1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Child and Adolescent Psychiatry**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core
14 residency program for physicians who desire to enter more specialized
15 practice. Fellowship-trained physicians serve the public by providing
16 subspecialty care, which may also include core medical care, acting as a
17 community resource for expertise in their field, creating and integrating
18 new knowledge into practice, and educating future generations of
19 physicians. Graduate medical education values the strength that a diverse
20 group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently
23 in their core specialty. The prior medical experience and expertise of
24 fellows distinguish them from physicians entering into residency training.
25 The fellow's care of patients within the subspecialty is undertaken with
26 appropriate faculty supervision and conditional independence. Faculty
27 members serve as role models of excellence, compassion,
28 professionalism, and scholarship. The fellow develops deep medical
29 knowledge, patient care skills, and expertise applicable to their focused
30 area of practice. Fellowship is an intensive program of subspecialty clinical
31 and didactic education that focuses on the multidisciplinary care of
32 patients. Fellowship education is often physically, emotionally, and
33 intellectually demanding, and occurs in a variety of clinical learning
34 environments committed to graduate medical education and the well-being
35 of patients, residents, fellows, faculty members, students, and all members
36 of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance
39 fellows' skills as physician-scientists. While the ability to create new
40 knowledge within medicine is not exclusive to fellowship-educated
41 physicians, the fellowship experience expands a physician's abilities to
42 pursue hypothesis-driven scientific inquiry that results in contributions to
43 the medical literature and patient care. Beyond the clinical subspecialty
44 expertise achieved, fellows develop mentored relationships built on an
45 infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Child and adolescent psychiatry is a medical specialty focused on the prevention,
50 diagnosis, and treatment of disorders of thinking, feeling, and behavior affecting
51 children, adolescents, and their families.

52
53 **Int.C. Length of Educational Program**

54
55 The educational program in child and adolescent psychiatry must be 24 months
56 in length. ^{(Core)*}

57
58 **I. Oversight**

59
60 **I.A. Sponsoring Institution**

61
62 *The Sponsoring Institution is the organization or entity that assumes the*
63 *ultimate financial and academic responsibility for a program of graduate*
64 *medical education consistent with the ACGME Institutional Requirements.*

65
66 *When the Sponsoring Institution is not a rotation site for the program, the*
67 *most commonly utilized site of clinical activity for the program is the*
68 *primary clinical site.*

69

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

70
71 **I.A.1. The program must be sponsored by one ACGME-accredited**
72 **Sponsoring Institution.** ^(Core)

73
74 **I.B. Participating Sites**

75
76 *A participating site is an organization providing educational experiences or*
77 *educational assignments/rotations for fellows.*

78
79 **I.B.1. The program, with approval of its Sponsoring Institution, must**
80 **designate a primary clinical site.** ^(Core)

81
82 **I.B.1.a)** The Sponsoring Institution must also sponsor an ACGME-
83 accredited program in psychiatry. ^(Core)

84
85 **I.B.2. There must be a program letter of agreement (PLA) between the**
86 **program and each participating site that governs the relationship**
87 **between the program and the participating site providing a required**
88 **assignment.** ^(Core)

89

- 90 I.B.2.a) The PLA must:
91
92 I.B.2.a).(1) be renewed at least every 10 years; and, (Core)
93
94 I.B.2.a).(2) be approved by the designated institutional official
95 (DIO). (Core)
96
97 I.B.3. The program must monitor the clinical learning and working
98 environment at all participating sites. (Core)
99
100 I.B.3.a) At each participating site there must be one faculty member,
101 designated by the program director, who is accountable for
102 fellow education for that site, in collaboration with the
103 program director. (Core)
104

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

- 105
106 I.B.4. The program director must submit any additions or deletions of
107 participating sites routinely providing an educational experience,
108 required for all fellows, of one month full time equivalent (FTE) or
109 more through the ACGME's Accreditation Data System (ADS). (Core)
110
111 I.B.4.a) The number of and distance between participating sites must
112 allow for full participation by the fellows in all organized
113 educational aspects of the program. (Core)
114
115 I.C. The program, in partnership with its Sponsoring Institution, must engage in
116 practices that focus on mission-driven, ongoing, systematic recruitment
117 and retention of a diverse and inclusive workforce of residents (if present),
118 fellows, faculty members, senior administrative staff members, and other
119 relevant members of its academic community. (Core)

120

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

121

122

I.D. Resources

123

124

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education.
(Core)

125

126

127

128

I.D.1.a) There must be office space available for each fellow to see patients. (Core)

129

130

131

I.D.1.b) There must be space for physical and neurological examinations and access to laboratory testing. (Core)

132

133

134

I.D.1.c) There must be equipment with the capacity for recording and viewing clinical encounters available to fellows. (Core)

135

136

137

I.D.1.d) There should be space and equipment specifically designated for seminars, lectures, and other educational activities. (Detail)†

138

139

140

I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: (Core)

141

142

143

144

I.D.2.a) access to food while on duty; (Core)

145

146

I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care; (Core)

147

148

149

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

150

151

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care;
(Core)

152

153

154

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

- 155
156 I.D.2.d) security and safety measures appropriate to the participating
157 site; and, ^(Core)
158
159 I.D.2.e) accommodations for fellows with disabilities consistent with
160 the Sponsoring Institution's policy. ^(Core)
161
162 I.D.3. Fellows must have ready access to subspecialty-specific and other
163 appropriate reference material in print or electronic format. This
164 must include access to electronic medical literature databases with
165 full text capabilities. ^(Core)
166
167 I.D.4. The program's educational and clinical resources must be adequate
168 to support the number of fellows appointed to the program. ^(Core)
169
170 I.E. *A fellowship program usually occurs in the context of many learners and*
171 *other care providers and limited clinical resources. It should be structured*
172 *to optimize education for all learners present.*
173
174 I.E.1. Fellows should contribute to the education of residents in core
175 programs, if present. ^(Core)
176

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

- 177
178 II. Personnel
179
180 II.A. Program Director
181
182 II.A.1. There must be one faculty member appointed as program director
183 with authority and accountability for the overall program, including
184 compliance with all applicable program requirements. ^(Core)
185
186 II.A.1.a) The Sponsoring Institution's Graduate Medical Education
187 Committee (GMEC) must approve a change in program
188 director. ^(Core)
189
190 II.A.1.b) Final approval of the program director resides with the
191 Review Committee. ^(Core)

192

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director’s nomination is reviewed and approved by the GMEC. Final approval of the program directors resides with the applicable ACGME Review Committee.

193

II.A.2. The program director and, as applicable, the program’s leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

194

195

196

197

II.A.2.a) Program leadership, in aggregate, must be provided with support equal to a dedicated minimum time specified below for administration of the program. This may be time spent by the program director only or divided between the program director and one or more associate (or assistant) program directors. ^{Core}

198

199

200

201

202

203

<u>Number of Approved Fellow Positions</u>	<u>Minimum support required (FTE)</u>
<u>1-6</u>	<u>0.2</u>
<u>7-8</u>	<u>0.36</u>
<u>9-10</u>	<u>0.4</u>
<u>11-12</u>	<u>0.44</u>
<u>13-14</u>	<u>0.48</u>
<u>15-16</u>	<u>0.52</u>
<u>17-18</u>	<u>0.56</u>
<u>19-20</u>	<u>0.6</u>
<u>21-22</u>	<u>0.64</u>
<u>23-24</u>	<u>0.68</u>
<u>25-26</u>	<u>0.72</u>
<u>27-28</u>	<u>0.76</u>

204

205

206

207

208

~~At a minimum, the program director must be provided with the salary support required to devote 50 percent FTE of non-clinical time to the administration of the program. ^(Core)~~

209

~~**II.A.2.b) Additional dedicated time and salary support must be provided for the program director or for associate program directors based on program size. ^(Core)**~~

210

211

212

213

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

214
215

232
233
234
235
236
237
238

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, (Core)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Psychiatry and Neurology (ABPN) or by the American Osteopathic Board of Neurology and Psychiatry, or subspecialty qualifications that are acceptable to the Review Committee. (Core)

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; (Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

239
240
241

II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the

242
243
244

mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

245
246
247
248
249

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

250
251
252
253
254
255
256
257
258
259
260
261
262
263
264
265
266
267

II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)

II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)

II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

268
269
270
271

II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)

- 272 II.A.4.a).(9) provide applicants who are offered an interview with
 273 information related to the applicant's eligibility for the
 274 relevant subspecialty board examination(s); ^(Core)
 275
- 276 II.A.4.a).(10) provide a learning and working environment in which
 277 fellows have the opportunity to raise concerns and
 278 provide feedback in a confidential manner as
 279 appropriate, without fear of intimidation or retaliation;
 280 ^(Core)
 281
- 282 II.A.4.a).(11) ensure the program's compliance with the Sponsoring
 283 Institution's policies and procedures related to
 284 grievances and due process; ^(Core)
 285
- 286 II.A.4.a).(12) ensure the program's compliance with the Sponsoring
 287 Institution's policies and procedures for due process
 288 when action is taken to suspend or dismiss, not to
 289 promote, or not to renew the appointment of a fellow;
 290 ^(Core)
 291

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 292
- 293 II.A.4.a).(13) ensure the program's compliance with the Sponsoring
 294 Institution's policies and procedures on employment
 295 and non-discrimination; ^(Core)
 296
- 297 II.A.4.a).(13).(a) Fellows must not be required to sign a non-
 298 competition guarantee or restrictive covenant.
 299 ^(Core)
 300
- 301 II.A.4.a).(14) document verification of program completion for all
 302 graduating fellows within 30 days; ^(Core)
 303
- 304 II.A.4.a).(15) provide verification of an individual fellow's
 305 completion upon the fellow's request, within 30 days;
 306 and, ^(Core)
 307

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 308
- 309 II.A.4.a).(16) obtain review and approval of the Sponsoring
 310 Institution's DIO before submitting information or
 311 requests to the ACGME, as required in the Institutional
 312 Requirements and outlined in the ACGME Program

Director's Guide to the Common Program Requirements. ^(Core)

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.

II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)

II.B.2. Faculty members must:

II.B.2.a) be role models of professionalism; ^(Core)

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

II.B.2.c) demonstrate a strong interest in the education of fellows; ^(Core)

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; ^(Core)

- 356
357 **II.B.2.e)** administer and maintain an educational environment
358 conducive to educating fellows; ^(Core)
359
360 **II.B.2.f)** regularly participate in organized clinical discussions,
361 rounds, journal clubs, and conferences; and, ^(Core)
362
363 **II.B.2.g)** pursue faculty development designed to enhance their skills
364 at least annually. ^(Core)
365

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

- 366
367 **II.B.3. Faculty Qualifications**
368
369 **II.B.3.a)** Faculty members must have appropriate qualifications in
370 their field and hold appropriate institutional appointments.
371 ^(Core)
372
373 **II.B.3.b)** Subspecialty physician faculty members must:
374
375 **II.B.3.b).(1)** have current certification in the subspecialty by the
376 American Board of Psychiatry and Neurology or the
377 American Osteopathic Board of Neurology and
378 Psychiatry, or possess qualifications judged acceptable
379 to the Review Committee. ^(Core)
380
381 **II.B.3.c)** Any non-physician faculty members who participate in
382 fellowship program education must be approved by the
383 program director. ^(Core)
384

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

- 385
386 **II.B.3.d)** Any other specialty physician faculty members must have
387 current certification in their specialty by the appropriate
388 American Board of Medical Specialties (ABMS) member
389 board or American Osteopathic Association (AOA) certifying
390 board, or possess qualifications judged acceptable to the
391 Review Committee. ^(Core)

392
393
394
395
396
397
398
399
400

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

422
423

II.B.4.a) Core faculty members must be designated by the program director. (Core)

II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. (Core)

II.B.4.c) In addition to the program director, there must be two core faculty members with current ABPN certification in child and adolescent psychiatry. (Core)

II.C. Program Coordinator

II.C.1. There must be a program coordinator. (Core)

II.C.2. The program coordinator must be provided with dedicated time and support adequate for administration of the program based upon its size and configuration. (Core)

II.C.2.a) At a minimum, the program coordinator must be provided with the dedicated time and support specified below for administration of the program: (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE</u>
<u>1-6</u>	<u>0.5</u>

<u>7-8</u>	<u>0.66</u>
<u>9-10</u>	<u>0.7</u>
<u>11-12</u>	<u>0.74</u>
<u>13-14</u>	<u>0.78</u>
<u>15-16</u>	<u>0.82</u>
<u>17-18</u>	<u>0.86</u>
<u>19-20</u>	<u>0.9</u>
<u>21-22</u>	<u>0.94 FT</u>
<u>23-24</u>	<u>0.98</u>
<u>25-26</u>	<u>1.02</u>
<u>27-28</u>	<u>1.06</u>

424
425

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies, and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

429
430
431
432

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

433
434
435

III. Fellow Appointments

436 **III.A. Eligibility Criteria**

437

438 **III.A.1. Eligibility Requirements – Fellowship Programs**

439

440 **All required clinical education for entry into ACGME-accredited**
441 **fellowship programs must be completed in an ACGME-accredited**
442 **residency program, an AOA-approved residency program, a**
443 **program with ACGME International (ACGME-I) Advanced Specialty**
444 **Accreditation, or a Royal College of Physicians and Surgeons of**
445 **Canada (RCPSC)-accredited or College of Family Physicians of**
446 **Canada (CFPC)-accredited residency program located in Canada.**

447 (Core)

448

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

449

450 **III.A.1.a) Fellowship programs must receive verification of each**
451 **entering fellow’s level of competence in the required field,**
452 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
453 **Milestones evaluations from the core residency program. (Core)**

454

455 **III.A.1.b) To be eligible for appointment, applicants should have completed**
456 **the first year of a psychiatry residency program or a program in**
457 **another primary care specialty, and that program must satisfy the**
458 **requirements in III.A.1. (Core)**

459

460 **III.A.1.c) Fellow Eligibility Exception**

461

462 **The Review Committee for Psychiatry will allow the following**
463 **exception to the fellowship eligibility requirements:**

464

465 **III.A.1.c).(1) An ACGME-accredited fellowship program may accept**
466 **an exceptionally qualified international graduate**
467 **applicant who does not satisfy the eligibility**
468 **requirements listed in III.A.1., but who does meet all of**
469 **the following additional qualifications and conditions:**

470 (Core)

471

472 **III.A.1.c).(1).(a) evaluation by the program director and**
473 **fellowship selection committee of the**
474 **applicant’s suitability to enter the program,**
475 **based on prior training and review of the**
476 **summative evaluations of training in the core**
477 **specialty; and, (Core)**

478

479 **III.A.1.c).(1).(b) review and approval of the applicant’s**
480 **exceptional qualifications by the GMEC; and,**
481 **(Core)**

482

483 III.A.1.c).(1).(c) verification of Educational Commission for
484 Foreign Medical Graduates (ECFMG)
485 certification. ^(Core)

486
487 III.A.1.c).(2) Applicants accepted through this exception must have
488 an evaluation of their performance by the Clinical
489 Competency Committee within 12 weeks of
490 matriculation. ^(Core)
491

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

492
493 III.B. The program director must not appoint more fellows than approved by the
494 Review Committee. ^(Core)

495
496 III.B.1. All complement increases must be approved by the Review
497 Committee. ^(Core)

498
499 III.B.2. There should be at least two fellows appointed at each level of education
500 at all times in the two-year FTE program. ^(Detail)

501
502 III.C. Fellow Transfers

503
504 The program must obtain verification of previous educational experiences
505 and a summative competency-based performance evaluation prior to
506 acceptance of a transferring fellow, and Milestones evaluations upon
507 matriculation. ^(Core)

508
509 IV. Educational Program

510
511 *The ACGME accreditation system is designed to encourage excellence and*
512 *innovation in graduate medical education regardless of the organizational*
513 *affiliation, size, or location of the program.*

514
515 *The educational program must support the development of knowledgeable, skillful*
516 *physicians who provide compassionate care.*
517

518 *In addition, the program is expected to define its specific program aims consistent*
519 *with the overall mission of its Sponsoring Institution, the needs of the community*
520 *it serves and that its graduates will serve, and the distinctive capabilities of*
521 *physicians it intends to graduate. While programs must demonstrate substantial*
522 *compliance with the Common and subspecialty-specific Program Requirements, it*
523 *is recognized that within this framework, programs may place different emphasis*
524 *on research, leadership, public health, etc. It is expected that the program aims*
525 *will reflect the nuanced program-specific goals for it and its graduates; for*
526 *example, it is expected that a program aiming to prepare physician-scientists will*
527 *have a different curriculum from one focusing on community health.*

529 **IV.A.** The curriculum must contain the following educational components: ^(Core)

531 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution’s
532 mission, the needs of the community it serves, and the desired
533 distinctive capabilities of its graduates; ^(Core)

535 **IV.A.1.a)** The program’s aims must be made available to program
536 applicants, fellows, and faculty members. ^(Core)

538 **IV.A.2.** competency-based goals and objectives for each educational
539 experience designed to promote progress on a trajectory to
540 autonomous practice in their subspecialty. These must be
541 distributed, reviewed, and available to fellows and faculty members;
542 ^(Core)

544 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive
545 responsibility for patient management, and graded supervision in
546 their subspecialty; ^(Core)

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

548 **IV.A.4.** structured educational activities beyond direct patient care; and,
549 ^(Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

552 **IV.A.5.** advancement of fellows’ knowledge of ethical principles
553 foundational to medical professionalism. ^(Core)

556 **IV.B.** **ACGME Competencies**

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

558

559

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: ^(Core)

560

561

562

IV.B.1.a) Professionalism

563

564

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

565

566

567

IV.B.1.b) Patient Care and Procedural Skills

568

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality*. *Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

569

570

IV.B.1.b).(1) Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. ^(Core)

571

572

573

574

575

IV.B.1.b).(1).(a) Fellows must demonstrate competence in:

576

577

IV.B.1.b).(1).(a).(i) evaluation and treatment of patients representing the full spectrum of psychiatric illnesses in children and adolescents, including developmental and substance use disorders; ^(Core)

578

579

580

581

582

IV.B.1.b).(1).(a).(ii) treatment of children and adolescents for the development of conceptual understanding and beginning clinical skills in major treatment modalities, including brief and long-term individual therapy, family therapy, group therapy, crisis intervention, supportive therapy, psychodynamic

583

584

585

586

587

588

589

590		psychotherapy, cognitive-behavioral
591		therapy, and pharmacotherapy; ^(Core)
592		
593	IV.B.1.b).(1).(a).(iii)	evaluation and treatment of patients from
594		diverse cultural backgrounds and varied
595		socioeconomic levels; and, ^(Core)
596		
597	IV.B.1.b).(1).(a).(iv)	performance and documentation of an
598		adequate individual and family history;
599		mental status; physical and neurological
600		examinations when appropriate;
601		supplementary medical and psychological
602		data, and integration of these data into a
603		formulation; differential diagnosis; and a
604		comprehensive treatment plan. ^(Core)
605		
606	IV.B.1.b).(2)	Fellows must be able to perform all medical,
607		diagnostic, and surgical procedures considered
608		essential for the area of practice. ^(Core)
609		
610	IV.B.1.c)	Medical Knowledge
611		
612		Fellows must demonstrate knowledge of established and
613		evolving biomedical, clinical, epidemiological and social-
614		behavioral sciences, as well as the application of this
615		knowledge to patient care. ^(Core)
616		
617	IV.B.1.c).(1)	Fellows must demonstrate competence in their knowledge
618		of:
619		
620	IV.B.1.c).(1).(a)	basic neurobiological, psychological, and clinical
621		sciences relevant to psychiatry and the application
622		of developmental, psychological, and sociocultural
623		theories relevant to the understanding of
624		psychopathology; ^(Core)
625		
626	IV.B.1.c).(1).(b)	the full range of psychopathology in children and
627		adolescents, including the etiology, epidemiology,
628		diagnosis, treatment, and prevention of the major
629		psychiatric conditions that affect children and
630		adolescents; ^(Core)
631		
632	IV.B.1.c).(1).(c)	recognition and management of domestic and
633		community violence, including physical and sexual
634		abuse, as well as neglect, as it affects children and
635		adolescents; ^(Core)
636		
637	IV.B.1.c).(1).(d)	diversity and cultural issues pertinent to children,
638		adolescents, and their families; and, ^(Core)
639		

640 IV.B.1.c).(1).(e) the appropriate uses and limitations of
641 psychological tests. ^(Core)

642
643 **IV.B.1.d) Practice-based Learning and Improvement**

644
645 **Fellows must demonstrate the ability to investigate and**
646 **evaluate their care of patients, to appraise and assimilate**
647 **scientific evidence, and to continuously improve patient care**
648 **based on constant self-evaluation and lifelong learning.** ^(Core)
649

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

650
651 **IV.B.1.e) Interpersonal and Communication Skills**

652
653 **Fellows must demonstrate interpersonal and communication**
654 **skills that result in the effective exchange of information and**
655 **collaboration with patients, their families, and health**
656 **professionals.** ^(Core)
657

658 **IV.B.1.f) Systems-based Practice**

659
660 **Fellows must demonstrate an awareness of and**
661 **responsiveness to the larger context and system of health**
662 **care, including the social determinants of health, as well as**
663 **the ability to call effectively on other resources to provide**
664 **optimal health care.** ^(Core)
665

666 **IV.C. Curriculum Organization and Fellow Experiences**

667
668 **IV.C.1. The curriculum must be structured to optimize fellow educational**
669 **experiences, the length of these experiences, and supervisory**
670 **continuity.** ^(Core)
671

672 **IV.C.1.a) Curriculum design must be consistent with the program's aims**
673 **(IV.A.1.), and must demonstrate a systematic approach, with**
674 **attention to evidence-based principles and scientific literature,**
675 **standards of the psychiatric profession, and developmental**
676 **appropriateness for learners.** ^(Core)
677

678 **IV.C.1.b) The assignment of rotations must be structured to minimize the**
679 **frequency of rotational transitions.** ^(Core)
680

- 681 **IV.C.2. The program must provide instruction and experience in pain**
682 **management if applicable for the subspecialty, including recognition**
683 **of the signs of addiction.** (Core)
684
685 IV.C.2.a) There must be instruction and experience in pain management.
686 (Core)
687
688 IV.C.3. Didactic instruction should include lectures, seminars, and assigned
689 readings that are coordinated with concurrent clinical experiences and
690 that are specific to each fellow's level of education. (Detail)
691
692 IV.C.4. Each fellow should attend a minimum of 70 percent of regularly
693 scheduled didactic sessions. (Detail)
694
695 IV.C.5. There must be interdisciplinary clinical conferences and didactic seminars
696 for fellows, at which faculty psychiatrists collaborate in teaching with
697 colleagues from other medical specialties and mental health disciplines.
698 (Core)
699
700 IV.C.6. Didactic and clinical experiences must be of sufficient breadth and depth
701 to provide fellows with a thorough, well-balanced presentation of the
702 generally-accepted observations and theories, as well as the major
703 diagnostic, therapeutic, and preventive procedures in child and
704 adolescent psychiatry. (Core)
705
706 IV.C.7. In addition to the PGY-1 required for eligibility, a minimum of two
707 additional years of accredited education in general psychiatry and two
708 additional years of accredited education in a child and adolescent
709 psychiatry program must be provided within an ACGME-accredited
710 program. (Core)
711
712 IV.C.8. In general, education in child and adolescent psychiatry obtained as part
713 of the curriculum for general psychiatry may not count toward education
714 in child and adolescent psychiatry. However, certain clinical experiences
715 with children, adolescents, and families taken during the period when
716 he/she is designated as a child and adolescent psychiatry fellow may be
717 counted toward a fourth year in general psychiatry, as well as toward the
718 child and adolescent psychiatry program requirements, thereby fulfilling
719 program requirements in general psychiatry and child and adolescent
720 psychiatry at the same time. For these experiences to be given credit for
721 both child and adolescent psychiatry and general psychiatry, the
722 experiences must: (Core)
723
724 IV.C.8.a) be limited to child and adolescent psychiatry patients; (Core)
725
726 IV.C.8.b) be limited to a maximum of 12 months that can be double-
727 counted; (Core)
728
729 IV.C.8.c) be documented by the program director in all areas for which
730 credit is given in both programs; (Core)
731

732	IV.C.8.d)	result in no reduction in total length of time devoted to education in
733		child and adolescent psychiatry, which must remain at two years
734		FTE; and, ^(Core)
735		
736	IV.C.8.e)	be limited to the following experiences: ^(Core)
737		
738	IV.C.8.e).(1)	one month FTE of child neurology; ^(Core)
739		
740	IV.C.8.e).(2)	one month FTE of pediatric consultation/liaison; ^(Core)
741		
742	IV.C.8.e).(3)	one month FTE of addiction psychiatry; ^(Core)
743		
744	IV.C.8.e).(4)	forensic psychiatry experience; ^(Core)
745		
746	IV.C.8.e).(5)	community psychiatry experience; and, ^(Core)
747		
748	IV.C.8.e).(6)	no more than 20 percent of outpatient experience, as
749		described in the ACGME Program Requirements for
750		Graduate Medical Education in Psychiatry. ^(Core)
751		
752	IV.C.9.	Electives must have written goals and objectives, be well constructed and
753		supervised, and lead to effective learning experiences. ^(Core)
754		
755	IV.C.9.a)	The choice of electives must be made with the advice and
756		approval of the program director and the appropriate preceptor.
757		^(Core)
758		
759	IV.C.10.	Fellows must have an organized educational clinical experience in each
760		of the following:
761		
762	IV.C.10.a)	pediatric neurology; ^(Core)
763		
764	IV.C.10.b)	intellectual disability (intellectual development disorder), and other
765		developmental disorders; ^(Core)
766		
767	IV.C.10.c)	initial management of psychiatric emergencies in children and
768		adolescents; ^(Core)
769		
770	IV.C.10.d)	caring for acutely- and severely-disturbed children and
771		adolescents, with the fellows actively involved in diagnostic
772		assessment and treatment planning; and, ^(Core)
773		
774	IV.C.10.d).(1)	This experience must occur in settings with an organized
775		treatment program, such as inpatient units, residential
776		treatment facilities, partial hospitalization programs, and/or
777		day treatment programs. ^(Core)
778		
779	IV.C.10.d).(2)	This experience must be the FTE of no fewer than four
780		months and no more than 10 months. ^(Core)
781		
782	IV.C.10.e)	consultation experiences during which fellows do not primarily

783		engage in treatment, but use their specialized knowledge and
784		skills to assist others to function better in their roles. ^(Core)
785		
786	IV.C.10.e).(1)	Exposure and experience in consultation to facilities
787		serving children, adolescents, and their families must
788		include supervised: ^(Core)
789		
790	IV.C.10.e).(1).(a)	consultation experience with an adequate number
791		of pediatric patients in outpatient and/or inpatient
792		non-psychiatric medical facilities; ^(Core)
793		
794	IV.C.10.e).(1).(b)	formal observation and/or consultation experiences
795		in schools; and, ^(Core)
796		
797	IV.C.10.e).(1).(c)	experience in legal issues relevant to child and
798		adolescent psychiatry, which may include forensic
799		consultation, court testimony, and/or interaction
800		with a juvenile justice system. ^(Core)
801		
802	IV.C.11.	Fellows should have experience consulting to community systems of
803		care. ^(Detail)
804		
805	IV.C.12.	Fellows must be provided sufficient supervision from child and adolescent
806		psychiatrists to enable each fellow to establish working relationships that
807		foster identification in the role of a child and adolescent psychiatrist. ^(Core)
808		
809	IV.C.13.	Fellows must have at least two hours of faculty preceptorship weekly, one
810		hour of which must be individual. ^(Core)
811		
812	IV.C.14.	Fellows must have instruction in normal development, including
813		observation of and interaction with normal preschoolers, school-aged
814		children, and adolescents. ^(Core)
815		
816	IV.C.15.	Fellows must have instruction in the integration of neurobiological,
817		phenomenological, psychological, and sociocultural issues into a
818		comprehensive formulation of clinical problems. ^(Core)
819		
820	IV.C.16.	Care for outpatients must include work with some child and adolescent
821		patients from each developmental age group, continuously over time, and
822		whenever possible, for one year's duration or more. ^(Core)
823		
824	IV.D.	Scholarship
825		
826		<i>Medicine is both an art and a science. The physician is a humanistic</i>
827		<i>scientist who cares for patients. This requires the ability to think critically,</i>
828		<i>evaluate the literature, appropriately assimilate new knowledge, and</i>
829		<i>practice lifelong learning. The program and faculty must create an</i>
830		<i>environment that fosters the acquisition of such skills through fellow</i>
831		<i>participation in scholarly activities as defined in the subspecialty-specific</i>
832		<i>Program Requirements. Scholarly activities may include discovery,</i>
833		<i>integration, application, and teaching.</i>

The ACGME recognizes the diversity of fellowships and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.

IV.D.1. Program Responsibilities

IV.D.1.a) The program must demonstrate evidence of scholarly activities, consistent with its mission(s) and aims. ^(Core)

IV.D.1.b) The program in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate fellow and faculty involvement in scholarly activities. ^(Core)

IV.D.2. Faculty Scholarly Activity

IV.D.2.a) Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains: ^(Core)

- Research in basic science, education, translational science, patient care, or population health
- Peer-reviewed grants
- Quality improvement and/or patient safety initiatives
- Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
- Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
- Contribution to professional committees, educational organizations, or editorial boards
- Innovations in education

IV.D.2.b) The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be

differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

- 876
877 **IV.D.2.b).(1)** faculty participation in grand rounds, posters,
878 workshops, quality improvement presentations,
879 podium presentations, grant leadership, non-peer-
880 reviewed print/electronic resources, articles or
881 publications, book chapters, textbooks, webinars,
882 service on professional committees, or serving as a
883 journal reviewer, journal editorial board member, or
884 editor; ^{(Outcome)‡}
885
886 **IV.D.2.b).(2)** peer-reviewed publication. ^(Outcome)
887
888 **IV.D.3. Fellow Scholarly Activity**
889
890 **IV.D.3.a)** All fellows must be educated in research literacy and in the
891 concepts and process of evidenced-based clinical practice to
892 develop skills in question formulation, information searching,
893 critical appraisal, and medical decision-making. ^(Core)
894
895 **IV.D.3.b)** The program must provide opportunities for research and
896 development of research skills for fellows interested in conducting
897 research in psychiatry or related fields. ^(Core)
898
899 **IV.D.3.c)** The program must provide interested fellows access to and the
900 opportunity to participate actively in ongoing research under a
901 mentor. ^(Core)
902
903 **IV.D.3.d)** The program must ensure the participation of fellows and faculty
904 members in journal clubs, research conferences, didactics, and/or
905 other activities that address critical appraisal of the literature and
906 understanding of the research process. ^(Core)
907
908 **V. Evaluation**
909
910 **V.A. Fellow Evaluation**
911
912 **V.A.1. Feedback and Evaluation**
913

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**

- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

914
915
916
917
918

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

935
936
937
938
939
940
941
942

V.A.1.a).(1) The program must maintain records of all evaluations required in this section, and these must be made available on review of the program. ^(Core)

V.A.1.a).(2) In addition to periodic assessments, there must be an annual evaluation procedure, which must include a written examination of the knowledge base, as well as a formal documented clinical skills examination. ^(Core)

V.A.1.a).(3) Fellows' teaching abilities should be documented by evaluations from faculty members and/or learners. ^(Detail)

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. ^(Core)

- 943
 944 **V.A.1.c)** The program must provide an objective performance
 945 evaluation based on the Competencies and the subspecialty-
 946 specific Milestones, and must: ^(Core)
 947
 948 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
 949 patients, self, and other professional staff members);
 950 and, ^(Core)
 951
 952 **V.A.1.c).(2)** provide that information to the Clinical Competency
 953 Committee for its synthesis of progressive fellow
 954 performance and improvement toward unsupervised
 955 practice. ^(Core)
 956

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 957
 958 **V.A.1.d)** The program director or their designee, with input from the
 959 Clinical Competency Committee, must:
 960
 961 **V.A.1.d).(1)** meet with and review with each fellow their
 962 documented semi-annual evaluation of performance,
 963 including progress along the subspecialty-specific
 964 Milestones. ^(Core)
 965
 966 **V.A.1.d).(2)** assist fellows in developing individualized learning
 967 plans to capitalize on their strengths and identify areas
 968 for growth; and, ^(Core)
 969
 970 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
 971 institutional policies and procedures. ^(Core)
 972

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention,

documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 973
974 **V.A.1.e)** At least annually, there must be a summative evaluation of
975 each fellow that includes their readiness to progress to the
976 next year of the program, if applicable. ^(Core)
977
- 978 **V.A.1.f)** The evaluations of a fellow's performance must be accessible
979 for review by the fellow. ^(Core)
980
- 981 **V.A.2.** Final Evaluation
982
- 983 **V.A.2.a)** The program director must provide a final evaluation for each
984 fellow upon completion of the program. ^(Core)
985
- 986 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when
987 applicable the subspecialty-specific Case Logs, must
988 be used as tools to ensure fellows are able to engage
989 in autonomous practice upon completion of the
990 program. ^(Core)
991
- 992 **V.A.2.a).(2)** The final evaluation must:
993
- 994 **V.A.2.a).(2).(a)** become part of the fellow's permanent record
995 maintained by the institution, and must be
996 accessible for review by the fellow in
997 accordance with institutional policy; ^(Core)
998
- 999 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the
1000 knowledge, skills, and behaviors necessary to
1001 enter autonomous practice; ^(Core)
1002
- 1003 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
1004 Competency Committee; and, ^(Core)
1005
- 1006 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
1007 the program. ^(Core)
1008
- 1009 **V.A.3.** A Clinical Competency Committee must be appointed by the
1010 program director. ^(Core)
1011
- 1012 **V.A.3.a)** At a minimum the Clinical Competency Committee must
1013 include three members, at least one of whom is a core faculty
1014 member. Members must be faculty members from the same
1015 program or other programs, or other health professionals
1016 who have extensive contact and experience with the
1017 program's fellows. ^(Core)

- 1018
- 1019 **V.A.3.b) The Clinical Competency Committee must:**
- 1020
- 1021 **V.A.3.b).(1) review all fellow evaluations at least semi-annually;**
- 1022 **(Core)**
- 1023
- 1024 **V.A.3.b).(2) determine each fellow's progress on achievement of**
- 1025 **the subspecialty-specific Milestones; and, (Core)**
- 1026
- 1027 **V.A.3.b).(3) meet prior to the fellows' semi-annual evaluations and**
- 1028 **advise the program director regarding each fellow's**
- 1029 **progress. (Core)**
- 1030
- 1031 **V.B. Faculty Evaluation**
- 1032
- 1033 **V.B.1. The program must have a process to evaluate each faculty**
- 1034 **member's performance as it relates to the educational program at**
- 1035 **least annually. (Core)**
- 1036

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1037
- 1038 **V.B.1.a) This evaluation must include a review of the faculty member's**
- 1039 **clinical teaching abilities, engagement with the educational**
- 1040 **program, participation in faculty development related to their**
- 1041 **skills as an educator, clinical performance, professionalism,**
- 1042 **and scholarly activities. (Core)**
- 1043
- 1044 **V.B.1.b) This evaluation must include written, confidential evaluations**
- 1045 **by the fellows. (Core)**
- 1046
- 1047 **V.B.2. Faculty members must receive feedback on their evaluations at least**
- 1048 **annually. (Core)**
- 1049

1050 **V.B.3. Results of the faculty educational evaluations should be**
1051 **incorporated into program-wide faculty development plans. (Core)**
1052

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1053
1054 **V.C. Program Evaluation and Improvement**
1055

1056 **V.C.1. The program director must appoint the Program Evaluation**
1057 **Committee to conduct and document the Annual Program**
1058 **Evaluation as part of the program’s continuous improvement**
1059 **process. (Core)**
1060

1061 **V.C.1.a) The Program Evaluation Committee must be composed of at**
1062 **least two program faculty members, at least one of whom is a**
1063 **core faculty member, and at least one fellow. (Core)**
1064

1065 **V.C.1.b) Program Evaluation Committee responsibilities must include:**
1066

1067 **V.C.1.b).(1) acting as an advisor to the program director, through**
1068 **program oversight; (Core)**
1069

1070 **V.C.1.b).(2) review of the program’s self-determined goals and**
1071 **progress toward meeting them; (Core)**
1072

1073 **V.C.1.b).(3) guiding ongoing program improvement, including**
1074 **development of new goals, based upon outcomes;**
1075 **and, (Core)**
1076

1077 **V.C.1.b).(4) review of the current operating environment to identify**
1078 **strengths, challenges, opportunities, and threats as**
1079 **related to the program’s mission and aims. (Core)**
1080

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

1081
1082 **V.C.1.c) The Program Evaluation Committee should consider the**
1083 **following elements in its assessment of the program:**
1084

1085 **V.C.1.c).(1) curriculum; (Core)**
1086

1087 **V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);**
1088 **(Core)**

1089		
1090	V.C.1.c).(3)	ACGME letters of notification, including citations, Areas for Improvement, and comments; ^(Core)
1091		
1092		
1093	V.C.1.c).(4)	quality and safety of patient care; ^(Core)
1094		
1095	V.C.1.c).(5)	aggregate fellow and faculty:
1096		
1097	V.C.1.c).(5).(a)	well-being; ^(Core)
1098		
1099	V.C.1.c).(5).(b)	recruitment and retention; ^(Core)
1100		
1101	V.C.1.c).(5).(c)	workforce diversity; ^(Core)
1102		
1103	V.C.1.c).(5).(d)	engagement in quality improvement and patient safety; ^(Core)
1104		
1105		
1106	V.C.1.c).(5).(e)	scholarly activity; ^(Core)
1107		
1108	V.C.1.c).(5).(f)	ACGME Resident/Fellow and Faculty Surveys (where applicable); and, ^(Core)
1109		
1110		
1111	V.C.1.c).(5).(g)	written evaluations of the program. ^(Core)
1112		
1113	V.C.1.c).(6)	aggregate fellow:
1114		
1115	V.C.1.c).(6).(a)	achievement of the Milestones; ^(Core)
1116		
1117	V.C.1.c).(6).(b)	in-training examinations (where applicable); ^(Core)
1118		
1119		
1120	V.C.1.c).(6).(c)	board pass and certification rates; and, ^(Core)
1121		
1122	V.C.1.c).(6).(d)	graduate performance. ^(Core)
1123		
1124	V.C.1.c).(7)	aggregate faculty:
1125		
1126	V.C.1.c).(7).(a)	evaluation; and, ^(Core)
1127		
1128	V.C.1.c).(7).(b)	professional development ^(Core)
1129		
1130	V.C.1.d)	The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. ^(Core)
1131		
1132		
1133		
1134	V.C.1.e)	The annual review, including the action plan, must:
1135		
1136	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the fellows; and, ^(Core)
1137		
1138		
1139	V.C.1.e).(2)	be submitted to the DIO. ^(Core)

1140
1141 **V.C.2.** The program must participate in a Self-Study prior to its 10-Year
1142 Accreditation Site Visit. ^(Core)

1143
1144 **V.C.2.a)** A summary of the Self-Study must be submitted to the DIO.
1145 ^(Core)
1146

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1147
1148 **V.C.3.** *One goal of ACGME-accredited education is to educate physicians*
1149 *who seek and achieve board certification. One measure of the*
1150 *effectiveness of the educational program is the ultimate pass rate.*

1151
1152 *The program director should encourage all eligible program*
1153 *graduates to take the certifying examination offered by the*
1154 *applicable American Board of Medical Specialties (ABMS) member*
1155 *board or American Osteopathic Association (AOA) certifying board.*

1156
1157 **V.C.3.a)** For subspecialties in which the ABMS member board and/or
1158 AOA certifying board offer(s) an annual written exam, in the
1159 preceding three years, the program's aggregate pass rate of
1160 those taking the examination for the first time must be higher
1161 than the bottom fifth percentile of programs in that
1162 subspecialty. ^(Outcome)

1163
1164 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
1165 AOA certifying board offer(s) a biennial written exam, in the
1166 preceding six years, the program's aggregate pass rate of
1167 those taking the examination for the first time must be higher
1168 than the bottom fifth percentile of programs in that
1169 subspecialty. ^(Outcome)

1170
1171 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
1172 AOA certifying board offer(s) an annual oral exam, in the
1173 preceding three years, the program's aggregate pass rate of
1174 those taking the examination for the first time must be higher
1175 than the bottom fifth percentile of programs in that
1176 subspecialty. ^(Outcome)

1177
1178 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
1179 AOA certifying board offer(s) a biennial oral exam, in the

1180 preceding six years, the program's aggregate pass rate of
1181 those taking the examination for the first time must be higher
1182 than the bottom fifth percentile of programs in that
1183 subspecialty. ^(Outcome)

1184
1185 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1186 whose graduates over the time period specified in the
1187 requirement have achieved an 80 percent pass rate will have
1188 met this requirement, no matter the percentile rank of the
1189 program for pass rate in that subspecialty. ^(Outcome)
1190

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1191
1192 **V.C.3.f)** Programs must report, in ADS, board certification status
1193 annually for the cohort of board-eligible fellows that
1194 graduated seven years earlier. ^(Core)
1195

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1196
1197 **VI. The Learning and Working Environment**
1198

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*

1204

1205
1206
1207
1208
1209
1210
1211
1212
1213
1214
1215
1216
1217

- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

1268

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety. (Core)

VI.A.1.a).(1).(b) The program must have a structure that promotes safe, interprofessional, team-based care. (Core)

VI.A.1.a).(2) Education on Patient Safety

Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. (Core)

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

VI.A.1.a).(3) Patient Safety Events

Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.

1337		
1338		
1339		
1340	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. ^(Core)
1341		
1342		
1343		
1344	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1345		
1346		<i>Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.</i>
1347		
1348		
1349		
1350	VI.A.1.b).(3).(a)	Fellows must have the opportunity to participate in interprofessional quality improvement activities. ^(Core)
1351		
1352		
1353		
1354	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. ^(Detail)
1355		
1356		
1357	VI.A.2.	Supervision and Accountability
1358		
1359	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.</i>
1360		
1361		
1362		
1363		
1364		
1365		
1366		
1367		
1368		<i>Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.</i>
1369		
1370		
1371		
1372		
1373		
1374	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. ^(Core)
1375		
1376		
1377		
1378		
1379		
1380		

- 1381 VI.A.2.a).(1).(a) This information must be available to fellows,
 1382 faculty members, other members of the health
 1383 care team, and patients. ^(Core)
 1384
 1385 VI.A.2.a).(1).(b) Fellows and faculty members must inform each
 1386 patient of their respective roles in that patient's
 1387 care when providing direct patient care. ^(Core)
 1388
 1389 VI.A.2.b) *Supervision may be exercised through a variety of methods.*
 1390 *For many aspects of patient care, the supervising physician*
 1391 *may be a more advanced fellow. Other portions of care*
 1392 *provided by the fellow can be adequately supervised by the*
 1393 *appropriate availability of the supervising faculty member or*
 1394 *fellow, either on site or by means of telecommunication*
 1395 *technology. Some activities require the physical presence of*
 1396 *the supervising faculty member. In some circumstances,*
 1397 *supervision may include post-hoc review of fellow-delivered*
 1398 *care with feedback.*
 1399

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

- 1400
 1401 VI.A.2.b).(1) The program must demonstrate that the appropriate
 1402 level of supervision in place for all fellows is based on
 1403 each fellow's level of training and ability, as well as
 1404 patient complexity and acuity. Supervision may be
 1405 exercised through a variety of methods, as appropriate
 1406 to the situation. ^(Core)
 1407
 1408 VI.A.2.b).(2) The program must define when physical presence of a
 1409 supervising physician is required. ^(Core)
 1410
 1411 VI.A.2.c) **Levels of Supervision**
 1412
 1413 To promote appropriate fellow supervision while providing
 1414 for graded authority and responsibility, the program must use
 1415 the following classification of supervision: ^(Core)
 1416
 1417 VI.A.2.c).(1) **Direct Supervision:**
 1418
 1419 VI.A.2.c).(1).(a) the supervising physician is physically present
 1420 with the fellow during the key portions of the
 1421 patient interaction; or, ^(Core)
 1422

- 1423 VI.A.2.c).(1).(b) the supervising physician and/or patient is not
 1424 physically present with the fellow and the
 1425 supervising physician is concurrently
 1426 monitoring the patient care through appropriate
 1427 telecommunication technology. ^(Core)
 1428
- 1429 VI.A.2.c).(2) Indirect Supervision: the supervising physician is not
 1430 providing physical or concurrent visual or audio
 1431 supervision but is immediately available to the fellow
 1432 for guidance and is available to provide appropriate
 1433 direct supervision. ^(Core)
 1434
- 1435 VI.A.2.c).(3) Oversight – the supervising physician is available to
 1436 provide review of procedures/encounters with
 1437 feedback provided after care is delivered. ^(Core)
 1438
- 1439 VI.A.2.d) The privilege of progressive authority and responsibility,
 1440 conditional independence, and a supervisory role in patient
 1441 care delegated to each fellow must be assigned by the
 1442 program director and faculty members. ^(Core)
 1443
- 1444 VI.A.2.d).(1) The program director must evaluate each fellow’s
 1445 abilities based on specific criteria, guided by the
 1446 Milestones. ^(Core)
 1447
- 1448 VI.A.2.d).(2) Faculty members functioning as supervising
 1449 physicians must delegate portions of care to fellows
 1450 based on the needs of the patient and the skills of
 1451 each fellow. ^(Core)
 1452
- 1453 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
 1454 fellows and residents in recognition of their progress
 1455 toward independence, based on the needs of each
 1456 patient and the skills of the individual resident or
 1457 fellow. ^(Detail)
 1458
- 1459 VI.A.2.e) Programs must set guidelines for circumstances and events
 1460 in which fellows must communicate with the supervising
 1461 faculty member(s). ^(Core)
 1462
- 1463 VI.A.2.e).(1) Each fellow must know the limits of their scope of
 1464 authority, and the circumstances under which the
 1465 fellow is permitted to act with conditional
 1466 independence. ^(Outcome)
 1467

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1468
 1469 VI.A.2.f) Faculty supervision assignments must be of sufficient
 1470 duration to assess the knowledge and skills of each fellow

1471 and to delegate to the fellow the appropriate level of patient
1472 care authority and responsibility. ^(Core)

1473
1474 **VI.B. Professionalism**

1475
1476 **VI.B.1. Programs, in partnership with their Sponsoring Institutions, must**
1477 **educate fellows and faculty members concerning the professional**
1478 **responsibilities of physicians, including their obligation to be**
1479 **appropriately rested and fit to provide the care required by their**
1480 **patients. ^(Core)**

1481
1482 **VI.B.2. The learning objectives of the program must:**

1483
1484 **VI.B.2.a) be accomplished through an appropriate blend of supervised**
1485 **patient care responsibilities, clinical teaching, and didactic**
1486 **educational events; ^(Core)**

1487
1488 **VI.B.2.b) be accomplished without excessive reliance on fellows to**
1489 **fulfill non-physician obligations; and, ^(Core)**

1490

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1491
1492 **VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)**

1493
1494 **VI.B.2.c).(1)** The number of patients for whom fellows have primary
1495 responsibility at any one time must permit them to provide
1496 each patient with appropriate treatment, as well as to have
1497 sufficient time for other aspects of their educational
1498 program. ^(Core)

1499

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1500
1501 **VI.B.3. The program director, in partnership with the Sponsoring Institution,**
1502 **must provide a culture of professionalism that supports patient**
1503 **safety and personal responsibility. ^(Core)**

1504
 1505 **VI.B.4.** **Fellows and faculty members must demonstrate an understanding**
 1506 **of their personal role in the:**
 1507
 1508 **VI.B.4.a)** **provision of patient- and family-centered care;** (Outcome)
 1509
 1510 **VI.B.4.b)** **safety and welfare of patients entrusted to their care,**
 1511 **including the ability to report unsafe conditions and adverse**
 1512 **events;** (Outcome)
 1513

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1514
 1515 **VI.B.4.c)** **assurance of their fitness for work, including:** (Outcome)
 1516

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1517
 1518 **VI.B.4.c).(1)** **management of their time before, during, and after**
 1519 **clinical assignments; and,** (Outcome)
 1520
 1521 **VI.B.4.c).(2)** **recognition of impairment, including from illness,**
 1522 **fatigue, and substance use, in themselves, their peers,**
 1523 **and other members of the health care team.** (Outcome)
 1524
 1525 **VI.B.4.d)** **commitment to lifelong learning;** (Outcome)
 1526
 1527 **VI.B.4.e)** **monitoring of their patient care performance improvement**
 1528 **indicators; and,** (Outcome)
 1529
 1530 **VI.B.4.f)** **accurate reporting of clinical and educational work hours,**
 1531 **patient outcomes, and clinical experience data.** (Outcome)
 1532
 1533 **VI.B.5.** **All fellows and faculty members must demonstrate responsiveness**
 1534 **to patient needs that supersedes self-interest. This includes the**
 1535 **recognition that under certain circumstances, the best interests of**
 1536 **the patient may be served by transitioning that patient's care to**
 1537 **another qualified and rested provider.** (Outcome)
 1538
 1539 **VI.B.6.** **Programs, in partnership with their Sponsoring Institutions, must**
 1540 **provide a professional, equitable, respectful, and civil environment**
 1541 **that is free from discrimination, sexual and other forms of**
 1542 **harassment, mistreatment, abuse, or coercion of students, fellows,**
 1543 **faculty, and staff.** (Core)
 1544

1545 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1546 have a process for education of fellows and faculty regarding
1547 unprofessional behavior and a confidential process for reporting,
1548 investigating, and addressing such concerns. ^(Core)
1549

1550 VI.C. Well-Being
1551

1552 *Psychological, emotional, and physical well-being are critical in the*
1553 *development of the competent, caring, and resilient physician and require*
1554 *proactive attention to life inside and outside of medicine. Well-being*
1555 *requires that physicians retain the joy in medicine while managing their*
1556 *own real life stresses. Self-care and responsibility to support other*
1557 *members of the health care team are important components of*
1558 *professionalism; they are also skills that must be modeled, learned, and*
1559 *nurtured in the context of other aspects of fellowship training.*
1560

1561 *Fellows and faculty members are at risk for burnout and depression.*
1562 *Programs, in partnership with their Sponsoring Institutions, have the same*
1563 *responsibility to address well-being as other aspects of resident*
1564 *competence. Physicians and all members of the health care team share*
1565 *responsibility for the well-being of each other. For example, a culture which*
1566 *encourages covering for colleagues after an illness without the expectation*
1567 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1568 *clinical learning environment models constructive behaviors, and prepares*
1569 *fellows with the skills and attitudes needed to thrive throughout their*
1570 *careers.*
1571

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

1572 VI.C.1. The responsibility of the program, in partnership with the
1573 Sponsoring Institution, to address well-being must include:
1574

1575 VI.C.1.a) efforts to enhance the meaning that each fellow finds in the
1576 experience of being a physician, including protecting time
1577 with patients, minimizing non-physician obligations,
1578 providing administrative support, promoting progressive
1579

1580 autonomy and flexibility, and enhancing professional
1581 relationships; ^(Core)

1582
1583 VI.C.1.b) attention to scheduling, work intensity, and work
1584 compression that impacts fellow well-being; ^(Core)
1585

1586 VI.C.1.c) evaluating workplace safety data and addressing the safety of
1587 fellows and faculty members; ^(Core)
1588

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1589
1590 VI.C.1.d) policies and programs that encourage optimal fellow and
1591 faculty member well-being; and, ^(Core)
1592

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1593
1594 VI.C.1.d).(1) Fellows must be given the opportunity to attend
1595 medical, mental health, and dental care appointments,
1596 including those scheduled during their working hours.
1597 ^(Core)
1598

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1599
1600 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1601 and substance use disorder. The program, in partnership with
1602 its Sponsoring Institution, must educate faculty members and
1603 fellows in identification of the symptoms of burnout,
1604 depression, and substance use disorder, including means to
1605 assist those who experience these conditions. Fellows and
1606 faculty members must also be educated to recognize those
1607 symptoms in themselves and how to seek appropriate care.
1608 The program, in partnership with its Sponsoring Institution,
1609 must: ^(Core)
1610

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (<https://dl.acgme.org/pages/well-being-tools-resources>).

1611

1612 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1613 program director or other designated personnel or
1614 programs when they are concerned that another
1615 fellow, resident, or faculty member may be displaying
1616 signs of burnout, depression, a substance use
1617 disorder, suicidal ideation, or potential for violence;
1618 (Core)
1619

Background and Intent: Individuals experiencing burnout, depression, a substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1620
1621 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1622 and, (Core)
1623
1624 VI.C.1.e).(3) provide access to confidential, affordable mental
1625 health assessment, counseling, and treatment,
1626 including access to urgent and emergent care 24
1627 hours a day, seven days a week. (Core)
1628

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1629
1630 VI.C.2. There are circumstances in which fellows may be unable to attend
1631 work, including but not limited to fatigue, illness, family
1632 emergencies, and parental leave. Each program must allow an
1633 appropriate length of absence for fellows unable to perform their
1634 patient care responsibilities. (Core)
1635
1636 VI.C.2.a) The program must have policies and procedures in place to
1637 ensure coverage of patient care. (Core)

1638
1639 VI.C.2.b) These policies must be implemented without fear of negative
1640 consequences for the fellow who is or was unable to provide
1641 the clinical work. ^(Core)
1642

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

1643
1644 VI.D. Fatigue Mitigation

1645
1646 VI.D.1. Programs must:

1647
1648 VI.D.1.a) educate all faculty members and fellows to recognize the
1649 signs of fatigue and sleep deprivation; ^(Core)

1650
1651 VI.D.1.b) educate all faculty members and fellows in alertness
1652 management and fatigue mitigation processes; and, ^(Core)

1653
1654 VI.D.1.c) encourage fellows to use fatigue mitigation processes to
1655 manage the potential negative effects of fatigue on patient
1656 care and learning. ^(Detail)
1657

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1658
1659 VI.D.2. Each program must ensure continuity of patient care, consistent
1660 with the program's policies and procedures referenced in VI.C.2–
1661 VI.C.2.b), in the event that a fellow may be unable to perform their
1662 patient care responsibilities due to excessive fatigue. ^(Core)
1663

1664 VI.D.3. The program, in partnership with its Sponsoring Institution, must
1665 ensure adequate sleep facilities and safe transportation options for
1666 fellows who may be too fatigued to safely return home. ^(Core)
1667

1668 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care
1669

1670 **VI.E.1. Clinical Responsibilities**
1671
1672 **The clinical responsibilities for each fellow must be based on PGY**
1673 **level, patient safety, fellow ability, severity and complexity of patient**
1674 **illness/condition, and available support services. (Core)**
1675

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1676
1677 **VI.E.2. Teamwork**
1678
1679 **Fellows must care for patients in an environment that maximizes**
1680 **communication. This must include the opportunity to work as a**
1681 **member of effective interprofessional teams that are appropriate to**
1682 **the delivery of care in the subspecialty and larger health system.**
1683 **(Core)**

1684
1685 **VI.E.2.a)** Contributors to effective interprofessional teams should include
1686 consulting physicians, psychologists, psychiatric nurses, social
1687 workers, other professional and paraprofessional mental health
1688 personnel, pediatricians, teachers, and other school personnel
1689 involved in the evaluation and treatment of patients. **(Detail)**
1690

1691 **VI.E.3. Transitions of Care**
1692

1693 **VI.E.3.a)** **Programs must design clinical assignments to optimize**
1694 **transitions in patient care, including their safety, frequency,**
1695 **and structure. (Core)**
1696

1697 **VI.E.3.b)** **Programs, in partnership with their Sponsoring Institutions,**
1698 **must ensure and monitor effective, structured hand-over**
1699 **processes to facilitate both continuity of care and patient**
1700 **safety. (Core)**
1701

1702 **VI.E.3.c)** **Programs must ensure that fellows are competent in**
1703 **communicating with team members in the hand-over process.**
1704 **(Outcome)**
1705

1706 **VI.E.3.d)** **Programs and clinical sites must maintain and communicate**
1707 **schedules of attending physicians and fellows currently**
1708 **responsible for care. (Core)**
1709

1710 **VI.E.3.e)** **Each program must ensure continuity of patient care,**
1711 **consistent with the program's policies and procedures**
1712 **referenced in VI.C.2-VI.C.2.b), in the event that a fellow may**

1713 be unable to perform their patient care responsibilities due to
1714 excessive fatigue or illness, or family emergency. ^(Core)

1715
1716 **VI.F. Clinical Experience and Education**

1717
1718 *Programs, in partnership with their Sponsoring Institutions, must design*
1719 *an effective program structure that is configured to provide fellows with*
1720 *educational and clinical experience opportunities, as well as reasonable*
1721 *opportunities for rest and personal activities.*

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1723
1724 **VI.F.1. Maximum Hours of Clinical and Educational Work per Week**

1725
1726 Clinical and educational work hours must be limited to no more than
1727 80 hours per week, averaged over a four-week period, inclusive of all
1728 in-house clinical and educational activities, clinical work done from
1729 home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations

of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

- 1731
- 1732 **VI.F.2. Mandatory Time Free of Clinical Work and Education**
- 1733
- 1734 **VI.F.2.a) The program must design an effective program structure that**
- 1735 **is configured to provide fellows with educational**
- 1736 **opportunities, as well as reasonable opportunities for rest**
- 1737 **and personal well-being. ^(Core)**
- 1738
- 1739 **VI.F.2.b) Fellows should have eight hours off between scheduled**
- 1740 **clinical work and education periods. ^(Detail)**
- 1741
- 1742 **VI.F.2.b).(1) There may be circumstances when fellows choose to**
- 1743 **stay to care for their patients or return to the hospital**
- 1744 **with fewer than eight hours free of clinical experience**

1745
1746
1747
1748

and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1749
1750
1751
1752

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1753
1754
1755
1756
1757
1758

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1761
1762
1763
1764
1765
1766
1767

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing

1768 effective transitions of care, and/or fellow education.
1769 (Core)

1770
1771 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
1772 be assigned to a fellow during this time. (Core)
1773

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1774
1775 VI.F.4. Clinical and Educational Work Hour Exceptions
1776

1777 VI.F.4.a) In rare circumstances, after handing off all other
1778 responsibilities, a fellow, on their own initiative, may elect to
1779 remain or return to the clinical site in the following
1780 circumstances:

1781
1782 VI.F.4.a).(1) to continue to provide care to a single severely ill or
1783 unstable patient; (Detail)

1784
1785 VI.F.4.a).(2) humanistic attention to the needs of a patient or
1786 family; or, (Detail)

1787
1788 VI.F.4.a).(3) to attend unique educational events. (Detail)

1789
1790 VI.F.4.b) These additional hours of care or education will be counted
1791 toward the 80-hour weekly limit. (Detail)
1792

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1793
1794 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
1795 for up to 10 percent or a maximum of 88 clinical and
1796 educational work hours to individual programs based on a
1797 sound educational rationale.

1798
1799 The Review Committee for Psychiatry will not consider requests
1800 for exceptions to the 80-hour limit to the fellows' work week.

1801
1802 VI.F.5. Moonlighting

- 1803
1804 **VI.F.5.a)** Moonlighting must not interfere with the ability of the fellow
1805 to achieve the goals and objectives of the educational
1806 program, and must not interfere with the fellow's fitness for
1807 work nor compromise patient safety. ^(Core)
1808
1809 **VI.F.5.b)** Time spent by fellows in internal and external moonlighting
1810 (as defined in the ACGME Glossary of Terms) must be
1811 counted toward the 80-hour maximum weekly limit. ^(Core)
1812

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

- 1813
1814 **VI.F.6.** **In-House Night Float**
1815
1816 **Night float must occur within the context of the 80-hour and one-**
1817 **day-off-in-seven requirements.** ^(Core)
1818

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

- 1819
1820 **VI.F.7.** **Maximum In-House On-Call Frequency**
1821
1822 **Fellows must be scheduled for in-house call no more frequently than**
1823 **every third night (when averaged over a four-week period).** ^(Core)
1824

- 1825 **VI.F.8.** **At-Home Call**

- 1826
1827 **VI.F.8.a)** **Time spent on patient care activities by fellows on at-home**
1828 **call must count toward the 80-hour maximum weekly limit.**
1829 **The frequency of at-home call is not subject to the every-**
1830 **third-night limitation, but must satisfy the requirement for one**
1831 **day in seven free of clinical work and education, when**
1832 **averaged over four weeks.** ^(Core)
1833

- 1834 **VI.F.8.a).(1)** **At-home call must not be so frequent or taxing as to**
1835 **preclude rest or reasonable personal time for each**
1836 **fellow.** ^(Core)
1837

- 1838 **VI.F.8.b)** **Fellows are permitted to return to the hospital while on at-**
1839 **home call to provide direct care for new or established**
1840 **patients. These hours of inpatient patient care must be**
1841 **included in the 80-hour maximum weekly limit.** ^(Detail)
1842

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-

home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
