1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Consultation-Liaison Psychiatry**

3
4 **Common Program Requirements (One-Year Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (One-Year Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core
14 residency program for physicians who desire to enter more specialized
15 practice. Fellowship-trained physicians serve the public by providing
16 subspecialty care, which may also include core medical care, acting as a
17 community resource for expertise in their field, creating and integrating
18 new knowledge into practice, and educating future generations of
19 physicians. Graduate medical education values the strength that a diverse
20 group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently
23 in their core specialty. The prior medical experience and expertise of
24 fellows distinguish them from physicians entering into residency training.
25 The fellow’s care of patients within the subspecialty is undertaken with
26 appropriate faculty supervision and conditional independence. Faculty
27 members serve as role models of excellence, compassion,
28 professionalism, and scholarship. The fellow develops deep medical
29 knowledge, patient care skills, and expertise applicable to their focused
30 area of practice. Fellowship is an intensive program of subspecialty clinical
31 and didactic education that focuses on the multidisciplinary care of
32 patients. Fellowship education is often physically, emotionally, and
33 intellectually demanding, and occurs in a variety of clinical learning
34 environments committed to graduate medical education and the well-being
35 of patients, residents, fellows, faculty members, students, and all members
36 of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance
39 fellows’ skills as physician-scientists. While the ability to create new
40 knowledge within medicine is not exclusive to fellowship-educated
41 physicians, the fellowship experience expands a physician’s abilities to
42 pursue hypothesis-driven scientific inquiry that results in contributions to
43 the medical literature and patient care. Beyond the clinical subspecialty
44 expertise achieved, fellows develop mentored relationships built on an
45 infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Consultation-liaison psychiatry is the discipline encompassing the study and
50 treatment of psychiatric disorders in patients with medical, surgical, obstetrical,
51 and neurological conditions, and particularly those with complex and/or chronic
52 conditions. Physicians specializing in consultation-liaison psychiatry have
53 expertise in the diagnosis and treatment of psychiatric disorders in complex
54 medically ill patients. The practice of consultation-liaison psychiatry requires
55 comprehensive assessment of patients with acute or chronic medical,
56 neurological, or surgical illness in which psychiatric morbidity affects their
57 medical care and/or quality of life, patients with somatic symptom disorders or
58 with psychological factors in which psychiatric morbidity affects a physical
59 condition, and patients with a psychiatric disorder that is the direct consequence
60 of a primary medical condition.

61
62 **Int.C. Length of Educational Program**

63
64 The educational program in consultation-liaison psychiatry must be 12 months in
65 length. ^{(Core)*}

66
67 **I. Oversight**

68
69 **I.A. Sponsoring Institution**

70
71 *The Sponsoring Institution is the organization or entity that assumes the*
72 *ultimate financial and academic responsibility for a program of graduate*
73 *medical education consistent with the ACGME Institutional Requirements.*

74
75 *When the Sponsoring Institution is not a rotation site for the program, the*
76 *most commonly utilized site of clinical activity for the program is the*
77 *primary clinical site.*

78
79
80 **Background and Intent: Participating sites will reflect the health care needs of the**
81 **community and the educational needs of the fellows. A wide variety of organizations**
82 **may provide a robust educational experience and, thus, Sponsoring Institutions and**
83 **participating sites may encompass inpatient and outpatient settings including, but not**
84 **limited to a university, a medical school, a teaching hospital, a nursing home, a**
85 **school of public health, a health department, a public health agency, an organized**
86 **health care delivery system, a medical examiner's office, an educational consortium, a**
87 **teaching health center, a physician group practice, a federally qualified health center,**
a surgery center, an academic and private single-specialty clinic, or an educational
foundation.

80 **I.A.1. The program must be sponsored by one ACGME-accredited**
81 **Sponsoring Institution. ^{(Core)*}**

82
83 **I.B. Participating Sites**

84
85 *A participating site is an organization providing educational experiences or*
86 *educational assignments/rotations for fellows.*

- 88 **I.B.1. The program, with approval of its Sponsoring Institution, must**
89 **designate a primary clinical site.** ^(Core)
90
- 91 I.B.1.a) The Sponsoring Institution must also sponsor an ACGME-
92 accredited program in psychiatry. ^(Core)
93
- 94 I.B.1.b) Within at least one of the participating sites there should be an
95 ACGME-accredited program in at least one of the following non-
96 psychiatric specialties: family medicine; internal medicine;
97 neurology; or physical medicine and rehabilitation. ^(Core)
98
- 99 **I.B.2. There must be a program letter of agreement (PLA) between the**
100 **program and each participating site that governs the relationship**
101 **between the program and the participating site providing a required**
102 **assignment.** ^(Core)
103
- 104 I.B.2.a) The PLA must:
- 105
- 106 I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)
107
- 108 I.B.2.a).(2) be approved by the designated institutional official
109 (DIO). ^(Core)
110
- 111 **I.B.3. The program must monitor the clinical learning and working**
112 **environment at all participating sites.** ^(Core)
113
- 114 I.B.3.a) At each participating site there must be one faculty member,
115 designated by the program director, who is accountable for
116 fellow education for that site, in collaboration with the
117 program director. ^(Core)
118

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience

- **Stating the policies and procedures that will govern fellow education during the assignment**

119
120
121
122

124
125
126
127
128
129
130
131
132
133
134

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME’s Accreditation Data System (ADS). (Core)

I.B.4.a) The number of and distance between participating sites must allow for fellows’ full participation in all organized educational aspects of the program. (Detail)†

I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. (Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

149
150
151
152
153
154

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. (Core)

I.D.1.a) At least one acute general hospital and one ambulatory care facility must be available. (Core)

I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: (Core)

I.D.2.a) access to food while on duty; (Core)

I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care, if the fellows are assigned in-house call; (Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be

stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

155
156
157
158
159

- I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; (Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

160
161
162
163

179
180
181
182
183
184
185
186
187

- I.D.2.d) security and safety measures appropriate to the participating site; and, (Core)

- I.D.2.e) accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy. (Core)

- I.D.3. Fellows must have ready access to subspecialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. (Core)

- I.D.4. The program's educational and clinical resources must be adequate to support the number of fellows appointed to the program. (Core)

- I.D.4.a) There must be patients of each sex with a variety of clinical problems, including critically-ill patients. (Core)

- I.E. *A fellowship program usually occurs in the context of many learners and other care providers and limited clinical resources. It should be structured to optimize education for all learners present.*

- I.E.1. Fellows should contribute to the education of residents in core programs, if present. (Core)

- I.E.2. The presence of other learners must not interfere with the appointed fellows' education. (Detail)

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

201
202
203

II. Personnel

II.A. Program Director

II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. (Core)

II.A.1.a) The Sponsoring Institution’s Graduate Medical Education Committee (GMEC) must approve a change in program director. (Core)

II.A.1.b) Final approval of the program director resides with the Review Committee. (Core)

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director’s nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

204
205
206

208
209
210
211
212
213
214

II.A.2. The program director and, as applicable, the program’s leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. (Core)

II.A.2.a) Program leadership, in aggregate, must be provided with support equal to a dedicated minimum time specified below for administration of the program. This may be spent by the program director only or divided between the program director and one or more associate (or assistant) program directors. (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u>1-6</u>	<u>0.2</u>
<u>7-8</u>	<u>0.36</u>
<u>9-10</u>	<u>0.4</u>

215
216
217
218
219
220

~~At a minimum, the program director must be provided with the salary support required to devote 25 percent FTE of non-clinical time to the administration of the program. Additional support must be provided based on program size as follows: (Core)~~

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE</u>
<u>1-2</u>	<u>0.25</u>
<u>3 or more</u>	<u>0.375</u>

221

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those

significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

245
246
247
248
249
250

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; and, (Core)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Psychiatry and Neurology (ABPN) (note that while the Common Program Requirements deem AOA certification acceptable, certification in this subspecialty is not offered by a certifying board of the AOA) or subspecialty qualifications that are acceptable to the Review Committee. (Core)

II.A.3.b).(1) The Review Committee accepts only ABPN certification in the subspecialty. (Core)

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. (Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; (Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

251
252
253
254
255
256

- II.A.4.a).(2)** design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

257
258
259
260
261

- II.A.4.a).(3)** administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

262

272
273
274
275
276
277
278
279

- II.A.4.a).(4)** develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; ^(Core)

- II.A.4.a).(5)** have the authority to approve program faculty members for participation in the fellowship program education at all sites; ^(Core)

- II.A.4.a).(6)** have the authority to remove program faculty members from participation in the fellowship program education at all sites; ^(Core)

- II.A.4.a).(7)** have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a

fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

302
303
- II.A.4.a).(8)** submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)
- II.A.4.a).(9)** provide applicants who are offered an interview with information related to the applicant’s eligibility for the relevant subspecialty board examination(s); ^(Core)
- II.A.4.a).(10)** provide a learning and working environment in which fellows have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; ^(Core)
- II.A.4.a).(11)** ensure the program’s compliance with the Sponsoring Institution’s policies and procedures related to grievances and due process; ^(Core)
- II.A.4.a).(12)** ensure the program’s compliance with the Sponsoring Institution’s policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a fellow; ^(Core)

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution’s policies and procedures, and will ensure they are followed by the program’s leadership, faculty members, support personnel, and fellows.

- II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring Institution’s policies and procedures on employment and non-discrimination; ^(Core)
- II.A.4.a).(13).(a)** Fellows must not be required to sign a non-competition guarantee or restrictive covenant. ^(Core)
- II.A.4.a).(14)** document verification of program completion for all graduating fellows within 30 days; ^(Core)
- II.A.4.a).(15)** provide verification of an individual fellow’s completion upon the fellow’s request, within 30 days; and, ^(Core)

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

II.A.4.a).(16) obtain review and approval of the Sponsoring Institution’s DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Director’s Guide to the Common Program Requirements. ^(Core)

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.

351
352
353
354
355
356
357
358
359
360
361

II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)

II.B.2. Faculty members must:

II.B.2.a) be role models of professionalism; ^(Core)

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

362

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

363

364 **II.B.2.c)** demonstrate a strong interest in the education of fellows; ^(Core)

365

366 **II.B.2.d)** devote sufficient time to the educational program to fulfill
367 their supervisory and teaching responsibilities; ^(Core)

368

369 **II.B.2.e)** administer and maintain an educational environment
370 conducive to educating fellows; and, ^(Core)

371

372 **II.B.2.f)** pursue faculty development designed to enhance their skills.
373 ^(Core)

374

375 **II.B.3. Faculty Qualifications**

376

377 **II.B.3.a)** Faculty members must have appropriate qualifications in
378 their field and hold appropriate institutional appointments.
379 ^(Core)

380

381 **II.B.3.b)** Subspecialty physician faculty members must:

382

383 **II.B.3.b).(1)** have current certification in the subspecialty by the
384 **American Board of Psychiatry and Neurology** (note that
385 while the Common Program Requirements deem AOA
386 certification acceptable, certification in this subspecialty is
387 not offered by a certifying board of the AOA) **or possess**
388 **qualifications judged acceptable to the Review**
389 **Committee.** ^(Core)

390

391 **II.B.3.c)** Any non-physician faculty members who participate in
392 fellowship program education must be approved by the
393 program director. ^(Core)

394

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

395

396 **II.B.3.d)** Any other specialty physician faculty members must have
397 current certification in their specialty by the appropriate
398 **American Board of Medical Specialties (ABMS) member**
399 **board or American Osteopathic Association (AOA) certifying**

408
409
410

board, or possess qualifications judged acceptable to the Review Committee. (Core)

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. (Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contributions to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

II.B.4.a) Core faculty members must be designated by the program director. (Core)

II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. (Core)

II.B.4.c) In addition to the program director, there must be at least one core faculty member certified in the subspecialty by the ABPN. (Core)

II.C. Program Coordinator

II.C.1. There must be administrative support for program coordination. (Core)

II.C.1.a) At a minimum, the program coordinator must be provided with the dedicated time and support specified below for administration of the program. (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE</u>
<u>1-6</u>	<u>0.5</u>
<u>7-8</u>	<u>0.66</u>
<u>9-10</u>	<u>0.7</u>

429

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

430
431
432
433
434
435
436

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada. ^(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

453
454
455
456
457
458
459
460
461
462
463
464
465
466
467
468
469

III.A.1.a) Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. ^(Core)

III.A.1.b) Prior to appointment in the program, fellows must have satisfactorily completed a general psychiatry program that satisfies the requirements in III.A.1. ^(Core)

III.A.1.c) Fellow Eligibility Exception

The Review Committee for Psychiatry will allow the following exception to the fellowship eligibility requirements:

III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate

- 470 applicant who does not satisfy the eligibility
 471 requirements listed in III.A.1., but who does meet all of
 472 the following additional qualifications and conditions:
 473 (Core)
 474
- 475 **III.A.1.c).(1).(a)** evaluation by the program director and
 476 fellowship selection committee of the
 477 applicant’s suitability to enter the program,
 478 based on prior training and review of the
 479 summative evaluations of training in the core
 480 specialty; and, (Core)
 481
- 482 **III.A.1.c).(1).(b)** review and approval of the applicant’s
 483 exceptional qualifications by the GMEC; and,
 484 (Core)
 485
- 486 **III.A.1.c).(1).(c)** verification of Educational Commission for
 487 Foreign Medical Graduates (ECFMG)
 488 certification. (Core)
 489
- 490 **III.A.1.c).(2)** Applicants accepted through this exception must have
 491 an evaluation of their performance by the Clinical
 492 Competency Committee within 12 weeks of
 493 matriculation. (Core)
 494

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

- 495
- 496 **III.B.** The program director must not appoint more fellows than approved by the
 497 Review Committee. (Core)
 498
- 499 **III.B.1.** All complement increases must be approved by the Review
 500 Committee. (Core)
 501
- 502 **IV. Educational Program**
 503

504 ***The ACGME accreditation system is designed to encourage excellence and***
505 ***innovation in graduate medical education regardless of the organizational***
506 ***affiliation, size, or location of the program.***

507
508 ***The educational program must support the development of knowledgeable, skillful***
509 ***physicians who provide compassionate care.***

510
511 ***In addition, the program is expected to define its specific program aims consistent***
512 ***with the overall mission of its Sponsoring Institution, the needs of the community***
513 ***it serves and that its graduates will serve, and the distinctive capabilities of***
514 ***physicians it intends to graduate. While programs must demonstrate substantial***
515 ***compliance with the Common and subspecialty-specific Program Requirements, it***
516 ***is recognized that within this framework, programs may place different emphasis***
517 ***on research, leadership, public health, etc. It is expected that the program aims***
518 ***will reflect the nuanced program-specific goals for it and its graduates; for***
519 ***example, it is expected that a program aiming to prepare physician-scientists will***
520 ***have a different curriculum from one focusing on community health.***

521
522 **IV.A. The curriculum must contain the following educational components:** (Core)

523
524 **IV.A.1. a set of program aims consistent with the Sponsoring Institution’s**
525 **mission, the needs of the community it serves, and the desired**
526 **distinctive capabilities of its graduates;** (Core)

527
528 **IV.A.1.a) The program’s aims must be made available to program**
529 **applicants, fellows, and faculty members.** (Core)

530
531 **IV.A.2. competency-based goals and objectives for each educational**
532 **experience designed to promote progress on a trajectory to**
533 **autonomous practice in their subspecialty. These must be**
534 **distributed, reviewed, and available to fellows and faculty members;**
535 **(Core)**

536
537 **IV.A.3. delineation of fellow responsibilities for patient care, progressive**
538 **responsibility for patient management, and graded supervision in**
539 **their subspecialty;** (Core)

540
Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

541
542 **IV.A.4. structured educational activities beyond direct patient care; and,**
543 **(Core)**

544
Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which

fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

545
546
547
548
549
550

IV.A.5. advancement of fellows' knowledge of ethical principles foundational to medical professionalism. ^(Core)

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

551
552
553
554
555
556
557
558
559
560
561

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: ^(Core)

IV.B.1.a) Professionalism

Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs.* 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

693		
694	IV.B.1.d)	Practice-based Learning and Improvement
695		
696		Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)
697		
698		
699		
700		
<p>Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.</p> <p>The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.</p>		
701		
702	IV.B.1.e)	Interpersonal and Communication Skills
703		
704		Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. ^(Core)
705		
706		
707		
708		
709	IV.B.1.f)	Systems-based Practice
710		
711		Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinants of health, as well as the ability to call effectively on other resources to provide optimal health care. ^(Core)
712		
713		
714		
715		
716		
717	IV.C.	Curriculum Organization and Fellow Experiences

- 718
719 **IV.C.1. The curriculum must be structured to optimize fellow educational**
720 **experiences, the length of these experiences, and supervisory**
721 **continuity.** ^(Core)
722
- 723 IV.C.1.a) Curriculum design must be consistent with the program’s aims
724 (IV.A.1.), and must demonstrate a systematic approach, with
725 attention to evidence-based principles and scientific literature,
726 standards of the profession, and the developmental
727 appropriateness for learners. ^(Core)
728
- 729 IV.C.1.b) The assignment of rotations must be structured to minimize the
730 frequency of rotational transitions. ^(Core)
731
- 732 **IV.C.2. The program must provide instruction and experience in pain**
733 **management if applicable for the subspecialty, including recognition**
734 **of the signs of addiction.** ^(Core)
735
- 736 IV.C.1. The 12-month program must be completed within no more than a two-
737 year period. ^(Core)
738
- 739 IV.C.2. All major dimensions of the curriculum must be structured educational
740 experiences guided by written competency-based goals and objectives
741 linked to specific teaching and evaluation methods. ^(Detail)
742
- 743 IV.C.3. Educational sessions should include journal club, critical incident
744 conferences, weekly didactic seminars, and teaching patient rounds. ^(Detail)
745
- 746 IV.C.3.a) Fellows must attend at least 70 percent of all required didactic
747 components of the programs. Attendance by fellows and faculty
748 members should be documented. ^(Detail)
749
- 750 IV.C.4. Fellows must participate in continuity of patient care. ^(Core)
751
- 752 IV.C.4.a) This experience must include care for patients in an acute general
753 hospital and an ambulatory care facility. ^(Detail)
754
- 755 IV.C.5. Each fellow must have a minimum of two hours of faculty mentorship
756 weekly, one of which must be one-to-one preceptorship and one of which
757 hour may be group preceptorship. ^(Core)
758
- 759 IV.C.6. Each fellow must maintain a patient log documenting all clinical
760 experiences. ^(Detail)
761
- 762 **IV.D. Scholarship**
763
- 764 ***Medicine is both an art and a science. The physician is a humanistic***

766 ***evaluate the literature, appropriately assimilate new knowledge, and***
767 ***practice lifelong learning. The program and faculty must create an***
768 ***environment that fosters the acquisition of such skills through fellow***

769 *participation in scholarly activities as defined in the subspecialty-specific*
770 *Program Requirements. Scholarly activities may include discovery,*
771 *integration, application, and teaching.*

772
773 *The ACGME recognizes the diversity of fellowships and anticipates that*
774 *programs prepare physicians for a variety of roles, including clinicians,*
775 *scientists, and educators. It is expected that the program's scholarship will*
776 *reflect its mission(s) and aims, and the needs of the community it serves.*
777 *For example, some programs may concentrate their scholarly activity on*
778 *quality improvement, population health, and/or teaching, while other*
779 *programs might choose to utilize more classic forms of biomedical*
780 *research as the focus for scholarship.*

781
782 **IV.D.1. Program Responsibilities**

783
784 **IV.D.1.a) The program must demonstrate evidence of scholarly**
785 **activities, consistent with its mission(s) and aims. ^(Core)**

786
787 **IV.D.2. Faculty Scholarly Activity**

788
789 **IV.D.2.a) Faculty members must participate in scholarly activities**
790 **appropriate to the subspecialty, including local, regional, and**
791 **national specialty societies, research, presentations, or**
792 **publications. ^(Detail)**

793
794 **IV.D.2.b) Faculty members must regularly participate in organized clinical**
795 **discussions, rounds, journal clubs, and conferences. ^(Detail)**

796
797 **IV.D.3. Fellow Scholarly Activity**

798
799 **IV.D.3.a) Fellows must participate in developing new knowledge or**
800 **evaluating research findings. ^(Core)**

801
802 **V. Evaluation**

803
804 **V.A. Fellow Evaluation**

805
806 **V.A.1. Feedback and Evaluation**

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**

- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

808
809
810
811
812
813
814
815
816
817
818
819

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

V.A.1.a).(1) The evaluation must include review and discussion with each fellow of the fellow's educational record documenting completion of all required components at the time of evaluation of the program, evaluations of clinical and didactic work by supervisors and teachers, and patient log documenting all clinical experiences. ^(Detail)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

V.A.1.b).(1) Evaluations must be completed at least every three months. ^(Core)

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: ^(Core)

V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, ^(Core)

V.A.1.c).(2) provide that information to the Clinical Competency Committee for its synthesis of progressive fellow

837
838
839

performance and improvement toward unsupervised practice. ^(Core)

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

851

- V.A.1.d)** The program director or their designee, with input from the Clinical Competency Committee, must:
- V.A.1.d).(1)** meet with and review with each fellow their documented semi-annual evaluation of performance, including progress along the subspecialty-specific Milestones. ^(Core)
- V.A.1.d).(2)** develop plans for fellows failing to progress, following institutional policies and procedures. ^(Core)

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

852
853
854
855
856
857
858
859
860

- V.A.1.e)** The evaluations of a fellow's performance must be accessible for review by the fellow. ^(Core)
- V.A.2.** Final Evaluation
- V.A.2.a)** The program director must provide a final evaluation for each fellow upon completion of the program. ^(Core)

- 861 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when
862 applicable the subspecialty-specific Case Logs, must
863 be used as tools to ensure fellows are able to engage
864 in autonomous practice upon completion of the
865 program. ^(Core)
866
- 867 **V.A.2.a).(2)** The final evaluation must:
868
- 869 **V.A.2.a).(2).(a)** become part of the fellow’s permanent record
870 maintained by the institution, and must be
871 accessible for review by the fellow in
872 accordance with institutional policy; ^(Core)
873
- 874 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the
875 knowledge, skills, and behaviors necessary to
876 enter autonomous practice; ^(Core)
877
- 878 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
879 Competency Committee; and, ^(Core)
880
- 881 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
882 the program. ^(Core)
883
- 884 **V.A.3.** A Clinical Competency Committee must be appointed by the
885 program director. ^(Core)
886
- 887 **V.A.3.a)** At a minimum the Clinical Competency Committee must
888 include three members, at least one of whom is a core faculty
889 member. Members must be faculty members from the same
890 program or other programs, or other health professionals
891 who have extensive contact and experience with the
892 program’s fellows. ^(Core)
893
- 894 **V.A.3.b)** The Clinical Competency Committee must:
895
- 896 **V.A.3.b).(1)** review all fellow evaluations at least semi-annually;
897 ^(Core)
898
- 899 **V.A.3.b).(2)** determine each fellow’s progress on achievement of
900 the subspecialty-specific Milestones; and, ^(Core)
901
- 902 **V.A.3.b).(3)** meet prior to the fellows’ semi-annual evaluations and
903 advise the program director regarding each fellow’s
904 progress. ^(Core)
905
- 906 **V.B.** Faculty Evaluation
907
- 908 **V.B.1.** The program must have a process to evaluate each faculty
909 member’s performance as it relates to the educational program at
910 least annually. ^(Core)
911

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 912
913 **V.B.1.a)** This evaluation must include a review of the faculty member's
914 clinical teaching abilities, engagement with the educational
915 program, participation in faculty development related to their
916 skills as an educator, clinical performance, professionalism,
917 and scholarly activities. (Core)
918
919 **V.B.1.b)** This evaluation must include written, confidential evaluations
920 by the fellows. (Core)
921
922 **V.B.2.** Faculty members must receive feedback on their evaluations at least
923 annually. (Core)
924

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 925
926 **V.C. Program Evaluation and Improvement**
927
928 **V.C.1.** The program director must appoint the Program Evaluation
929 Committee to conduct and document the Annual Program
930 Evaluation as part of the program's continuous improvement
931 process. (Core)
932
933 **V.C.1.a)** The Program Evaluation Committee must be composed of at
934 least two program faculty members, at least one of whom is a
935 core faculty member, and at least one fellow. (Core)
936
937 **V.C.1.b)** Program Evaluation Committee responsibilities must include:

- 938
 939 **V.C.1.b).(1)** acting as an advisor to the program director, through
 940 program oversight; ^(Core)
 941
 942 **V.C.1.b).(2)** review of the program’s self-determined goals and
 943 progress toward meeting them; ^(Core)
 944
 945 **V.C.1.b).(3)** guiding ongoing program improvement, including
 946 development of new goals, based upon outcomes;
 947 and, ^(Core)
 948
 949 **V.C.1.b).(4)** review of the current operating environment to identify
 950 strengths, challenges, opportunities, and threats as
 951 related to the program’s mission and aims. ^(Core)
 952

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

- 953
 954 **V.C.1.c)** The Program Evaluation Committee should consider the
 955 following elements in its assessment of the program:
 956
 957 **V.C.1.c).(1)** fellow performance; ^(Core)
 958
 959 **V.C.1.c).(2)** faculty development; and, ^(Core)
 960
 961 **V.C.1.c).(3)** progress on the previous year’s action plan(s). ^(Core)
 962
 963 **V.C.1.d)** The Program Evaluation Committee must evaluate the
 964 program’s mission and aims, strengths, areas for
 965 improvement, and threats. ^(Core)
 966
 967 **V.C.1.e)** The annual review, including the action plan, must:
 968
 969 **V.C.1.e).(1)** be distributed to and discussed with the members of
 970 the teaching faculty and the fellows; and, ^(Core)
 971
 972 **V.C.1.e).(2)** be submitted to the DIO. ^(Core)
 973
 974 **V.C.2.** The program must participate in a Self-Study prior to its 10-Year
 975 Accreditation Site Visit. ^(Core)
 976
 977 **V.C.2.a)** A summary of the Self-Study must be submitted to the DIO.
 978 ^(Core)
 979

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it.

Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 980
981 **V.C.3.** *One goal of ACGME-accredited education is to educate physicians*
982 *who seek and achieve board certification. One measure of the*
983 *effectiveness of the educational program is the ultimate pass rate.*
984
985 *The program director should encourage all eligible program*
986 *graduates to take the certifying examination offered by the*
987 *applicable American Board of Medical Specialties (ABMS) member*
988 *board or American Osteopathic Association (AOA) certifying board.*
989
990 **V.C.3.a)** For subspecialties in which the ABMS member board and/or
991 AOA certifying board offer(s) an annual written exam, in the
992 preceding three years, the program’s aggregate pass rate of
993 those taking the examination for the first time must be higher
994 than the bottom fifth percentile of programs in that
995 subspecialty. ^{(Outcome)‡}
996
997 **V.C.3.b)** For subspecialties in which the ABMS member board and/or
998 AOA certifying board offer(s) a biennial written exam, in the
999 preceding six years, the program’s aggregate pass rate of
1000 those taking the examination for the first time must be higher
1001 than the bottom fifth percentile of programs in that
1002 subspecialty. ^(Outcome)
1003
1004 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
1005 AOA certifying board offer(s) an annual oral exam, in the
1006 preceding three years, the program’s aggregate pass rate of
1007 those taking the examination for the first time must be higher
1008 than the bottom fifth percentile of programs in that
1009 subspecialty. ^(Outcome)
1010
1011 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
1012 AOA certifying board offer(s) a biennial oral exam, in the
1013 preceding six years, the program’s aggregate pass rate of
1014 those taking the examination for the first time must be higher
1015 than the bottom fifth percentile of programs in that
1016 subspecialty. ^(Outcome)
1017
1018 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1019 whose graduates over the time period specified in the
1020 requirement have achieved an 80 percent pass rate will have
1021 met this requirement, no matter the percentile rank of the
1022 program for pass rate in that subspecialty. ^(Outcome)

1023

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1024

1025

V.C.3.f)

Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. ^(Core)

1026

1027

1028

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1029

1030

VI. The Learning and Working Environment

1031

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

1032

1033

1034

- ***Excellence in the safety and quality of care rendered to patients by fellows today***

1035

1036

1037

- ***Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice***

1038

1039

1040

- ***Excellence in professionalism through faculty modeling of:***

1041

1042

- ***the effacement of self-interest in a humanistic environment that supports the professional development of physicians***

1043

1044

1045

- ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***

1046

1047

1048
1049
1050

- ***Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team***

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

1075		
1076	VI.A.1.a)	Patient Safety
1077		
1078	VI.A.1.a).(1)	Culture of Safety
1079		
1080		<i>A culture of safety requires continuous identification</i>
1081		<i>of vulnerabilities and a willingness to transparently</i>
1082		<i>deal with them. An effective organization has formal</i>
1083		<i>mechanisms to assess the knowledge, skills, and</i>
1084		<i>attitudes of its personnel toward safety in order to</i>
1085		<i>identify areas for improvement.</i>
1086		
1087	VI.A.1.a).(1).(a)	The program, its faculty, residents, and fellows
1088		must actively participate in patient safety
1089		systems and contribute to a culture of safety.
1090		<small>(Core)</small>
1091		
1092	VI.A.1.a).(1).(b)	The program must have a structure that
1093		promotes safe, interprofessional, team-based
1094		care. <small>(Core)</small>
1095		
1096	VI.A.1.a).(2)	Education on Patient Safety
1097		
1098		Programs must provide formal educational activities
1099		that promote patient safety-related goals, tools, and
1100		techniques. <small>(Core)</small>
1101		

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1102		
1103	VI.A.1.a).(3)	Patient Safety Events
1104		
1105		<i>Reporting, investigation, and follow-up of adverse</i>
1106		<i>events, near misses, and unsafe conditions are pivotal</i>
1107		<i>mechanisms for improving patient safety, and are</i>
1108		<i>essential for the success of any patient safety</i>
1109		<i>program. Feedback and experiential learning are</i>
1110		<i>essential to developing true competence in the ability</i>
1111		<i>to identify causes and institute sustainable systems-</i>
1112		<i>based changes to ameliorate patient safety</i>
1113		<i>vulnerabilities.</i>
1114		
1115	VI.A.1.a).(3).(a)	Residents, fellows, faculty members, and other
1116		clinical staff members must:
1117		
1118	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting
1119		patient safety events at the clinical site;
1120		<small>(Core)</small>
1121		

1122	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and, ^(Core)
1123		
1124		
1125		
1126	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution's patient safety reports. ^(Core)
1127		
1128		
1129		
1130	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. ^(Core)
1131		
1132

1215		
1216		
1217		
1218	VI.A.2.a).(1).(b)	Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)
1219		
1220		
1221		
1222	VI.A.2.b)	<i>Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician</i>
1223		

1224
1225
1226
1227
1228
1229
1230
1231
1232

may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

- VI.A.2.b).(1)** The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow’s level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. ^(Core)
- VI.A.2.b).(1).(a)** Only licensed independent practitioners as consistent with state regulations and medical staff bylaws may have primary responsibility for a patient. ^(Detail)
- VI.A.2.b).(2)** The program must define when physical presence of a supervising physician is required. ^(Core)
- VI.A.2.c)** **Levels of Supervision**
- To promote appropriate fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: ^(Core)
- VI.A.2.c).(1)** **Direct Supervision:**
- VI.A.2.c).(1).(a)** the supervising physician is physically present with the fellow during the key portions of the patient interaction; or, ^(Core)
- VI.A.2.c).(1).(b)** the supervising physician and/or patient is not physically present with the fellow and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. ^(Core)

1266		
1267	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. ^(Core)
1268		
1269		
1270		
1271		
1272		
1273	VI.A.2.c).(3)	Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. ^(Core)
1274		
1275		
1276		
1277	VI.A.2.d)	The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. ^(Core)
1278		
1279		
1280		
1281		
1282	VI.A.2.d).(1)	The program director must evaluate each fellow’s abilities based on specific criteria, guided by the Milestones. ^(Core)
1283		
1284		
1285		
1286	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. ^(Core)
1287		
1288		
1289		
1290		
1291	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow. ^(Detail)
1292		
1293		
1294		
1295		
1296		
1297	VI.A.2.e)	Programs must set guidelines for circumstances and events in which fellows must communicate with the supervising faculty member(s). ^(Core)
1298		
1299		
1300		
1301	VI.A.2.e).(1)	Each fellow must know the limits of their scope of authority, and the circumstances under which the fellow is permitted to act with conditional independence. ^(Outcome)
1302		
1303		
1304		
1305		

<p>Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.</p>

1306		
1307	VI.A.2.f)	Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each fellow and to delegate to the fellow the appropriate level of patient care authority and responsibility. ^(Core)
1308		
1309		
1310		
1311		
1312	VI.B.	Professionalism
1313		

1314 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
1315 educate fellows and faculty members concerning the professional
1316 responsibilities of physicians, including their obligation to be
1317 appropriately rested and fit to provide the care required by their
1318 patients. ^(Core)
1319

1320 VI.B.2. The learning objectives of the program must:

1321
1322 VI.B.2.a) be accomplished through an appropriate blend of supervised
1323 patient care responsibilities, clinical teaching, and didactic
1324 educational events; ^(Core)
1325

1326 VI.B.2.b) be accomplished without excessive reliance on fellows to
1327 fulfill non-physician obligations; and, ^(Core)
1328

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1329
1330 VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)
1331

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1332
1333 VI.B.3. The program director, in partnership with the Sponsoring Institution,
1334 must provide a culture of professionalism that supports patient
1335 safety and personal responsibility. ^(Core)
1336

1337 VI.B.4. Fellows and faculty members must demonstrate an understanding
1338 of their personal role in the:

1339
1340 VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)
1341

1342 VI.B.4.b) safety and welfare of patients entrusted to their care,
1343 including the ability to report unsafe conditions and adverse
1344 events; ^(Outcome)
1345

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1346
1347
1348

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1362
1363
1364

VI.B.4.c).(1) management of their time before, during, and after clinical assignments; and, (Outcome)

VI.B.4.c).(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. (Outcome)

VI.B.4.d) commitment to lifelong learning; (Outcome)

VI.B.4.e) monitoring of their patient care performance improvement indicators; and, (Outcome)

VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. (Outcome)

VI.B.5. All fellows and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to another qualified and rested provider. (Outcome)

VI.B.6. Programs, in partnership with their Sponsoring Institutions, must provide a professional, equitable, respectful, and civil environment that is free from discrimination, sexual and other forms of harassment, mistreatment, abuse, or coercion of students, fellows, faculty, and staff. (Core)

VI.B.7. Programs, in partnership with their Sponsoring Institutions, should have a process for education of fellows and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. (Core)

VI.C. Well-Being

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being

1403

requires that physicians retain the joy in medicine while managing their own real life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of fellowship training.

Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

- VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:**
- VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)**
- VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; ^(Core)**
- VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; ^(Core)**

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1421
1422 VI.C.1.d) policies and programs that encourage optimal fellow and
1423 faculty member well-being; and, ^(Core)
1424

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1425
1426 VI.C.1.d).(1) Fellows must be given the opportunity to attend
1427 medical, mental health, and dental care appointments,
1428 including those scheduled during their working hours.
1429 ^(Core)
1430

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1431
1432 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1433 and substance use disorder. The program, in partnership with
1434 its Sponsoring Institution, must educate faculty members and
1435 fellows in identification of the symptoms of burnout,
1436 depression, and substance use disorder, including means to
1437 assist those who experience these conditions. Fellows and
1438 faculty members must also be educated to recognize those
1439 symptoms in themselves and how to seek appropriate care.
1440 The program, in partnership with its Sponsoring Institution,
1441 must: ^(Core)
1442

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (<https://dl.acgme.org/pages/well-being-tools-resources>).

1443
1444 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1445 program director or other designated personnel or
1446 programs when they are concerned that another
1447 fellow, resident, or faculty member may be displaying
1448 signs of burnout, depression, a substance use
1449 disorder, suicidal ideation, or potential for violence;
1450 ^(Core)
1451

Background and Intent: Individuals experiencing burnout, depression, a substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1452
1453 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1454 and, (Core)
1455
1456 VI.C.1.e).(3) provide access to confidential, affordable mental
1457 health assessment, counseling, and treatment,
1458 including access to urgent and emergent care 24
1459 hours a day, seven days a week. (Core)
1460

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1461
1462 VI.C.2. There are circumstances in which fellows may be unable to attend
1463 work, including but not limited to fatigue, illness, family
1464 emergencies, and parental leave. Each program must allow an
1465 appropriate length of absence for fellows unable to perform their
1466 patient care responsibilities. (Core)
1467
1468 VI.C.2.a) The program must have policies and procedures in place to
1469 ensure coverage of patient care. (Core)
1470
1471 VI.C.2.b) These policies must be implemented without fear of negative
1472 consequences for the fellow who is or was unable to provide
1473 the clinical work. (Core)
1474

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1475
1476 **VI.D. Fatigue Mitigation**
1477
1478 **VI.D.1. Programs must:**
1479
1480 **VI.D.1.a) educate all faculty members and fellows to recognize the**
1481 **signs of fatigue and sleep deprivation; ^(Core)**
1482
1483 **VI.D.1.b) educate all faculty members and fellows in alertness**
1484 **management and fatigue mitigation processes; and, ^(Core)**
1485
1486 **VI.D.1.c) encourage fellows to use fatigue mitigation processes to**
1487 **manage the potential negative effects of fatigue on patient**
1488 **care and learning. ^(Detail)**
1489

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1490
1491 **VI.D.2. Each program must ensure continuity of patient care, consistent**
1492 **with the program’s policies and procedures referenced in VI.C.2–**
1493 **VI.C.2.b), in the event that a fellow may be unable to perform their**
1494 **patient care responsibilities due to excessive fatigue. ^(Core)**
1495
1496 **VI.D.3. The program, in partnership with its Sponsoring Institution, must**
1497 **ensure adequate sleep facilities and safe transportation options for**
1498 **fellows who may be too fatigued to safely return home. ^(Core)**

1501
1502 **VI.E.1. Clinical Responsibilities**
1503
1504 **The clinical responsibilities for each fellow must be based on PGY**
1505 **level, patient safety, fellow ability, severity and complexity of patient**
1506 **illness/condition, and available support services. ^(Core)**
1507

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty

members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

- 1508
1509 **VI.E.2. Teamwork**
1510
1511 **Fellows must care for patients in an environment that maximizes**

1552

1553
1554
1555
1556
1557

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1558
1559
1560
1561
1562
1563
1564
1565

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be

structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

- 1566
1567 **VI.F.2. Mandatory Time Free of Clinical Work and Education**
1568
1569 **VI.F.2.a) The program must design an effective program structure that**
1570 **is configured to provide fellows with educational**
1571 **opportunities, as well as reasonable opportunities for rest**
1572 **and personal well-being.** ^(Core)
1573
1574 **VI.F.2.b) Fellows should have eight hours off between scheduled**
1575 **clinical work and education periods.** ^(Detail)
1576
1577 **VI.F.2.b).(1) There may be circumstances when fellows choose to**
1578 **stay to care for their patients or return to the hospital**
1579 **with fewer than eight hours free of clinical experience**
1580 **and education. This must occur within the context of**
1581 **the 80-hour and the one-day-off-in-seven**
1582 **requirements.** ^(Detail)
1583

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. (Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)

1608

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1609

1610

VI.F.4. Clinical and Educational Work Hour Exceptions

1611

1612

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

1613

1614

1615

1616

1617

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)

1618

1619

1620

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, ^(Detail)

1621

1622

1623

VI.F.4.a).(3) to attend unique educational events. ^(Detail)

1624

1625

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)

1626

1627

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1628

1629

VI.F.4.c) A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.

1630

1631

1632

1633

1634

The Review Committee for Psychiatry will not consider requests for exceptions to the 80-hour limit to the residents' work week.

1635

1636

1637

VI.F.5. Moonlighting

1638

1639

VI.F.5.a) Moonlighting must not interfere with the ability of the fellow to achieve the goals and objectives of the educational program, and must not interfere with the fellow's fitness for work nor compromise patient safety. ^(Core)

1640

1641

1642

1643
1644 **VI.F.5.b) Time spent by fellows in internal and external moonlighting**
1645 **(as defined in the ACGME Glossary of Terms) must be**
1646 **counted toward the 80-hour maximum weekly limit. ^(Core)**
1647

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1648
1649 **VI.F.6. In-House Night Float**
1650
1651 **Night float must occur within the context of the 80-hour and one-**
1652 **day-off-in-seven requirements. ^(Core)**
1653

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1654
1655 **VI.F.7. Maximum In-House On-Call Frequency**
1656
1657 **Fellows must be scheduled for in-house call no more frequently than**
1658 **every third night (when averaged over a four-week period). ^(Core)**
1659

1660 **VI.F.8. At-Home Call**

1661
1662 **VI.F.8.a) Time spent on patient care activities by fellows on at-home**
1663 **call must count toward the 80-hour maximum weekly limit.**
1664 **The frequency of at-home call is not subject to the every-**
1665 **third-night limitation, but must satisfy the requirement for one**
1666 **day in seven free of clinical work and education, when**
1667 **averaged over four weeks. ^(Core)**
1668

1669 **VI.F.8.a).(1) At-home call must not be so frequent or taxing as to**
1670 **preclude rest or reasonable personal time for each**
1671 **fellow. ^(Core)**
1672

1673 **VI.F.8.b) Fellows are permitted to return to the hospital while on at-**
1674 **home call to provide direct care for new or established**
1675 **patients. These hours of inpatient patient care must be**
1676 **included in the 80-hour maximum weekly limit. ^(Detail)**
1677

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.

***Core Requirements:** Statements that define structure, resource, or process elements essential to every graduate medical educational program.

†Detail Requirements: Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

‡Outcome Requirements: Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

Osteopathic Recognition

For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition Requirements also apply (www.acgme.org/OsteopathicRecognition).
