~~Diagnostic radiology subspecialty fellowship programs are designed to develop advanced knowledge and skills in a specific clinical area. The program design and/or structure must be approved by the Review Committee as part of the regular review process.~~

Nuclear radiology is defined as ~~a~~ the clinical subspecialty of radiology involving the diagnostic and therapeutic use of radioactive materials using unsealed sources. Radiologists select, interpret, and perform procedures, including diagnostic imaging by external detection of radionuclides, diagnostic in vivo or combination in vivo/in vitro procedures that involve the administration and detection of radioactivity by non-imaging means, and therapeutic administration of radionuclides.

Int.C. Length of Educational Program

The educational program in nuclear radiology must be at least 12 months in length. ^{(Core)*}

I. Oversight

I.A. Sponsoring Institution

The Sponsoring Institution is the organization or entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education consistent with the ACGME Institutional Requirements.

When the Sponsoring Institution is not a rotation site for the program, the most commonly utilized site of clinical activity for the program is the primary clinical site.

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

84
85
86
87
88
89

I.A.1. The program must be sponsored by one ACGME-accredited Sponsoring Institution. ^(Core)

I.B. Participating Sites

A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.

I.B.1. The program, with approval of its Sponsoring Institution, must designate a primary clinical site. ^(Core)

- 90
91 I.B.1.a) The Sponsoring Institution must also sponsor an ACGME-
92 accredited program in diagnostic radiology. ^(Core)
93
94 I.B.1.b) ~~A fellowship program in the subspecialties of diagnostic radiology~~
95 ~~should be accredited in institutions that either sponsor an~~
96 ~~ACGME-accredited residency program in diagnostic radiology or~~
97 ~~are integrated by formal agreement into such programs. Close~~
98 ~~cooperation between fellowship and residency program directors~~
99 ~~is required.~~
100
101 **I.B.2. There must be a program letter of agreement (PLA) between the**
102 **program and each participating site that governs the relationship**
103 **between the program and the participating site providing a required**
104 **assignment.** ^(Core)
105
106 **I.B.2.a) The PLA must:**
107
108 **I.B.2.a).(1) be renewed at least every 10 years; and,** ^(Core)
109
110 **I.B.2.a).(2) be approved by the designated institutional official**
111 **(DIO).** ^(Core)
112
113 **I.B.3. The program must monitor the clinical learning and working**
114 **environment at all participating sites.** ^(Core)
115
116 **I.B.3.a) At each participating site there must be one faculty member,**
117 **designated by the program director, who is accountable for**
118 **fellow education for that site, in collaboration with the**
119 **program director.** ^(Core)
120

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**

- **Stating the policies and procedures that will govern fellow education during the assignment**

121
122
123
124
125
126
127
128
129
130
131
132

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME’s Accreditation Data System (ADS). ^(Core)

I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. ^(Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

158
159
160
161
162
163

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. ^(Core)

I.D.1.a) The program must have access to a nuclear pharmacy. ^(Core)

I.D.1.b) There must be adequate office space for nuclear radiology faculty members, program administration, and fellows. ^(Core)

I.D.1.c) The program must have appropriate facilities and space for the education of the fellows. ^(Core)

I.D.1.c).(1) There must be adequate study space, conference space, and access to computers. ^(CoreDetail)

I.D.1.c).(2) Adequate space for image display, interpretation, and consultation with clinicians and referring physicians must be available. ^(Core)

I.D.1.d) All equipment required for nuclear radiology education must be modern and available. ^(Core)

I.D.1.e) ~~State-of-the-art~~ Access to routine nuclear imaging equipment, including thyroid probe, single photon emission computed tomography (SPECT) and SPECT/computed tomography (SPECT/CT), and positron emission tomography/CT (PET/CT), must be available for instructional purposes. ^(Core)

- 164 I.D.2. The program, in partnership with its Sponsoring Institution, must
 165 ensure healthy and safe learning and working environments that
 166 promote fellow well-being and provide for: ^(Core)
 167
 168 I.D.2.a) access to food while on duty; ^(Core)
 169
 170 I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available
 171 and accessible for fellows with proximity appropriate for safe
 172 patient care; ^(Core)
 173

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

- 174
 175 I.D.2.c) clean and private facilities for lactation that have refrigeration
 176 capabilities, with proximity appropriate for safe patient care;
 177 ^(Core)
 178

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

- 179
 180 I.D.2.d) security and safety measures appropriate to the participating
 181 site; and, ^(Core)
 182
 183 I.D.2.e) accommodations for fellows with disabilities consistent with
 184 the Sponsoring Institution's policy. ^(Core)
 185
 186 I.D.3. Fellows must have ready access to subspecialty-specific and other
 187 appropriate reference material in print or electronic format. This
 188 must include access to electronic medical literature databases with
 189 full text capabilities. ^(Core)
 190
 191 I.D.4. The program's educational and clinical resources must be adequate
 192 to support the number of fellows appointed to the program. ^(Core)
 193
 194 I.D.4.a) The program must ensure there is an adequate volume and
 195 variety of therapeutic procedures, imaging studies, and image-
 196 guided invasive procedures for the fellows' education. ^(Core)
 197

198 I.E. ***A fellowship program usually occurs in the context of many learners and***
199 ***other care providers and limited clinical resources. It should be structured***
200 ***to optimize education for all learners present.***

201
202 I.E.1. **Fellows should contribute to the education of residents in core**
203 **programs, if present. ^(Core)**
204

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

205
206 I.E.2. ~~The presence of other learners in the program, including residents from~~
207 ~~other specialties, subspecialty fellows, PhD students, and nurse~~
208 ~~practitioners, must not interfere with the appointed fellows' education.~~
209 ~~^(Detail)~~

210
211 I.E.3. **The fellows must not dilute or detract from the educational opportunities**
212 **available to residents in the core diagnostic radiology residency and in a**
213 **nuclear medicine residency program (if sponsored by the same**
214 **institution). ^(CoreDetail)**

215
216 I.E.4. **Lines of responsibilities for the diagnostic radiology residents and the**
217 **nuclear radiology ~~subspecialty~~ fellows must be clearly defined. ^(Core)**
218

Subspecialty-Specific Background and Intent: A close relationship and interaction between the fellowship program and the diagnostic radiology residency program will be essential in the management and oversight of the clinical environment to prevent dilution of education and training opportunities for both fellows and residents.

219
220 **II. Personnel**

221
222 **II.A. Program Director**

223
224 **II.A.1. There must be one faculty member appointed as program director**
225 **with authority and accountability for the overall program, including**
226 **compliance with all applicable program requirements. ^(Core)**

227
228 **II.A.1.a) The Sponsoring Institution's Graduate Medical Education**
229 **Committee (GMEC) must approve a change in program**
230 **director. ^(Core)**

231
232 **II.A.1.b) Final approval of the program director resides with the**
233 **Review Committee. ^(Core)**
234

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as

program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

235
236
237
238
239
240
241
242
243

II.A.2. The program director must be provided with support adequate for administration of the program based upon its size and configuration.
(Core)

II.A.2.a) At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program: (Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u>1-4</u>	<u>0.1</u>
<u>5-7</u>	<u>0.2</u>
<u>8 or more</u>	<u>0.3</u>

244

Background and Intent: Ten percent FTE is defined as one half day per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

245
246
247
248
249
250
251
252
253
254
255

257
258
259
260
261
262
263
264
265
266

II.A.3. Qualifications of the program director:

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; (Core)

II.A.3.a).(1) This must include post-residency experience in nuclear radiology, including fellowship education. (Core) [Moved from II.A.3.c)]

II.A.3.a).(2) This must include at least three years' experience as a faculty member in an ACGME-accredited diagnostic radiology, interventional radiology, or nuclear medicine residency or nuclear radiology fellowship program. (Core)

II.A.3.b) must include current certification in the subspecialty for which they are the program director by the American Board of Radiology, or subspecialty qualifications that are acceptable to the Review Committee; (Core)

[Note that while the Common Program Requirements deem certification by a certifying board of the American Osteopathic

267 Association (AOA) acceptable, there is no AOA board that offers
268 certification in this subspecialty]

269
270 II.A.3.b).(1) In lieu of subspecialty certification by the American Board
271 of Radiology, the Review Committee only accepts current
272 certification by the American Board of Nuclear Medicine or
273 the American Osteopathic Board of Nuclear Medicine. ^(Core)

274
275 II.A.3.c) must include devotion of at least 80 percent of his or her
276 professional ~~time~~ clinical contributions in nuclear radiology ~~the~~
277 subspecialty; and, ^(Core)

278
279 II.A.3.d) must include devotion of ~~devote~~ sufficient time to fulfill all
280 responsibilities inherent ~~in~~ to meeting the educational goals of the
281 program. ^(CoreDetail)

282
283 **II.A.4. Program Director Responsibilities**

284
285 **The program director must have responsibility, authority, and**
286 **accountability for: administration and operations; teaching and**
287 **scholarly activity; fellow recruitment and selection, evaluation, and**
288 **promotion of fellows, and disciplinary action; supervision of fellows;**
289 **and fellow education in the context of patient care.** ^(Core)

290
291 **II.A.4.a) The program director must:**

292
293 **II.A.4.a).(1) be a role model of professionalism;** ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

295
296 **II.A.4.a).(2) design and conduct the program in a fashion**
297 **consistent with the needs of the community, the**
298 **mission(s) of the Sponsoring Institution, and the**
299 **mission(s) of the program;** ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

301

302 II.A.4.a).(3) administer and maintain a learning environment
303 conducive to educating the fellows in each of the
304 ACGME Competency domains; (Core)
305

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

306
307 II.A.4.a).(4) develop and oversee a process to evaluate candidates
308 prior to approval as program faculty members for
309 participation in the fellowship program education and
310 at least annually thereafter, as outlined in V.B.; (Core)
311

312 II.A.4.a).(5) have the authority to approve program faculty
313 members for participation in the fellowship program
314 education at all sites; (Core)
315

316 II.A.4.a).(6) have the authority to remove program faculty
317 members from participation in the fellowship program
318 education at all sites; (Core)
319

320 II.A.4.a).(7) have the authority to remove fellows from supervising
321 interactions and/or learning environments that do not
322 meet the standards of the program; (Core)
323

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

324
325 II.A.4.a).(8) submit accurate and complete information required
326 and requested by the DIO, GMEC, and ACGME; (Core)
327

328 II.A.4.a).(9) provide applicants who are offered an interview with
329 information related to the applicant's eligibility for the
330 relevant subspecialty board examination(s); (Core)
331

332 II.A.4.a).(10) provide a learning and working environment in which
333 fellows have the opportunity to raise concerns and
334 provide feedback in a confidential manner as
335 appropriate, without fear of intimidation or retaliation;
336 (Core)
337

- 338 **II.A.4.a).(11)** ensure the program’s compliance with the Sponsoring
 339 Institution’s policies and procedures related to
 340 grievances and due process; ^(Core)
 341
 342 **II.A.4.a).(12)** ensure the program’s compliance with the Sponsoring
 343 Institution’s policies and procedures for due process
 344 when action is taken to suspend or dismiss, not to
 345 promote, or not to renew the appointment of a fellow;
 346 ^(Core)
 347

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution’s policies and procedures, and will ensure they are followed by the program’s leadership, faculty members, support personnel, and fellows.

- 348
 349 **II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring
 350 Institution’s policies and procedures on employment
 351 and non-discrimination; ^(Core)
 352
 353 **II.A.4.a).(13).(a)** **Fellows must not be required to sign a non-**
 354 **competition guarantee or restrictive covenant.**
 355 ^(Core)
 356
 357 **II.A.4.a).(14)** document verification of program completion for all
 358 graduating fellows within 30 days; ^(Core)
 359
 360 **II.A.4.a).(15)** provide verification of an individual fellow’s
 361 completion upon the fellow’s request, within 30 days;
 362 and, ^(Core)
 363

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 364
 365 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
 366 Institution’s DIO before submitting information or
 367 requests to the ACGME, as required in the Institutional
 368 Requirements and outlined in the ACGME Program
 369 Director’s Guide to the Common Program
 370 Requirements. ^(Core)
 371

372 **II.B. Faculty**

373

374 *Faculty members are a foundational element of graduate medical education*
 375 *– faculty members teach fellows how to care for patients. Faculty members*
 376 *provide an important bridge allowing fellows to grow and become practice*
 377 *ready, ensuring that patients receive the highest quality of care. They are*
 378 *role models for future generations of physicians by demonstrating*

379 *compassion, commitment to excellence in teaching and patient care,*
380 *professionalism, and a dedication to lifelong learning. Faculty members*
381 *experience the pride and joy of fostering the growth and development of*
382 *future colleagues. The care they provide is enhanced by the opportunity to*
383 *teach. By employing a scholarly approach to patient care, faculty members,*
384 *through the graduate medical education system, improve the health of the*
385 *individual and the population.*

386
387 *Faculty members ensure that patients receive the level of care expected*
388 *from a specialist in the field. They recognize and respond to the needs of*
389 *the patients, fellows, community, and institution. Faculty members provide*
390 *appropriate levels of supervision to promote patient safety. Faculty*
391 *members create an effective learning environment by acting in a*
392 *professional manner and attending to the well-being of the fellows and*
393 *themselves.*

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

395
396 **II.B.1. For each participating site, there must be a sufficient number of**
397 **faculty members with competence to instruct and supervise all**
398 **fellows at that location. ^(Core)**

399
400 **II.B.1.a)** To ensure adequate supervision and evaluation of fellows’
401 academic progress, there must be at least one FTE faculty
402 member for each fellow. ^(Core)

403
404 **II.B.2. Faculty members must:**

405
406 **II.B.2.a) be role models of professionalism; ^(Core)**

407
408 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**
409 **cost-effective, patient-centered care; ^(Core)**

410
Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

411
412 **II.B.2.c) demonstrate a strong interest in the education of fellows; ^(Core)**

413
414 **II.B.2.d) devote sufficient time to the educational program to fulfill**
415 **their supervisory and teaching responsibilities; ^(Core)**

416
417 **II.B.2.e) administer and maintain an educational environment**
418 **conducive to educating fellows; ^(Core)**

419
420 **II.B.2.f) regularly participate in organized clinical discussions,**
421 **rounds, journal clubs, and conferences; and, ^(Core)**

422
423 **II.B.2.g) pursue faculty development designed to enhance their skills**
424 **at least annually. (Core)**
425

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

426
427 **II.B.3. Faculty Qualifications**
428

429 **II.B.3.a) Faculty members must have appropriate qualifications in**
430 **their field and hold appropriate institutional appointments.**
431 **(Core)**

432
433 **II.B.3.b) Subspecialty physician faculty members must:**

434
435 **II.B.3.b).(1) have current certification in the subspecialty by the**
436 **American Board of Radiology, or possess**
437 **qualifications judged acceptable to the Review**
438 **Committee; and, (Core)**

439
440 [Note that while the Common Program Requirements
441 deem certification by a certifying board of the American
442 Osteopathic Association (AOA) acceptable, there is no
443 AOA board that offers certification in this subspecialty]

444
445 **II.B.3.b).(2) ~~In addition, faculty members must be certified either by the~~**
446 **American Board of Radiology or American Osteopathic**
447 **Board of Radiology in diagnostic radiology, ~~or by the~~**
448 **American Board of Radiology in nuclear radiology, or by**
449 **the American Board of Nuclear Medicine or American**
450 **Osteopathic Board of Nuclear Medicine in nuclear**
451 **medicine, or possess qualifications acceptable to the**
452 **Review Committee. (Core)**

453
454 **II.B.3.c) Any non-physician faculty members who participate in**
455 **fellowship program education must be approved by the**
456 **program director. (Core)**
457

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

458
459 **II.B.3.d)** Any other specialty physician faculty members must have
460 current certification in their specialty by the appropriate
461 American Board of Medical Specialties (ABMS) member
462 board or American Osteopathic Association (AOA) certifying
463 board, or possess qualifications judged acceptable to the
464 Review Committee. ^(Core)

465
466 **II.B.4.** Core Faculty
467
468 Core faculty members must have a significant role in the education
469 and supervision of fellows and must devote a significant portion of
470 their entire effort to fellow education and/or administration, and
471 must, as a component of their activities, teach, evaluate, and provide
472 formative feedback to fellows. ^(Core)
473

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

474
475 **II.B.4.a)** Core faculty members must be designated by the program
476 director. ^(Core)
477

478 **II.B.4.b)** Core faculty members must complete the annual ACGME
479 Faculty Survey. ^(Core)
480

481 **II.B.4.c)** The nuclear radiology faculty must have a minimum of two FTE
482 core faculty members, which must include the program director
483 and at least one other FTE faculty member who is ABR-certified
484 experienced in nuclear radiology or ABNM-/AOBNM-certified in
485 nuclear medicine. ^(Core)
486

487 **II.C.** Program Coordinator
488

489 **II.C.1.** There must be a program coordinator. ^(Core)
490

491 **II.C.2.** The program coordinator must be provided with support adequate
492 for administration of the program based upon its size and
493 configuration. ^(Core)
494

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

495
496
497
498
499
500
501

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

515
516
517

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada. ^(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

518
519
520
521
522
523

III.A.1.a) Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. ^(Core)

- 524 III.A.1.b) Prerequisite ~~education-experience~~ for entry into the fellowship
525 program should include the satisfactory completion of a diagnostic
526 radiology or interventional radiology residency program that
527 satisfies the requirements in III.A.1. (Core)
528
- 529 III.A.1.c) **Fellow Eligibility Exception**
530
531 **The Review Committee for Radiology will allow the following**
532 **exception to the fellowship eligibility requirements:**
533
- 534 III.A.1.c).(1) **An ACGME-accredited fellowship program may accept**
535 **an exceptionally qualified international graduate**
536 **applicant who does not satisfy the eligibility**
537 **requirements listed in III.A.1., but who does meet all of**
538 **the following additional qualifications and conditions:**
539 (Core)
540
- 541 III.A.1.c).(1).(a) **evaluation by the program director and**
542 **fellowship selection committee of the**
543 **applicant’s suitability to enter the program,**
544 **based on prior training and review of the**
545 **summative evaluations of training in the core**
546 **specialty; and, (Core)**
547
- 548 III.A.1.c).(1).(b) **review and approval of the applicant’s**
549 **exceptional qualifications by the GMEC; and,**
550 (Core)
551
- 552 III.A.1.c).(1).(c) **verification of Educational Commission for**
553 **Foreign Medical Graduates (ECFMG)**
554 **certification. (Core)**
555
- 556 III.A.1.c).(2) **Applicants accepted through this exception must have**
557 **an evaluation of their performance by the Clinical**
558 **Competency Committee within 12 weeks of**
559 **matriculation. (Core)**
560

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed

as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

561
562 **III.B. The program director must not appoint more fellows than approved by the**
563 **Review Committee. (Core)**
564

565 **III.B.1. All complement increases must be approved by the Review**
566 **Committee. (Core)**
567

568 **III.C. Fellow Transfers**
569

570 **The program must obtain verification of previous educational experiences**
571 **and a summative competency-based performance evaluation prior to**
572 **acceptance of a transferring fellow, and Milestones evaluations upon**
573 **matriculation. (Core)**
574

575 **IV. Educational Program**
576

577 ***The ACGME accreditation system is designed to encourage excellence and***
578 ***innovation in graduate medical education regardless of the organizational***
579 ***affiliation, size, or location of the program.***
580

581 ***The educational program must support the development of knowledgeable, skillful***
582 ***physicians who provide compassionate care.***
583

584 ***In addition, the program is expected to define its specific program aims consistent***
585 ***with the overall mission of its Sponsoring Institution, the needs of the community***
586 ***it serves and that its graduates will serve, and the distinctive capabilities of***
587 ***physicians it intends to graduate. While programs must demonstrate substantial***
588 ***compliance with the Common and subspecialty-specific Program Requirements, it***
589 ***is recognized that within this framework, programs may place different emphasis***
590 ***on research, leadership, public health, etc. It is expected that the program aims***
591 ***will reflect the nuanced program-specific goals for it and its graduates; for***
592 ***example, it is expected that a program aiming to prepare physician-scientists will***
593 ***have a different curriculum from one focusing on community health.***
594

595 **IV.A. The curriculum must contain the following educational components: (Core)**
596

597 **IV.A.1. a set of program aims consistent with the Sponsoring Institution's**
598 **mission, the needs of the community it serves, and the desired**
599 **distinctive capabilities of its graduates; (Core)**
600

601 **IV.A.1.a) The program's aims must be made available to program**
602 **applicants, fellows, and faculty members. (Core)**
603

604 **IV.A.2. competency-based goals and objectives for each educational**
605 **experience designed to promote progress on a trajectory to**
606 **autonomous practice in their subspecialty. These must be**
607 **distributed, reviewed, and available to fellows and faculty members;**
608 **(Core)**
609

610 IV.A.3. delineation of fellow responsibilities for patient care, progressive
611 responsibility for patient management, and graded supervision in
612 their subspecialty; ^(Core)
613

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

614
615 IV.A.4. structured educational activities beyond direct patient care; and,
616 ^(Core)
617

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

618
619 IV.A.5. advancement of fellows' knowledge of ethical principles
620 foundational to medical professionalism. ^(Core)
621

622 IV.B. ACGME Competencies
623

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

624
625 IV.B.1. The program must integrate the following ACGME Competencies
626 into the curriculum: ^(Core)
627

628 IV.B.1.a) Professionalism

629
630 Fellows must demonstrate a commitment to professionalism
631 and an adherence to ethical principles. ^(Core)
632

633 IV.B.1.b) Patient Care and Procedural Skills
634

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.*) In addition, there

should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

 961 IV.B.1.c).(6) Fellows should ~~develop~~ demonstrate knowledge of and
 962 skills in preparing and presenting educational material for
 963 medical students, residents, graduate medical staff
 964 members, and allied health personnel. (Core)
 965
 966 **IV.B.1.d) Practice-based Learning and Improvement**
 967
 968 **Fellows must demonstrate the ability to investigate and**
 969 **evaluate their care of patients, to appraise and assimilate**
 970 **scientific evidence, and to continuously improve patient care**
 971 **based on constant self-evaluation and lifelong learning.** (Core)
 972

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

- 973
 974 **IV.B.1.e) Interpersonal and Communication Skills**
 975

976 **Fellows must demonstrate interpersonal and communication**

- Research in basic science, education, translational science, patient care, or population health
 - Peer-reviewed grants
 - Quality improvement and/or patient safety initiatives
 - Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
 - Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
 - Contribution to professional committees, educational organizations, or editorial boards
 - Innovations in education

1103 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
1104 **activity within and external to the program by the following**
1105 **methods:**

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1107
1108 **IV.D.2.b).(1) faculty participation in grand rounds, posters,**
1109 **workshops, quality improvement presentations,**
1110 **podium presentations, grant leadership, non-peer-**

1117 IV.D.2.b).(2) peer-reviewed publication. (Outcome)

1118
1119 IV.D.3. Fellow Scholarly Activity

1120
1121 IV.D.3.a) The program must provide instruction in the fundamentals of
1122 research principles, including experimental design, and
1123 performance of, and interpretation of results. (Core)

1124
1125 IV.D.3.b) All fellows must engage in a scholarly project. (Core)

1126
1127 IV.D.3.b).(1) This Scholarly projects should may take the form of
1128 demonstrate the fellows' competence in the fundamentals
1129 of research by the completion of and/or participation in one
1130 of the following projects, but not limited to:

1131
1132 IV.D.3.b).(1).(a) laboratory research; (Detail)

1133
1134 IV.D.3.b).(1).(b) clinical research; or, (Detail)

1135
1136 IV.D.3.b).(1).(c) analysis of disease processes, imaging techniques,
1137 or practice management issues. (Detail)

1138
1139 IV.D.3.b).(2) The results of such projects ~~should~~ must be submitted
1140 disseminated in the academic community by either
1141 submission for publication within a printed journal or online
1142 educational resource, or presentationed at departmental,
1143 institutional, local, regional, national, or international
1144 meetings. (Outcome)

1145
1146 V. Evaluation

1147
1148 V.A. Fellow Evaluation

1149
1150 V.A.1. Feedback and Evaluation

1151

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**

- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1152
1153
1154
1155
1156

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1157

1174
1175
1176
1177
1178
1179

~~V.A.1.a).(1) The program must ensure that there is at least a quarterly review. ^(Core)~~

~~V.A.1.a).(1).(a) These reviews should include:~~

~~V.A.1.a).(1).(a).(i) review of faculty members' evaluations of the fellow; ^(Detail)~~

~~V.A.1.a).(1).(a).(ii) review of the procedure log; and, ^(Detail)~~

~~V.A.1.a).(1).(a).(iii) documentation of compliance with institutional and departmental policies (HIPAA, the Joint Commission, patient safety, infection control, etc). ^(Detail)~~

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

1180 **V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in
1181 the context of other clinical responsibilities must be
1182 evaluated at least every three months and at
1183 completion. ^(Core)
1184

Specialty-Specific Background and Intent: A complete quarterly evaluation also includes a review of the fellows' procedure log, procedural competencies, and documentation of compliance with institutional and departmental policies (HIPAA, the Joint Commission, patient safety, infection control, etc.).

1185
1186 **V.A.1.c)** The program must provide an objective performance
1187 evaluation based on the Competencies and the subspecialty-
1188 specific Milestones, and must: ^(Core)
1189

1190 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,
1191 patients, self, and other professional staff members);
1192 and, ^(Core)
1193

1194 **V.A.1.c).(2)** provide that information to the Clinical Competency
1195 Committee for its synthesis of progressive fellow
1196 performance and improvement toward unsupervised
1197 practice. ^(Core)
1198

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

1199
1200 **V.A.1.d)** The program director or their designee, with input from the
1201 Clinical Competency Committee, must:
1202

1203 **V.A.1.d).(1)** meet with and review with each fellow their
1204 documented semi-annual evaluation of performance,
1205 including progress along the subspecialty-specific
1206 Milestones. ^(Core)
1207

1208 **V.A.1.d).(2)** assist fellows in developing individualized learning
1209 plans to capitalize on their strengths and identify areas
1210 for growth; and, ^(Core)
1211

1212 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
1213 institutional policies and procedures. ^(Core)
1214

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1215		
1216	V.A.1.e)	At least annually, there must be a summative evaluation of each fellow that includes their readiness to progress to the next year of the program, if applicable. (Core)
1217		
1218		
1219		
1220	V.A.1.f)	The evaluations of a fellow's performance must be accessible for review by the fellow. (Core)
1221		
1222		
1223	V.A.2.	Final Evaluation
1224		
1225	V.A.2.a)	The program director must provide a final evaluation for each fellow upon completion of the program. (Core)
1226		
1227		
1228	V.A.2.a).(1)	The subspecialty-specific Milestones, and when applicable the subspecialty-specific Case Logs, must be used as tools to ensure fellows are able to engage in autonomous practice upon completion of the program. (Core)
1229		
1230		
1231		
1232		
1233		
1234	V.A.2.a).(2)	The final evaluation must:
1235		
1236	V.A.2.a).(2).(a)	become part of the fellow's permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; (Core)
1237		
1238		
1239		
1240		
1241	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; (Core)
1242

1244		
1245	V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, (Core)
1246		
1247		

- 1248 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of
 1249 the program. ^(Core)
 1250
 1251 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
 1252 **program director.** ^(Core)
 1253
 1254 **V.A.3.a)** **At a minimum the Clinical Competency Committee must**
 1255 **include three members, at least one of whom is a core faculty**
 1256 **member. Members must be faculty members from the same**
 1257 **program or other programs, or other health professionals**
 1258 **who have extensive contact and experience with the**
 1259 **program’s fellows.** ^(Core)
 1260
 1261 **V.A.3.b)** **The Clinical Competency Committee must:**
 1262
 1263 **V.A.3.b).(1)** **review all fellow evaluations at least semi-annually;**
 1264 ^(Core)
 1265
 1266 **V.A.3.b).(2)** **determine each fellow’s progress on achievement of**
 1267 **the subspecialty-specific Milestones; and,** ^(Core)
 1268
 1269 **V.A.3.b).(3)** **meet prior to the fellows’ semi-annual evaluations and**
 1270 **advise the program director regarding each fellow’s**
 1271 **progress.** ^(Core)
 1272
 1273 **V.B. Faculty Evaluation**
 1274
 1275 **V.B.1.** **The program must have a process to evaluate each faculty**
 1276 **member’s performance as it relates to the educational program at**
 1277 **least annually.** ^(Core)
 1278

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1279

- 1280 **V.B.1.a)** This evaluation must include a review of the faculty member's
 1281 clinical teaching abilities, engagement with the educational
 1282 program, participation in faculty development related to their
 1283 skills as an educator, clinical performance, professionalism,
 1284 and scholarly activities. ^(Core)
 1285
- 1286 **V.B.1.b)** This evaluation must include written, confidential evaluations
 1287 by the fellows. ^(Core)
 1288
- 1289 **V.B.2.** Faculty members must receive feedback on their evaluations at least
 1290 annually. ^(Core)
 1291
- 1292 **V.B.3.** Results of the faculty educational evaluations should be
 1293 incorporated into program-wide faculty development plans. ^(Core)
 1294

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1295
- 1296 **V.C. Program Evaluation and Improvement**
- 1297
- 1298 **V.C.1.** The program director must appoint the Program Evaluation
 1299 Committee to conduct and document the Annual Program
 1300 Evaluation as part of the program's continuous improvement
 1301 process. ^(Core)
 1302
- 1303 **V.C.1.a)** The Program Evaluation Committee must be composed of at
 1304 least two program faculty members, at least one of whom is a
 1305 core faculty member, and at least one fellow. ^(Core)
 1306
- 1307 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
- 1308
- 1309 **V.C.1.b).(1)** acting as an advisor to the program director, through
 1310 program oversight; ^(Core)
 1311
- 1312 **V.C.1.b).(2)** review of the program's self-determined goals and
 1313 progress toward meeting them; ^(Core)
 1314
- 1315 **V.C.1.b).(3)** guiding ongoing program improvement, including
 1316 development of new goals, based upon outcomes;
 1317 and, ^(Core)
 1318
- 1319 **V.C.1.b).(4)** review of the current operating environment to identify
 1320 strengths, challenges, opportunities, and threats as
 1321 related to the program's mission and aims. ^(Core)
 1322

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual

Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1323
1324 **V.C.1.c)** **The Program Evaluation Committee should consider the**
1325 **following elements in its assessment of the program:**
1326
1327 **V.C.1.c).(1)** **curriculum;** ^(Core)
1328

1369

- 1370 V.C.1.c).(7).(b) professional development ^(Core)
- 1371
- 1372 V.C.1.d) The Program Evaluation Committee must evaluate the
1373 program's mission and aims, strengths, areas for
1374 improvement, and threats. ^(Core)
- 1375
- 1376 V.C.1.e) The annual review, including the action plan, must:
- 1377
- 1378 V.C.1.e).(1) be distributed to and discussed with the members of
1379 the teaching faculty and the fellows; and, ^(Core)
- 1380
- 1381 V.C.1.e).(2) be submitted to the DIO. ^(Core)
- 1382
- 1383 V.C.2. The program must participate in a Self-Study prior to its 10-Year
1384 Accreditation Site Visit. ^(Core)
- 1385
- 1386 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
1387 ^(Core)
- 1388

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1389
- 1390 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
1391 *who seek and achieve board certification. One measure of the*
1392 *effectiveness of the educational program is the ultimate pass rate.*
- 1393
- 1394 *The program director should encourage all eligible program*
1395 *graduates to take the certifying examination offered by the*
1396 *applicable American Board of Medical Specialties (ABMS) member*
1397 *board or American Osteopathic Association (AOA) certifying board.*
- 1398
- 1399 V.C.3.a) For subspecialties in which the ABMS member board and/or
1400 AOA certifying board offer(s) an annual written exam, in the
1401 preceding three years, the program's aggregate pass rate of
1402 those taking the examination for the first time must be higher
1403 than the bottom fifth percentile of programs in that
1404 subspecialty. ^(Outcome)
- 1405
- 1406 V.C.3.b) For subspecialties in which the ABMS member board and/or
1407 AOA certifying board offer(s) a biennial written exam, in the
1408 preceding six years, the program's aggregate pass rate of
1409 those taking the examination for the first time must be higher

- 1410 than the bottom fifth percentile of programs in that
 1411 subspecialty. ^(Outcome)
 1412
 1413 **V.C.3.c)** For subspecialties in which the ABMS member board and/or
 1414 AOA certifying board offer(s) an annual oral exam, in the
 1415 preceding three years, the program’s aggregate pass rate of
 1416 those taking the examination for the first time must be higher
 1417 than the bottom fifth percentile of programs in that
 1418 subspecialty. ^(Outcome)
 1419
 1420 **V.C.3.d)** For subspecialties in which the ABMS member board and/or
 1421 AOA certifying board offer(s) a biennial oral exam, in the
 1422 preceding six years, the program’s aggregate pass rate of
 1423 those taking the examination for the first time must be higher
 1424 than the bottom fifth percentile of programs in that
 1425 subspecialty. ^(Outcome)
 1426
 1427 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
 1428 whose graduates over the time period specified in the
 1429 requirement have achieved an 80 percent pass rate will have
 1430 met this requirement, no matter the percentile rank of the
 1431 program for pass rate in that subspecialty. ^(Outcome)
 1432

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1433
 1434 **V.C.3.f)** Programs must report, in ADS, board certification status
 1435 annually for the cohort of board-eligible fellows that
 1436 graduated seven years earlier. ^(Core)
 1437

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates’ performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1460
1461
1462

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

1463 **VI.A.1. Patient Safety and Quality Improvement**
1464
1465 *All physicians share responsibility for promoting patient safety and*
1466 *enhancing quality of patient care. Graduate medical education must*
1467 *prepare fellows to provide the highest level of clinical care with*
1468 *continuous focus on the safety, individual needs, and humanity of*
1469 *their patients. It is the right of each patient to be cared for by fellows*
1470 *who are appropriately supervised; possess the requisite knowledge,*
1471 *skills, and abilities; understand the limits of their knowledge and*
1472 *experience; and seek assistance as required to provide optimal*
1473 *patient care.*
1474
1475 *Fellows must demonstrate the ability to analyze the care they*
1476 *provide, understand their roles within health care teams, and play an*
1477 *active role in system improvement processes. Graduating fellows*
1478 *will apply these skills to critique their future unsupervised practice*
1479 *and effect quality improvement measures.*
1480
1481 *It is necessary for fellows and faculty members to consistently work*
1482 *in a well-coordinated manner with other health care professionals to*
1483 *achieve organizational patient safety goals.*
1484
1485 **VI.A.1.a) Patient Safety**
1486
1487 **VI.A.1.a).(1) Culture of Safety**
1488
1489 *A culture of safety requires continuous identification*
1490 *of vulnerabilities and a willingness to transparently*
1491 *deal with them. An effective organization has formal*
1492 *mechanisms to assess the knowledge, skills, and*
1493 *attitudes of its personnel toward safety in order to*
1494 *identify areas for improvement.*
1495
1496 **VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows**
1497 **must actively participate in patient safety**
1498 **systems and contribute to a culture of safety.**
1499 **(Core)**
1500
1501 **VI.A.1.a).(1).(b) The program must have a structure that**
1502 **promotes safe, interprofessional, team-based**
1503 **care. (Core)**
1504
1505 **VI.A.1.a).(2) Education on Patient Safety**
1506
1507 **Programs must provide formal educational activities**
1508 **that promote patient safety-related goals, tools, and**
1509 **techniques. (Core)**
1510

<p>Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.</p>
--

1511

1512	VI.A.1.a).(3)	Patient Safety Events
1513		
1514		<i>Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety, and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.</i>

1541		
1542		
1543		
1544		
1545		
1546	VI.A.1.a).(4)	Fellow Education and Experience in Disclosure of Adverse Events
1547		
1548		
1549		<i>Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for fellows to develop and apply.</i>
1550		
1551		
1552		
1553		
1554		
1555	VI.A.1.a).(4).(a)	All fellows must receive training in how to disclose adverse events to patients and families.
1556		<small>(Core)</small>
1557		
1558		
1559	VI.A.1.a).(4).(b)	Fellows should have the opportunity to participate in the disclosure of patient safety events, real or simulated.
1560		<small>(Detail)</small>
1561		
1562		

1563	VI.A.1.b)	Quality Improvement
1564		
1565	VI.A.1.b).(1)	Education in Quality Improvement
1566		
1567		<i>A cohesive model of health care includes quality-</i>
1568		<i>related goals, tools, and techniques that are necessary</i>
1569		<i>in order for health care professionals to achieve</i>
1570		<i>quality improvement goals.</i>
1571		
1572	VI.A.1.b).(1).(a)	Fellows must receive training and experience in
1573		quality improvement processes, including an
1574		understanding of health care disparities. ^(Core)
1575		
1576	VI.A.1.b).(2)	Quality Metrics
1577		
1578		<i>Access to data is essential to prioritizing activities for</i>
1579		<i>care improvement and evaluating success of</i>
1580		<i>improvement efforts.</i>
1581		
1582	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data
1583		on quality metrics and benchmarks related to
1584		their patient populations. ^(Core)
1585		
1586	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1587		
1588		<i>Experiential learning is essential to developing the</i>
1589		<i>ability to identify and institute sustainable systems-</i>
1590		<i>based changes to improve patient care.</i>
1591		
1592	VI.A.1.b).(3).(a)	Fellows must have the opportunity to
1593		participate in interprofessional quality
1594		improvement activities. ^(Core)
1595		
1596	VI.A.1.b).(3).(a).(i)	This should include activities aimed at
1597		reducing health care disparities. ^(Detail)
1598		
1599	VI.A.2.	Supervision and Accountability
1600		
1601	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for</i>
1602		<i>the care of the patient, every physician shares in the</i>
1603		<i>responsibility and accountability for their efforts in the</i>
1604		<i>provision of care. Effective programs, in partnership with</i>
1605		<i>their Sponsoring Institutions, define, widely communicate,</i>
1606		<i>and monitor a structured chain of responsibility and</i>
1607		<i>accountability as it relates to the supervision of all patient</i>
1608		<i>care.</i>
1609		
1610		<i>Supervision in the setting of graduate medical education</i>
1611		<i>provides safe and effective care to patients; ensures each</i>
1612		<i>fellow's development of the skills, knowledge, and attitudes</i>

1613 *required to enter the unsupervised practice of medicine; and*
1614 *establishes a foundation for continued professional growth.*

1615
1616 **VI.A.2.a).(1)** Each patient must have an identifiable and
1617 appropriately-credentialed and privileged attending
1618 physician (or licensed independent practitioner as
1619 specified by the applicable Review Committee) who is
1620 responsible and accountable for the patient's care.
1621 (Core)

1622
1623 **VI.A.2.a).(1).(a)** This information must be available to fellows,
1624 faculty members, other members of the health
1625 care team, and patients. (Core)

1626
1627 **VI.A.2.a).(1).(b)** Fellows and faculty members must inform each
1628 patient of their respective roles in that patient's
1629 care when providing direct patient care. (Core)

1630
1631 **VI.A.2.b)** *Supervision may be exercised through a variety of methods.*
1632 *For many aspects of patient care, the supervising physician*
1633 *may be a more advanced fellow. Other portions of care*
1634 *provided by the fellow can be adequately supervised by the*
1635 *appropriate availability of the supervising faculty member or*
1636 *fellow, either on site or by means of telecommunication*
1637 *technology. Some activities require the physical presence of*
1638 *the supervising faculty member. In some circumstances,*
1639 *supervision may include post-hoc review of fellow-delivered*
1640 *care with feedback.*

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1642
1643 **VI.A.2.b).(1)** The program must demonstrate that the appropriate
1644 level of supervision in place for all fellows is based on
1645 each fellow's level of training and ability, as well as
1646 patient complexity and acuity. Supervision may be
1647 exercised through a variety of methods, as appropriate
1648 to the situation. (Core)

1649
1650 **VI.A.2.b).(2)** The program must define when physical presence of a
1651 supervising physician is required. (Core)

1652
1653 **VI.A.2.c)** **Levels of Supervision**
1654

1655		To promote appropriate fellow supervision while providing
1656		for graded authority and responsibility, the program must use
1657		the following classification of supervision: ^(Core)
1658		
1659	VI.A.2.c).(1)	Direct Supervision:
1660		
1661	VI.A.2.c).(1).(a)	the supervising physician is physically present
1662		with the fellow during the key portions of the
1663		patient interaction; or, ^(Core)
1664		
1665	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not
1666		physically present with the fellow and the
1667		supervising physician is concurrently
1668		monitoring the patient care through appropriate
1669		telecommunication technology. ^(Core)
1670		
1671	VI.A.2.c).(1).(b).(i)	<u>The program must have clear guidelines</u>
1672		<u>that delineate which competencies must be</u>
1673		<u>met to determine when a fellow can</u>
1674		<u>progress to indirect supervision.</u> ^(Core)
1675		
1676	VI.A.2.c).(1).(b).(ii)	<u>The program director must ensure that clear</u>
1677		<u>expectations exist and are communicated to</u>
1678		<u>the fellows, and that these expectations</u>
1679		<u>outline specific situations in which a fellow</u>
1680		<u>would still require direct supervision.</u> ^(Core)
1681		
1682	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not
1683		providing physical or concurrent visual or audio
1684		supervision but is immediately available to the fellow
1685		for guidance and is available to provide appropriate
1686		direct supervision. ^(Core)
1687		
1688	VI.A.2.c).(3)	Oversight – the supervising physician is available to
1689		provide review of procedures/encounters with
1690		feedback provided after care is delivered. ^(Core)
1691		
1692	VI.A.2.d)	The privilege of progressive authority and responsibility,
1693		conditional independence, and a supervisory role in patient
1694		care delegated to each fellow must be assigned by the
1695		program director and faculty members. ^(Core)
1696		
1697	VI.A.2.d).(1)	The program director must evaluate each fellow’s
1698		abilities based on specific criteria, guided by the
1699		Milestones. ^(Core)
1700		
1701	VI.A.2.d).(2)	Faculty members functioning as supervising
1702		physicians must delegate portions of care to fellows
1703		based on the needs of the patient and the skills of
1704		each fellow. ^(Core)
1705		

1706 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
1707 fellows and residents in recognition of their progress
1708 toward independence, based on the needs of each
1709 patient and the skills of the individual resident or
1710 fellow. ^(Detail)

1712 VI.A.2.e) Programs must set guidelines for circumstances and events
1713 in which fellows must communicate with the supervising
1714 faculty member(s). ^(Core)

1716 VI.A.2.e).(1) Each fellow must know the limits of their scope of
1717 authority, and the circumstances under which the
1718 fellow is permitted to act with conditional
1719 independence. ^(Outcome)

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1721
1722 VI.A.2.f) Faculty supervision assignments must be of sufficient
1723 duration to assess the knowledge and skills of each fellow
1724 and to delegate to the fellow the appropriate level of patient
1725 care authority and responsibility. ^(Core)

1727 VI.B. Professionalism

1729 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
1730 educate fellows and faculty members concerning the professional
1731 responsibilities of physicians, including their obligation to be
1732 appropriately rested and fit to provide the care required by their
1733 patients. ^(Core)

1735 VI.B.2. The learning objectives of the program must:

1737 VI.B.2.a) be accomplished through an appropriate blend of supervised
1738 patient care responsibilities, clinical teaching, and didactic
1739 educational events; ^(Core)

1741 VI.B.2.b) be accomplished without excessive reliance on fellows to
1742 fulfill non-physician obligations; and, ^(Core)

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these

things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1744
1745
1746

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1747
1748
1749

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. (Core)

VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:

VI.B.4.a) provision of patient- and family-centered care; (Outcome)

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; (Outcome)

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1761
1762
1763

VI.B.4.c) assurance of their fitness for work, including; (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1818

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:

VI.C.1.a) efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)

VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts fellow well-being; ^(Core)

VI.C.1.c) evaluating workplace safety data and addressing the safety of fellows and faculty members; ^(Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1836
1837
1838
1839

VI.C.1.d) policies and programs that encourage optimal fellow and faculty member well-being; and, ^(Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1840
1841
1842
1843
1844
1845

VI.C.1.d).(1) Fellows must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours. ^(Core)

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1846
1847
1848

VI.C.1.e) attention to fellow and faculty member burnout, depression, and substance use disorder. The program, in partnership with

1849 its Sponsoring Institution, must educate faculty members and
1850 fellows in identification of the symptoms of burnout,
1851 depression, and substance use disorder, including means to
1852 assist those who experience these conditions. Fellows and
1853 faculty members must also be educated to recognize those
1854 symptoms in themselves and how to seek appropriate care.
1855 The program, in partnership with its Sponsoring Institution,
1856 must: ^(Core)
1857

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1858
1859 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1860 program director or other designated personnel or
1861 programs when they are concerned that another
1862 fellow, resident, or faculty member may be displaying
1863 signs of burnout, depression, a substance use
1864 disorder, suicidal ideation, or potential for violence;
1865 ^(Core)
1866

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1867
1868 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1869 and, ^(Core)
1870
1871 VI.C.1.e).(3) provide access to confidential, affordable mental
1872 health assessment, counseling, and treatment,
1873 including access to urgent and emergent care 24
1874 hours a day, seven days a week. ^(Core)
1875

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health

issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- VI.D. **Fatigue Mitigation**
- VI.D.1. **Programs must:**
 - VI.D.1.a) educate all faculty members and fellows to recognize the signs of fatigue and sleep deprivation; ^(Core)
 - VI.D.1.b) educate all faculty members and fellows in alertness management and fatigue mitigation processes; and, ^(Core)
 - VI.D.1.c) encourage fellows to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. ^(Detail)

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active

to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- VI.D.2.** Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2–VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue. ^(Core)
- VI.D.3.** The program, in partnership with its Sponsoring Institution, must ensure adequate sleep facilities and safe transportation options for fellows who may be too fatigued to safely return home. ^(Core)
- VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
- VI.E.1. Clinical Responsibilities**
- The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. ^(Core)

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1953		
1954		
1955		
1956		
1957	VI.F.	Clinical Experience and Education <i>Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.</i>
1958		
1959		
1960		
1961		
1962		
1963		
1963		

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1964	VI.F.1.	Maximum Hours of Clinical and Educational Work per Week Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. (Core)
1965		
1966		
1967		
1968		
1969		
1970		
1971		

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling
While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their

scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1972
1973
1974

VI.F.2. Mandatory Time Free of Clinical Work and Education

- 1975 VI.F.2.a) The program must design an effective program structure that
 1976 is configured to provide fellows with educational
 1977 opportunities, as well as reasonable opportunities for rest
 1978 and personal well-being. ^(Core)
 1979
- 1980 VI.F.2.b) Fellows should have eight hours off between scheduled
 1981 clinical work and education periods. ^(Detail)
 1982
- 1983 VI.F.2.b).(1) There may be circumstances when fellows choose to
 1984 stay to care for their patients or return to the hospital
 1985 with fewer than eight hours free of clinical experience
 1986 and education. This must occur within the context of
 1987 the 80-hour and the one-day-off-in-seven
 1988 requirements. ^(Detail)
 1989

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

- 1990
- 1991 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
 1992 education after 24 hours of in-house call. ^(Core)
 1993

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

- 1994
- 1995 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
 1996 seven free of clinical work and required education (when
 1997 averaged over four weeks). At-home call cannot be assigned
 1998 on these free days. ^(Core)
 1999

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is

defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. ^(Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. ^(Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4. Clinical and Educational Work Hour Exceptions

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, ^(Detail)

VI.F.4.a).(3) to attend unique educational events. ^(Detail)

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and

that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

VI.F.7. Maximum In-House On-Call Frequency

Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). ^(Core)

VI.F.8. At-Home Call

VI.F.8.a) **Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. ^(Core)**

2076 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to
2077 preclude rest or reasonable personal time for each
2078 fellow. ^(Core)

2079
2080 VI.F.8.b) Fellows are permitted to return to the hospital while on at-
2081 home call to provide direct care for new or established
2082 patients. These hours of inpatient patient care must be
2083 included in the 80-hour maximum weekly limit. ^(Detail)
2084

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
