1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Musculoskeletal Radiology**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Int.B.1. Diagnostic radiology subspecialty fellowship programs are designed to
50 develop advanced knowledge and skills in a specific clinical area. The
51 program design and/or structure must be approved by the Residency
52 Review Committee as part of the regular review process.
53

54 Int.B.21. The Musculoskeletal radiology is a subspecialty that fellowship program
55 constitutes an closely supervised experience in the application and
56 interpretation of all imaging examinations and procedures as they relate
57 to the analysis of disorders of the musculoskeletal system, including
58 bones, joints, and soft tissues. The imaging methods and procedures
59 include routine radiography, computed tomography, ultrasonography,
60 radionuclide scintigraphy/positron emission tomography (PET), magnetic
61 resonance, arthrography, bone mineral density studies, and diagnostic
62 and therapeutic injections, as well as image-guided percutaneous biopsy
63 techniques.
64

65 Int.B.3 Fellowships in musculoskeletal radiology provide an organized,
66 comprehensive, supervised, and progressively responsible full-time
67 educational experience in the selection, interpretation, and performance
68 of these examinations and procedures. A further objective is to provide
69 fellows an opportunity to develop skills necessary for clinical and/or basic
70 research in the subspecialty of musculoskeletal radiology.
71

72 **Int.C. Length of Educational Program**

73
74 The educational program in musculoskeletal radiology ~~diagnostic radiology~~
75 ~~subspecialties~~ must be at least 12 months in length. (Core)*
76

77 **I. Oversight**

78
79 **I.A. Sponsoring Institution**

80
81 *The Sponsoring Institution is the organization or entity that assumes the*
82 *ultimate financial and academic responsibility for a program of graduate*
83 *medical education consistent with the ACGME Institutional Requirements.*
84

85 *When the Sponsoring Institution is not a rotation site for the program, the*
86 *most commonly utilized site of clinical activity for the program is the*
87 *primary clinical site.*
88

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

89

- 90 **I.A.1. The program must be sponsored by one ACGME-accredited**
 91 **Sponsoring Institution.** ^(Core)
 92
- 93 **I.B. Participating Sites**
 94
 95 ***A participating site is an organization providing educational experiences or***
 96 ***educational assignments/rotations for fellows.***
 97
- 98 **I.B.1. The program, with approval of its Sponsoring Institution, must**
 99 **designate a primary clinical site.** ^(Core)
 100
- 101 **I.B.1.a)** The Sponsoring Institution must also sponsor an ACGME-
 102 accredited program in diagnostic radiology. ^(Core)
 103
- 104 **I.B.1.b)** ~~Close cooperation between the fellowship and residency program~~
 105 ~~director is required.~~ ^(Detail)
 106
- 107 **I.B.1.c)** There must be an ACGME-accredited program in orthopaedic
 108 surgery at the primary clinical site. ^(Core)
 109
- 110 **I.B.1.d)** There should be ACGME-accredited programs in ~~orthopaedic~~
 111 ~~surgery, pathology~~ and rheumatology at the primary clinical site.
 112 ^(Core)
 113
- 114 **I.B.1.d).(1)** If these programs are not available at the primary clinical
 115 site, there must be an active rheumatology service and a
 116 department of pathology that provides bone and soft tissue
 117 pathology education at the primary clinical site. ^(Core)
 118
- 119 **I.B.2. There must be a program letter of agreement (PLA) between the**
 120 **program and each participating site that governs the relationship**
 121 **between the program and the participating site providing a required**
 122 **assignment.** ^(Core)
 123
- 124 **I.B.2.a) The PLA must:**
 125
- 126 **I.B.2.a).(1) be renewed at least every 10 years; and,** ^(Core)
 127
- 128 **I.B.2.a).(2) be approved by the designated institutional official**
 129 **(DIO).** ^(Core)
 130
- 131 **I.B.3. The program must monitor the clinical learning and working**
 132 **environment at all participating sites.** ^(Core)
 133
- 134 **I.B.3.a) At each participating site there must be one faculty member,**
 135 **designated by the program director, who is accountable for**
 136 **fellow education for that site, in collaboration with the**
 137 **program director.** ^(Core)
 138

<p>Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical</p>

settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

139
140
141
142
143
144
145
146
147
148
149
150

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME's Accreditation Data System (ADS). ^(Core)

I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. ^(Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

151
152
153
154
155
156
157
158
159
160
161
162
163
164

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. ^(Core)

I.D.1.a) There must be adequate office space for musculoskeletal radiology faculty members, program administration, and fellows. ^(Core)

I.D.1.b) The program must have appropriate facilities and space for the education of the fellows. ^(Core)

165 I.D.1.b).(1) There must be adequate study space, conference space,
166 and access to computers. (CoreDetail)

167
168 I.D.1.b).(2) Adequate space for image display, interpretation, and
169 consultation with clinicians and referring physicians must
170 be available. (Core)

171
172 I.D.1.c) All equipment required for musculoskeletal radiology education
173 must be modern and available. (Core)

174
175 I.D.1.d) Access to routine radiographic, computed tomographic,
176 scintigraphic, magnetic resonance, and ultrasound equipment
177 must be provided. ~~Adequate space for image display,~~
178 ~~interpretation, and consultation with referring physicians must be~~
179 ~~available.~~ (Core)

180
181 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
182 **ensure healthy and safe learning and working environments that**
183 **promote fellow well-being and provide for:** (Core)

184
185 **I.D.2.a) access to food while on duty;** (Core)

186
187 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
188 **and accessible for fellows with proximity appropriate for safe**
189 **patient care;** (Core)

190

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

191
192 I.D.2.c) **clean and private facilities for lactation that have refrigeration**
193 **capabilities, with proximity appropriate for safe patient care;**
194 (Core)

195
Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

196
197 I.D.2.d) **security and safety measures appropriate to the participating**
198 **site; and,** (Core)

199

- 200 I.D.2.e) accommodations for fellows with disabilities consistent with
 201 the Sponsoring Institution's policy. (Core)
 202
- 203 I.D.3. Fellows must have ready access to subspecialty-specific and other
 204 appropriate reference material in print or electronic format. This
 205 must include access to electronic medical literature databases with
 206 full text capabilities. (Core)
 207
- 208 I.D.4. The program's educational and clinical resources must be adequate
 209 to support the number of fellows appointed to the program. (Core)
 210
- 211 I.D.4.a) The program must ensure there is an adequate volume and
 212 variety of imaging studies and image-guided invasive procedures
 213 for the fellows' education. (Core)
 214
- 215 I.D.4.b) The program must ensure that fellows must be are provided
 216 access to a variety of patients encompassing the entire range of
 217 disorders of the musculoskeletal system, including articular,
 218 congenital, degenerative, hematopoietic, infectious, metabolic,
 219 hematopoietic, infectious, neoplastic, traumatic, and vascular,
 220 congenital, and neoplastic diseases. (Core)
 221
- 222 I.D.4.c) ~~The imaging methods and procedures available for education~~
 223 ~~should include routine radiography, computed tomography,~~
 224 ~~ultrasonography, bone mineral density, radionuclide scintigraphy,~~
 225 ~~magnetic resonance, arthrography, diagnostic/therapeutic~~
 226 ~~injections, and image-guided percutaneous biopsy techniques.~~
 227 (Core)
 228
- 229 I.D.4.d) Fellows must have access to both inpatients and outpatients is
 230 required. (Core)
 231
- 232 I.E. ***A fellowship program usually occurs in the context of many learners and***
 233 ***other care providers and limited clinical resources. It should be structured***
 234 ***to optimize education for all learners present.***
 235
- 236 I.E.1. Fellows should contribute to the education of residents in core
 237 programs, if present. (Core)
 238

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

- 239
- 240 I.E.2. Shared experiences with residents and fellows in orthopaedic surgery,
 241 pathology, rheumatology, pathology, and other appropriate specialties,
 242 including surgical subspecialties, should occur. (Core)
 243

- 244 I.E.2.a) When appropriate, supervision and teaching by faculty members
 245 expert in these additional disciplines should be available. ^(Detail)
 246
 247 I.E.3. ~~The presence of other learners (including residents from other specialties~~
 248 ~~subspecialty fellows, PhD students, and nurse practitioners) in the~~
 249 ~~program must not interfere with the appointed fellows' education.~~ ^(Detail)
 250
 251 I.E.4. The fellows must not dilute or detract from the educational opportunities
 252 available to residents in the core diagnostic radiology residency program.
 253 ^(CoreDetail)
 254
 255 I.E.5. Lines of responsibilities for the diagnostic radiology residents and the
 256 musculoskeletal subspecialty fellows must be clearly defined. ^(Core)
 257

Subspecialty-Specific Background and Intent: A close relationship and interaction between the fellowship program and the diagnostic radiology residency program will be essential in the management and oversight of the clinical environment to prevent dilution of education and training for both fellows and residents.

258
 259 **II. Personnel**

260
 261 **II.A. Program Director**

262
 263 **II.A.1. There must be one faculty member appointed as program director**
 264 **with authority and accountability for the overall program, including**
 265 **compliance with all applicable program requirements.** ^(Core)
 266

267 **II.A.1.a) The Sponsoring Institution's Graduate Medical Education**
 268 **Committee (GMEC) must approve a change in program**
 269 **director.** ^(Core)
 270

271 **II.A.1.b) Final approval of the program director resides with the**
 272 **Review Committee.** ^(Core)
 273

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

274
 275 **II.A.2. The program director must be provided with support adequate for**
 276 **administration of the program based upon its size and configuration.**
 277 ^(Core)
 278

279 **II.A.2.a) At a minimum, the program director must be provided with the**
 280 **dedicated time and support specified below for administration of**
 281 **the program:** ^(Core)
 282

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u>1-4</u>	<u>0.1</u>
<u>5-7</u>	<u>0.2</u>
<u>8 or more</u>	<u>0.3</u>

283

Background and Intent: Ten percent FTE is defined as one half day per week.

“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).

The requirement does not address the source of funding required to provide the specified salary support.

284

285

II.A.3. Qualifications of the program director:

286

287

II.A.3.a) must include subspecialty expertise and qualifications acceptable to the Review Committee; (Core)

288

289

290

II.A.3.a).(1) This must include post-residency experience in musculoskeletal radiology the subspecialty area, including fellowship training, education or five years of practice experience focused in musculoskeletal radiology the subspecialty for those subspecialties in which no certification is offered. (Core)

291

292

293

294

295

296

297

II.A.3.a).(2) This must include experience as an educator and supervisor of fellows in musculoskeletal radiology. (Core)

298

299

300

II.A.3.a).(3) This must include at least three years' experience as a faculty member in an ACGME-accredited or American Osteopathic Association (AOA)-approved residency or fellowship program. (Core)

301

302

303

304

305

II.A.3.b) must include current certification in the specialty by the American Board of Radiology or by the American Osteopathic Board of Radiology, or subspecialty qualifications that are acceptable to the Review Committee; (Core)

306

307

308

309

310

311

312

313

314

315

II.A.3.c) must include devotion of at least 80 percent of professional clinical contributions in musculoskeletal radiology; and, (Core)

316

317

318

II.A.3.d) must include devotion of sufficient time to fulfill all responsibilities inherent to meeting the educational goals of the program. (Core)

319

320

321 II.A.3.e) must include ~~devotion of at least 80% of his/her professional time~~
322 ~~in musculoskeletal radiology, and devote sufficient time to fulfill all~~
323 ~~responsibilities inherent to meeting the educational goals of the~~
324 ~~program.~~^(Detail)
325

326 **II.A.4. Program Director Responsibilities**
327

328 **The program director must have responsibility, authority, and**
329 **accountability for: administration and operations; teaching and**
330 **scholarly activity; fellow recruitment and selection, evaluation, and**
331 **promotion of fellows, and disciplinary action; supervision of fellows;**
332 **and fellow education in the context of patient care.** ^(Core)
333

334 **II.A.4.a) The program director must:**
335

336 **II.A.4.a).(1) be a role model of professionalism;** ^(Core)
337

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

338
339 **II.A.4.a).(2) design and conduct the program in a fashion**
340 **consistent with the needs of the community, the**
341 **mission(s) of the Sponsoring Institution, and the**
342 **mission(s) of the program;** ^(Core)
343

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

344
345 **II.A.4.a).(3) administer and maintain a learning environment**
346 **conducive to educating the fellows in each of the**
347 **ACGME Competency domains;** ^(Core)
348

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

349
350 **II.A.4.a).(4) develop and oversee a process to evaluate candidates**
351 **prior to approval as program faculty members for**

- 352 participation in the fellowship program education and
353 at least annually thereafter, as outlined in V.B.; (Core)
354
355 II.A.4.a).(5) have the authority to approve program faculty
356 members for participation in the fellowship program
357 education at all sites; (Core)
358
359 II.A.4.a).(6) have the authority to remove program faculty
360 members from participation in the fellowship program
361 education at all sites; (Core)
362
363 II.A.4.a).(7) have the authority to remove fellows from supervising
364 interactions and/or learning environments that do not
365 meet the standards of the program; (Core)
366

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 367
368 II.A.4.a).(8) submit accurate and complete information required
369 and requested by the DIO, GMEC, and ACGME; (Core)
370
371 II.A.4.a).(9) provide applicants who are offered an interview with
372 information related to the applicant's eligibility for the
373 relevant subspecialty board examination(s); (Core)
374
375 II.A.4.a).(10) provide a learning and working environment in which
376 fellows have the opportunity to raise concerns and
377 provide feedback in a confidential manner as
378 appropriate, without fear of intimidation or retaliation;
379 (Core)
380
381 II.A.4.a).(11) ensure the program's compliance with the Sponsoring
382 Institution's policies and procedures related to
383 grievances and due process; (Core)
384
385 II.A.4.a).(12) ensure the program's compliance with the Sponsoring
386 Institution's policies and procedures for due process
387 when action is taken to suspend or dismiss, not to
388 promote, or not to renew the appointment of a fellow;
389 (Core)
390

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

- 391
 392 **II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring
 393 Institution’s policies and procedures on employment
 394 and non-discrimination; ^(Core)
 395
 396 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-
 397 competition guarantee or restrictive covenant.
 398 ^(Core)
 399
 400 **II.A.4.a).(14)** document verification of program completion for all
 401 graduating fellows within 30 days; ^(Core)
 402
 403 **II.A.4.a).(15)** provide verification of an individual fellow’s
 404 completion upon the fellow’s request, within 30 days;
 405 and, ^(Core)
 406

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 407
 408 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
 409 Institution’s DIO before submitting information or

 414

415 **II.B. Faculty**

416
 417 *Faculty members are a foundational element of graduate medical education*
 418 *– faculty members teach fellows how to care for patients. Faculty members*
 419 *provide an important bridge allowing fellows to grow and become practice*
 420 *ready, ensuring that patients receive the highest quality of care. They are*
 421 *role models for future generations of physicians by demonstrating*
 422 *compassion, commitment to excellence in teaching and patient care,*
 423 *professionalism, and a dedication to lifelong learning. Faculty members*
 424 *experience the pride and joy of fostering the growth and development of*
 425 *future colleagues. The care they provide is enhanced by the opportunity to*
 426 *teach. By employing a scholarly approach to patient care, faculty members,*
 427 *through the graduate medical education system, improve the health of the*
 428 *individual and the population.*

429
 430 *Faculty members ensure that patients receive the level of care expected*
 431 *from a specialist in the field. They recognize and respond to the needs of*
 432 *the patients, fellows, community, and institution. Faculty members provide*
 433 *appropriate levels of supervision to promote patient safety. Faculty*
 434 *members create an effective learning environment by acting in a*

435
436
437

professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

438

II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)

440

441

442

443

II.B.1.a) To ensure adequate teaching, supervision, and evaluation of the fellows’ academic progress, there must be a ratio of at least one full-time faculty member for every two fellows in the program. To ensure adequate supervision of the fellows, there must be at least one full-time faculty person available for every two fellows in the program. ^(Core)

444

445

446

447

448

449

II.B.1.a).(1) ~~If necessary, other radiologists with expertise in certain imaging methods or procedures may function at least as part-time members of the program.~~ ^(Detail)

450

451

452

453

II.B.2. Faculty members must:

454

455

II.B.2.a) be role models of professionalism; ^(Core)

456

457

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

458

459

460

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

461

II.B.2.c) demonstrate a strong interest in the education of fellows; ^(Core)

462

463

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; ^(Core)

464

465

466

II.B.2.e) administer and maintain an educational environment conducive to educating fellows; ^(Core)

467

468

469

II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, ^(Core)

470

471

472

II.B.2.g) pursue faculty development designed to enhance their skills at least annually. ^(Core)

473

474

475

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

II.B.3. Faculty Qualifications

II.B.3.a) Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments.
(Core)

II.B.3.b) Subspecialty physician faculty members must:

II.B.3.b).(1) have current certification in the specialty by the American Board of Radiology or the American Osteopathic Board of Radiology, or possess qualifications judged acceptable to the Review Committee; and, (Core)

[Note that while the Common Program Requirements deem certification by a certifying board of the ABMS or the AOA acceptable, there is no ABMS or AOA board that offers certification in this subspecialty]

II.B.3.b).(2) have post-residency experience in musculoskeletal radiology, including fellowship education. (Core)

II.B.3.c) Any non-physician faculty members who participate in fellowship program education must be approved by the program director. (Core)

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

508
509
510
511

II.B.3.d) Any other specialty physician faculty members must have current certification in their specialty by the appropriate American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board, or possess qualifications judged acceptable to the Review Committee. (Core)

II.B.4. Core Faculty

512
513
514
515
516
517
518

Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. ^(Core)

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

539

II.B.4.a) Core faculty members must be designated by the program director. ^(Core)

II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. ^(Core)

II.B.4.c) The musculoskeletal radiology faculty must have a minimum of two FTE core faculty members, which must include the program director and at least one person experienced other full-time radiologist specializing in musculoskeletal radiology ~~who has a substantial commitment to the fellowship program.~~ ^(Core)

II.C. Program Coordinator

II.C.1. There must be a program coordinator. ^(Core)

II.C.2. The program coordinator must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

III. Fellow Appointments

III.A. Eligibility Criteria

III.A.1. Eligibility Requirements – Fellowship Programs

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada. ^(Core)

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

569
570
571
572
573
574
575
576

III.A.1.a) Fellowship programs must receive verification of each entering fellow's level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. ^(Core)

~~III.A.1.b) Prerequisite training experience for entry into the fellowship program should include the satisfactory completion of a diagnostic~~

577 radiology or interventional radiology residency program that
578 satisfies the requirements in III.A.1. (Core)
579
580 **III.A.1.c) Fellow Eligibility Exception**
581
582 **The Review Committee for Diagnostic-Radiology will allow the**
583 **following exception to the fellowship eligibility requirements:**
584
585 **III.A.1.c).(1) An ACGME-accredited fellowship program may accept**
586 **an exceptionally qualified international graduate**
587 **applicant who does not satisfy the eligibility**
588 **requirements listed in III.A.1., but who does meet all of**
589 **the following additional qualifications and conditions:**
590 **(Core)**
591
592 **III.A.1.c).(1).(a) evaluation by the program director and**
593 **fellowship selection committee of the**
594 **applicant’s suitability to enter the program,**
595 **based on prior training and review of the**
596 **summative evaluations of training in the core**
597 **specialty; and, (Core)**
598
599 **III.A.1.c).(1).(b) review and approval of the applicant’s**
600 **exceptional qualifications by the GMEC; and,**
601 **(Core)**
602
603 **III.A.1.c).(1).(c) verification of Educational Commission for**
604 **Foreign Medical Graduates (ECFMG)**
605 **certification. (Core)**
606
607 **III.A.1.c).(2) Applicants accepted through this exception must have**
608 **an evaluation of their performance by the Clinical**
609 **Competency Committee within 12 weeks of**
610 **matriculation. (Core)**
611

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

612
613 **III.B. The program director must not appoint more fellows than approved by the**
614 **Review Committee. (Core)**

615
616 **III.B.1. All complement increases must be approved by the Review**
617 **Committee. (Core)**

618
619 **III.C. Fellow Transfers**
620
621 **The program must obtain verification of previous educational experiences**
622 **and a summative competency-based performance evaluation prior to**
623 **acceptance of a transferring fellow, and Milestones evaluations upon**
624 **matriculation. (Core)**

625
626 **IV. Educational Program**

627
628 ***The ACGME accreditation system is designed to encourage excellence and***
629 ***innovation in graduate medical education regardless of the organizational***
630 ***affiliation, size, or location of the program.***

631
632 ***The educational program must support the development of knowledgeable, skillful***
633 ***physicians who provide compassionate care.***

634
635 ***In addition, the program is expected to define its specific program aims consistent***
636 ***with the overall mission of its Sponsoring Institution, the needs of the community***
637 ***it serves and that its graduates will serve, and the distinctive capabilities of***
638 ***physicians it intends to graduate. While programs must demonstrate substantial***
639 ***compliance with the Common and subspecialty-specific Program Requirements, it***
640 ***is recognized that within this framework, programs may place different emphasis***
641 ***on research, leadership, public health, etc. It is expected that the program aims***
642 ***will reflect the nuanced program-specific goals for it and its graduates; for***
643 ***example, it is expected that a program aiming to prepare physician-scientists will***
644 ***have a different curriculum from one focusing on community health.***

645
646 **IV.A. The curriculum must contain the following educational components: (Core)**

647
648 **IV.A.1. a set of program aims consistent with the Sponsoring Institution's**
649 **mission, the needs of the community it serves, and the desired**
650 **distinctive capabilities of its graduates; (Core)**

651
652 **IV.A.1.a) The program's aims must be made available to program**
653 **applicants, fellows, and faculty members. (Core)**

654
655 **IV.A.2. competency-based goals and objectives for each educational**
656 **experience designed to promote progress on a trajectory to**
657 **autonomous practice in their subspecialty. These must be**
658 **distributed, reviewed, and available to fellows and faculty members;**
659 **(Core)**

660

661 IV.A.3. delineation of fellow responsibilities for patient care, progressive
662 responsibility for patient management, and graded supervision in
663 their subspecialty; ^(Core)
664

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

665
666 IV.A.4. structured educational activities beyond direct patient care; and,
667 ^(Core)
668

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

669
670 IV.A.5. advancement of fellows' knowledge of ethical principles
671 foundational to medical professionalism. ^(Core)
672

673 IV.B. ACGME Competencies
674

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

675
676 IV.B.1. The program must integrate the following ACGME Competencies
677 into the curriculum: ^(Core)
678

679 IV.B.1.a) Professionalism

680
681 Fellows must demonstrate a commitment to professionalism
682 and an adherence to ethical principles. ^(Core)
683

684 IV.B.1.b) Patient Care and Procedural Skills
685

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.*) In addition, there

should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

686		
687	IV.B.1.b).(1)	Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. <small>(Core)</small>

789

IV.B.1.d) Practice-based Learning and Improvement

Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

790

IV.B.1.e) Interpersonal and Communication Skills

Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. ^(Core)

791

849 [Moved from IV.C.8.a).(3)]
850
- 851 IV.C.3.b).(3).(a) These should include the disciplines of neurological
852 surgery, orthopaedic surgery, ~~neurological surgery,~~
853 and other appropriate surgical specialties;
854 pathology; rheumatology; and oncology. ^(Core)
855 [Moved from IV.C.7.a)]
856
- 857 IV.C.3.b).(3).(b) In addition, the ~~training educational~~ experience
858 should include radiology-oriented conferences with
859 medical students and ~~graduate medical staff.~~
860 ^(CoreDetail) [Moved from IV.C.7.a)]
861
- 862 IV.C.3.b).(4) peer-review case conferences and/or morbidity and
863 mortality conferences. ^(CoreDetail) [Moved from IV.C.8.a).(4)]
864
- Subspecialty-Specific Background and Intent: It is intended that fellows will participate in structured didactic activities that may include, but are not limited to, lectures, conferences, courses, labs, asynchronous learning, simulations, drills, case discussions, grand rounds, didactic teaching, and education in critical appraisal of medical evidence.
- 865
866 IV.C.3.c) ~~regularly scheduled interdepartmental conferences are a~~
867 ~~necessary component of the program.~~ ^(Core)
868
- 869 IV.C.3.d) ~~Fellows must participate on a regular basis in scheduled~~
870 ~~conferences.~~ ^(Core)
871

- 872 IV.C.3.e) Journal club must be held on a quarterly basis. (Core)
 873
 874 IV.C.3.f) Fellows must ~~attend~~participate in and regularly attend didactic
 875 activities, conferences directed to the level of the individual fellow,
 876 that provide formal review of the topics in the subspecialty
 877 curriculum. (Core)
 878
 879 IV.C.3.f).(1) This should include scheduled presentations by the
 880 fellows. (Detail)
 881
 882 IV.C.3.f).(2) These didactic activities ~~conferences~~ should occur at least
 883 twice per month. (Detail)
 884
 885 IV.C.3.g) Fellows should attend and participate in local conferences and at
 886 least one national meeting or medical education post-graduate
 887 course in musculoskeletal radiology ~~the subspecialty while in~~
 888 training during the fellowship program. (Core) [Moved from IV.C.9.]
 889
 890 IV.C.3.g).(1) ~~Participation in local or national subspecialty societies~~
 891 ~~should be encouraged. Reasonable expenses should be~~
 892 ~~reimbursed.~~ (Detail)
 893

Subspecialty-Specific Background and Intent: Fellow participation in local or national subspecialty societies is encouraged, and programs are encouraged to provide support, including time away from the program, for that participation.

- 894
 895 IV.C.4. Fellow Experiences
 896
 897 IV.C.4.a) Fellows must have clinical ~~experience~~ and didactic ~~sessions~~
 898 experiences that encompassing the entire spectrum of
 899 musculoskeletal diseases and their pathophysiology. (Core) [Moved
 900 from IV.C.3.]
 901
 902 IV.C.4.a).(1) This must include both the axial and the appendicular
 903 skeletons of both adult and pediatric patients. (Core) [Detail]
 904 [Moved from IV.C.3.a)]
 905
 906 IV.C.4.b) ~~The Fellows~~ must interpret, under appropriate supervision,
 907 diagnostic examinations. (Core) [Moved from IV.C.4.]
 908
 909 IV.C.4.c) ~~Furthermore, the Fellows~~ must perform and interpret image-
 910 guided interventions, including image-guided percutaneous biopsy
 911 procedures, arthrograms, and diagnostic/therapeutic injections,
 912 and percutaneous biopsy procedures. (Core) [Moved from IV.C.4.]
 913
 914 IV.C.4.d) Fellows must maintain ~~keep~~ a procedure log documenting their
 915 involvement in both diagnostic and types of image-guided
 916 interventions that he/she performs. (Core) [Moved from
 917 IV.B.1.b).(2).(c)]
 918

919 IV.C.4.e) ~~The Fellows should have experience with ultrasonography, bone~~
920 ~~densitometry, and radionuclide scintigraphy, and ultrasonography~~
921 ~~as they relate to diseases of the musculoskeletal system. (Core)~~
922 [Moved from IV.C.5.]
923

924 **IV.D. Scholarship**

925
926 *Medicine is both an art and a science. The physician is a humanistic*
927 *scientist who cares for patients. This requires the ability to think critically,*
928 *evaluate the literature, appropriately assimilate new knowledge, and*
929 *practice lifelong learning. The program and faculty must create an*
930 *environment that fosters the acquisition of such skills through fellow*
931 *participation in scholarly activities as defined in the subspecialty-specific*
932 *Program Requirements. Scholarly activities may include discovery,*
933 *integration, application, and teaching.*
934

935 *The ACGME recognizes the diversity of fellowships and anticipates that*
936 *programs prepare physicians for a variety of roles, including clinicians,*
937 *scientists, and educators. It is expected that the program's scholarship will*
938 *reflect its mission(s) and aims, and the needs of the community it serves.*
939 *For example, some programs may concentrate their scholarly activity on*
940 *quality improvement, population health, and/or teaching, while other*
941 *programs might choose to utilize more classic forms of biomedical*
942 *research as the focus for scholarship.*
943

944 **IV.D.1. Program Responsibilities**

945
946 **IV.D.1.a) The program must demonstrate evidence of scholarly**
947 **activities, consistent with its mission(s) and aims. (Core)**
948

949 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**
950 **must allocate adequate resources to facilitate fellow and**
951 **faculty involvement in scholarly activities. (Core)**
952

953 **IV.D.2. Faculty Scholarly Activity**

954
955 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
956 **accomplishments in at least three of the following domains:**
957 **(Core)**
958

- 959 • **Research in basic science, education, translational**
- 960 **science, patient care, or population health**
- 961 • **Peer-reviewed grants**
- 962 • **Quality improvement and/or patient safety initiatives**
- 963 • **Systematic reviews, meta-analyses, review articles,**
- 964 **chapters in medical textbooks, or case reports**
- 965 • **Creation of curricula, evaluation tools, didactic**
- 966 **educational activities, or electronic educational**
- 967 **materials**

- 968 • Contribution to professional committees, educational
- 969 organizations, or editorial boards
- 970 • Innovations in education
- 971

972 **IV.D.2.b)** The program must demonstrate dissemination of scholarly
 973 activity within and external to the program by the following
 974 methods:
 975

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

976
 977 **IV.D.2.b).(1)** faculty participation in grand rounds, posters,
 978 workshops, quality improvement presentations,
 979 podium presentations, grant leadership, non-peer-
 980 reviewed print/electronic resources, articles or
 981 publications, book chapters, textbooks, webinars,
 982 service on professional committees, or serving as a
 983 journal reviewer, journal editorial board member, or
 984 editor; (Outcome)‡

985
 986 **IV.D.2.b).(2)** peer-reviewed publication. (Outcome)

987
 988 **IV.D.3. Fellow Scholarly Activity**

989
 990 **IV.D.3.a)** The program must provide instruction in the fundamentals of
 991 experimental design, performance, and interpretation of results.
 992 (Core)

993
 994 **IV.D.3.b)** All fellows must engage in a scholarly project. (Core)

995
 996 **IV.D.3.b).(1)** This Scholarly projects should may take the form of
 997 demonstrate the fellows’ competence in the fundamentals
 998 of research by the completion of and/or participation in one
 999 of the following projects, but not limited to:

1000
 1001 **IV.D.3.b).(1).(a)** laboratory research; (Detail)

1002
 1003 **IV.D.3.b).(1).(b)** clinical research; (Detail)

1004
 1005 **IV.D.3.b).(1).(c)** analysis of disease processes, imaging techniques,
 1006 or practice management issues. (Detail)

1007
 1008 **IV.D.3.b).(2)** The results of such projects should be disseminated in the
 1009 academic community by either submission for publication

1010 within a printed journal or online educational resource, or
1011 presentation at departmental, institutional, local, regional,
1012 national, or international meetings. The results of such
1013 projects must be submitted for publication or presented at
1014 departmental, institutional, local, regional, national or
1015 international meetings. (Outcome)

1016
1017 IV.D.3.c) Laboratory facilities to support research projects should be
1018 available in the institution. (Detail)

1019
1020 **V. Evaluation**

1021
1022 **V.A. Fellow Evaluation**

1023
1024 **V.A.1. Feedback and Evaluation**

1025

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

1026
1027 **V.A.1.a) Faculty members must directly observe, evaluate, and**
1028 **frequently provide feedback on fellow performance during**
1029 **each rotation or similar educational assignment.** (Core)

1030
Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty

members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

- 1031
1032 V.A.1.a).(1) The program must ensure that there is at least a quarterly
1033 review. ^(Core)
1034
1035 V.A.1.a).(1).(a) These quarterly reviews should include:
1036
1037 V.A.1.a).(1).(a).(i) review of faculty evaluations of the fellow;
1038 (Detail)
1039
1040 V.A.1.a).(1).(a).(ii) review of the procedure log; and, ^(Detail)
1041
1042 V.A.1.a).(1).(a).(iii) documentation of compliance with
1043 institutional and departmental policies
1044 (HIPAA, the Joint Commission, patient
1045 safety, infection control, etc.). ^(Detail)
1046
1047 **V.A.1.b) Evaluation must be documented at the completion of the**
1048 **assignment.** ^(Core)
1049
1050 **V.A.1.b).(1) For block rotations of greater than three months in**
1051 **duration, evaluation must be documented at least**
1052 **every three months.** ^(Core)
1053
1054 **V.A.1.b).(2) Longitudinal experiences such as continuity clinic in**
1055 **the context of other clinical responsibilities must be**
1056 **evaluated at least every three months and at**
1057 **completion.** ^(Core)
1058

Specialty-Specific Background and Intent: A complete quarterly evaluation also includes a review of the fellows' procedure log, procedural competencies, and documentation of compliance with institutional and departmental policies (HIPAA, the Joint Commission, patient safety, infection control, etc.).

- 1059
1060 **V.A.1.c) The program must provide an objective performance**
1061 **evaluation based on the Competencies and the subspecialty-**
1062 **specific Milestones, and must:** ^(Core)
1063
1064 **V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,**
1065 **patients, self, and other professional staff members);**
1066 **and,** ^(Core)
1067
1068 **V.A.1.c).(2) provide that information to the Clinical Competency**
1069 **Committee for its synthesis of progressive fellow**
1070 **performance and improvement toward unsupervised**
1071 **practice.** ^(Core)
1072

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

1074
1075
1076
1077
1078
1079
1080
1081
1082
1083
1084
1085
1086
1087
1088
- V.A.1.d)** The program director or their designee, with input from the Clinical Competency Committee, must:
- V.A.1.d).(1)** meet with and review with each fellow their documented semi-annual evaluation of performance, including progress along the subspecialty-specific Milestones. ^(Core)
- V.A.1.d).(2)** assist fellows in developing individualized learning plans to capitalize on their strengths and identify areas for growth; and, ^(Core)
- V.A.1.d).(3)** develop plans for fellows failing to progress, following institutional policies and procedures. ^(Core)

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1145		
1146		
1147	V.B.	Faculty Evaluation

1148
1149
1150
1151
1152

- V.B.1. The program must have a process to evaluate each faculty member's performance as it relates to the educational program at least annually. (Core)**

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1153
1154
1155
1156
1157
1158
1159
1160
1161
1162
1163
1164
1165
1166
1167
1168

- V.B.1.a) This evaluation must include a review of the faculty member's clinical teaching abilities, engagement with the educational program, participation in faculty development related to their skills as an educator, clinical performance, professionalism, and scholarly activities. (Core)**
- V.B.1.b) This evaluation must include written, confidential evaluations by the fellows. (Core)**
- V.B.2. Faculty members must receive feedback on their evaluations at least annually. (Core)**
- V.B.3. Results of the faculty educational evaluations should be incorporated into program-wide faculty development plans. (Core)**

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1169
1170
1171
1172
1173

- V.C. Program Evaluation and Improvement**
- V.C.1. The program director must appoint the Program Evaluation Committee to conduct and document the Annual Program**

- 1174 **Evaluation as part of the program's continuous improvement**
 1175 **process.** ^(Core)
 1176
 1177 **V.C.1.a)** **The Program Evaluation Committee must be composed of at**
 1178 **least two program faculty members, at least one of whom is a**
 1179 **core faculty member, and at least one fellow.** ^(Core)
 1180
 1181 **V.C.1.b)** **Program Evaluation Committee responsibilities must include:**
 1182
 1183 **V.C.1.b).(1)** **acting as an advisor to the program director, through**
 1184 **program oversight;** ^(Core)
 1185
 1186 **V.C.1.b).(2)** **review of the program's self-determined goals and**
 1187 **progress toward meeting them;** ^(Core)
 1188
 1189 **V.C.1.b).(3)** **guiding ongoing program improvement, including**
 1190 **development of new goals, based upon outcomes;**
 1191 **and,** ^(Core)
 1192
 1193 **V.C.1.b).(4)** **review of the current operating environment to identify**
 1194 **strengths, challenges, opportunities, and threats as**
 1195 **related to the program's mission and aims.** ^(Core)
 1196

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1197
 1198 **V.C.1.c)** **The Program Evaluation Committee should consider the**
 1199 **following elements in its assessment of the program:**

1261		
1262		

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the

Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1304
1305
1306
- V.C.3.e) ~~For each of the exams referenced in V.C.3.a) d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty.~~ ^(Outcome)

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five

~~percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.~~

~~There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.~~

1307
1308
1309
1310
1311

V.C.3.f) ~~Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier.~~^(Core)

~~Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.~~

~~The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.~~

~~In the future, the ACGME may establish parameters related to ultimate board certification rates.~~

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more

discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

1363 *A culture of safety requires continuous identification*
1364 *of vulnerabilities and a willingness to transparently*
1365 *deal with them. An effective organization has formal*
1366 *mechanisms to assess the knowledge, skills, and*
1367 *attitudes of its personnel toward safety in order to*
1368 *identify areas for improvement.*

1370 VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows
1371 must actively participate in patient safety
1372 systems and contribute to a culture of safety.
1373 (Core)

1374 VI.A.1.a).(1).(b) The program must have a structure that
1375 promotes safe, interprofessional, team-based
1376 care. (Core)

1377 VI.A.1.a).(2) Education on Patient Safety

1378 Programs must provide formal educational activities
1379 that promote patient safety-related goals, tools, and
1380 techniques. (Core)

1381 **Background and Intent: Optimal patient safety occurs in the setting of a coordinated**
1382 **interprofessional learning and working environment.**

1383 VI.A.1.a).(3) Patient Safety Events

1384 *Reporting, investigation, and follow-up of adverse*
1385 *events, near misses, and unsafe conditions are pivotal*
1386 *mechanisms for improving patient safety, and are*
1387 *essential for the success of any patient safety*
1388 *program. Feedback and experiential learning are*
1389 *essential to developing true competence in the ability*
1390 *to identify causes and institute sustainable systems-*
1391 *based changes to ameliorate patient safety*
1392 *vulnerabilities.*

1393 VI.A.1.a).(3).(a) Residents, fellows, faculty members, and other
1394 clinical staff members must:

1395 VI.A.1.a).(3).(a).(i) know their responsibilities in reporting
1396 patient safety events at the clinical site;
1397 (Core)

1398 VI.A.1.a).(3).(a).(ii) know how to report patient safety
1399 events, including near misses, at the
1400 clinical site; and, (Core)

1401 VI.A.1.a).(3).(a).(iii) be provided with summary information
1402 of their institution's patient safety
1403 reports. (Core)

1412		
1413	VI.A.1.a).(3).(b)	Fellows must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. ^(Core)

This should include activities aimed at reducing health care disparities. ^(Detail)

1471
1472
1473 VI.A.2.

Supervision and Accountability

1474
1475 VI.A.2.a)

Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.

Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.

1483
1484
1485
1486
1487
1488
1489
1490 VI.A.2.a).(1)

Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. ^(Core)

1491
1492
1493
1494
1495
1496

1498
1499
1500
1501 VI.A.2.a).(1).(b)

Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)

1502
1503
1504
1505 VI.A.2.b)

Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances,

1513
1514
1515

supervision may include post-hoc review of fellow-delivered care with feedback.

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1554

- VI.A.2.b).(1)** The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow’s level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. ^(Core)
- VI.A.2.b).(2)** The program must define when physical presence of a supervising physician is required. ^(Core)
- VI.A.2.c)** **Levels of Supervision**
- To promote appropriate fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: ^(Core)
- VI.A.2.c).(1)** **Direct Supervision:**
- VI.A.2.c).(1).(a)** the supervising physician is physically present with the fellow during the key portions of the patient interaction; or, ^(Core)
- VI.A.2.c).(1).(b)** the supervising physician and/or patient is not physically present with the fellow and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. ^(Core)
- VI.A.2.c).(1).(b).(i)** The program must have clear guidelines that delineate which competencies must be met to determine when a fellow can progress to indirect supervision. ^(Core)
- VI.A.2.c).(1).(b).(ii)** The program director must ensure that clear expectations exist and are communicated to the fellows, and that these expectations outline specific situations in which a fellow would still require direct supervision. ^(Core)

1555		
1556	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. ^(Core)
1557		
1558		
1559		
1560		
1561		
1562	VI.A.2.c).(3)	Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. ^(Core)
1563		
1564		
1565		
1566	VI.A.2.d)	The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members. ^(Core)
1567		
1568		
1569		
1570		
1571	VI.A.2.d).(1)	The program director must evaluate each fellow’s abilities based on specific criteria, guided by the Milestones. ^(Core)
1572		
1573		
1574		
1575	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow. ^(Core)
1576		
1577		
1578		
1579		
1580	VI.A.2.d).(3)	Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow. ^(Detail)
1581		
1582		
1583		
1584		
1585		
1586	VI.A.2.e)	Programs must set guidelines for circumstances and events in which fellows must communicate with the supervising faculty member(s). ^(Core)
1587		
1588		
1589		
1590	VI.A.2.e).(1)	Each fellow must know the limits of their scope of authority, and the circumstances under which the fellow is permitted to act with conditional independence. ^(Outcome)
1591		
1592		
1593		
1594		

<p>Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.</p>

1595		
1596	VI.A.2.f)	Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each fellow and to delegate to the fellow the appropriate level of patient care authority and responsibility. ^(Core)
1597		
1598		
1599		
1600		
1601	VI.B.	Professionalism
1602		

1603 **VI.B.1.** Programs, in partnership with their Sponsoring Institutions, must
1604 educate fellows and faculty members concerning the professional
1605 responsibilities of physicians, including their obligation to be
1606 appropriately rested and fit to provide the care required by their
1607 patients. ^(Core)
1608

1609 **VI.B.2.** The learning objectives of the program must:

1610
1611 **VI.B.2.a)** be accomplished through an appropriate blend of supervised
1612 patient care responsibilities, clinical teaching, and didactic
1613 educational events; ^(Core)
1614

1615 **VI.B.2.b)** be accomplished without excessive reliance on fellows to
1616 fulfill non-physician obligations; and, ^(Core)
1617

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1618
1619 **VI.B.2.c)** ensure manageable patient care responsibilities. ^(Core)
1620

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1621
1622 **VI.B.3.** The program director, in partnership with the Sponsoring Institution,
1623 must provide a culture of professionalism that supports patient
1624 safety and personal responsibility. ^(Core)
1625

1626 **VI.B.4.** Fellows and faculty members must demonstrate an understanding
1627 of their personal role in the:

1628
1629 **VI.B.4.a)** provision of patient- and family-centered care; ^(Outcome)
1630

1631 **VI.B.4.b)** safety and welfare of patients entrusted to their care,
1632 including the ability to report unsafe conditions and adverse
1633 events; ^(Outcome)
1634

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1635
1636
1637

VI.B.4.c) assurance of their fitness for work, including: (Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

1638

1639 **VI.B.4.c).(1)**

management of their time before, during, and after clinical assignments; and, (Outcome)

1640

1641

1642 **VI.B.4.c).(2)**

recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. (Outcome)

1643

1644

1645

1646 **VI.B.4.d)**

commitment to lifelong learning; (Outcome)

1647

1648 **VI.B.4.e)**

monitoring of their patient care performance improvement indicators; and, (Outcome)

1649

1650

1651 **VI.B.4.f)**

accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. (Outcome)

1652

1653

1654 **VI.B.5.**

All fellows and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to another qualified and rested provider. (Outcome)

1655

1656

1657

1658

1659

1660 **VI.B.6.**

Programs, in partnership with their Sponsoring Institutions, must provide a professional, equitable, respectful, and civil environment that is free from discrimination, sexual and other forms of harassment, mistreatment, abuse, or coercion of students, fellows, faculty, and staff. (Core)

1661

1662

1663

1664

1665

1666 **VI.B.7.**

Programs, in partnership with their Sponsoring Institutions, should have a process for education of fellows and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. (Core)

1667

1668

1669

1670

1671 **VI.C.**

Well-Being

1672

1673

1674

1675

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being

1691
1692

requires that physicians retain the joy in medicine while managing their own real-life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of fellowship training.

Fellows and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

- VI.C.1.** The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:
- VI.C.1.a)** efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)
- VI.C.1.b)** attention to scheduling, work intensity, and work compression that impacts fellow well-being; ^(Core)
- VI.C.1.c)** evaluating workplace safety data and addressing the safety of fellows and faculty members; ^(Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that

monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

VI.C.1.e).(1) encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence; ^(Core)

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the

stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1741
1742 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1743 and, ^(Core)
1744
1745 VI.C.1.e).(3) provide access to confidential, affordable mental
1746 health assessment, counseling, and treatment,
1747 including access to urgent and emergent care 24
1748 hours a day, seven days a week. ^(Core)
1749

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1750
1751 VI.C.2. There are circumstances in which fellows may be unable to attend
1752 work, including but not limited to fatigue, illness, family
1753 emergencies, and parental leave. Each program must allow an
1754 appropriate length of absence for fellows unable to perform their
1755 patient care responsibilities. ^(Core)
1756
1757 VI.C.2.a) The program must have policies and procedures in place to
1758 ensure coverage of patient care. ^(Core)
1759
1760 VI.C.2.b) These policies must be implemented without fear of negative
1761 consequences for the fellow who is or was unable to provide
1762 the clinical work. ^(Core)
1763

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1764
1765 VI.D. Fatigue Mitigation

- 1766
1767 **VI.D.1. Programs must:**
1768
1769 **VI.D.1.a) educate all faculty members and fellows to recognize the**
1770 **signs of fatigue and sleep deprivation;** ^(Core)
1771
1772 **VI.D.1.b) educate all faculty members and fellows in alertness**
1773 **management and fatigue mitigation processes; and,** ^(Core)
1774
1775 **VI.D.1.c) encourage fellows to use fatigue mitigation processes to**
1776 **manage the potential negative effects of fatigue on patient**
1777 **care and learning.** ^(Detail)
1778

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1779
1780 **VI.D.2. Each program must ensure continuity of patient care, consistent**
1781 **with the program’s policies and procedures referenced in VI.C.2–**
1782 **VI.C.2.b), in the event that a fellow may be unable to perform their**
1783 **patient care responsibilities due to excessive fatigue.** ^(Core)
1784
1785 **VI.D.3. The program, in partnership with its Sponsoring Institution, must**
1786 **ensure adequate sleep facilities and safe transportation options for**
1787 **fellows who may be too fatigued to safely return home.** ^(Core)
1788
1789 **VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
1790
1791 **VI.E.1. Clinical Responsibilities**
1792
1793 **The clinical responsibilities for each fellow must be based on PGY**
1794 **level, patient safety, fellow ability, severity and complexity of patient**
1795 **illness/condition, and available support services.** ^(Core)
1796

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees

have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

VI.E.2. Teamwork

Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system.
(Core)

VI.E.3. Transitions of Care

VI.E.3.a) Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. (Core)

VI.E.3.b) Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. (Core)

VI.E.3.c) Programs must ensure that fellows are competent in communicating with team members in the hand-over process.
(Outcome)

VI.E.3.d) Programs and clinical sites must maintain and communicate schedules of attending physicians and fellows currently responsible for care. (Core)

VI.E.3.e) Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. (Core)

VI.F. Clinical Experience and Education

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to

number of hours worked may have led some to conclude that fellows' duty to "clock out" on time superseded their duty to their patients.

1841
1842
1843
1844
1845

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the

80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1864

1865 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and
1866 education after 24 hours of in-house call. ^(Core)
1867

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1868
1869 VI.F.2.d) Fellows must be scheduled for a minimum of one day in
1870 seven free of clinical work and required education (when
1871 averaged over four weeks). At-home call cannot be assigned
1872 on these free days. ^(Core)
1873

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

1874
1875 VI.F.3. Maximum Clinical Work and Education Period Length
1876

1877 VI.F.3.a) Clinical and educational work periods for fellows must not
1878 exceed 24 hours of continuous scheduled clinical
1879 assignments. ^(Core)
1880

1881 VI.F.3.a).(1) Up to four hours of additional time may be used for
1882 activities related to patient safety, such as providing
1883 effective transitions of care, and/or fellow education.
1884 ^(Core)
1885

1886 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
1887 be assigned to a fellow during this time. ^(Core)
1888

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1889
1890 VI.F.4. Clinical and Educational Work Hour Exceptions
1891

- 1892 **VI.F.4.a)** In rare circumstances, after handing off all other
 1893 responsibilities, a fellow, on their own initiative, may elect to
 1894 remain or return to the clinical site in the following
 1895 circumstances:
 1896
- 1897 **VI.F.4.a).(1)** to continue to provide care to a single severely ill or
 1898 unstable patient; ^(Detail)
 1899
- 1900 **VI.F.4.a).(2)** humanistic attention to the needs of a patient or
 1901 family; or, ^(Detail)
 1902
- 1903 **VI.F.4.a).(3)** to attend unique educational events. ^(Detail)
 1904
- 1905 **VI.F.4.b)** These additional hours of care or education will be counted
 1906 toward the 80-hour weekly limit. ^(Detail)
 1907

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 1908
- 1909 **VI.F.4.c)** A Review Committee may grant rotation-specific exceptions
 1910 for up to 10 percent or a maximum of 88 clinical and
 1911 educational work hours to individual programs based on a
 1912 sound educational rationale.
 1913
- 1914 The Review Committee for Diagnostic Radiology will not consider
 1915 requests for exceptions to the 80-hour limit to the fellows' work
 1916 week.
 1917
- 1918 **VI.F.5. Moonlighting**
- 1919
- 1920 **VI.F.5.a)** Moonlighting must not interfere with the ability of the fellow
 1921 to achieve the goals and objectives of the educational
 1922 program, and must not interfere with the fellow's fitness for
 1923 work nor compromise patient safety. ^(Core)
 1924
- 1925 **VI.F.5.b)** Time spent by fellows in internal and external moonlighting
 1926 (as defined in the ACGME Glossary of Terms) must be
 1927 counted toward the 80-hour maximum weekly limit. ^(Core)
 1928

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1929

1930 VI.F.6. In-House Night Float
1931
1932 Night float must occur within the context of the 80-hour and one-
1933 day-off-in-seven requirements. ^(Core)
1934

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1935
1936 VI.F.7. Maximum In-House On-Call Frequency
1937
1938 Fellows must be scheduled for in-house call no more frequently than
1939 every third night (when averaged over a four-week period). ^(Core)
1940

1941 VI.F.8. At-Home Call
1942

1943 VI.F.8.a) Time spent on patient care activities by fellows on at-home
1944 call must count toward the 80-hour maximum weekly limit.
1945 The frequency of at-home call is not subject to the every-
1946 third-night limitation, but must satisfy the requirement for one
1947 day in seven free of clinical work and education, when
1948 averaged over four weeks. ^(Core)
1949

1950 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to
1951 preclude rest or reasonable personal time for each
1952 fellow. ^(Core)
1953

1954 VI.F.8.b) Fellows are permitted to return to the hospital while on at-
1955 home call to provide direct care for new or established
1956 patients. These hours of inpatient patient care must be
1957 included in the 80-hour maximum weekly limit. ^(Detail)
1958

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.

1959
