1 **ACGME Program Requirements for Graduate Medical Education**
2 **in Critical Care Medicine**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48 Critical care medicine is the internal medicine subspecialty that focuses on the
49 diagnosis, management, and prevention of complications in patients who are
50 severely ill and who usually require intensive monitoring and/or organ system
51 support.
52

53 **Int.C. Length of Educational Program**

54
55 The educational program in critical care medicine must be 24 months in length.
56 (Core)*
57

58 **I. Oversight**

59
60 **I.A. Sponsoring Institution**

61
62 *The Sponsoring Institution is the organization or entity that assumes the*
63 *ultimate financial and academic responsibility for a program of graduate*
64 *medical education consistent with the ACGME Institutional Requirements.*
65

66 *When the Sponsoring Institution is not a rotation site for the program, the*
67 *most commonly utilized site of clinical activity for the program is the*
68 *primary clinical site.*
69

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

70
71 **I.A.1. The program must be sponsored by one ACGME-accredited**
72 **Sponsoring Institution. (Core)***
73

74 **I.B. Participating Sites**

75
76 *A participating site is an organization providing educational experiences or*
77 *educational assignments/rotations for fellows.*
78

79 **I.B.1. The program, with approval of its Sponsoring Institution, must**
80 **designate a primary clinical site. (Core)**
81

82 **I.B.1.a)** A critical care medicine fellowship must function as an integral
83 part of an ACGME-accredited residency in internal medicine. (Core)
84

85 **I.B.1.b)** Located at the primary clinical site, there should be at least three
86 ACGME-accredited subspecialty programs from the following
87 disciplines: in cardiovascular disease, gastroenterology, infectious
88 diseases, nephrology, or pulmonary disease. (Detail)
89

- 90 I.B.1.c) The Sponsoring Institution must establish the critical care
 91 medicine fellowship within a department of internal medicine or an
 92 administrative unit whose primary mission is the advancement of
 93 internal medicine subspecialty education and patient care. ^(Detail)
 94
- 95 I.B.1.d) The Sponsoring Institution must ensure that there is a reporting
 96 relationship with the program director of the internal medicine
 97 residency program to ensure compliance with ACGME
 98 accreditation requirements. ^(Core)
 99
- 100 **I.B.2. There must be a program letter of agreement (PLA) between the**
 101 **program and each participating site that governs the relationship**
 102 **between the program and the participating site providing a required**
 103 **assignment. ^(Core)**
- 104
- 105 **I.B.2.a) The PLA must:**
- 106
- 107 **I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)**
- 108
- 109 **I.B.2.a).(2) be approved by the designated institutional official**
 110 **(DIO). ^(Core)**
- 111
- 112 **I.B.3. The program must monitor the clinical learning and working**
 113 **environment at all participating sites. ^(Core)**
- 114
- 115 **I.B.3.a) At each participating site there must be one faculty member,**
 116 **designated by the program director, who is accountable for**
 117 **fellow education for that site, in collaboration with the**
 118 **program director. ^(Core)**
 119

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**
- **Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows**
- **Specifying the duration and content of the educational experience**
- **Stating the policies and procedures that will govern fellow education during the assignment**

120
121 **I.B.4.** **The program director must submit any additions or deletions of**
122 **participating sites routinely providing an educational experience,**
123 **required for all fellows, of one month full time equivalent (FTE) or**
124 **more through the ACGME’s Accreditation Data System (ADS). ^(Core)**
125

126 **I.C.** **The program, in partnership with its Sponsoring Institution, must engage in**
127 **practices that focus on mission-driven, ongoing, systematic recruitment**
128 **and retention of a diverse and inclusive workforce of residents (if present),**
129 **fellows, faculty members, senior administrative staff members, and other**
130 **relevant members of its academic community. ^(Core)**
131

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

132
133 **I.D.** **Resources**

134
135 **I.D.1.** **The program, in partnership with its Sponsoring Institution, must**
136 **ensure the availability of adequate resources for fellow education.**
137 **^(Core)**

138
139 I.D.1.a) Space and Equipment

140
141 There must be space and equipment for the program, including
142 meeting rooms, examination rooms, computers, visual and other
143 educational aids, and work/study space. ^(Core)
144

145 I.D.1.b) Facilities

146
147 I.D.1.b).(1) Inpatient and outpatient systems must be in place to
148 prevent fellows from performing routine clerical functions,
149 such as scheduling tests and appointments, and retrieving
150 records and letters. ^(Detail)
151

152 I.D.1.b).(2) The sponsoring institution must provide the broad range of
153 facilities and clinical support services required to provide
154 comprehensive care of adult patients. ^(Core)
155

156 I.D.1.b).(3) Fellows must have access to a lounge facility during
157 assigned duty hours. ^(Detail)
158

159 I.D.1.b).(4) When fellows are in the hospital, assigned night duty, or
160 called in from home, they must be provided with a secure
161 space for their belongings. ^(Detail)
162

163 I.D.1.b).(5) There must be facilities to care for patients with acute
164 myocardial infarction, severe trauma, shock, recent open

165		heart surgery, recent major thoracic or abdominal surgery,
166		and severe neurologic and neurosurgical conditions. ^(Core)
167		
168	I.D.1.c)	Laboratory Services
169		
170		The following must be available at the primary clinical site:
171		
172	I.D.1.c).(1)	a supporting laboratory that provides complete and prompt
173		laboratory evaluation; ^(Core)
174		
175	I.D.1.c).(2)	timely bedside imaging services for patients in the critical
176		care units; and, ^(Core)
177		
178	I.D.1.c).(3)	computed tomography (CT) imaging, including CT
179		angiography. ^(Core)
180		
181	I.D.1.d)	Other Support Services
182		
183		The following must be available:
184		
185	I.D.1.d).(1)	an active open heart surgery program; ^(Core)
186		
187	I.D.1.d).(2)	an active emergency service; ^(Core)
188		
189	I.D.1.d).(3)	post-operative care and respiratory care services; ^(Core)
190		
191	I.D.1.d).(4)	nutritional support services; ^(Core)
192		
193	I.D.1.d).(5)	equipment necessary to care for critically ill patients; and,
194		^(Core)
195		
196	I.D.1.d).(6)	critical care unit(s) located in a designated area within the
197		hospital, and constructed and designed specifically for the
198		care of critically ill patients. ^(Core)
199		
200	I.D.1.d).(6).(a)	Whether operating in separate locations or in
201		combined facilities, the program must provide the
202		equivalent of a medical intensive care unit (MICU),
203		a surgical intensive care unit (SICU), and a
204		coronary intensive care unit (CICU). ^(Detail)
205		
206	I.D.1.d).(6).(b)	The MICU or its equivalent must be at the primary
207		clinical site, and should be the focus of a teaching
208		service. ^(Core)
209		
210	I.D.1.d).(7)	Other services should be available, including
211		anesthesiology, laboratory medicine, and, radiology. ^(Detail)
212		
213	I.D.1.e)	Medical Records
214		

215 Access to an electronic health record should be provided. In the
216 absence of an existing electronic health record, institutions must
217 demonstrate institutional commitment to its development and
218 progress toward its implementation. ^(Core)
219

220 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
221 **ensure healthy and safe learning and working environments that**
222 **promote fellow well-being and provide for:** ^(Core)
223

224 **I.D.2.a) access to food while on duty;** ^(Core)
225

226 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
227 **and accessible for fellows with proximity appropriate for safe**
228 **patient care;** ^(Core)
229

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

230
231 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
232 **capabilities, with proximity appropriate for safe patient care;**
233 ^(Core)
234

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

235
236 **I.D.2.d) security and safety measures appropriate to the participating**
237 **site; and,** ^(Core)
238

239 **I.D.2.e) accommodations for fellows with disabilities consistent with**
240 **the Sponsoring Institution's policy.** ^(Core)
241

242 **I.D.3. Fellows must have ready access to subspecialty-specific and other**
243 **appropriate reference material in print or electronic format. This**
244 **must include access to electronic medical literature databases with**
245 **full text capabilities.** ^(Core)
246

247 **I.D.4. The program's educational and clinical resources must be adequate**
248 **to support the number of fellows appointed to the program.** ^(Core)
249

- 250 I.D.4.a) Patient Population
 251
 252 I.D.4.a).(1) The patient population must have a variety of clinical
 253 problems and stages of diseases. ^(Core)
 254
 255 I.D.4.a).(1).(a) Because critical care medicine is multidisciplinary in
 256 nature, the program must provide opportunities to
 257 manage adult patients with a wide variety of serious
 258 illnesses and injuries requiring treatment in a critical
 259 care setting. ^(Detail)
 260
 261 I.D.4.a).(2) There must be patients of each gender, with a broad age
 262 range, including geriatric patients. ^(Core)
 263
 264 I.D.4.a).(3) A sufficient number of patients must be available to enable
 265 each fellow to achieve the required educational outcomes.
 266 ^(Core)
 267
 268 I.D.4.b) There must be an average daily census of at least five patients
 269 per fellow during assignments to critical care units. ^(Detail)
 270
 271 **I.E.** *A fellowship program usually occurs in the context of many learners and*
 272 *other care providers and limited clinical resources. It should be structured*
 273 *to optimize education for all learners present.*
 274
 275 **I.E.1.** **Fellows should contribute to the education of residents in core**
 276 **programs, if present.** ^(Core)
 277

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

- 278
 279 **II. Personnel**
 280
 281 **II.A. Program Director**
 282
 283 **II.A.1.** **There must be one faculty member appointed as program director**
 284 **with authority and accountability for the overall program, including**
 285 **compliance with all applicable program requirements.** ^(Core)
 286
 287 **II.A.1.a)** **The Sponsoring Institution's Graduate Medical Education**
 288 **Committee (GMEC) must approve a change in program**
 289 **director.** ^(Core)
 290
 291 **II.A.1.b)** **Final approval of the program director resides with the**
 292 **Review Committee.** ^(Core)
 293

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

294
295
296
297
298
299
300
301
302
303
304
305
306

II.A.2. The program director and, as applicable, the program's leadership team, must be provided with support adequate for administration of the program based upon its size and configuration. ^(Core)

II.A.2.a) At a minimum, the program director must be provided with the salary support required to devote 20-50 percent FTE of non-clinical time to the administration of the program. ^(Core)

At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program: ^(Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>.2</u>
<u>7-9</u>	<u>.25</u>
<u>10-12</u>	<u>.3</u>
<u>13-15</u>	<u>.35</u>
<u>16-18</u>	<u>.4</u>
<u>19-21</u>	<u>.45</u>
<u>>21</u>	<u>.5</u>

307
308
309
310
311
312
313

II.A.2.b) Programs must appoint at least one of the subspecialty-certified core faculty members to be associate program director(s). The associate program directors(s) must be provided with support equal to a dedicated minimum time for administration of the program as follows: ^(Core)

<u>Number of Approved Fellow Positions</u>	<u>Minimum Support Required (FTE)</u>
<u><7</u>	<u>0</u>
<u>7-9</u>	<u>.13</u>
<u>10-12</u>	<u>.14</u>
<u>13-15</u>	<u>.15</u>
<u>16-18</u>	<u>.16</u>
<u>19-21</u>	<u>.17</u>
<u>22-24</u>	<u>.18</u>
<u>25-27</u>	<u>.24</u>
<u>28-30</u>	<u>.30</u>

314

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows,

must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

315

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have at least 30 percent FTE support for the Program Director and at least 14 percent FTE support for the associate program director(s). Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE. Further, the Review Committee allows the minimum required FTE support to be shared among multiple associate program directors, as delegated by and at the discretion of the program director.

- 316 **II.A.3. Qualifications of the program director:**
317
318 **II.A.3.a) must include subspecialty expertise and qualifications**
319 **acceptable to the Review Committee; and, ^(Core)**
320
321 **II.A.3.a).(1)** The program director must have administrative experience
322 and at least three years of participation as an active faculty
323 member in an ACGME-accredited internal medicine
324 residency or critical care medicine fellowship. ^(Core)
325
326 **II.A.3.b) must include current certification in the subspecialty for**
327 **which they are the program director by the American Board**
328 **of Internal Medicine (ABIM) or by the American Osteopathic**
329 **Board of Internal Medicine (AOBIM), or subspecialty**
330 **qualifications that are acceptable to the Review Committee.**
331 ^(Core)
332
333 **II.A.3.b).(1)** The Review Committee only accepts current ABIM or
334 AOBIM certification in critical care medicine. ^(Core)

335
336 **II.A.4. Program Director Responsibilities**
337

338 The program director must have responsibility, authority, and
339 accountability for: administration and operations; teaching and
340 scholarly activity; fellow recruitment and selection, evaluation, and
341 promotion of fellows, and disciplinary action; supervision of fellows;
342 and fellow education in the context of patient care. ^(Core)
343

344 **II.A.4.a) The program director must:**

345
346 **II.A.4.a).(1) be a role model of professionalism;** ^(Core)
347

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

348
349 **II.A.4.a).(2) design and conduct the program in a fashion**
350 **consistent with the needs of the community, the**
351 **mission(s) of the Sponsoring Institution, and the**
352 **mission(s) of the program;** ^(Core)
353

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

354
355 **II.A.4.a).(3) administer and maintain a learning environment**
356 **conducive to educating the fellows in each of the**
357 **ACGME Competency domains;** ^(Core)
358

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

359
360 **II.A.4.a).(4) develop and oversee a process to evaluate candidates**
361 **prior to approval as program faculty members for**
362 **participation in the fellowship program education and**
363 **at least annually thereafter, as outlined in V.B.;** ^(Core)
364

- 365 **II.A.4.a).(5)** have the authority to approve program faculty
366 members for participation in the fellowship program
367 education at all sites; ^(Core)
368
369 **II.A.4.a).(6)** have the authority to remove program faculty
370 members from participation in the fellowship program
371 education at all sites; ^(Core)
372
373 **II.A.4.a).(7)** have the authority to remove fellows from supervising
374 interactions and/or learning environments that do not
375 meet the standards of the program; ^(Core)
376

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 377
378 **II.A.4.a).(8)** submit accurate and complete information required
379 and requested by the DIO, GMEC, and ACGME; ^(Core)
380
381 **II.A.4.a).(9)** provide applicants who are offered an interview with
382 information related to the applicant's eligibility for the
383 relevant subspecialty board examination(s); ^(Core)
384
385 **II.A.4.a).(10)** provide a learning and working environment in which
386 fellows have the opportunity to raise concerns and
387 provide feedback in a confidential manner as
388 appropriate, without fear of intimidation or retaliation;
389 ^(Core)
390
391 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
392 Institution's policies and procedures related to
393 grievances and due process; ^(Core)
394
395 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
396 Institution's policies and procedures for due process
397 when action is taken to suspend or dismiss, not to
398 promote, or not to renew the appointment of a fellow;
399 ^(Core)
400

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.

401

- 402 **II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring
 403 **Institution’s policies and procedures on employment**
 404 **and non-discrimination;** ^(Core)
 405
 406 **II.A.4.a).(13).(a)** **Fellows must not be required to sign a non-**
 407 **competition guarantee or restrictive covenant.**
 408 ^(Core)
 409
 410 **II.A.4.a).(14)** **document verification of program completion for all**
 411 **graduating fellows within 30 days;** ^(Core)
 412
 413 **II.A.4.a).(15)** **provide verification of an individual fellow’s**
 414 **completion upon the fellow’s request, within 30 days;**
 415 **and,** ^(Core)
 416

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 417
 418 **II.A.4.a).(16)** **obtain review and approval of the Sponsoring**
 419 **Institution’s DIO before submitting information or**
 420 **requests to the ACGME, as required in the Institutional**
 421 **Requirements and outlined in the ACGME Program**
 422 **Director’s Guide to the Common Program**
 423 **Requirements.** ^(Core)
 424

425 **II.B. Faculty**

426
 427 ***Faculty members are a foundational element of graduate medical education***
 428 ***– faculty members teach fellows how to care for patients. Faculty members***
 429 ***provide an important bridge allowing fellows to grow and become practice***
 430 ***ready, ensuring that patients receive the highest quality of care. They are***
 431 ***role models for future generations of physicians by demonstrating***
 432 ***compassion, commitment to excellence in teaching and patient care,***
 433 ***professionalism, and a dedication to lifelong learning. Faculty members***
 434 ***experience the pride and joy of fostering the growth and development of***
 435 ***future colleagues. The care they provide is enhanced by the opportunity to***
 436 ***teach. By employing a scholarly approach to patient care, faculty members,***
 437 ***through the graduate medical education system, improve the health of the***
 438 ***individual and the population.***

439
 440 ***Faculty members ensure that patients receive the level of care expected***
 441 ***from a specialist in the field. They recognize and respond to the needs of***
 442 ***the patients, fellows, community, and institution. Faculty members provide***
 443 ***appropriate levels of supervision to promote patient safety. Faculty***
 444 ***members create an effective learning environment by acting in a***
 445 ***professional manner and attending to the well-being of the fellows and***
 446 ***themselves.***

447

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.

448

449

II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. (Core)

450

451

452

453

II.B.2. Faculty members must:

454

455

II.B.2.a) be role models of professionalism; (Core)

456

457

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; (Core)

458

459

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

460

461

II.B.2.c) demonstrate a strong interest in the education of fellows; (Core)

462

463

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; (Core)

464

465

466

II.B.2.e) administer and maintain an educational environment conducive to educating fellows; (Core)

467

468

469

II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, (Core)

470

471

472

II.B.2.g) pursue faculty development designed to enhance their skills at least annually. (Core)

473

474

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

475

476

II.B.3. Faculty Qualifications

477

478

II.B.3.a) Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments. (Core)

479

480

481

482 **II.B.3.b) Subspecialty physician faculty members must:**
483
484 **II.B.3.b).(1) have current certification in the subspecialty by the**
485 **American Board of Internal Medicine or the American**
486 **Osteopathic Board of Internal Medicine, or possess**
487 **qualifications judged acceptable to the Review**
488 **Committee. (Core)**

489
490 **II.B.3.c) Any non-physician faculty members who participate in**
491 **fellowship program education must be approved by the**
492 **program director. (Core)**
493

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

494
495 **II.B.3.d) Any other specialty physician faculty members must have**
496 **current certification in their specialty by the appropriate**
497 **American Board of Medical Specialties (ABMS) member**
498 **board or American Osteopathic Association (AOA) certifying**
499 **board, or possess qualifications judged acceptable to the**
500 **Review Committee. (Core)**
501

502 **II.B.3.d).(1) ABIM- or AOBIM-certified clinical faculty members in**
503 **cardiology, gastroenterology, hematology, infectious**
504 **disease, nephrology, oncology, and pulmonary disease,**
505 **must participate in the program. (Core)**
506

507 **II.B.3.d).(2) Faculty from anesthesiology, cardiovascular surgery,**
508 **emergency medicine, neurology, neurosurgery, obstetrics**
509 **and gynecology, orthopaedic surgery, surgery, thoracic**
510 **surgery, urology, and vascular surgery should be available**
511 **to participate in the education of fellows. (Core)**
512

513 **II.B.4. Core Faculty**

514
515 **Core faculty members must have a significant role in the education**
516 **and supervision of fellows and must devote a significant portion of**
517 **their entire effort to fellow education and/or administration, and**
518 **must, as a component of their activities, teach, evaluate, and provide**
519 **formative feedback to fellows. (Core)**
520

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core

faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

- 521
522 **II.B.4.a)** Core faculty members must be designated by the program
523 director. ^(Core)
524
- 525 **II.B.4.b)** Core faculty members must complete the annual ACGME
526 Faculty Survey. ^(Core)
527
- 528 **II.B.4.c)** In addition to the program director, there must be at least two core
529 faculty members certified in critical care medicine by the ABIM or
530 the AOBIM. ^(Core)
531
- 532 **II.B.4.d)** In programs approved for more than three fellows, there must be
533 at least one core faculty member certified in critical care medicine
534 by the ABIM or the AOBIM for every 1.5 fellows. ^(Core)
535
- 536 **II.B.4.e)** At a minimum, the required core faculty members, in aggregate
537 and excluding members of the program leadership, must be
538 provided with support equal to an average dedicated minimum of
539 .1 FTE for educational and administrative responsibilities that do
540 not involve direct patient care. ^(Core)
541

542 ~~Specialty Background and Intent: The program must have a minimum number of ABIM- or AOBIM-certified endocrinology, diabetes, and metabolism faculty members who devote significant time to teaching, supervising, and advising residents, and working closely with the program director. One way the endocrinology, diabetes, and metabolism-certified faculty members can demonstrate they are devoting a significant portion of their effort to resident education is by dedicating an average of 10 hours per week to the program.~~

Subspecialty-Specific Background and Intent: For instance, a program with an approved complement of 12 fellows is required to have a minimum of eight ABIM- or AOBIM-subspecialty-certified faculty members and an FTE of 10 percent each. Because an associate program director is also a core faculty member, the minimum dedicated time requirements for associate program directors are inclusive of core faculty activities. An additional 10 percent FTE for the core faculty position is not required. For example, if one core faculty member is named the associate program director for a 12-fellow program, the required minimum support for that position is 14 percent FTE.

543 **II.C. Program Coordinator**
544

545 II.C.1. There must be a program coordinator. (Core)

546

547 II.C.2. The program coordinator must be provided with support adequate
548 for administration of the program based upon its size and
549 configuration. (Core)

550

551 II.C.2.a) At a minimum, the program coordinator must be provided with the
552 dedicated time and support specified below for administration of
553 the program. Additional administrative support must be provided
554 based on the program size as follows: (Core)

555

<u>Number of Approved Fellow Positions</u>	<u>Minimum FTE Required for Coordinator Support</u>	<u>Additional Aggregate FTE Required for Administration of the Program</u>
<u>1-3</u>	<u>.3</u>	<u>0</u>
<u>4-6</u>	<u>.3</u>	<u>.2</u>
<u>7-9</u>	<u>.3</u>	<u>.38</u>
<u>10-12</u>	<u>.3</u>	<u>.44</u>
<u>13-15</u>	<u>.3</u>	<u>.50</u>
<u>16-18</u>	<u>.3</u>	<u>.56</u>
<u>19-21</u>	<u>.3</u>	<u>.62</u>
<u>22-24</u>	<u>.3</u>	<u>.68</u>
<u>25-27</u>	<u>.3</u>	<u>.74</u>
<u>28-30</u>	<u>.3</u>	<u>.80</u>

556

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

557

558

559

II.D. Other Program Personnel

560
561
562
563

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

564
565
566
567
568
569
570
571
572
573
574

- II.D.1. There must be services available from other health care professionals, including dietitians, language interpreters, nurses, occupational therapists, physical therapists, and social workers. ^(Detail)
- II.D.2. Personnel must include nurses and technicians who are skilled in critical care instrumentation, respiratory function, and laboratory medicine. ^(Detail)
- II.D.3. There must be appropriate and timely consultation from other specialties. ^(Detail)

575

III. Fellow Appointments

576

III.A. Eligibility Criteria

577

III.A.1. Eligibility Requirements – Fellowship Programs

578

579

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.
^(Core)

580

581

582

583

584

585

586

587

588

589

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

590

- III.A.1.a) Fellowship programs must receive verification of each entering fellow’s level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program. ^(Core)

591

592

593

594

595

- III.A.1.b) Prerequisite Postgraduate Clinical Education

596

597

- III.A.1.b).(1) To be eligible for appointment at the F1 level, fellows should have completed an ACGME-, AOA-, ACGME-I, or RCPSC-accredited internal medicine or emergency medicine program. ^(Core)

598

599

600

601

602

603	III.A.1.b).(2)	To be eligible for appointment at the F2 level, fellows must
604		have completed a two- or three-year ACGME-, AOA-,
605		ACGME-I, or RCPSC-accredited internal medicine
606		subspecialty fellowship. ^(Core)
607		
608	III.A.1.b).(3)	Fellows from ACGME-, AOA-, ACGME-I, or RCPSC-
609		accredited emergency medicine programs should have
610		completed at least six months of direct patient care
611		experience in internal medicine, of which at least three
612		months must have been in a medical intensive care unit.
613		^(Core)
614		
615	III.A.1.b).(4)	Fellows from non-ACGME-, AOA, ACGME-I, or RCPSC-
616		accredited internal medicine or emergency medicine
617		programs must have completed at least three years of
618		internal medicine education prior to starting the fellowship.
619		^(Core)
620		
621	III.A.1.c)	Fellow Eligibility Exception
622		
623		The Review Committee for Internal Medicine will allow the
624		following exception to the fellowship eligibility requirements:
625		
626	III.A.1.c).(1)	An ACGME-accredited fellowship program may accept
627		an exceptionally qualified international graduate
628		applicant who does not satisfy the eligibility
629		requirements listed in III.A.1., but who does meet all of
630		the following additional qualifications and conditions:
631		^(Core)
632		
633	III.A.1.c).(1).(a)	evaluation by the program director and
634		fellowship selection committee of the
635		applicant’s suitability to enter the program,
636		based on prior training and review of the
637		summative evaluations of training in the core
638		specialty; and, ^(Core)
639		
640	III.A.1.c).(1).(b)	review and approval of the applicant’s
641		exceptional qualifications by the GMEC; and,
642		^(Core)
643		
644	III.A.1.c).(1).(c)	verification of Educational Commission for
645		Foreign Medical Graduates (ECFMG)
646		certification. ^(Core)
647		
648	III.A.1.c).(2)	Applicants accepted through this exception must have
649		an evaluation of their performance by the Clinical
650		Competency Committee within 12 weeks of
651		matriculation. ^(Core)
652		

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

653
654 **III.B. The program director must not appoint more fellows than approved by the**
655 **Review Committee. (Core)**
656

657 **III.B.1. All complement increases must be approved by the Review**
658 **Committee. (Core)**
659

660 **III.C. Fellow Transfers**
661

662 **The program must obtain verification of previous educational experiences**
663 **and a summative competency-based performance evaluation prior to**
664 **acceptance of a transferring fellow, and Milestones evaluations upon**
665 **matriculation. (Core)**
666

667 **IV. Educational Program**
668

669 ***The ACGME accreditation system is designed to encourage excellence and***
670 ***innovation in graduate medical education regardless of the organizational***
671 ***affiliation, size, or location of the program.***
672

673 ***The educational program must support the development of knowledgeable, skillful***
674 ***physicians who provide compassionate care.***
675

676 ***In addition, the program is expected to define its specific program aims consistent***
677 ***with the overall mission of its Sponsoring Institution, the needs of the community***
678 ***it serves and that its graduates will serve, and the distinctive capabilities of***
679 ***physicians it intends to graduate. While programs must demonstrate substantial***
680 ***compliance with the Common and subspecialty-specific Program Requirements, it***
681 ***is recognized that within this framework, programs may place different emphasis***
682 ***on research, leadership, public health, etc. It is expected that the program aims***
683 ***will reflect the nuanced program-specific goals for it and its graduates; for***
684 ***example, it is expected that a program aiming to prepare physician-scientists will***
685 ***have a different curriculum from one focusing on community health.***
686

687 **IV.A. The curriculum must contain the following educational components: (Core)**

- 688
689 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution’s
690 mission, the needs of the community it serves, and the desired
691 distinctive capabilities of its graduates; ^(Core)
692
693 **IV.A.1.a)** The program’s aims must be made available to program
694 applicants, fellows, and faculty members. ^(Core)
695
696 **IV.A.2.** competency-based goals and objectives for each educational
697 experience designed to promote progress on a trajectory to
698 autonomous practice in their subspecialty. These must be
699 distributed, reviewed, and available to fellows and faculty members;
700 ^(Core)
701
702 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive
703 responsibility for patient management, and graded supervision in
704 their subspecialty; ^(Core)
705

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

- 706
707 **IV.A.4.** structured educational activities beyond direct patient care; and,
708 ^(Core)
709

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

- 710
711 **IV.A.5.** advancement of fellows’ knowledge of ethical principles
712 foundational to medical professionalism. ^(Core)
713
714 **IV.B.** **ACGME Competencies**
715

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

- 716
717 **IV.B.1.** The program must integrate the following ACGME Competencies
718 into the curriculum: ^(Core)

719
720 **IV.B.1.a) Professionalism**
721
722 **Fellows must demonstrate a commitment to professionalism**
723 **and an adherence to ethical principles.** (Core)
724

725 **IV.B.1.b) Patient Care and Procedural Skills**
726

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

727
728 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**
729 **compassionate, appropriate, and effective for the**
730 **treatment of health problems and the promotion of**
731 **health.** (Core)
732

733 IV.B.1.b).(1).(a) Fellows must demonstrate competence in the
734 practice of health promotion, disease prevention,
735 diagnosis, care, and treatment of patients of each
736 gender, from adolescence to old age, during health
737 and all stages of illness; and, (Core)
738

739 IV.B.1.b).(1).(b) Fellows must demonstrate competence in the
740 prevention, evaluation, and management of
741 patients with:

743 IV.B.1.b).(1).(b).(i) acute lung injury, including radiation,
744 inhalation, and trauma; (Core)

746 IV.B.1.b).(1).(b).(ii) acute metabolic disturbances, including
747 overdoses and intoxication syndromes;
748 (Core)

750 IV.B.1.b).(1).(b).(iii) anaphylaxis and acute allergic reactions in
751 the critical care unit; (Core)

753 IV.B.1.b).(1).(b).(iv) cardiovascular diseases in the critical care
754 unit; (Core)

756 IV.B.1.b).(1).(b).(v) circulatory failure; (Core)

758 IV.B.1.b).(1).(b).(vi) end-of-life issues and palliative care; (Core)

759		
760	IV.B.1.b).(1).(b).(vii)	hypertensive emergencies; (Core)
761		
762	IV.B.1.b).(1).(b).(viii)	immunosuppressed conditions in the critical care unit; (Core)
763		
764		
765	IV.B.1.b).(1).(b).(ix)	metabolic, nutritional, and endocrine effects of critical illness, hematologic and coagulation disorders associated with critical illness; (Core)
766		
767		
768		
769		
770	IV.B.1.b).(1).(b).(x)	multi-organ system failure; (Core)
771		
772	IV.B.1.b).(1).(b).(xi)	perioperative critically ill patients, (Core)
773

940 **IV.B.1.d)**

Practice-based Learning and Improvement

Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

947

948 **IV.B.1.e)**

Interpersonal and Communication Skills

Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. ^(Core)

953

954		
955	IV.B.1.f)	Systems-based Practice
956		
957		Fellows must demonstrate an awareness of and
958		responsiveness to the larger context and system of health
959		care, including the social determinants of health, as well as
960		the ability to call effectively on other resources to provide
961		optimal health care. <small>(Core)</small>
962		
963	IV.C.	Curriculum Organization and Fellow Experiences
964		
965	IV.C.1.	The curriculum must be structured to optimize fellow educational
966		experiences, the length of these experiences, and supervisory
967		continuity. <small>(Core)</small>
968		
969	IV.C.1.a)	Assignment of rotations must be structured to minimize the
970		frequency of rotational transitions, and rotations must be of
971		sufficient length to provide a quality educational experience,
972		defined by continuity of patient care, ongoing supervision,
973		longitudinal relationships with faculty members, and meaningful
974		assessment and feedback. <small>(Core)</small>
975		
976	IV.C.1.b)	Clinical experiences should be structured to facilitate learning in a
977		manner that allows fellows to function as part of an effective
978		interprofessional team that works together towards the shared
979		goals of patient safety and quality improvement. <small>(Core)</small>
980		
981	IV.C.2.	The program must provide instruction and experience in pain
982		management if applicable for the subspecialty, including recognition
983		of the signs of addiction. <small>(Core)</small>
984		
985	IV.C.3.	A minimum of 12 months must be devoted to clinical experiences. <small>(Core)</small>
986		
987	IV.C.3.a)	At least six months must be devoted to the care of critically ill
988		medical patients (i.e., MICU/CICU or equivalent). <small>(Core)</small>
989		
990	IV.C.3.a).(1)	This required MICU/CICU experience may be reduced up
991		to three months by equivalent (month for month) ICU
992		experience completed during a previous two- to three-year
993		ACGME-, AOA, or RCPSC-accredited internal medicine
994		subspecialty fellowship. <small>(Detail)</small>
995		
996	IV.C.3.b)	At least three months must be devoted to the care of critically ill
997		non-medical patients. <small>(Core)</small>
998		
999	IV.C.3.b).(1)	This experience should consist of at least one month of
1000		direct patient care activity, with the remainder being fulfilled
1001		with either consultative activities or with direct care of such
1002		patients. <small>(Detail)</small>
1003		
1004	IV.C.4.	Fellows entering at the F1 level who have completed an ACGME, AOA-,

1005		ACGME-I-, or RCPSC-accredited emergency medicine program, but have
1006		not completed the prerequisite clinical experiences in internal medicine
1007		described in Section III.A.1.b).(3), must complete these experiences
1008		during the beginning of the F1 year prior to being allowed to supervise
1009		any internal medicine residents. (Core)
1010		
1011	IV.C.4.a)	Any clinical experiences done to fulfill the prerequisite clinical
1012		experiences in internal medicine described in Section III.A.1.b).(3)
1013		will not count toward the 12 months of minimum required clinical
1014		experiences in critical care medicine. (Core)
1015		
1016	IV.C.5.	Twelve additional months must be devoted to appropriate elective
1017		experiences or scholarly activity. (Core)
1018		
1019	IV.C.5.a)	Fellows who have completed a previous two- to three-year
1020		ACGME-, AOA, ACGME-I, or RCPSC-accredited internal
1021		medicine subspecialty fellowship will automatically satisfy this
1022		requirement. (Detail)
1023		
1024	IV.C.6.	Fellows must participate in training using simulation. (Detail)
1025		
1026	IV.C.7.	Fellows must be informed of the clinical outcomes of their patients who
1027		are discharged from the critical care units. (Detail)
1028		
1029	IV.C.8.	Fellows must have clinical experience in the evaluation and management
1030		of patients:
1031		
1032	IV.C.8.a)	with trauma; (Core)
1033		
1034	IV.C.8.b)	with neurosurgical emergencies; (Core)
1035		
1036	IV.C.8.c)	with critical obstetric and gynecologic disorders; and, (Core)
1037		
1038	IV.C.8.d)	after discharge from the critical care unit. (Core)
1039		
1040	IV.C.9.	Procedures and Technical Skills
1041		
1042	IV.C.9.a)	Direct supervision of procedures performed by each fellow must
1043		occur until proficiency has been acquired and documented by the
1044		program director. (Core)
1045		
1046	IV.C.9.b)	Faculty members must teach and supervise the fellows in the
1047		performance and interpretation of procedures. Procedures must
1048		be documented in each fellow's record, giving indications,
1049		outcomes, diagnoses, and supervisor(s). (Core)
1050		
1051	IV.C.9.c)	It is suggested that fellows have clinical experience in the
1052		placement of percutaneous tracheostomies. (Detail)
1053		
1054	IV.C.9.d)	Fellows must have experience in the role of critical care medicine
1055		consultant in the inpatient setting. (Core)

- 1056
1057 IV.C.10. The core curriculum must include a didactic program based upon the core
1058 knowledge content in the subspecialty area. ^(Core)
- 1059
1060 IV.C.10.a) The program must afford each fellow an opportunity to review
1061 topics covered in conferences that he or she was unable to attend.
1062 ^(Detail)
- 1063
1064 IV.C.10.b) Fellows must participate in clinical case conferences, journal
1065 clubs, research conferences, and morbidity and mortality or quality
1066 improvement conferences. ^(Detail)
- 1067
1068 IV.C.10.c) All core conferences must have at least one faculty member
1069 present and must be scheduled as to ensure peer-peer and peer-
1070 faculty interaction. ^(Detail)
- 1071
1072 IV.C.11. Patient-based teaching must include direct interaction between fellows
1073 and faculty members, bedside teaching, discussion of pathophysiology,
1074 and the use of current evidence in diagnostic and therapeutic decisions.
1075 ^(Core)
- 1076
1077 The teaching must be:
- 1078
1079 IV.C.11.a) formally conducted on all inpatient, outpatient, and consultative
1080 services; and, ^(Detail)
- 1081
1082 IV.C.11.b) conducted with a frequency and duration that ensures a
1083 meaningful and continuous teaching relationship between the
1084 assigned supervising faculty member(s) and fellows. ^(Detail)
- 1085
1086 IV.C.12. Fellows must receive instruction in practice management relevant to
1087 critical care medicine. ^(Detail)
- 1088

1122 **^(Core)**

- 1123
1124
1125
1126
1127
1128
1129
1130
1131
1132
1133
1134
1135
1136
- Research in basic science, education, translational science, patient care, or population health
 - Peer-reviewed grants
 - Quality improvement and/or patient safety initiatives
 - Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
 - Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
 - Contribution to professional committees, educational organizations, or editorial boards
 - Innovations in education

1137 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
1138 **activity within and external to the program by the following**
1139 **methods:**

1140

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1141
1142 **IV.D.2.b).(1) faculty participation in grand rounds, posters,**
1143 **workshops, quality improvement presentations,**
1144 **podium presentations, grant leadership, non-peer-**
1145 **reviewed print/electronic resources, articles or**
1146 **publications, book chapters, textbooks, webinars,**

1147 **service on professional committees, or serving as a**
1148 **journal reviewer, journal editorial board member, or**
1149 **editor.** (Outcome)‡

1150
1151 IV.D.2.b).(1).(a)

At least 50 percent of the core faculty members who are certified in critical care medicine by the ABIM or AOBIM (see Program Requirements II.B.4.c)-d) must annually engage in a variety of scholarly activities, as listed in Program Requirement IV.D.2.b).(1). (Core)

1161
1162
1163
1164
1165
1166
1167
1168
1169 **V. Evaluation**

1170
1171 **V.A. Fellow Evaluation**

1172
1173 **V.A.1. Feedback and Evaluation**
1174

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

- 1175
1176 **V.A.1.a) Faculty members must directly observe, evaluate, and**
1177 **frequently provide feedback on fellow performance during**
1178 **each rotation or similar educational assignment.** (Core)
1179
1180 V.A.1.a).(1) The faculty must discuss this evaluation with each fellow at
1181 the completion of each assignment. (Core)
1182
1183 V.A.1.a).(2) Assessment of procedural competence should include a
1184 formal evaluation process and not be based solely on a
1185 minimum number of procedures performed. (Detail)
1186

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

- 1187
1188 **V.A.1.b) Evaluation must be documented at the completion of the**
1189 **assignment.** (Core)
1190
1191 **V.A.1.b).(1) For block rotations of greater than three months in**
1192 **duration, evaluation must be documented at least**
1193 **every three months.** (Core)
1194
1195 **V.A.1.b).(2) Longitudinal experiences such as continuity clinic in**
1196 **the context of other clinical responsibilities must be**
1197 **evaluated at least every three months and at**
1198 **completion.** (Core)
1199
1200 **V.A.1.c) The program must provide an objective performance**
1201 **evaluation based on the Competencies and the subspecialty-**
1202 **specific Milestones, and must:** (Core)
1203
1204 **V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers,**
1205 **patients, self, and other professional staff members);**
1206 **and,** (Core)
1207
1208 **V.A.1.c).(2) provide that information to the Clinical Competency**
1209 **Committee for its synthesis of progressive fellow**
1210 **performance and improvement toward unsupervised**
1211 **practice.** (Core)
1212

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship.

These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 1213
 1214 **V.A.1.d)** The program director or their designee, with input from the
 1215 Clinical Competency Committee, must:
 1216
 1217 **V.A.1.d).(1)** meet with and review with each fellow their
 1218 documented semi-annual evaluation of performance,
 1219 including progress along the subspecialty-specific
 1220 Milestones. ^(Core)
 1221
 1222 **V.A.1.d).(2)** assist fellows in developing individualized learning
 1223 plans to capitalize on their strengths and identify areas
 1224 for growth; and, ^(Core)
 1225
 1226 **V.A.1.d).(3)** develop plans for fellows failing to progress, following
 1227 institutional policies and procedures. ^(Core)
 1228

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1229
 1230 **V.A.1.e)** At least annually, there must be a summative evaluation of
 1231 each fellow that includes their readiness to progress to the
 1232 next year of the program, if applicable. ^(Core)
 1233
 1234 **V.A.1.f)** The evaluations of a fellow's performance must be accessible
 1235 for review by the fellow. ^(Core)
 1236
 1237 **V.A.2.** Final Evaluation
 1238

1239	V.A.2.a)	The program director must provide a final evaluation for each fellow upon completion of the program. ^(Core)
1240		
1241		
1242	V.A.2.a).(1)	The subspecialty-specific Milestones, and when applicable the subspecialty-specific Case Logs, must be used as tools to ensure fellows are able to engage in autonomous practice upon completion of the program. ^(Core)
1243		
1244		
1245		
1246		
1247		
1248	V.A.2.a).(2)	The final evaluation must:
1249		
1250	V.A.2.a).(2).(a)	become part of the fellow’s permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; ^(Core)
1251		
1252		
1253		
1254		
1255	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; ^(Core)
1256		
1257		
1258		
1259	V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, ^(Core)
1260		
1261		
1262	V.A.2.a).(2).(d)	be shared with the fellow upon completion of the program. ^(Core)
1263		
1264		
1265	V.A.3.	A Clinical Competency Committee must be appointed by the program director. ^(Core)
1266		
1267		
1268	V.A.3.a)	At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program’s fellows. ^(Core)
1269		
1270		
1271		
1272		
1273		
1274		
1275	V.A.3.b)	The Clinical Competency Committee must:
1276		
1277	V.A.3.b).(1)	review all fellow evaluations at least semi-annually; ^(Core)
1278		
1279		
1280	V.A.3.b).(2)	determine each fellow’s progress on achievement of the subspecialty-specific Milestones; and, ^(Core)
1281		
1282		
1283	V.A.3.b).(3)	meet prior to the fellows’ semi-annual evaluations and advise the program director regarding each fellow’s progress. ^(Core)
1284		
1285		
1286		
1287	V.B.	Faculty Evaluation
1288		

1289 **V.B.1.** The program must have a process to evaluate each faculty
1290 member's performance as it relates to the educational program at
1291 least annually. ^(Core)
1292

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1293
1294 **V.B.1.a)** This evaluation must include a review of the faculty member's
1295 clinical teaching abilities, engagement with the educational
1296 program, participation in faculty development related to their
1297 skills as an educator, clinical performance, professionalism,
1298 and scholarly activities. ^(Core)
1299

1300 **V.B.1.b)** This evaluation must include written, confidential evaluations
1301 by the fellows. ^(Core)
1302

1303 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1304 annually. ^(Core)
1305

1306 **V.B.3.** Results of the faculty educational evaluations should be
1307 incorporated into program-wide faculty development plans. ^(Core)
1308

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1309
1310 **V.C.** Program Evaluation and Improvement
1311

1312 **V.C.1.** The program director must appoint the Program Evaluation
1313 Committee to conduct and document the Annual Program

- 1314 **Evaluation as part of the program's continuous improvement**
 1315 **process.** ^(Core)
 1316
 1317 **V.C.1.a)** **The Program Evaluation Committee must be composed of at**
 1318 **least two program faculty members, at least one of whom is a**
 1319 **core faculty member, and at least one fellow.** ^(Core)
 1320
 1321 **V.C.1.b)** **Program Evaluation Committee responsibilities must include:**
 1322
 1323 **V.C.1.b).(1)** **acting as an advisor to the program director, through**
 1324 **program oversight;** ^(Core)
 1325
 1326 **V.C.1.b).(2)** **review of the program's self-determined goals and**
 1327 **progress toward meeting them;** ^(Core)
 1328
 1329 **V.C.1.b).(3)** **guiding ongoing program improvement, including**
 1330 **development of new goals, based upon outcomes;**
 1331 **and,** ^(Core)
 1332
 1333 **V.C.1.b).(4)** **review of the current operating environment to identify**
 1334 **strengths, challenges, opportunities, and threats as**
 1335 **related to the program's mission and aims.** ^(Core)
 1336

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1337
 1338 **V.C.1.c)** **The Program Evaluation Committee should consider the**
 1339 **following elements in its assessment of the program:**
 1340
 1341 **V.C.1.c).(1)** **curriculum;** ^(Core)
 1342
 1343 **V.C.1.c).(2)** **outcomes from prior Annual Program Evaluation(s);**
 1344 ^(Core)
 1345
 1346 **V.C.1.c).(3)** **ACGME letters of notification, including citations,**
 1347 **Areas for Improvement, and comments;** ^(Core)

1374		
1375		
1376	V.C.1.c).(6).(c)	board pass and certification rates; and, ^(Core)
1377		
1378	V.C.1.c).(6).(d)	graduate performance. ^(Core)
1379		
1380	V.C.1.c).(7)	aggregate faculty:
1381		
1382	V.C.1.c).(7).(a)	evaluation; and, ^(Core)
1383		
1384	V.C.1.c).(7).(b)	professional development ^(Core)
1385		
1386	V.C.1.d)	The Program Evaluation Committee must evaluate the program’s mission and aims, strengths, areas for improvement, and threats. ^(Core)
1387		
1388		
1389		
1390	V.C.1.e)	The annual review, including the action plan, must:
1391		
1392	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the fellows; and, ^(Core)
1393		
1394		
1395	V.C.1.e).(2)	be submitted to the DIO. ^(Core)
1396		
1397	V.C.2.	The program must participate in a Self-Study prior to its 10-Year Accreditation Site Visit. ^(Core)
1398		
1399		
1400	V.C.2.a)	A summary of the Self-Study must be submitted to the DIO. ^(Core)
1401		
1402		

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the

Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- V.C.3.** *One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.*
- The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.*
- V.C.3.a)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.b)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.c)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.d)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty. *(Outcome)*

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five

percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1447
1448
1449
1450
1451

V.C.3.f) Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. ^(Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more

discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

1503 ***A culture of safety requires continuous identification***

Supervision and Accountability

1614
1615 VI.A.2.a)

Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.

Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.

Fellows and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)

1642
1643
1644
1645 VI.A.2.b)

Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced fellow. Other portions of care provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances,

1653
1654
1655

supervision may include post-hoc review of fellow-delivered care with feedback.

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

- 1702 Milestones. ^(Core)
- 1703
- 1704 VI.A.2.d).(2) Faculty members functioning as supervising
- 1705 physicians must delegate portions of care to fellows
- 1706 based on the needs of the patient and the skills of
- 1707 each fellow. ^(Core)
- 1708
- 1709 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
- 1710 fellows and residents in recognition of their progress
- 1711 toward independence, based on the needs of each
- 1712 patient and the skills of the individual resident or
- 1713 fellow. ^(Detail)
- 1714
- 1715 VI.A.2.e) Programs must set guidelines for circumstances and events
- 1716 in which fellows must communicate with the supervising
- 1717 faculty member(s). ^(Core)
- 1718
- 1719 VI.A.2.e).(1) Each fellow must know the limits of their scope of
- 1720 authority, and the circumstances under which the
- 1721 fellow is permitted to act with conditional
- 1722 independence. ^(Outcome)
- 1723

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1724
- 1725 VI.A.2.f) Faculty supervision assignments must be of sufficient
- 1726 duration to assess the knowledge and skills of each fellow
- 1727 and to delegate to the fellow the appropriate level of patient
- 1728 care authority and responsibility. ^(Core)
- 1729
- 1730 VI.B. Professionalism
- 1731
- 1732 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
- 1733 educate fellows and faculty members concerning the professional
- 1734 responsibilities of physicians, including their obligation to be
- 1735 appropriately rested and fit to provide the care required by their
- 1736 patients. ^(Core)
- 1737
- 1738 VI.B.2. The learning objectives of the program must:
- 1739
- 1740 VI.B.2.a) be accomplished through an appropriate blend of supervised
- 1741 patient care responsibilities, clinical teaching, and didactic
- 1742 educational events; ^(Core)

1743
1744
1745
1746

VI.B.2.b) be accomplished without excessive reliance on fellows to fulfill non-physician obligations; and, ^(Core)

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1747
1748
1749

VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

1818 *clinical learning environment models constructive behaviors, and prepares*
1819 *fellows with the skills and attitudes needed to thrive throughout their*
1820 *careers.*
1821

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

- 1822
1823 **VI.C.1.** The responsibility of the program, in partnership with the
1824 Sponsoring Institution, to address well-being must include:
1825
1826 **VI.C.1.a)** efforts to enhance the meaning that each fellow finds in the
1827 experience of being a physician, including protecting time
1828 with patients, minimizing non-physician obligations,
1829 providing administrative support, promoting progressive
1830 autonomy and flexibility, and enhancing professional
1831 relationships; ^(Core)
1832
1833 **VI.C.1.b)** attention to scheduling, work intensity, and work
1834 compression that impacts fellow well-being; ^(Core)
1835
1836 **VI.C.1.c)** evaluating workplace safety data and addressing the safety of
1837 fellows and faculty members; ^(Core)
1838

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

- 1839
1840 **VI.C.1.d)** policies and programs that encourage optimal fellow and
1841 faculty member well-being; and, ^(Core)
1842

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1843
1844 **VI.C.1.d).(1)** **Fellows must be given the opportunity to attend**
1845 **medical, mental health, and dental care appointments,**
1846 **including those scheduled during their working hours.**
1847 **(Core)**
1848

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1849
1850 **VI.C.1.e)** **attention to fellow and faculty member burnout, depression,**
1851 **and substance use disorder. The program, in partnership with**
1852 **its Sponsoring Institution, must educate faculty members and**
1853 **fellows in identification of the symptoms of burnout,**
1854 **depression, and substance use disorder, including means to**
1855 **assist those who experience these conditions. Fellows and**
1856 **faculty members must also be educated to recognize those**
1857 **symptoms in themselves and how to seek appropriate care.**
1858 **The program, in partnership with its Sponsoring Institution,**
1859 **must: (Core)**
1860

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available in Learn at ACGME (<https://dl.acgme.org/pages/well-being-tools-resources>).

1861
1862 **VI.C.1.e).(1)** **encourage fellows and faculty members to alert the**
1863 **program director or other designated personnel or**
1864 **programs when they are concerned that another**
1865 **fellow, resident, or faculty member may be displaying**
1866 **signs of burnout, depression, a substance use**
1867 **disorder, suicidal ideation, or potential for violence;**
1868 **(Core)**
1869

Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1870
1871 **VI.C.1.e).(2)** provide access to appropriate tools for self-screening;
1872 and, ^(Core)
1873
1874 **VI.C.1.e).(3)** provide access to confidential, affordable mental
1875 health assessment, counseling, and treatment,
1876 including access to urgent and emergent care 24
1877 hours a day, seven days a week. ^(Core)
1878

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1879
1880 **VI.C.2.** There are circumstances in which fellows may be unable to attend
1881 work, including but not limited to fatigue, illness, family
1882 emergencies, and parental leave. Each program must allow an
1883 appropriate length of absence for fellows unable to perform their
1884 patient care responsibilities. ^(Core)
1885
1886 **VI.C.2.a)** The program must have policies and procedures in place to
1887 ensure coverage of patient care. ^(Core)
1888
1889 **VI.C.2.b)** These policies must be implemented without fear of negative
1890 consequences for the fellow who is or was unable to provide
1891 the clinical work. ^(Core)
1892

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1893
1894 **VI.D. Fatigue Mitigation**
1895
1896 **VI.D.1. Programs must:**
1897
1898 **VI.D.1.a)** educate all faculty members and fellows to recognize the
1899 signs of fatigue and sleep deprivation; ^(Core)
1900
1901 **VI.D.1.b)** educate all faculty members and fellows in alertness
1902 management and fatigue mitigation processes; and, ^(Core)
1903
1904 **VI.D.1.c)** encourage fellows to use fatigue mitigation processes to
1905 manage the potential negative effects of fatigue on patient
1906 care and learning. ^(Detail)

1907

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1908

1909

VI.D.2. Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2–VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue. (Core)

1919

VI.E.1. Clinical Responsibilities

1920

1921

1922

The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. (Core)

1923

1924

1925

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1926

VI.E.2. Teamwork

1927

1928

1929

Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty and larger health system.

1961		
1962		<i>Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.</i>
1963		
1964		
1965		
1966		

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1967		
1968	VI.F.1.	Maximum Hours of Clinical and Educational Work per Week
1969		
1970		Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)
1971		
1972		
1973		
1974		

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work

periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding

whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1994
1995
1996

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. ^(Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1997
1998
1999
2000
2001
2002

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended

that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

2003		
2004	VI.F.3.	Maximum Clinical Work and Education Period Length
2005		
2006	VI.F.3.a)	Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)
2007		
2008		
2009		
2010	VI.F.3.a).(1)	Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. ^(Core)
2011		
2012		
2013		
2014		
2015	VI.F.3.a).(1).(a)	Additional patient care responsibilities must not be assigned to a fellow during this time. ^(Core)
2016		
2017		

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

2018		
2019	VI.F.4.	Clinical and Educational Work Hour Exceptions
2020		
2021	VI.F.4.a)	In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:
2022		
2023		
2024		
2025		
2026	VI.F.4.a).(1)	to continue to provide care to a single severely ill or unstable patient; ^(Detail)
2027		
2028		
2029	VI.F.4.a).(2)	humanistic attention to the needs of a patient or family; or, ^(Detail)
2030		
2031		
2032	VI.F.4.a).(3)	to attend unique educational events. ^(Detail)
2033		

2034 VI.F.4.b) These additional hours of care or education will be counted
2035 toward the 80-hour weekly limit. ^(Detail)
2036

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

2037
2038 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
2039 for up to 10 percent or a maximum of 88 clinical and
2040 educational work hours to individual programs based on a
2041 sound educational rationale.
2042
2043 The Review Committee for Internal Medicine will not consider
2044 requests for exceptions to the 80-hour limit to the fellows' work
2045 week.
2046

2047 VI.F.5. Moonlighting

2048 VI.F.5.a) Moonlighting must not interfere with the ability of the fellow
2049 to achieve the goals and objectives of the educational
2050 program, and must not interfere with the fellow's fitness for
2051 work nor compromise patient safety. ^(Core)
2052

2053 VI.F.5.b) Time spent by fellows in internal and external moonlighting
2054 (as defined in the ACGME Glossary of Terms) must be
2055 counted toward the 80-hour maximum weekly limit. ^(Core)
2056
2057

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

2058 VI.F.6. In-House Night Float
2059
2060 Night float must occur within the context of the 80-hour and one-
2061 day-off-in-seven requirements. ^(Core)
2062
2063

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

2064 VI.F.7. Maximum In-House On-Call Frequency
2065
2066 Fellows must be scheduled for in-house call no more frequently than
2067 every third night (when averaged over a four-week period). ^(Core)
2068
2069

2070 VI.F.7.a) Internal medicine fellowships must not average in-house call over
2071 a four-week period. ^(Core)

2072
2073 **VI.F.8. At-Home Call**

2074
2075 **VI.F.8.a) Time spent on patient care activities by fellows on at-home**
2076 **call must count toward the 80-hour maximum weekly limit.**
2077 **The frequency of at-home call is not subject to the every-**
2078 **third-night limitation, but must satisfy the requirement for one**
2079 **day in seven free of clinical work and education, when**
2080 **averaged over four weeks.** ^(Core)

2081
2082 **VI.F.8.a).(1) At-home call must not be so frequent or taxing as to**
2083 **preclude rest or reasonable personal time for each**
2084 **fellow.** ^(Core)

2085
2086 **VI.F.8.b) Fellows are permitted to return to the hospital while on at-**
2087 **home call to provide direct care for new or established**
2088 **patients. These hours of inpatient patient care must be**
2089 **included in the 80-hour maximum weekly limit.** ^(Detail)

2090

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
