1                   **Proposed ACGME Program Requirements for Graduate Medical Education**  
2   **in Medical Biochemical Genetics**

3  
4                   **Common Program Requirements (Fellowship) are in BOLD**

5  
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that  
7 section. These philosophic statements are not program requirements and are therefore not  
8 citable.  
9

**Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.**

10  
11 **Introduction**

12  
13 **Int.A.**       *Fellowship is advanced graduate medical education beyond a core*  
14 *residency program for physicians who desire to enter more specialized*  
15 *practice. Fellowship-trained physicians serve the public by providing*  
16 *subspecialty care, which may also include core medical care, acting as a*  
17 *community resource for expertise in their field, creating and integrating*  
18 *new knowledge into practice, and educating future generations of*  
19 *physicians. Graduate medical education values the strength that a diverse*  
20 *group of physicians brings to medical care.*

21  
22 *Fellows who have completed residency are able to practice independently*  
23 *in their core specialty. The prior medical experience and expertise of*  
24 *fellows distinguish them from physicians entering into residency training.*  
25 *The fellow's care of patients within the subspecialty is undertaken with*  
26 *appropriate faculty supervision and conditional independence. Faculty*  
27 *members serve as role models of excellence, compassion,*  
28 *professionalism, and scholarship. The fellow develops deep medical*  
29 *knowledge, patient care skills, and expertise applicable to their focused*  
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*  
31 *and didactic education that focuses on the multidisciplinary care of*  
32 *patients. Fellowship education is often physically, emotionally, and*  
33 *intellectually demanding, and occurs in a variety of clinical learning*  
34 *environments committed to graduate medical education and the well-being*  
35 *of patients, residents, fellows, faculty members, students, and all members*  
36 *of the health care team.*

37  
38 *In addition to clinical education, many fellowship programs advance*  
39 *fellows' skills as physician-scientists. While the ability to create new*  
40 *knowledge within medicine is not exclusive to fellowship-educated*  
41 *physicians, the fellowship experience expands a physician's abilities to*  
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*  
43 *the medical literature and patient care. Beyond the clinical subspecialty*  
44 *expertise achieved, fellows develop mentored relationships built on an*  
45 *infrastructure that promotes collaborative research.*

46  
47 **Int.B.**       **Definition of Subspecialty**

- 48  
49 Int.B.1. Medical biochemical geneticists are physicians who provide comprehensive  
50 diagnostic, management, and genetic counseling services for patients with inborn  
51 errors of metabolism. They focus on the treatment of genetic disorders of  
52 intermediary metabolism, lysosomal storage diseases, disorders of energy  
53 metabolism, and related disorders.  
54
- 55 Int.B.2. Medical biochemical geneticists:
- 56
- 57 Int.B.2.a) diagnose and provide acute management of inborn errors of  
58 metabolism;
- 59
- 60 Int.B.2.b) provide long-term management, including nutritional  
61 recommendations for chronic management of inborn errors of  
62 metabolism;
- 63
- 64 Int.B.2.c) provide genetic counseling, including assessment of mode of  
65 inheritance, recurrence risk, and information about natural history  
66 of disease;
- 67
- 68 Int.B.2.d) use their knowledge of heterogeneity, variability and natural  
69 history of inborn errors of metabolism in patient-care decision  
70 making;
- 71
- 72 Int.B.2.e) elicit and interpret individual and family medical histories;
- 73
- 74 Int.B.2.f) order and interpret specialized laboratory testing;
- 75
- 76 Int.B.2.g) interact with other health-care professionals, especially  
77 nutritionists, in the provision of services for patients with genetic  
78 disorders of intermediary metabolism; and,
- 79
- 80 Int.B.2.h) identify emerging and experimental therapeutics for patients.

81  
82 **Int.C. Length of Educational Program**

83  
84 The educational program in medical biochemical genetics must be 12 months in  
85 length. <sup>(Core)\*</sup>

86  
87 **I. Oversight**

88  
89 **I.A. Sponsoring Institution**

90  
91 ***The Sponsoring Institution is the organization or entity that assumes the  
92 ultimate financial and academic responsibility for a program of graduate  
93 medical education consistent with the ACGME Institutional Requirements.***

94  
95 ***When the Sponsoring Institution is not a rotation site for the program, the  
96 most commonly utilized site of clinical activity for the program is the  
97 primary clinical site.***

98

**Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.**

- 99  
100 I.A.1. The program must be sponsored by one ACGME-accredited  
101 Sponsoring Institution. <sup>(Core)</sup>  
102  
103 I.B. Participating Sites  
104  
105 *A participating site is an organization providing educational experiences or*  
106 *educational assignments/rotations for fellows.*  
107  
108 I.B.1. The program, with approval of its Sponsoring Institution, must  
109 designate a primary clinical site. <sup>(Core)</sup>  
110  
111 I.B.1.a) Institutions sponsoring medical biochemical genetics programs  
112 must also sponsor ACGME-accredited programs in medical  
113 genetics and genomics. <sup>(Core)</sup>  
114  
115 I.B.1.b) Institutions sponsoring medical biochemical genetics programs  
116 should sponsor ACGME-accredited programs in pediatrics and  
117 internal medicine. <sup>(Detail) †</sup>  
118  
119 I.B.2. There must be a program letter of agreement (PLA) between the  
120 program and each participating site that governs the relationship  
121 between the program and the participating site providing a required  
122 assignment. <sup>(Core)</sup>  
123  
124 I.B.2.a) The PLA must:  
125  
126 I.B.2.a).(1) be renewed at least every 10 years; and, <sup>(Core)</sup>  
127  
128 I.B.2.a).(2) be approved by the designated institutional official  
129 (DIO). <sup>(Core)</sup>  
130  
131 I.B.3. The program must monitor the clinical learning and working  
132 environment at all participating sites. <sup>(Core)</sup>  
133  
134 I.B.3.a) At each participating site there must be one faculty member,  
135 designated by the program director, who is accountable for  
136 fellow education for that site, in collaboration with the  
137 program director. <sup>(Core)</sup>  
138

**Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical**

settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Directors' Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

139  
140  
141  
142  
143  
144  
145  
146  
147  
148  
149  
150

**I.B.4.** The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME's Accreditation Data System (ADS). <sup>(Core)</sup>

**I.C.** The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. <sup>(Core)</sup>

**Background and Intent:** It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

151  
152  
153  
154  
155  
156  
157  
158  
159  
160  
161  
162  
163  
164

**I.D. Resources**

**I.D.1.** The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. <sup>(Core)</sup>

**I.D.1.a)** Participating sites must have a medical biochemical genetics laboratory which provides an appropriate volume and variety of biochemical genetics-related services and has an adequate number of qualified staff members, which must include a laboratory director certified in biochemical genetics by the American Board of Medical Genetics and Genomics. <sup>(Core)</sup>

- 165 I.D.1.b) Participating sites must provide a sufficient number and variety of  
 166 inpatients and outpatients to permit fellows to gain experience with  
 167 the presentation, natural history, and chronic treatment of a wide  
 168 range of inborn errors of metabolism. (Core)  
 169  
 170 I.D.1.c) Adequate space and equipment must be available to meet the  
 171 educational goals of the program. (Core)  
 172  
 173 I.D.1.c).(1) In addition to space for patient care activities, this requires  
 174 meeting rooms, classrooms, office space, research  
 175 facilities, and facilities for record storage and retrieval. (Detail)  
 176  
 177 I.D.1.c).(2) Office and laboratory space must be provided for the  
 178 fellows for both patient-care work and participation in  
 179 scholarly activities. (Core)  
 180  
 181 **I.D.2. The program, in partnership with its Sponsoring Institution, must**  
 182 **ensure healthy and safe learning and working environments that**  
 183 **promote fellow well-being and provide for:** (Core)  
 184  
 185 **I.D.2.a) access to food while on duty;** (Core)  
 186  
 187 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**  
 188 **and accessible for fellows with proximity appropriate for safe**  
 189 **patient care;** (Core)  
 190

**Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.**

- 191  
 192 I.D.2.c) clean and private facilities for lactation that have refrigeration  
 193 capabilities, with proximity appropriate for safe patient care;  
 194 (Core)  
 195

**Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).**

- 196  
 197 I.D.2.d) security and safety measures appropriate to the participating  
 198 site; and, (Core)  
 199

- 200 I.D.2.e) accommodations for fellows with disabilities consistent with  
201 the Sponsoring Institution's policy. <sup>(Core)</sup>  
202
- 203 I.D.3. Fellows must have ready access to subspecialty-specific and other  
204 appropriate reference material in print or electronic format. This  
205 must include access to electronic medical literature databases with  
206 full text capabilities. <sup>(Core)</sup>  
207
- 208 I.D.4. The program's educational and clinical resources must be adequate  
209 to support the number of fellows appointed to the program. <sup>(Core)</sup>  
210
- 211 I.D.4.a) The number and variety of patients available to the program, in  
212 both inpatient and outpatient settings, must be sufficient to allow  
213 fellows to develop an understanding of the wide variety of inborn  
214 errors of metabolism. <sup>(Core)</sup>  
215
- 216 I.E. *A fellowship program usually occurs in the context of many learners and  
217 other care providers and limited clinical resources. It should be structured  
218 to optimize education for all learners present.*  
219
- 220 I.E.1. Fellows should contribute to the education of residents in core  
221 programs, if present. <sup>(Core)</sup>  
222

**Background and Intent:** The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

- 223
- 224 II. Personnel
- 225
- 226 II.A. Program Director
- 227
- 228 II.A.1. There must be one faculty member appointed as program director  
229 with authority and accountability for the overall program, including  
230 compliance with all applicable program requirements. <sup>(Core)</sup>  
231
- 232 II.A.1.a) The Sponsoring Institution's Graduate Medical Education  
233 Committee (GMEC) must approve a change in program  
234 director. <sup>(Core)</sup>  
235
- 236 II.A.1.b) Final approval of the program director resides with the  
237 Review Committee. <sup>(Core)</sup>  
238

**Background and Intent:** While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

239  
240 **II.A.2.**                    **The program director and, as applicable, the program’s leadership**  
241 **team, must be provided with support adequate for administration of**  
242 **the program based upon its size and configuration.** <sup>(Core)</sup>  
243

244 **II.A.2.a)**                    Program leadership, in aggregate, must be provided with support  
245 equal to a dedicated minimum of 20 percent time for  
246 administration of the program, which may be time spent by the  
247 program director only or divided among the program director and  
248 one or more associate (or assistant) program directors. At a  
249 minimum, the program director must be provided with the salary  
250 support required to devote 10 percent FTE of non-clinical time to  
251 the administration of the program. <sup>(Core)</sup>  
252

**Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.**

**The ultimate outcome of graduate medical education is excellence in fellow education and patient care.**

**The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.**

**Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.**

253  
254 **II.A.3.**                    **Qualifications of the program director:**  
255

256 **II.A.3.a)**                    **must include subspecialty expertise and qualifications**  
257 **acceptable to the Review Committee;** <sup>(Core)</sup>  
258

259 **II.A.3.a).(1)**                    The program director should have at least three years of  
260 active participation as a specialist in biochemical genetics  
261 following completion of all graduate medical education.  
262 <sup>(Detail)</sup>  
263

264 **II.A.3.b)**                    **must include current certification in the subspecialty for**  
265 **which they are the program director by the American Board**  
266 **of Medical Genetics and Genomics (ABMGG) or subspecialty**

267 **qualifications that are acceptable to the Review Committee;**  
268 (Core)

269  
270 [Note that while the Common Program Requirements deem  
271 certification by a certifying board of the American Osteopathic  
272 Association (AOA) acceptable, there is no AOA board that offers  
273 certification in this subspecialty]

274  
275 II.A.3.b).(1) The Review Committee will also accept current ABMGG  
276 certification in ~~either both~~ clinical genetics and genomics ~~or~~  
277 and clinical biochemical genetics. (Core)

278  
279 II.A.3.b).(2) The program director must be actively participating in the  
280 ABMGG's Continuing Certification program in the  
281 specialty(ies) in which the program director is certified. (Core)

282  
283 II.A.3.c) must include current medical licensure and appropriate medical  
284 staff appointment; and, (Core)

285  
286 II.A.3.d) must include ongoing clinical activity. (Core)

287  
288 **II.A.4. Program Director Responsibilities**

289  
290 **The program director must have responsibility, authority, and**  
291 **accountability for: administration and operations; teaching and**  
292 **scholarly activity; fellow recruitment and selection, evaluation, and**  
293 **promotion of fellows, and disciplinary action; supervision of fellows;**  
294 **and fellow education in the context of patient care.** (Core)

295  
296 **II.A.4.a) The program director must:**

297  
298 **II.A.4.a).(1) be a role model of professionalism;** (Core)

299  
**Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.**

300  
301 **II.A.4.a).(2) design and conduct the program in a fashion**  
302 **consistent with the needs of the community, the**  
303 **mission(s) of the Sponsoring Institution, and the**  
304 **mission(s) of the program;** (Core)

305  
**Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design**

and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

306  
307  
308  
309  
310

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the fellows in each of the ACGME Competency domains; <sup>(Core)</sup>

**Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.**

311  
312  
313  
314  
315  
316  
317  
318  
319  
320  
321  
322  
323  
324  
325  
326  
327  
328

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the fellowship program education and at least annually thereafter, as outlined in V.B.; <sup>(Core)</sup>

- II.A.4.a).(5) have the authority to approve program faculty members for participation in the fellowship program education at all sites; <sup>(Core)</sup>

- II.A.4.a).(6) have the authority to remove program faculty members from participation in the fellowship program education at all sites; <sup>(Core)</sup>

- II.A.4.a).(7) have the authority to remove fellows from supervising interactions and/or learning environments that do not meet the standards of the program; <sup>(Core)</sup>

**Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.**

**There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.**

329  
330  
331  
332  
333  
334  
335  
336  
337  
338  
339

- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; <sup>(Core)</sup>

- II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant subspecialty board examination(s); <sup>(Core)</sup>

- II.A.4.a).(10) provide a learning and working environment in which fellows have the opportunity to raise concerns and provide feedback in a confidential manner as

- 340 appropriate, without fear of intimidation or retaliation;  
 341 (Core)  
 342  
 343 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring  
 344 Institution's policies and procedures related to  
 345 grievances and due process; (Core)  
 346  
 347 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring  
 348 Institution's policies and procedures for due process  
 349 when action is taken to suspend or dismiss, not to  
 350 promote, or not to renew the appointment of a fellow;  
 351 (Core)  
 352

**Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.**

- 353  
 354 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring  
 355 Institution's policies and procedures on employment  
 356 and non-discrimination; (Core)  
 357  
 358 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-  
 359 competition guarantee or restrictive covenant.  
 360 (Core)  
 361  
 362 **II.A.4.a).(14)** document verification of program completion for all  
 363 graduating fellows within 30 days; (Core)  
 364  
 365 **II.A.4.a).(15)** provide verification of an individual fellow's  
 366 completion upon the fellow's request, within 30 days;  
 367 and, (Core)  
 368

**Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.**

- 369  
 370 **II.A.4.a).(16)** obtain review and approval of the Sponsoring  
 371 Institution's DIO before submitting information or  
 372 requests to the ACGME, as required in the Institutional  
 373 Requirements and outlined in the ACGME Program  
 374 Directors' Guide to the Common Program  
 375 Requirements. (Core)  
 376  
 377 **II.B. Faculty**  
 378  
 379 *Faculty members are a foundational element of graduate medical education*  
 380 *– faculty members teach fellows how to care for patients. Faculty members*

381 *provide an important bridge allowing fellows to grow and become practice*  
382 *ready, ensuring that patients receive the highest quality of care. They are*  
383 *role models for future generations of physicians by demonstrating*  
384 *compassion, commitment to excellence in teaching and patient care,*  
385 *professionalism, and a dedication to lifelong learning. Faculty members*  
386 *experience the pride and joy of fostering the growth and development of*  
387 *future colleagues. The care they provide is enhanced by the opportunity to*  
388 *teach. By employing a scholarly approach to patient care, faculty members,*  
389 *through the graduate medical education system, improve the health of the*  
390 *individual and the population.*

391  
392 *Faculty members ensure that patients receive the level of care expected*  
393 *from a specialist in the field. They recognize and respond to the needs of*  
394 *the patients, fellows, community, and institution. Faculty members provide*  
395 *appropriate levels of supervision to promote patient safety. Faculty*  
396 *members create an effective learning environment by acting in a*  
397 *professional manner and attending to the well-being of the fellows and*  
398 *themselves.*  
399

**Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.**

400  
401 **II.B.1.** For each participating site, there must be a sufficient number of  
402 faculty members with competence to instruct and supervise all  
403 fellows at that location. <sup>(Core)</sup>  
404

405 **II.B.2.** Faculty members must:

406  
407 **II.B.2.a)** be role models of professionalism; <sup>(Core)</sup>  
408

409 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,  
410 cost-effective, patient-centered care; <sup>(Core)</sup>  
411

**Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.**

412  
413 **II.B.2.c)** demonstrate a strong interest in the education of fellows; <sup>(Core)</sup>  
414

415 **II.B.2.d)** devote sufficient time to the educational program to fulfill  
416 their supervisory and teaching responsibilities; <sup>(Core)</sup>  
417

418 **II.B.2.e)** administer and maintain an educational environment  
419 conducive to educating fellows; <sup>(Core)</sup>  
420

421 **II.B.2.f)** regularly participate in organized clinical discussions,  
422 rounds, journal clubs, and conferences; and, <sup>(Core)</sup>  
423

424 **II.B.2.g) pursue faculty development designed to enhance their skills**  
425 **at least annually. (Core)**  
426

**Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.**

427  
428 **II.B.3. Faculty Qualifications**  
429

430 **II.B.3.a) Faculty members must have appropriate qualifications in**  
431 **their field and hold appropriate institutional appointments.**  
432 **(Core)**  
433

434 **II.B.3.b) Subspecialty physician faculty members must:**  
435

436 **II.B.3.b).(1) have current certification in the subspecialty by the**  
437 **American Board of Medical Genetics and Genomics or**  
438 **possess qualifications judged acceptable to the**  
439 **Review Committee. (Core)**  
440

441 [Note that while the Common Program Requirements  
442 deem certification by a certifying board of the American  
443 Osteopathic Association (AOA) acceptable, there is no  
444 AOA board that offers certification in this subspecialty]  
445

446 **II.B.3.b).(1).(a) The Review Committee will also accept current**  
447 **ABMGG certification in either clinical genetics and**  
448 **genomics or clinical biochemical genetics. (Core)**  
449

450 **II.B.3.c) Any non-physician faculty members who participate in**  
451 **fellowship program education must be approved by the**  
452 **program director. (Core)**  
453

**Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.**

454  
455 **II.B.3.d) Any other specialty physician faculty members must have**  
456 **current certification in their specialty by the appropriate**  
457 **American Board of Medical Specialties (ABMS) member**  
458 **board or American Osteopathic Association (AOA) certifying**

459 board, or possess qualifications judged acceptable to the  
460 Review Committee. <sup>(Core)</sup>

461  
462 **II.B.4. Core Faculty**

463  
464 **Core faculty members must have a significant role in the education**  
465 **and supervision of fellows and must devote a significant portion of**  
466 **their entire effort to fellow education and/or administration, and**  
467 **must, as a component of their activities, teach, evaluate, and provide**  
468 **formative feedback to fellows.** <sup>(Core)</sup>  
469

**Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.**

470  
471 **II.B.4.a) Core faculty members must be designated by the program**  
472 **director.** <sup>(Core)</sup>  
473

474 **II.B.4.b) Core faculty members must complete the annual ACGME**  
475 **Faculty Survey.** <sup>(Core)</sup>  
476

477 **II.B.4.c) There must be at least three FTE core faculty members, including**  
478 **the program director, with current ABMGG certification in medical**  
479 **biochemical genetics, clinical genetics and genomics, or clinical**  
480 **biochemical genetics.** <sup>(Core)</sup>  
481

482 **II.C. Program Coordinator**

483  
484 **II.C.1. There must be a program coordinator.** <sup>(Core)</sup>  
485

486 **II.C.2. The program coordinator must be provided with dedicated time and**  
487 **support adequate for administration of the program based upon its**  
488 **size and configuration.** <sup>(Core)</sup>  
489

490 **II.C.2.a) The program coordinator must be provided with support equal to a**  
491 **dedicated minimum of 20 percent time for administration of the**  
492 **program.** <sup>(Core)</sup>  
493

**Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.**

**Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.**

**The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.**

**Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.**

494  
495  
496  
497  
498  
499  
500

**II.D. Other Program Personnel**

**The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. <sup>(Core)</sup>**

**Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.**

**II.D.1. Fellows must have regular opportunities to work with genetic counselors, nurses, and nutritionists who are involved in the provision of clinical metabolic disease services. <sup>(Core)</sup>**

**III. Fellow Appointments**

**III.A. Eligibility Criteria**

**III.A.1. Eligibility Requirements – Fellowship Programs**

**All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of**

518  
519  
520

**Canada (CFPC)-accredited residency program located in Canada.**  
(Core)

**Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).**

**III.A.1.a) Fellowship programs must receive verification of each entering fellow’s level of competence in the required field, upon matriculation, using ACGME, ACGME-I, or CanMEDS Milestones evaluations from the core residency program.** (Core)

**III.A.1.b)** Prior to appointment in the program, fellows must have successfully completed a program in medical genetics and genomics that satisfies the requirements in III.A.1. (Core)

**III.A.1.c) Fellow Eligibility Exception**  
**The Review Committee for Medical Genetics and Genomics will allow the following exception to the fellowship eligibility requirements:**

**III.A.1.c).(1) An ACGME-accredited fellowship program may accept an exceptionally qualified international graduate applicant who does not satisfy the eligibility requirements listed in III.A.1., but who does meet all of the following additional qualifications and conditions:** (Core)

**III.A.1.c).(1).(a) evaluation by the program director and fellowship selection committee of the applicant’s suitability to enter the program, based on prior training and review of the summative evaluations of training in the core specialty; and,** (Core)

**III.A.1.c).(1).(b) review and approval of the applicant’s exceptional qualifications by the GMEC; and,** (Core)

**III.A.1.c).(1).(c) verification of Educational Commission for Foreign Medical Graduates (ECFMG) certification.** (Core)

**III.A.1.c).(2) Applicants accepted through this exception must have an evaluation of their performance by the Clinical Competency Committee within 12 weeks of matriculation.** (Core)

**Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United**

States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

**III.B. The program director must not appoint more fellows than approved by the Review Committee. (Core)**

**III.B.1. All complement increases must be approved by the Review Committee. (Core)**

**III.C. Fellow Transfers**

**The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. (Core)**

**IV. Educational Program**

***The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.***

***The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.***

***In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.***

**IV.A. The curriculum must contain the following educational components: (Core)**

600 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution’s  
601 mission, the needs of the community it serves, and the desired  
602 distinctive capabilities of its graduates; <sup>(Core)</sup>

603  
604 **IV.A.1.a)** The program’s aims must be made available to program  
605 applicants, fellows, and faculty members. <sup>(Core)</sup>  
606

607 **IV.A.2.** competency-based goals and objectives for each educational  
608 experience designed to promote progress on a trajectory to  
609 autonomous practice in their subspecialty. These must be  
610 distributed, reviewed, and available to fellows and faculty members;  
611 <sup>(Core)</sup>  
612

613 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive  
614 responsibility for patient management, and graded supervision in  
615 their subspecialty; <sup>(Core)</sup>  
616

**Background and Intent:** These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

617  
618 **IV.A.4.** structured educational activities beyond direct patient care; and,  
619 <sup>(Core)</sup>  
620

**Background and Intent:** Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

621  
622 **IV.A.5.** advancement of fellows’ knowledge of ethical principles  
623 foundational to medical professionalism. <sup>(Core)</sup>  
624

625 **IV.B.** **ACGME Competencies**  
626

**Background and Intent:** The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

627  
628 **IV.B.1.** The program must integrate the following ACGME Competencies  
629 into the curriculum: <sup>(Core)</sup>  
630

631 **IV.B.1.a) Professionalism**  
632  
633 **Fellows must demonstrate a commitment to professionalism**  
634 **and an adherence to ethical principles.** (Core)  
635

636 **IV.B.1.b) Patient Care and Procedural Skills**  
637

**Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.**

**These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.**

638  
639 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**  
640 **compassionate, appropriate, and effective for the**  
641 **treatment of health problems and the promotion of**  
642 **health.** (Core)  
643

644 IV.B.1.b).(1).(a) Fellows must demonstrate competence in:

645  
646 IV.B.1.b).(1).(a).(i) gathering essential and accurate  
647 information about the patient using the  
648 following clinical skills: (Core)  
649

650 IV.B.1.b).(1).(a).(i).(a) medical interviewing, including the  
651 taking and interpretation of a  
652 complete family history (to include  
653 construction of a pedigree); (Core)  
654

655 IV.B.1.b).(1).(a).(i).(b) physical examination; and, (Core)  
656

657 IV.B.1.b).(1).(a).(i).(c) diagnostic studies, including the  
658 interpretation of laboratory data  
659 generated from biochemical and  
660 molecular genetic analyses. (Core)  
661

662 IV.B.1.b).(1).(a).(ii) making informed decisions about diagnostic  
663 and therapeutic interventions based on  
664 patient and family information and  
665 preferences, up-to-date scientific evidence,  
666 and clinical judgment by: (Core)  
667

668 IV.B.1.b).(1).(a).(ii).(a) demonstrating effective and  
669 appropriate clinical problem-solving  
670 skills; (Core)

671		
672	IV.B.1.b).(1).(a).(ii).(b)	understanding the limits of one's knowledge and expertise; and, (Core)
673		
674		
675	IV.B.1.b).(1).(a).(ii).(c)	appropriate use of consultants and referrals. (Core)
676		
677

721		

- 722  
723 IV.B.1.c).(1).(a).(iv).(d) newborn screening for metabolic  
724 disorders. <sup>(Core)</sup>  
725  
726 IV.B.1.c).(1).(a).(v) the genetic epidemiology of inborn errors of  
727 metabolism and the application of that  
728 knowledge to newborn screening; <sup>(Core)</sup>  
729  
730 IV.B.1.c).(1).(a).(vi) principles of operation in clinical  
731 biochemical genetics diagnostic  
732 laboratories; and, <sup>(Core)</sup>  
733  
734 IV.B.1.c).(1).(a).(vii) the limits of current knowledge about IEM  
735 and the general strategies for biomedical  
736 research on these disorders. <sup>(Core)</sup>  
737

738 **IV.B.1.d)**

**Practice-based Learning and Improvement**

**Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. <sup>(Core)</sup>**

**Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.**

**The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.**

- 745  
746 **IV.B.1.e)** **Interpersonal and Communication Skills**  
747  
748 **Fellows must demonstrate interpersonal and communication**  
749 **skills that result in the effective exchange of information and**  
750 **collaboration with patients, their families, and health**  
751 **professionals. <sup>(Core)</sup>**  
752

753 **IV.B.1.f)**

**Systems-based Practice**

**Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinants of health, as well as the ability to call effectively on other resources to provide optimal health care. <sup>(Core)</sup>**

761 **IV.C.**

**Curriculum Organization and Fellow Experiences**

762

763	<b>IV.C.1.</b>	<b>The curriculum must be structured to optimize fellow educational experiences, the length of these experiences, and supervisory continuity.</b> <sup>(Core)</sup>
764		
765		
766		
767	IV.C.1.a)	The program must ensure:
768		
769	IV.C.1.a).(1)	adequate supervision during times of rotational transition and hand-offs; <sup>(Core)</sup>
770		
771		
772	IV.C.1.a).(2)	continuity of supervision at all participating sites; and, <sup>(Core)</sup>
773		
774	IV.C.1.a).(3)	that fellows have exposure to and sufficient time in specialty clinics. <sup>(Core)</sup>
775		
776		
777	<b>IV.C.2.</b>	<b>The program must provide instruction and experience in pain management if applicable for the subspecialty, including recognition of the signs of addiction.</b> <sup>(Core)</sup>
778		
779		
780		
781	IV.C.3.	The 12 months of medical biochemical genetics education must include 11 months of broad-based, clinically-oriented medical biochemical genetics activities and one month of activities in a medical biochemical genetics diagnostic laboratory. <sup>(Core)</sup>
782		
783		
784		
785		
786	IV.C.4.	The program must possess a well-organized and effective curriculum, both didactic and clinical. <sup>(Core)</sup>
787		
788		
789	IV.C.5.	The curriculum must provide fellows with direct experience in progressive responsibility for patient management. <sup>(Core)</sup>
790		
791		
792	IV.C.6.	The fellowship must be organized to provide a well-structured, integrated, and progressive educational experience in medical biochemical genetics. <sup>(Core)</sup>
793		
794		
795		
796	IV.C.7.	Fellows must have the opportunity to develop the abilities to diagnose IEM, counsel patients, and manage the broad range of clinical problems that are encompassed by biochemical genetics. <sup>(Core)</sup>
797		
798		
799		
800	IV.C.8.	As medical biochemical genetics increasingly involves diagnosis and long-term management of adults, fellows must be competent to work with patients of all ages. <sup>(Core)</sup>
801		
802		
803		
804	IV.C.9.	Programs must provide:
805		
806	IV.C.9.a)	clinical teaching conferences for the fellows. <sup>(Core)</sup>
807		
808	IV.C.9.a).(1)	Attendance by the fellows and the faculty members must be documented. <sup>(Detail)</sup>
809		
810		
811	IV.C.9.a).(2)	These conferences must be distinct from the basic science lectures and didactic sessions. <sup>(Detail)</sup>
812		
813		

814	IV.C.9.b)	structured education, including formal coursework in the basic
815		sciences and clinical areas pertinent to biochemical genetics, to
816		include
817		
818	IV.C.9.b).(1)	amino acids; (Core)
819		
820	IV.C.9.b).(2)	carbohydrates; (Core)
821		
822	IV.C.9.b).(3)	cofactors; (Core)
823		
824	IV.C.9.b).(4)	creatine; (Core)
825		
826	IV.C.9.b).(5)	lipids; (Core)
827		
828	IV.C.9.b).(6)	lysosomes; (Core)
829		
830	IV.C.9.b).(7)	metals; (Core)
831		
832	IV.C.9.b).(8)	mitochondria; (Core)
833		
834	IV.C.9.b).(9)	neurotransmitters; (Core)
835		
836	IV.C.9.b).(10)	organic acids; (Core)
837		
838	IV.C.9.b).(11)	peroxisomes; (Core)
839		
840	IV.C.9.b).(12)	urines and pyrimidines; and, (Core)
841		
842	IV.C.9.b).(13)	transport. (Core)
843		
844	IV.C.9.c)	mentored clinical education in the practice of biochemical genetics
845		in both outpatient and inpatient settings; (Core)
846		
847	IV.C.9.d)	basic instruction in medical biochemical genetic laboratory testing;
848		(Core)
849		
850	IV.C.9.e)	basic instruction in clinical research; and, (Core)
851		
852	IV.C.9.f)	advanced instruction in the interpretation of biochemical laboratory
853		test results. (Core)
854		
855	IV.C.10.	Fellows must spend a minimum of four continuous weeks in the
856		laboratory so that they will be able to develop their abilities to understand
857		an appropriate variety of laboratory methods. (Core)
858		
859	IV.C.10.a)	Fellows' education must include participation in the working
860		conferences of laboratories, as well as ongoing discussion of
861		laboratory data during other clinical conferences. (Core)
862		
863	IV.C.10.b)	The medical biochemical genetics laboratory must be an integral
864		component of each program. (Core)

865  
866 IV.C.11. Fellows must participate formally, through lectures or other didactic  
867 sessions, in the equivalent of a one-semester graduate-level course in  
868 biochemical genetics. <sup>(Core)</sup>  
869

870 **IV.D. Scholarship**

871  
872 *Medicine is both an art and a science. The physician is a humanistic*  
873 *scientist who cares for patients. This requires the ability to think critically,*  
874 *evaluate the literature, appropriately assimilate new knowledge, and*  
875 *practice lifelong learning. The program and faculty must create an*  
876 *environment that fosters the acquisition of such skills through fellow*  
877 *participation in scholarly activities as defined in the subspecialty-specific*  
878 *Program Requirements. Scholarly activities may include discovery,*  
879 *integration, application, and teaching.*

880  
881 *The ACGME recognizes the diversity of fellowships and anticipates that*  
882 *programs prepare physicians for a variety of roles, including clinicians,*  
883 *scientists, and educators. It is expected that the program's scholarship will*  
884 *reflect its mission(s) and aims, and the needs of the community it serves.*  
885 *For example, some programs may concentrate their scholarly activity on*  
886 *quality improvement, population health, and/or teaching, while other*  
887 *programs might choose to utilize more classic forms of biomedical*  
888 *research as the focus for scholarship.*  
889

890 **IV.D.1. Program Responsibilities**

891  
892 **IV.D.1.a) The program must demonstrate evidence of scholarly**  
893 **activities, consistent with its mission(s) and aims. <sup>(Core)</sup>**

894  
895 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**  
896 **must allocate adequate resources to facilitate fellow and**  
897 **faculty involvement in scholarly activities. <sup>(Core)</sup>**  
898

899 **IV.D.2. Faculty Scholarly Activity**

900  
901 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**  
902 **accomplishments in at least three of the following domains:**  
903 **<sup>(Core)</sup>**

- 904  
905  
906  
907  
908  
909  
910  
911  
912  
913
- **Research in basic science, education, translational science, patient care, or population health**
  - **Peer-reviewed grants**
  - **Quality improvement and/or patient safety initiatives**
  - **Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports**
  - **Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials**

- 914 • Contribution to professional committees, educational
- 915 organizations, or editorial boards
- 916 • Innovations in education

917  
 918 **IV.D.2.b)** The program must demonstrate dissemination of scholarly  
 919 activity within and external to the program by the following  
 920 methods:  
 921

**Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.**

922  
 923 **IV.D.2.b).(1)** faculty participation in grand rounds, posters,  
 924 workshops, quality improvement presentations,  
 925 podium presentations, grant leadership, non-peer-  
 926 reviewed print/electronic resources, articles or  
 927 publications, book chapters, textbooks, webinars,  
 928 service on professional committees, or serving as a  
 929 journal reviewer, journal editorial board member, or  
 930 editor; (Outcome)‡

931  
 932 **IV.D.2.b).(2)** peer-reviewed publication. (Outcome)

933  
 934 **IV.D.3. Fellow Scholarly Activity**

935  
 936 **IV.D.3.a)** The curriculum must advance fellows’ knowledge of the basic  
 937 principles of research, including how research is conducted,  
 938 evaluated, explained to patients, and applied to patient care. (Core)

939  
 940 **IV.D.3.b)** Fellows must participate in scholarly activity. (Core)

**Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows’ maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Director Guide for more details.**

942  
 943 **V. Evaluation**

944  
 945 **V.A. Fellow Evaluation**

946  
 947 **V.A.1. Feedback and Evaluation**

**Background and Intent:** Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

949  
950  
951  
952  
953

- V.A.1.a)** Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. <sup>(Core)</sup>

**Background and Intent:** Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

954  
955  
956  
957  
958  
959  
960  
961  
962  
963

- V.A.1.b)** Evaluation must be documented at the completion of the assignment. <sup>(Core)</sup>
- V.A.1.b).(1)** For block rotations of greater than three months in duration, evaluation must be documented at least every three months. <sup>(Core)</sup>
- V.A.1.b).(2)** Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be

- 964 evaluated at least every three months and at  
 965 completion. <sup>(Core)</sup>  
 966  
 967 **V.A.1.c)** The program must provide an objective performance  
 968 evaluation based on the Competencies and the subspecialty-  
 969 specific Milestones, and must: <sup>(Core)</sup>  
 970  
 971 **V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers,  
 972 patients, self, and other professional staff members);  
 973 and, <sup>(Core)</sup>  
 974  
 975 **V.A.1.c).(2)** provide that information to the Clinical Competency  
 976 Committee for its synthesis of progressive fellow  
 977 performance and improvement toward unsupervised  
 978 practice. <sup>(Core)</sup>  
 979

**Background and Intent:** The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

- 980  
 981 **V.A.1.d)** The program director or their designee, with input from the  
 982 Clinical Competency Committee, must:  
 983  
 984 **V.A.1.d).(1)** meet with and review with each fellow their  
 985 documented semi-annual evaluation of performance,  
 986 including progress along the subspecialty-specific  
 987 Milestones. <sup>(Core)</sup>  
 988  
 989 **V.A.1.d).(2)** assist fellows in developing individualized learning  
 990 plans to capitalize on their strengths and identify areas  
 991 for growth; and, <sup>(Core)</sup>  
 992  
 993 **V.A.1.d).(3)** develop plans for fellows failing to progress, following  
 994 institutional policies and procedures. <sup>(Core)</sup>  
 995

**Background and Intent:** Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

**Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.**

- 996  
997 **V.A.1.e)** At least annually, there must be a summative evaluation of  
998 each fellow that includes their readiness to progress to the  
999 next year of the program, if applicable. <sup>(Core)</sup>  
1000  
1001 **V.A.1.f)** The evaluations of a fellow’s performance must be accessible  
1002 for review by the fellow. <sup>(Core)</sup>  
1003  
1004 **V.A.2.** Final Evaluation  
1005  
1006 **V.A.2.a)** The program director must provide a final evaluation for each  
1007 fellow upon completion of the program. <sup>(Core)</sup>  
1008  
1009 **V.A.2.a).(1)** The subspecialty-specific Milestones, and when  
1010 applicable the subspecialty-specific Case Logs, must  
1011 be used as tools to ensure fellows are able to engage  
1012 in autonomous practice upon completion of the  
1013 program. <sup>(Core)</sup>  
1014  
1015 **V.A.2.a).(2)** The final evaluation must:  
1016  
1017 **V.A.2.a).(2).(a)** become part of the fellow’s permanent record  
1018 maintained by the institution, and must be  
1019 accessible for review by the fellow in  
1020 accordance with institutional policy; <sup>(Core)</sup>  
1021  
1022 **V.A.2.a).(2).(b)** verify that the fellow has demonstrated the  
1023 knowledge, skills, and behaviors necessary to  
1024 enter autonomous practice; <sup>(Core)</sup>  
1025  
1026 **V.A.2.a).(2).(c)** consider recommendations from the Clinical  
1027 Competency Committee; and, <sup>(Core)</sup>  
1028  
1029 **V.A.2.a).(2).(d)** be shared with the fellow upon completion of  
1030 the program. <sup>(Core)</sup>  
1031  
1032 **V.A.3.** A Clinical Competency Committee must be appointed by the  
1033 program director. <sup>(Core)</sup>  
1034  
1035 **V.A.3.a)** At a minimum the Clinical Competency Committee must  
1036 include three members, at least one of whom is a core faculty  
1037 member. Members must be faculty members from the same  
1038 program or other programs, or other health professionals

- 1039 who have extensive contact and experience with the  
 1040 program's fellows. <sup>(Core)</sup>
- 1041
- 1042 **V.A.3.b) The Clinical Competency Committee must:**
- 1043
- 1044 **V.A.3.b).(1) review all fellow evaluations at least semi-annually;**  
 1045 <sup>(Core)</sup>
- 1046
- 1047 **V.A.3.b).(2) determine each fellow's progress on achievement of**  
 1048 **the subspecialty-specific Milestones; and, <sup>(Core)</sup>**
- 1049
- 1050 **V.A.3.b).(3) meet prior to the fellows' semi-annual evaluations and**  
 1051 **advise the program director regarding each fellow's**  
 1052 **progress. <sup>(Core)</sup>**
- 1053
- 1054 **V.B. Faculty Evaluation**
- 1055
- 1056 **V.B.1. The program must have a process to evaluate each faculty**  
 1057 **member's performance as it relates to the educational program at**  
 1058 **least annually. <sup>(Core)</sup>**
- 1059

**Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.**

- 1060
- 1061 **V.B.1.a) This evaluation must include a review of the faculty member's**  
 1062 **clinical teaching abilities, engagement with the educational**  
 1063 **program, participation in faculty development related to their**  
 1064 **skills as an educator, clinical performance, professionalism,**  
 1065 **and scholarly activities. <sup>(Core)</sup>**
- 1066
- 1067 **V.B.1.b) This evaluation must include written, confidential evaluations**  
 1068 **by the fellows. <sup>(Core)</sup>**
- 1069

1070 **V.B.2. Faculty members must receive feedback on their evaluations at least**  
1071 **annually.** (Core)

1072  
1073 **V.B.3. Results of the faculty educational evaluations should be**  
1074 **incorporated into program-wide faculty development plans.** (Core)  
1075

**Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.**

1076  
1077 **V.C. Program Evaluation and Improvement**  
1078

1079 **V.C.1. The program director must appoint the Program Evaluation**  
1080 **Committee to conduct and document the Annual Program**  
1081 **Evaluation as part of the program's continuous improvement**  
1082 **process.** (Core)

1083  
1084 **V.C.1.a) The Program Evaluation Committee must be composed of at**  
1085 **least two program faculty members, at least one of whom is a**  
1086 **core faculty member, and at least one fellow.** (Core)

1087  
1088 **V.C.1.b) Program Evaluation Committee responsibilities must include:**

1089  
1090 **V.C.1.b).(1) acting as an advisor to the program director, through**  
1091 **program oversight;** (Core)

1092  
1093 **V.C.1.b).(2) review of the program's self-determined goals and**  
1094 **progress toward meeting them;** (Core)

1095  
1096 **V.C.1.b).(3) guiding ongoing program improvement, including**  
1097 **development of new goals, based upon outcomes;**  
1098 **and,** (Core)

1099  
1100 **V.C.1.b).(4) review of the current operating environment to identify**  
1101 **strengths, challenges, opportunities, and threats as**  
1102 **related to the program's mission and aims.** (Core)  
1103

**Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.**

1104  
1105 **V.C.1.c) The Program Evaluation Committee should consider the**  
1106 **following elements in its assessment of the program:**

1107  
1108 **V.C.1.c).(1) curriculum;** (Core)

1109		
1110	<b>V.C.1.c).(2)</b>	<b>outcomes from prior Annual Program Evaluation(s);</b>
1111		<small>(Core)</small>

1144		
1145	<b>V.C.1.c).(6).(d)</b>	<b>graduate performance.</b> <small>(Core)</small>
1146		
1147	<b>V.C.1.c).(7)</b>	<b>aggregate faculty:</b>
1148		
1149	<b>V.C.1.c).(7).(a)</b>	<b>evaluation; and,</b> <small>(Core)</small>
1150		
1151	<b>V.C.1.c).(7).(b)</b>	<b>professional development</b> <small>(Core)</small>
1152		
1153	<b>V.C.1.d)</b>	<b>The Program Evaluation Committee must evaluate the</b>
1154		<b>program's mission and aims, strengths, areas for</b>
1155		<b>improvement, and threats.</b> <small>(Core)</small>
1156		
1157	<b>V.C.1.e)</b>	<b>The annual review, including the action plan, must:</b>
1158		

- 1159 V.C.1.e).(1) be distributed to and discussed with the members of  
 1160 the teaching faculty and the fellows; and, <sup>(Core)</sup>  
 1161  
 1162 V.C.1.e).(2) be submitted to the DIO. <sup>(Core)</sup>  
 1163  
 1164 V.C.2. The program must participate in a Self-Study prior to its 10-Year  
 1165 Accreditation Site Visit. <sup>(Core)</sup>  
 1166  
 1167 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.  
 1168 <sup>(Core)</sup>  
 1169

**Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.**

- 1170  
 1171 V.C.3. *One goal of ACGME-accredited education is to educate physicians*  
 1172 *who seek and achieve board certification. One measure of the*  
 1173 *effectiveness of the educational program is the ultimate pass rate.*  
 1174  
 1175 *The program director should encourage all eligible program*  
 1176 *graduates to take the certifying examination offered by the*  
 1177 *applicable American Board of Medical Specialties (ABMS) member*  
 1178 *board or American Osteopathic Association (AOA) certifying board.*  
 1179  
 1180 V.C.3.a) For subspecialties in which the ABMS member board and/or  
 1181 AOA certifying board offer(s) an annual written exam, in the  
 1182 preceding three years, the program's aggregate pass rate of  
 1183 those taking the examination for the first time must be higher  
 1184 than the bottom fifth percentile of programs in that  
 1185 subspecialty. <sup>(Outcome)</sup>  
 1186  
 1187 V.C.3.b) For subspecialties in which the ABMS member board and/or  
 1188 AOA certifying board offer(s) a biennial written exam, in the  
 1189 preceding six years, the program's aggregate pass rate of  
 1190 those taking the examination for the first time must be higher  
 1191 than the bottom fifth percentile of programs in that  
 1192 subspecialty. <sup>(Outcome)</sup>  
 1193  
 1194 V.C.3.c) For subspecialties in which the ABMS member board and/or  
 1195 AOA certifying board offer(s) an annual oral exam, in the  
 1196 preceding three years, the program's aggregate pass rate of  
 1197 those taking the examination for the first time must be higher

- 1198 than the bottom fifth percentile of programs in that  
 1199 subspecialty. <sup>(Outcome)</sup>  
 1200  
 1201 **V.C.3.d)** For subspecialties in which the ABMS member board and/or  
 1202 AOA certifying board offer(s) a biennial oral exam, in the  
 1203 preceding six years, the program’s aggregate pass rate of  
 1204 those taking the examination for the first time must be higher  
 1205 than the bottom fifth percentile of programs in that  
 1206 subspecialty. <sup>(Outcome)</sup>  
 1207  
 1208 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program  
 1209 whose graduates over the time period specified in the  
 1210 requirement have achieved an 80 percent pass rate will have  
 1211 met this requirement, no matter the percentile rank of the  
 1212 program for pass rate in that subspecialty. <sup>(Outcome)</sup>  
 1213

**Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.**

**There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.**

- 1214  
 1215 **V.C.3.f)** Programs must report, in ADS, board certification status  
 1216 annually for the cohort of board-eligible fellows that  
 1217 graduated seven years earlier. <sup>(Core)</sup>  
 1218

**Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.**

**The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates’ performance on board certification examinations.**

**In the future, the ACGME may establish parameters related to ultimate board certification rates.**

- 1219  
 1220 **VI. The Learning and Working Environment**  
 1221

***Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:***

1222  
 1223  
 1224

1225  
1226  
1227  
1228  
1229  
1230  
1231  
1232  
1233  
1234  
1235  
1236  
1237  
1238  
1239  
1240

- ***Excellence in the safety and quality of care rendered to patients by fellows today***
- ***Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice***
- ***Excellence in professionalism through faculty modeling of:***
  - ***the effacement of self-interest in a humanistic environment that supports the professional development of physicians***
  - ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***
- ***Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team***

**Background and Intent:** The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

1241  
1242  
1243  
1244  
1245

**VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability**

**VI.A.1. Patient Safety and Quality Improvement**

***All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge,***

1252 **skills, and abilities; understand the limits of their knowledge and**  
1253 **experience; and seek assistance as required to provide optimal**  
1254 **patient care.**

1255  
1256 **Fellows must demonstrate the ability to analyze the care they**  
1257 **provide, understand their roles within health care teams, and play an**  
1258 **active role in system improvement processes. Graduating fellows**  
1259 **will apply these skills to critique their future unsupervised practice**  
1260 **and effect quality improvement measures.**

1261  
1262 **It is necessary for fellows and faculty members to consistently work**  
1263 **in a well-coordinated manner with other health care professionals to**  
1264 **achieve organizational patient safety goals.**

1265  
1266 **VI.A.1.a) Patient Safety**

1267  
1268 **VI.A.1.a).(1) Culture of Safety**

1269  
1270 **A culture of safety requires continuous identification**  
1271 **of vulnerabilities and a willingness to transparently**  
1272 **deal with them. An effective organization has formal**  
1273 **mechanisms to assess the knowledge, skills, and**  
1274 **attitudes of its personnel toward safety in order to**  
1275 **identify areas for improvement.**

1276  
1277 **VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows**  
1278 **must actively participate in patient safety**  
1279 **systems and contribute to a culture of safety.**  
1280 **(Core)**

1281  
1282 **VI.A.1.a).(1).(b) The program must have a structure that**  
1283 **promotes safe, interprofessional, team-based**  
1284 **care. (Core)**

1285  
1286 **VI.A.1.a).(2) Education on Patient Safety**

1287  
1288 **Programs must provide formal educational activities**  
1289 **that promote patient safety-related goals, tools, and**  
1290 **techniques. (Core)**

1291  
**Background and Intent: Optimal patient safety occurs in the setting of a coordinated  
interprofessional learning and working environment.**

1292  
1293 **VI.A.1.a).(3) Patient Safety Events**

1294  
1295 **Reporting, investigation, and follow-up of adverse**  
1296 **events, near misses, and unsafe conditions are pivotal**  
1297 **mechanisms for improving patient safety, and are**  
1298 **essential for the success of any patient safety**  
1299 **program. Feedback and experiential learning are**  
1300 **essential to developing true competence in the ability**

1301 *to identify causes and institute sustainable systems-*  
1302 *based changes to ameliorate patient safety*  
1303 *vulnerabilities.*

1304  
1305 **VI.A.1.a).(3).(a)** Residents, fellows, faculty members, and other  
1306 clinical staff members must:

1307  
1308 **VI.A.1.a).(3).(a).(i)** know their responsibilities in reporting  
1309 patient safety events at the clinical site;  
1310 (Core)

1311  
1312 **VI.A.1.a).(3).(a).(ii)** know how to report patient safety  
1313 events, including near misses, at the  
1314 clinical site; and, (Core)

1315  
1316 **VI.A.1.a).(3).(a).(iii)** be provided with summary information  
1317 of their institution's patient safety  
1318 reports. (Core)

1319  
1320 **VI.A.1.a).(3).(b)** Fellows must participate as team members in  
1321 real and/or simulated interprofessional clinical  
1322 patient safety activities, such as root cause  
1323 analyses or other activities that include  
1324 analysis, as well as formulation and  
1325 implementation of actions. (Core)

1326  
1327 **VI.A.1.a).(4)** Fellow Education and Experience in Disclosure of  
1328 Adverse Events

1329  
1330 *Patient-centered care requires patients, and when*  
1331 *appropriate families, to be apprised of clinical*  
1332 *situations that affect them, including adverse events.*  
1333 *This is an important skill for faculty physicians to*  
1334 *model, and for fellows to develop and apply.*

1335  
1336 **VI.A.1.a).(4).(a)** All fellows must receive training in how to  
1337 disclose adverse events to patients and  
1338 families. (Core)

1339  
1340 **VI.A.1.a).(4).(b)** Fellows should have the opportunity to  
1341 participate in the disclosure of patient safety  
1342 events, real or simulated. (Detail)

1343  
1344 **VI.A.1.b)** Quality Improvement

1345  
1346 **VI.A.1.b).(1)** Education in Quality Improvement

1347  
1348 *A cohesive model of health care includes quality-*  
1349 *related goals, tools, and techniques that are necessary*  
1350 *in order for health care professionals to achieve*  
1351 *quality improvement goals.*

1352		
1353	VI.A.1.b).(1).(a)	Fellows must receive training and experience in quality improvement processes, including an understanding of health care disparities. <sup>(Core)</sup>
1354		
1355		
1356		
1357	VI.A.1.b).(2)	<b>Quality Metrics</b>
1358		
1359		<i>Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.</i>
1360		
1361		
1362		
1363	VI.A.1.b).(2).(a)	Fellows and faculty members must receive data on quality metrics and benchmarks related to their patient populations. <sup>(Core)</sup>
1364		
1365		
1366		
1367	VI.A.1.b).(3)	<b>Engagement in Quality Improvement Activities</b>
1368		
1369		<i>Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.</i>
1370		
1371		
1372		
1373	VI.A.1.b).(3).(a)	Fellows must have the opportunity to participate in interprofessional quality improvement activities. <sup>(Core)</sup>
1374		
1375		
1376		
1377	VI.A.1.b).(3).(a).(i)	This should include activities aimed at reducing health care disparities. <sup>(Detail)</sup>
1378		
1379		
1380	VI.A.2.	<b>Supervision and Accountability</b>
1381		
1382	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.</i>
1383		
1384		
1385		
1386		
1387		
1388		
1389		
1390		
1391		<i>Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each fellow's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.</i>
1392		
1393		
1394		
1395		
1396		
1397	VI.A.2.a).(1)	Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care. <sup>(Core)</sup>
1398		
1399		
1400		
1401		
1402		

1403  
1404 Licensed independent practitioners who have primary  
1405 responsibility for patient care must be physicians. <sup>(Core)</sup>

1406  
1407 **VI.A.2.a).(1).(a)** This information must be available to fellows,  
1408 faculty members, other members of the health  
1409 care team, and patients. <sup>(Core)</sup>

1410  
1411 **VI.A.2.a).(1).(b)** Fellows and faculty members must inform each  
1412 patient of their respective roles in that patient's  
1413 care when providing direct patient care. <sup>(Core)</sup>

1414  
1415 **VI.A.2.b)** *Supervision may be exercised through a variety of methods.*  
1416 *For many aspects of patient care, the supervising physician*  
1417 *may be a more advanced fellow. Other portions of care*  
1418 *provided by the fellow can be adequately supervised by the*  
1419 *appropriate availability of the supervising faculty member or*  
1420 *fellow, either on site or by means of telecommunication*  
1421 *technology. Some activities require the physical presence of*  
1422 *the supervising faculty member. In some circumstances,*  
1423 *supervision may include post-hoc review of fellow-delivered*  
1424 *care with feedback.*

**Background and Intent:** Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1426  
1427 **VI.A.2.b).(1)** The program must demonstrate that the appropriate  
1428 level of supervision in place for all fellows is based on  
1429 each fellow's level of training and ability, as well as  
1430 patient complexity and acuity. Supervision may be  
1431 exercised through a variety of methods, as appropriate  
1432 to the situation. <sup>(Core)</sup>

1433  
1434 **VI.A.2.b).(2)** The program must define when physical presence of a  
1435 supervising physician is required. <sup>(Core)</sup>

1436  
1437 **VI.A.2.c)** Levels of Supervision

1438  
1439 To promote appropriate fellow supervision while providing  
1440 for graded authority and responsibility, the program must use  
1441 the following classification of supervision: <sup>(Core)</sup>

1442  
1443 **VI.A.2.c).(1)** Direct Supervision:

1444

1445	<b>VI.A.2.c).(1).(a)</b>	<b>the supervising physician is physically present with the fellow during the key portions of the patient interaction; or,</b> <sup>(Core)</sup>
1446		
1447		
1448		
1449	<b>VI.A.2.c).(1).(a).(i)</b>	Fellow performance of procedures must be done under direct supervision where the supervising physician is physically present.
1450		
1451		
1452		<sup>(Core)</sup>
1453		
1454	<b>VI.A.2.c).(1).(b)</b>	<b>the supervising physician and/or patient is not physically present with the fellow and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology.</b> <sup>(Core)</sup>
1455		
1456		
1457		
1458		
1459		
1460	<b>VI.A.2.c).(1).(b).(i)</b>	Direct supervision through appropriate telecommunication technology must be limited to history-taking and patient examination, assessment, and counseling.
1461		
1462		
1463		
1464		<sup>(Core)</sup>
1465		
1466	<b>VI.A.2.c).(2)</b>	<b>Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision.</b> <sup>(Core)</sup>
1467		
1468		
1469		
1470		
1471		
1472	<b>VI.A.2.c).(3)</b>	<b>Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered.</b> <sup>(Core)</sup>
1473		
1474		
1475		
1476	<b>VI.A.2.d)</b>	<b>The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each fellow must be assigned by the program director and faculty members.</b> <sup>(Core)</sup>
1477		
1478		
1479		
1480		
1481	<b>VI.A.2.d).(1)</b>	<b>The program director must evaluate each fellow’s abilities based on specific criteria, guided by the Milestones.</b> <sup>(Core)</sup>
1482		
1483		
1484		
1485	<b>VI.A.2.d).(2)</b>	<b>Faculty members functioning as supervising physicians must delegate portions of care to fellows based on the needs of the patient and the skills of each fellow.</b> <sup>(Core)</sup>
1486		
1487		
1488		
1489		
1490	<b>VI.A.2.d).(3)</b>	<b>Fellows should serve in a supervisory role to junior fellows and residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow.</b> <sup>(Detail)</sup>
1491		
1492		
1493		
1494		
1495		

1496 VI.A.2.e) Programs must set guidelines for circumstances and events  
1497 in which fellows must communicate with the supervising  
1498 faculty member(s). <sup>(Core)</sup>  
1499

1500 VI.A.2.e).(1) Each fellow must know the limits of their scope of  
1501 authority, and the circumstances under which the  
1502 fellow is permitted to act with conditional  
1503 independence. <sup>(Outcome)</sup>  
1504

**Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.**

1505  
1506 VI.A.2.f) Faculty supervision assignments must be of sufficient  
1507 duration to assess the knowledge and skills of each fellow  
1508 and to delegate to the fellow the appropriate level of patient  
1509 care authority and responsibility. <sup>(Core)</sup>  
1510

1511 VI.B. Professionalism

1512  
1513 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must  
1514 educate fellows and faculty members concerning the professional  
1515 responsibilities of physicians, including their obligation to be  
1516 appropriately rested and fit to provide the care required by their  
1517 patients. <sup>(Core)</sup>  
1518

1519 VI.B.2. The learning objectives of the program must:

1520  
1521 VI.B.2.a) be accomplished through an appropriate blend of supervised  
1522 patient care responsibilities, clinical teaching, and didactic  
1523 educational events; <sup>(Core)</sup>  
1524

1525 VI.B.2.b) be accomplished without excessive reliance on fellows to  
1526 fulfill non-physician obligations; and, <sup>(Core)</sup>  
1527

**Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.**

1528  
1529 VI.B.2.c) ensure manageable patient care responsibilities. <sup>(Core)</sup>  
1530

**Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY**

level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

- 1531  
1532 **VI.B.3.** The program director, in partnership with the Sponsoring Institution,  
1533 must provide a culture of professionalism that supports patient  
1534 safety and personal responsibility. <sup>(Core)</sup>  
1535  
1536 **VI.B.4.** Fellows and faculty members must demonstrate an understanding  
1537 of their personal role in the:  
1538  
1539 **VI.B.4.a)** provision of patient- and family-centered care; <sup>(Outcome)</sup>  
1540  
1541 **VI.B.4.b)** safety and welfare of patients entrusted to their care,  
1542 including the ability to report unsafe conditions and adverse  
1543 events; <sup>(Outcome)</sup>  
1544

**Background and Intent:** This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

- 1545  
1546 **VI.B.4.c)** assurance of their fitness for work, including; <sup>(Outcome)</sup>  
1547

**Background and Intent:** This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

- 1548  
1549 **VI.B.4.c).(1)** management of their time before, during, and after  
1550 clinical assignments; and, <sup>(Outcome)</sup>  
1551  
1552 **VI.B.4.c).(2)** recognition of impairment, including from illness,  
1553 fatigue, and substance use, in themselves, their peers,  
1554 and other members of the health care team. <sup>(Outcome)</sup>  
1555  
1556 **VI.B.4.d)** commitment to lifelong learning; <sup>(Outcome)</sup>  
1557  
1558 **VI.B.4.e)** monitoring of their patient care performance improvement  
1559 indicators; and, <sup>(Outcome)</sup>  
1560  
1561 **VI.B.4.f)** accurate reporting of clinical and educational work hours,  
1562 patient outcomes, and clinical experience data. <sup>(Outcome)</sup>  
1563  
1564 **VI.B.5.** All fellows and faculty members must demonstrate responsiveness  
1565 to patient needs that supersedes self-interest. This includes the  
1566 recognition that under certain circumstances, the best interests of

1567 the patient may be served by transitioning that patient's care to  
1568 another qualified and rested provider. (Outcome)

1569  
1570 **VI.B.6.** Programs, in partnership with their Sponsoring Institutions, must  
1571 provide a professional, equitable, respectful, and civil environment  
1572 that is free from discrimination, sexual and other forms of  
1573 harassment, mistreatment, abuse, or coercion of students, fellows,  
1574 faculty, and staff. (Core)

1575  
1576 **VI.B.7.** Programs, in partnership with their Sponsoring Institutions, should  
1577 have a process for education of fellows and faculty regarding  
1578 unprofessional behavior and a confidential process for reporting,  
1579 investigating, and addressing such concerns. (Core)

1580 **VI.C. Well-Being**

1582  
1583 *Psychological, emotional, and physical well-being are critical in the*  
1584 *development of the competent, caring, and resilient physician and require*  
1585 *proactive attention to life inside and outside of medicine. Well-being*  
1586 *requires that physicians retain the joy in medicine while managing their*  
1587 *own real life stresses. Self-care and responsibility to support other*  
1588 *members of the health care team are important components of*  
1589 *professionalism; they are also skills that must be modeled, learned, and*  
1590 *nurtured in the context of other aspects of fellowship training.*

1591  
1592 *Fellows and faculty members are at risk for burnout and depression.*  
1593 *Programs, in partnership with their Sponsoring Institutions, have the same*  
1594 *responsibility to address well-being as other aspects of resident*  
1595 *competence. Physicians and all members of the health care team share*  
1596 *responsibility for the well-being of each other. For example, a culture which*  
1597 *encourages covering for colleagues after an illness without the expectation*  
1598 *of reciprocity reflects the ideal of professionalism. A positive culture in a*  
1599 *clinical learning environment models constructive behaviors, and prepares*  
1600 *fellows with the skills and attitudes needed to thrive throughout their*  
1601 *careers.*

**Background and Intent:** The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

**As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.**

1603

1604 VI.C.1. The responsibility of the program, in partnership with the  
1605 Sponsoring Institution, to address well-being must include:

1606  
1607 VI.C.1.a) efforts to enhance the meaning that each fellow finds in the  
1608 experience of being a physician, including protecting time  
1609 with patients, minimizing non-physician obligations,  
1610 providing administrative support, promoting progressive  
1611 autonomy and flexibility, and enhancing professional  
1612 relationships; <sup>(Core)</sup>

1613  
1614 VI.C.1.b) attention to scheduling, work intensity, and work  
1615 compression that impacts fellow well-being; <sup>(Core)</sup>

1616  
1617 VI.C.1.c) evaluating workplace safety data and addressing the safety of  
1618 fellows and faculty members; <sup>(Core)</sup>  
1619

**Background and Intent:** This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1620  
1621 VI.C.1.d) policies and programs that encourage optimal fellow and  
1622 faculty member well-being; and, <sup>(Core)</sup>  
1623

**Background and Intent:** Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1624  
1625 VI.C.1.d).(1) Fellows must be given the opportunity to attend  
1626 medical, mental health, and dental care appointments,  
1627 including those scheduled during their working hours.  
1628 <sup>(Core)</sup>  
1629

**Background and Intent:** The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1630  
1631 VI.C.1.e) attention to fellow and faculty member burnout, depression,  
1632 and substance use disorder. The program, in partnership with  
1633 its Sponsoring Institution, must educate faculty members and  
1634 fellows in identification of the symptoms of burnout,  
1635 depression, and substance use disorder, including means to  
1636 assist those who experience these conditions. Fellows and  
1637 faculty members must also be educated to recognize those  
1638 symptoms in themselves and how to seek appropriate care.

1639  
1640  
1641

The program, in partnership with its Sponsoring Institution, must: <sup>(Core)</sup>

**Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).**

1642  
1643  
1644  
1645  
1646  
1647  
1648  
1649  
1650

**VI.C.1.e).(1)**

**encourage fellows and faculty members to alert the program director or other designated personnel or programs when they are concerned that another fellow, resident, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence;**  
<sup>(Core)</sup>

**Background and Intent: Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.**

1651  
1652  
1653  
1654  
1655  
1656  
1657  
1658  
1659

**VI.C.1.e).(2)**

**provide access to appropriate tools for self-screening; and,** <sup>(Core)</sup>

**VI.C.1.e).(3)**

**provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week.** <sup>(Core)</sup>

**Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.**

**The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.**

- 1660  
1661 **VI.C.2.** There are circumstances in which fellows may be unable to attend  
1662 work, including but not limited to fatigue, illness, family  
1663 emergencies, and parental leave. Each program must allow an  
1664 appropriate length of absence for fellows unable to perform their  
1665 patient care responsibilities. <sup>(Core)</sup>  
1666
- 1667 **VI.C.2.a)** The program must have policies and procedures in place to  
1668 ensure coverage of patient care. <sup>(Core)</sup>  
1669
- 1670 **VI.C.2.b)** These policies must be implemented without fear of negative  
1671 consequences for the fellow who is or was unable to provide  
1672 the clinical work. <sup>(Core)</sup>  
1673

**Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.**

- 1674  
1675 **VI.D. Fatigue Mitigation**  
1676
- 1677 **VI.D.1. Programs must:**  
1678
- 1679 **VI.D.1.a)** educate all faculty members and fellows to recognize the  
1680 signs of fatigue and sleep deprivation; <sup>(Core)</sup>  
1681
- 1682 **VI.D.1.b)** educate all faculty members and fellows in alertness  
1683 management and fatigue mitigation processes; and, <sup>(Core)</sup>  
1684
- 1685 **VI.D.1.c)** encourage fellows to use fatigue mitigation processes to  
1686 manage the potential negative effects of fatigue on patient  
1687 care and learning. <sup>(Detail)</sup>  
1688

**Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.**

**This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.**

- 1689  
1690 **VI.D.2.** Each program must ensure continuity of patient care, consistent  
1691 with the program's policies and procedures referenced in VI.C.2–

- 1692 VI.C.2.b), in the event that a fellow may be unable to perform their  
 1693 patient care responsibilities due to excessive fatigue. <sup>(Core)</sup>  
 1694  
 1695 VI.D.3. The program, in partnership with its Sponsoring Institution, must  
 1696 ensure adequate sleep facilities and safe transportation options for  
 1697 fellows who may be too fatigued to safely return home. <sup>(Core)</sup>  
 1698  
 1699 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care  
 1700  
 1701 VI.E.1. Clinical Responsibilities  
 1702  
 1703 The clinical responsibilities for each fellow must be based on PGY  
 1704 level, patient safety, fellow ability, severity and complexity of patient  
 1705 illness/condition, and available support services. <sup>(Core)</sup>  
 1706

**Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.**

- 1707  
 1708 VI.E.2. Teamwork  
 1709  
 1710 Fellows must care for patients in an environment that maximizes  
 1711 communication. This must include the opportunity to work as a  
 1712 member of effective interprofessional teams that are appropriate to  
 1713 the delivery of care in the subspecialty and larger health system.  
 1714 <sup>(Core)</sup>  
 1715  
 1716 VI.E.2.a) Genetic counselors, laboratory directors, metabolic dietitians,  
 1717 nurses, and technologists must be part of interprofessional teams.  
 1718 <sup>(Core)</sup>  
 1719  
 1720 VI.E.2.a).(1) Other providers and allied health professionals, such as  
 1721 pediatricians and social workers, should be part of  
 1722 interprofessional teams. <sup>(Core)</sup>  
 1723  
 1724 VI.E.3. Transitions of Care  
 1725  
 1726 VI.E.3.a) Programs must design clinical assignments to optimize  
 1727 transitions in patient care, including their safety, frequency,  
 1728 and structure. <sup>(Core)</sup>  
 1729  
 1730 VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,  
 1731 must ensure and monitor effective, structured hand-over  
 1732 processes to facilitate both continuity of care and patient  
 1733 safety. <sup>(Core)</sup>  
 1734

- 1735 VI.E.3.c) Programs must ensure that fellows are competent in  
 1736 communicating with team members in the hand-over process.  
 1737 (Outcome)  
 1738  
 1739 VI.E.3.d) Programs and clinical sites must maintain and communicate  
 1740 schedules of attending physicians and fellows currently  
 1741 responsible for care. (Core)  
 1742  
 1743 VI.E.3.e) Each program must ensure continuity of patient care,  
 1744 consistent with the program’s policies and procedures  
 1745 referenced in VI.C.2-VI.C.2.b), in the event that a fellow may  
 1746 be unable to perform their patient care responsibilities due to  
 1747 excessive fatigue or illness, or family emergency. (Core)  
 1748  
 1749 VI.F. Clinical Experience and Education  
 1750  
 1751 *Programs, in partnership with their Sponsoring Institutions, must design*  
 1752 *an effective program structure that is configured to provide fellows with*  
 1753 *educational and clinical experience opportunities, as well as reasonable*  
 1754 *opportunities for rest and personal activities.*  
 1755

**Background and Intent:** In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1756  
 1757 VI.F.1. Maximum Hours of Clinical and Educational Work per Week  
 1758  
 1759 Clinical and educational work hours must be limited to no more than  
 1760 80 hours per week, averaged over a four-week period, inclusive of all  
 1761 in-house clinical and educational activities, clinical work done from  
 1762 home, and all moonlighting. (Core)  
 1763

**Background and Intent:** Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

**Scheduling**  
 While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their

scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

### ***Oversight***

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

### ***Work from Home***

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1764  
1765  
1766

## **VI.F.2. Mandatory Time Free of Clinical Work and Education**

1767 VI.F.2.a) The program must design an effective program structure that  
1768 is configured to provide fellows with educational  
1769 opportunities, as well as reasonable opportunities for rest  
1770 and personal well-being. <sup>(Core)</sup>

1771  
1772 VI.F.2.b) Fellows should have eight hours off between scheduled  
1773 clinical work and education periods. <sup>(Detail)</sup>

1774  
1775 VI.F.2.b).(1) There may be circumstances when fellows choose to  
1776 stay to care for their patients or return to the hospital  
1777 with fewer than eight hours free of clinical experience  
1778 and education. This must occur within the context of  
1779 the 80-hour and the one-day-off-in-seven  
1780 requirements. <sup>(Detail)</sup>

1781  
**Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.**

1782  
1783 VI.F.2.c) Fellows must have at least 14 hours free of clinical work and  
1784 education after 24 hours of in-house call. <sup>(Core)</sup>

1785  
**Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.**

1786  
1787 VI.F.2.d) Fellows must be scheduled for a minimum of one day in  
1788 seven free of clinical work and required education (when  
1789 averaged over four weeks). At-home call cannot be assigned  
1790 on these free days. <sup>(Core)</sup>

1791  
**Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is**

defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

1806

**VI.F.3. Maximum Clinical Work and Education Period Length**

**VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. <sup>(Core)</sup>**

**VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. <sup>(Core)</sup>**

**VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. <sup>(Core)</sup>**

**Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.**

1807  
1808

1822  
1823  
1824  
1825

**VI.F.4. Clinical and Educational Work Hour Exceptions**

**VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**

**VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; <sup>(Detail)</sup>**

**VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, <sup>(Detail)</sup>**

**VI.F.4.a).(3) to attend unique educational events. <sup>(Detail)</sup>**

**VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. <sup>(Detail)</sup>**

**Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and**

that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1826

**VI.F.4.c)**                    **A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.**

The Review Committee for Medical Genetics and Genomics will not consider requests for exceptions to the 80-hour limit to the residents' work week.

**VI.F.5.**                    **Moonlighting**

**VI.F.5.a)**                    **Moonlighting must not interfere with the ability of the fellow to achieve the goals and objectives of the educational program, and must not interfere with the fellow's fitness for work nor compromise patient safety. <sup>(Core)</sup>**

**VI.F.5.b)**                    **Time spent by fellows in internal and external moonlighting (as defined in the ACGME Glossary of Terms) must be counted toward the 80-hour maximum weekly limit. <sup>(Core)</sup>**

**Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).**

**VI.F.6.**                    **In-House Night Float**

**Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. <sup>(Core)</sup>**

**Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.**

**VI.F.7.**                    **Maximum In-House On-Call Frequency**

**Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). <sup>(Core)</sup>**

**VI.F.8.**                    **At-Home Call**

**VI.F.8.a)**                    **Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. <sup>(Core)</sup>**

1868 VI.F.8.a).(1) At-home call must not be so frequent or taxing as to  
1869 preclude rest or reasonable personal time for each  
1870 fellow. <sup>(Core)</sup>

1871  
1872 VI.F.8.b) Fellows are permitted to return to the hospital while on at-  
1873 home call to provide direct care for new or established  
1874 patients. These hours of inpatient patient care must be  
1875 included in the 80-hour maximum weekly limit. <sup>(Detail)</sup>  
1876

**Background and Intent:** This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

**In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.**

1877  
1878 \*\*\*  
1879 \***Core Requirements:** Statements that define structure, resource, or process elements  
1880 essential to every graduate medical educational program.  
1881  
1882 †**Detail Requirements:** Statements that describe a specific structure, resource, or process, for  
1883 achieving compliance with a Core Requirement. Programs and sponsoring institutions in  
1884 substantial compliance with the Outcome Requirements may utilize alternative or innovative  
1885 approaches to meet Core Requirements.  
1886

1887 ‡**Outcome Requirements:** Statements that specify expected measurable or observable  
1888 attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their  
1889 graduate medical education.

### 1891 **Osteopathic Recognition**

1892 For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition  
1893 Requirements also apply ([www.acgme.org/OsteopathicRecognition](http://www.acgme.org/OsteopathicRecognition)).
