

**ACGME Program Requirements for Graduate Medical Education  
in Dermatology  
Summary and Impact of Micrographic Surgery and Dermatologic Oncology Requirement  
Revisions**

Requirement #: **4.11.I.**

Requirement Revision (significant change only):

Fellows should participate in performing the patient and laboratory procedures for which they will be expected to supervise ancillary staff members. (Core)

1. Describe the Review Committee's rationale for this revision: **As fellows may hold positions involving oversight or supervision of a Mohs laboratory and the ancillary staff members who are responsible for these procedures, it is essential that the program adequately prepare fellows for their supervisory roles. Ensuring that fellows possess a comprehensive understanding of the procedures constitutes a critical component of this preparation.**
2. How will the proposed requirement or revision improve resident/fellow education, patient safety, and/or patient care quality? **The fellows will be appropriately prepared for oversight of lab operations and the staff performing tissue processing, which improves the quality of patient care.**
3. How will the proposed requirement or revision impact continuity of patient care?  
**N/A**
4. Will the proposed requirement or revision necessitate additional institutional resources (e.g., facilities, organization of other services, addition of faculty members, financial support; volume and variety of patients), if so, how? **The Sponsoring Institution/program should not need additional resources, as they are already providing these patient care needs.**
5. How will the proposed revision impact other accredited programs?  
**N/A**
