1 **Proposed ACGME Program Requirements for Graduate Medical Education**
2 **in Diagnostic Radiology**

3
4 **Common Program Requirements (Residency) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.

9
10 **Introduction**

11
12 **Int.A.** *Graduate medical education is the crucial step of professional*
13 *development between medical school and autonomous clinical practice. It*
14 *is in this vital phase of the continuum of medical education that residents*
15 *learn to provide optimal patient care under the supervision of faculty*
16 *members who not only instruct, but serve as role models of excellence,*
17 *compassion, professionalism, and scholarship.*

18
19 *Graduate medical education transforms medical students into physician*
20 *scholars who care for the patient, family, and a diverse community; create*
21 *and integrate new knowledge into practice; and educate future generations*
22 *of physicians to serve the public. Practice patterns established during*
23 *graduate medical education persist many years later.*

24
25 *Graduate medical education has as a core tenet the graded authority and*
26 *responsibility for patient care. The care of patients is undertaken with*
27 *appropriate faculty supervision and conditional independence, allowing*
28 *residents to attain the knowledge, skills, attitudes, and empathy required*
29 *for autonomous practice. Graduate medical education develops physicians*
30 *who focus on excellence in delivery of safe, equitable, affordable, quality*
31 *care; and the health of the populations they serve. Graduate medical*
32 *education values the strength that a diverse group of physicians brings to*
33 *medical care.*

34
35 *Graduate medical education occurs in clinical settings that establish the*
36 *foundation for practice-based and lifelong learning. The professional*
37 *development of the physician, begun in medical school, continues through*
38 *faculty modeling of the effacement of self-interest in a humanistic*
39 *environment that emphasizes joy in curiosity, problem-solving, academic*
40 *rigor, and discovery. This transformation is often physically, emotionally,*
41 *and intellectually demanding and occurs in a variety of clinical learning*
42 *environments committed to graduate medical education and the well-being*
43 *of patients, residents, fellows, faculty members, students, and all members*
44 *of the health care team.*

45
46 **Int.B.** **Definition of Specialty**

47
48 Diagnostic radiology encompasses image-based diagnosis and image-guided
49 therapeutic techniques, and includes but is not limited to: computed tomography
50 (CT); interventional procedures; magnetic resonance imaging (MRI); medical

51 physics; nuclear radiology and molecular imaging; radiography/fluoroscopy;
52 ultrasonography; and radiology quality and safety.

53
54 Diagnostic radiology educational content includes, but is not limited to, diagnostic
55 imaging and related image-guided interventions in the following 10 categories:
56 breast; cardiac; gastrointestinal; musculoskeletal; neurologic; pediatric;
57 reproductive and endocrine; thoracic; urinary; and vascular.

58
59 **Int.C. Length of Educational Program**

60
61 The educational programs in diagnostic radiology are configured in 48-month and
62 60-month formats. The latter includes 12 months of education in fundamental
63 clinical skills of medicine, and both include 48 months of education in radiology
64 (R1, R2, R3, and R4 years.) ^{(Core)*}

65
66 Int.C.1. The 48-month program must be comprised of 48 months of radiology
67 education. ^(Core)

68
69 Int.C.2. The 60-month program must be comprised of 12 months of education in
70 fundamental clinical skills of medicine followed by 48 months of radiology
71 education. ^(Core)

72
73 Int.C.2.a) Programs seeking to utilize the 60-month format must submit an
74 educational justification for using this format to the Review
75 Committee for approval prior to implementation. The educational
76 effectiveness of this format will be subject to evaluation at each
77 subsequent program accreditation review. ^(Core)

78
79 **I. Oversight**

80
81 **I.A. Sponsoring Institution**

82
83 *The Sponsoring Institution is the organization or entity that assumes the*
84 *ultimate financial and academic responsibility for a program of graduate*
85 *medical education, consistent with the ACGME Institutional Requirements.*

86
87 *When the Sponsoring Institution is not a rotation site for the program, the*
88 *most commonly utilized site of clinical activity for the program is the*
89 *primary clinical site.*

90
91 **Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the residents. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.**

- 92 I.A.1. The program must be sponsored by one ACGME-accredited
 93 Sponsoring Institution. ^(Core)
 94
- 95 I.B. Participating Sites
 96
 97 *A participating site is an organization providing educational experiences or*
 98 *educational assignments/rotations for residents.*
 99
- 100 I.B.1. The program, with approval of its Sponsoring Institution, must
 101 designate a primary clinical site. ^(Core)
 102
- 103 I.B.1.a) Diagnostic radiology education should occur in environments with
 104 other residents and/or fellows from other specialties at the
 105 Sponsoring Institution and/or participating sites to facilitate the
 106 interchange of knowledge and experience among the residents.
 107 ^(Core)
 108
- 109 I.B.2. There must be a program letter of agreement (PLA) between the
 110 program and each participating site that governs the relationship
 111 between the program and the participating site providing a required
 112 assignment. ^(Core)
 113
- 114 I.B.2.a) The PLA must:
 115
- 116 I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)
 117
- 118 I.B.2.a).(2) be approved by the designated institutional official
 119 (DIO). ^(Core)
 120
- 121 I.B.3. The program must monitor the clinical learning and working
 122 environment at all participating sites. ^(Core)
 123
- 124 I.B.3.a) At each participating site there must be one faculty member,
 125 designated by the program director as the site director, who
 126 is accountable for resident education at that site, in
 127 collaboration with the program director. ^(Core)
 128

Background and Intent: While all residency programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites the program must ensure the quality of the educational experience. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for residents

- Specifying the responsibilities for teaching, supervision, and formal evaluation of residents
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern resident education during the assignment

129
130
131
132
133
134
135
136
137
138
139
140
141
142
143
144
145
146

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all residents, of one month full time equivalent (FTE) or more through the ACGME’s Accreditation Data System (ADS). ^(Core)

I.B.5. Programs with multiple participating sites must ensure the provision of a cohesive educational experience. ^(Core)

I.B.6. Each participating site must offer meaningful educational opportunities that enrich the overall program. ^(Core)

I.C. The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents, fellows (if present), faculty members, senior administrative staff members, and other relevant members of its academic community. ^(Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

147
148
149
150
151
152
153
154
155

161
162
163
164
165
166
167

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for resident education. ^(Core)

I.D.1.a) The program must provide adequate space, necessary equipment, and modern facilities to ensure an effective educational experience for residents in all of the specialty/subspecialty rotations in diagnostic radiology. ^(Core)

I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote resident well-being and provide for: ^(Core)

I.D.2.a) access to food while on duty; ^(Core)

I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for residents with proximity appropriate for safe patient care; ^(Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that residents function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while residents are working. Residents should have access to refrigeration where food may be stored. Food should be available when residents are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued resident.

169
170
171
172
173

- I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; (Core)**

Background and Intent: Sites must provide private and clean locations where residents may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the resident with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the resident and the resident's family, as outlined in VI.C.1.d).(1).

174
175
176
177

- I.D.2.d) security and safety measures appropriate to the participating site; and, (Core)**

178
179
180

- I.D.2.e) accommodations for residents with disabilities consistent with the Sponsoring Institution's policy. (Core)**

181
182
183
184
185

- I.D.3. Residents must have ready access to specialty-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. (Core)**

186
187
188

- I.D.4. The program's educational and clinical resources must be adequate to support the number of residents appointed to the program. (Core)**

189
190
191
192

- I.D.5. The program must ensure a sufficient volume and variety of pediatric and adult patients for residents to gain experience in the full spectrum of radiological examinations, procedures, and interpretations. (Core)**

193
194
195
196

- I.D.5.a) The program must have at least 7,000 radiological examinations per year per resident in both the diagnostic radiology program and in the PGY-2-4 years of the integrated interventional radiology program, if applicable. (Core)**

197
198
199
200
201

- I.E. The presence of other learners and other care providers, including, but not limited to, residents from other programs, subspecialty fellows, and advanced practice providers, must enrich the appointed residents' education. (Core)**

202
203 I.E.1. The program must report circumstances when the presence of other
204 learners has interfered with the residents' education to the DIO and
205 Graduate Medical Education Committee (GMEC). ^(Core)
206

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that residents' education is not compromised by the presence of other providers and learners.

207
Specialty-Specific Background and Intent: In providing oversight of the clinical resources available to the residents, programs have a responsibility to ensure that the educational opportunities available to diagnostic radiology residents are not diluted or detracted by the presence of interventional radiology residents.

208
209 **II. Personnel**

210
211 **II.A. Program Director**

212
213 **II.A.1. There must be one faculty member appointed as program director**
214 **with authority and accountability for the overall program, including**
215 **compliance with all applicable program requirements.** ^(Core)
216

217 **II.A.1.a) The Sponsoring Institution's GMEC must approve a change in**
218 **program director.** ^(Core)
219

220 **II.A.1.b) Final approval of the program director resides with the**
221 **Review Committee.** ^(Core)
222

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a residency, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

223
224 **II.A.1.c) The program must demonstrate retention of the program**
225 **director for a length of time adequate to maintain continuity**
226 **of leadership and program stability.** ^(Core)
227

Background and Intent: The success of residency programs is generally enhanced by continuity in the program director position. The professional activities required of a program director are unique and complex and take time to master. All programs are encouraged to undertake succession planning to facilitate program stability when there is necessary turnover in the program director position.

228
229 **II.A.2. The program director and, as applicable, the program's leadership**
230 **team, must be provided with support adequate for administration of**
231 **the program based upon its size and configuration.** ^(Core)

232
233
234
235
236
237
238
239
240

II.A.2.a)

At a minimum, the program director must be provided with the dedicated time and support specified below for administration of the program. Additional support for program leadership must be provided as specified below. This additional support may be for the program director only or divided among the program director and one or more associate (or assistant) program directors. (Core)

Number of Approved Resident Positions	Minimum support required (percent time/FTE or number of hours) for the Program Director	Minimum Additional Support Required (FTE or Number of Hours) for Program Leadership in Aggregate
Eight to 10 residents	0.25	n/a
11 to 15	0.3	n/a
16 to 23	0.4	n/a
24 to 31	0.5	n/a
32 to 39		0.6
40 to 47		0.7
48 to 55		0.8
56 to 63		0.9
64 to 71		1.0
72 or more		1.1

241
242
243
244
245
246

II.A.2.b)

60-month programs: In addition to the support requirements outlined above, 60-month programs must be provided additional support for the administration and oversight of the clinical year as follows: (Core)

Number of Clinical Year Positions	Minimum Additional Program Leadership FTE
1-3 residents	0.10
4 or more residents	0.15

247
248
249
250
251

II.A.2.c)

There must be at least one associate/assistant program director for programs with resident complements of 32 or more.
(Core)

Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of residency programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of residents, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in resident education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the residency program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

252
253
254
255
256
257
258

II.A.3. Qualifications of the program director:

II.A.3.a) must include specialty expertise and at least three years of documented educational and/or administrative experience, or qualifications acceptable to the Review Committee; (Core)

Background and Intent: Leading a program requires knowledge and skills that are established during residency and subsequently further developed. The time period from completion of residency until assuming the role of program director allows the individual to cultivate leadership abilities while becoming professionally established. The three-year period is intended for the individual's professional maturation.

The broad allowance for educational and/or administrative experience recognizes that strong leaders arise through diverse pathways. These areas of expertise are important when identifying and appointing a program director. The choice of a program director should be informed by the mission of the program and the needs of the community.

In certain circumstances, the program and Sponsoring Institution may propose and the Review Committee may accept a candidate for program director who fulfills these goals but does not meet the three-year minimum.

259

Specialty-Specific Background and Intent: The Review Committee considers three years of educational and/or administrative experience an important quality for new program director candidates. Examples of educational and/or administrative experiences may include previous participation as an active faculty member in an ACGME-accredited or AOA-approved diagnostic radiology residency, interventional radiology residency, or vascular and interventional radiology fellowship program. In submitting a new program director request in ADS, the Review Committee will additionally request a letter of support from the DIO and a copy of the candidate's full CV for review.

260
261
262
263
264
265

II.A.3.b) must include current certification in the specialty for which they are the program director by the American Board of Radiology or by the American Osteopathic Board of Radiology, or specialty qualifications that are acceptable to the Review Committee; (Core)

266
267 II.A.3.b).(1) The Review Committee accepts only ABMS and AOA
268 certification as acceptable qualifications for program
269 director certification. ^(Core)
270

271 II.A.3.c) must include current medical licensure and appropriate
272 medical staff appointment; and, ^(Core)
273

274 II.A.3.d) must include ongoing clinical activity. ^(Core)
275

Background and Intent: A program director is a role model for faculty members and residents. The program director must participate in clinical activity consistent with the specialty. This activity will allow the program director to role model the Core Competencies for the faculty members and residents.

276
277 II.A.3.e) should include demonstration of an active practice in radiology.
278 ^(Core)
279

280 II.A.4. **Program Director Responsibilities**

281
282 The program director must have responsibility, authority, and
283 accountability for: administration and operations; teaching and
284 scholarly activity; resident recruitment and selection, evaluation,
285 and promotion of residents, and disciplinary action; supervision of
286 residents; and resident education in the context of patient care. ^(Core)
287

288 II.A.4.a) The program director must:

289
290 II.A.4.a).(1) be a role model of professionalism; ^(Core)
291

Background and Intent: The program director, as the leader of the program, must serve as a role model to residents in addition to fulfilling the technical aspects of the role. As residents are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

292
293 II.A.4.a).(2) design and conduct the program in a fashion
294 consistent with the needs of the community, the
295 mission(s) of the Sponsoring Institution, and the
296 mission(s) of the program; ^(Core)
297

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the

design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

298
299
300
301
302

II.A.4.a).(3) administer and maintain a learning environment conducive to educating the residents in each of the ACGME Competency domains; (Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Residency programs can be highly complex. In a complex organization, the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

303

Specialty-Specific Background and Intent: Due to the intricate relationship between the diagnostic radiology and interventional radiology program(s), routine collaboration between the leadership of these programs is essential in administering and maintaining a learning environment that ensures a cohesive educational experience for all diagnostic and interventional radiology residents.

304

II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the residency program education and at least annually thereafter, as outlined in V.B.; (Core)

305
306
307
308
309

II.A.4.a).(5) have the authority to approve program faculty members for participation in the residency program education at all sites; (Core)

310
311
312
313

II.A.4.a).(6) have the authority to remove program faculty members from participation in the residency program education at all sites; (Core)

314
315
316
317

II.A.4.a).(7) have the authority to remove residents from supervising interactions and/or learning environments that do not meet the standards of the program; (Core)

318
319
320
321

Background and Intent: The program director has the responsibility to ensure that all who educate residents effectively role model the Core Competencies. Working with a resident is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

322
323
324
325

II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; (Core)

- 326 **II.A.4.a).(9)** provide applicants who are offered an interview with
 327 information related to the applicant's eligibility for the
 328 relevant specialty board examination(s); ^(Core)
 329
- 330 **II.A.4.a).(10)** provide a learning and working environment in which
 331 residents have the opportunity to raise concerns and
 332 provide feedback in a confidential manner as
 333 appropriate, without fear of intimidation or retaliation;
 334 ^(Core)
 335
- 336 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring
 337 Institution's policies and procedures related to
 338 grievances and due process; ^(Core)
 339
- 340 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring
 341 Institution's policies and procedures for due process
 342 when action is taken to suspend or dismiss, not to
 343 promote, or not to renew the appointment of a
 344 resident; ^(Core)
 345

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and residents.

- 346
- 347 **II.A.4.a).(13)** ensure the program's compliance with the Sponsoring
 348 Institution's policies and procedures on employment
 349 and non-discrimination; ^(Core)
 350
- 351 **II.A.4.a).(13).(a)** Residents must not be required to sign a non-
 352 competition guarantee or restrictive covenant.
 353 ^(Core)
 354
- 355 **II.A.4.a).(14)** document verification of program completion for all
 356 graduating residents within 30 days; ^(Core)
 357
- 358 **II.A.4.a).(15)** provide verification of an individual resident's
 359 completion upon the resident's request, within 30
 360 days; and, ^(Core)
 361

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of residents who have previously completed the program. Residents who leave the program prior to completion also require timely documentation of their summative evaluation.

- 362
- 363 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
 364 Institution's DIO before submitting information or
 365 requests to the ACGME, as required in the Institutional
 366 Requirements and outlined in the ACGME Program

367 Director's Guide to the Common Program
368 Requirements. ^(Core)
369

370 **II.B. Faculty**
371

372 *Faculty members are a foundational element of graduate medical education*
373 *– faculty members teach residents how to care for patients. Faculty*
374 *members provide an important bridge allowing residents to grow and*
375 *become practice-ready, ensuring that patients receive the highest quality of*
376 *care. They are role models for future generations of physicians by*
377 *demonstrating compassion, commitment to excellence in teaching and*
378 *patient care, professionalism, and a dedication to lifelong learning. Faculty*
379 *members experience the pride and joy of fostering the growth and*
380 *development of future colleagues. The care they provide is enhanced by*
381 *the opportunity to teach. By employing a scholarly approach to patient*
382 *care, faculty members, through the graduate medical education system,*
383 *improve the health of the individual and the population.*
384

385 *Faculty members ensure that patients receive the level of care expected*
386 *from a specialist in the field. They recognize and respond to the needs of*
387 *the patients, residents, community, and institution. Faculty members*
388 *provide appropriate levels of supervision to promote patient safety. Faculty*
389 *members create an effective learning environment by acting in a*
390 *professional manner and attending to the well-being of the residents and*
391 *themselves.*
392

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating residents. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.

393
394 **II.B.1. At each participating site, there must be a sufficient number of**
395 **faculty members with competence to instruct and supervise all**
396 **residents at that location. ^(Core)**
397

398 **II.B.1.a) There must be a minimum of one physician faculty member for**
399 **every resident in the program. ^(Core)**
400

401 **II.B.1.b) In addition to the practice domains, there should be designated**
402 **physician faculty members with expertise in and responsibility for**
403 **developing didactic content in the following educational content**
404 **areas:**
405

406 **II.B.1.b).(1) CT; ^(Core)**
407

408 **II.B.1.b).(2) MRI; ^(Core)**
409

410 **II.B.1.b).(3) radiography/fluoroscopy; and, ^(Core)**
411

412 **II.B.1.b).(4) ultrasonography. ^(Core)**
413

Specialty-Specific Background and Intent: Programs do not need to have additional faculty members to provide the didactic content for the educational content areas of CT, MRI, radiography/fluoroscopy, and ultrasonography. Any of the required eight core faculty members with additional expertise in any of the educational content areas may also provide education in these areas to fulfill this requirement and develop the didactic content for the related area.

- 414
415 II.B.1.c) There should be physician faculty, non-physician faculty, or other
416 staff members available to the program, within the institution, with
417 expertise in quality, safety, and informatics. (Core)
418
419 II.B.1.c).(1) These faculty or staff members should develop didactic
420 content related to their area of expertise. (Core)
421

Specialty-Specific Background and Intent: The faculty or staff members who fulfill the roles for expertise in quality, safety, and informatics are not required to have formal certification in their respective area(s) of expertise. It is not the Committee's expectation that there be dedicated staff members for each area of expertise. For example, programs may have an information technology staff member or administrator with relevant expertise in informatics, and this would satisfy the requirement as long as the individual was available to the program to dedicate the time to develop the necessary didactic content related to the area of expertise. The Committee's expectation is that there be some resident education in each area.

- 422
423 **II.B.2. Faculty members must:**
424
425 **II.B.2.a) be role models of professionalism;** (Core)
426
427 **II.B.2.b) demonstrate commitment to the delivery of safe, quality,**
428 **cost-effective, patient-centered care;** (Core)
429

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

- 430
431 **II.B.2.c) demonstrate a strong interest in the education of residents;**
432 **(Core)**
433
434 **II.B.2.d) devote sufficient time to the educational program to fulfill**
435 **their supervisory and teaching responsibilities;** (Core)
436
437 **II.B.2.e) administer and maintain an educational environment**
438 **conducive to educating residents;** (Core)
439
440 **II.B.2.f) regularly participate in organized clinical discussions,**
441 **rounds, journal clubs, and conferences; and,** (Core)
442
443 **II.B.2.g) pursue faculty development designed to enhance their skills**
444 **at least annually;** (Core)

445

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the residency program faculty in the aggregate.

446
447
448
449
450
451
452
453
454
455
456

- II.B.2.g).(1) as educators; ^(Core)
- II.B.2.g).(2) in quality improvement and patient safety; ^(Core)
- II.B.2.g).(3) in fostering their own and their residents' well-being; and, ^(Core)
- II.B.2.g).(4) in patient care based on their practice-based learning and improvement efforts. ^(Core)

Background and Intent: Practice-based learning serves as the foundation for the practice of medicine. Through a systematic analysis of one's practice and review of the literature, one is able to make adjustments that improve patient outcomes and care. Thoughtful consideration to practice-based analysis improves quality of care, as well as patient safety. This allows faculty members to serve as role models for residents in practice-based learning.

481

- II.B.2.h) Faculty members must review all resident-interpreted studies. ^(Core)
- II.B.2.h).(1) Faculty members should sign and verify these reports within 24 hours. ^(Detail)
- II.B.2.i) Faculty members must always be available when residents are on call after hours, on weekends, or on holidays. ^(Core)
- II.B.2.j) Faculty members representing each practice domain must be responsible for the educational content of his or her respective practice domain, and must organize conferences that cover topics in that domain. ^(Core)
- II.B.2.k) Faculty members representing each practice domain must not have primary responsibility for the educational content of more than one practice domain, but may have clinical responsibilities and/or teaching responsibilities in multiple practice domains. ^(Core)
- II.B.2.l) Faculty members representing each practice domain must devote at least 0.50 percent FTE in their practice domain. ^(Core)
- II.B.2.m) Faculty members responsible for the educational content of his/her respective practice domain must demonstrate a commitment to his or her respective practice domain. ^(Core)

- 482
483 II.B.2.m).(1) Such commitment should be demonstrated by any two of
484 the following: ^(Core)
485
486 II.B.2.m).(1).(a) specialty/subspecialty certification in the practice
487 domain, fellowship training, or three years of
488 practice in the domain; ^(Core)
489
490 II.B.2.m).(1).(b) active participation in specialty/subspecialty
491 societies, including CME activities in the practice
492 domain; ^(Core)
493
494 II.B.2.m).(1).(c) publications or presentations in the
495 specialty/subspecialty practice domain; or, ^(Core)
496
497 II.B.2.m).(1).(d) participation in Maintenance of Certification with
498 emphasis on the specialty/subspecialty practice
499 domain. ^(Core)
500
501 **II.B.3. Faculty Qualifications**
502
503 **II.B.3.a) Faculty members must have appropriate qualifications in**
504 **their field and hold appropriate institutional appointments.**
505 ^(Core)
506
507 **II.B.3.b) Physician faculty members must:**
508
509 **II.B.3.b).(1) have current certification in the specialty by the**
510 **American Board of Radiology or the American**
511 **Osteopathic Board of Radiology, or possess**
512 **qualifications judged acceptable to the Review**
513 **Committee.** ^(Core)
514
515 **II.B.3.b).(2) Other faculty qualifications acceptable to the Review**
516 **Committee include certification by other American Board of**
517 **Medical Specialties (ABMS) member boards, or other**
518 **American Osteopathic Association (AOA) certifying boards.**
519 ^(Core)
520
521 **II.B.3.c) Any non-physician faculty members who participate in**
522 **residency program education must be approved by the**
523 **program director.** ^(Core)
524

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of residents by non-physician educators enables the resident to better manage patient care and provides valuable advancement of the residents' knowledge. Furthermore, other individuals contribute to the education of the resident in the basic science of the specialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the residents, the program director may designate the individual as a program faculty member or a program core faculty member.

530
531
532
533

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of residents and must devote a significant portion of their entire effort to resident education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to residents. ^(Core)

Background and Intent: Core faculty members are critical to the success of resident education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring residents, and assessing residents' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of residents, and also participate in non-clinical activities related to resident education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting resident applicants, providing didactic instruction, mentoring residents, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

552
553
554
555
556
557
558
559

II.B.4.a) Core faculty members must be designated by the program director. ^(Core)

II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. ^(Core)

II.B.4.c) There must be at least eight core physician faculty members to represent each of the following practice domains: ^(Core)

II.B.4.c).(1) abdominal (gastrointestinal and genitourinary) radiology; ^(Core)

II.B.4.c).(2) breast radiology; ^(Core)

II.B.4.c).(3) cardiothoracic (cardiac and thoracic) radiology; ^(Core)

II.B.4.c).(4) interventional radiology; ^(Core)

II.B.4.c).(5) musculoskeletal radiology; ^(Core)

II.B.4.c).(6) neuroradiology; ^(Core)

II.B.4.c).(7) nuclear radiology and molecular imaging; and, ^(Core)

II.B.4.c).(8) pediatric radiology. ^(Core)

560

Specialty-Specific Background and Intent: A pediatric radiologist may have a primary appointment at another site and still be the designated faculty member supervising pediatric radiologic education for the program.

561

II.C. Program Coordinator

562

563

564

II.C.1. There must be a program coordinator. (Core)

565

566

II.C.2. The program coordinator must be provided with dedicated time and support adequate for administration of the program based upon its size and configuration. (Core)

567

568

569

II.C.2.a) At a minimum, the program coordinator must be provided with the dedicated time and support specified below for administration of the program: (Core)

570

571

572

573

Number of Approved Resident Positions	Minimum FTE
Eight to 10	0.7
11 to 15	0.8
16 to 20	0.9
21 to 25	1.0
26 to 30	1.10
31 to 35	1.20
36 to 40	1.30
41 to 45	1.40
46 to 50	1.50
51 to 55	1.60
56 to 60	1.70
61 to 65	1.80
66 to 70	1.90
71 or more	2.0

574

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators

assist the program director in meeting accreditation requirements, educational programming, and support of residents.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer residents may not require a full-time coordinator; one coordinator may support more than one program.

575
576
577
578
579
580
581

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

III. Resident Appointments

III.A. Eligibility Requirements

III.A.1. An applicant must meet one of the following qualifications to be eligible for appointment to an ACGME-accredited program: ^(Core)

III.A.1.a) graduation from a medical school in the United States or Canada, accredited by the Liaison Committee on Medical Education (LCME) or graduation from a college of osteopathic medicine in the United States, accredited by the American Osteopathic Association Commission on Osteopathic College Accreditation (AOACOCA); or, ^(Core)

III.A.1.b) graduation from a medical school outside of the United States or Canada, and meeting one of the following additional qualifications: ^(Core)

III.A.1.b).(1) holding a currently valid certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) prior to appointment; or, ^(Core)

III.A.1.b).(2) holding a full and unrestricted license to practice medicine in the United States licensing jurisdiction in which the ACGME-accredited program is located. ^(Core)

III.A.2. All prerequisite post-graduate clinical education required for initial entry or transfer into ACGME-accredited residency programs must be completed in ACGME-accredited residency programs, AOA-approved residency programs, Royal College of Physicians and

613 **Surgeons of Canada (RCPSC)-accredited or College of Family**
614 **Physicians of Canada (CFPC)-accredited residency programs**
615 **located in Canada, or in residency programs with ACGME**
616 **International (ACGME-I) Advanced Specialty Accreditation.** ^(Core)
617

618 **III.A.2.a) Residency programs must receive verification of each**
619 **resident’s level of competency in the required clinical field**
620 **using ACGME, CanMEDS, or ACGME-I Milestones evaluations**
621 **from the prior training program upon matriculation.** ^(Core)
622

Background and Intent: Programs with ACGME-I Foundational Accreditation or from institutions with ACGME-I accreditation do not qualify unless the program has also achieved ACGME-I Advanced Specialty Accreditation. To ensure entrants into ACGME-accredited programs from ACGME-I programs have attained the prerequisite milestones for this training, they must be from programs that have ACGME-I Advanced Specialty Accreditation.

623
624 **III.A.2.b) To be eligible for appointment to the 48-month program, residents**
625 **must have successfully completed a prerequisite year of direct**
626 **patient care in a program that satisfies the requirements in III.A.2.**
627 **in anesthesiology, emergency medicine, family medicine, internal**
628 **medicine, neurology, obstetrics and gynecology, pediatrics,**
629 **surgery or a surgical specialty, a transitional year, or any**
630 **combination of these.** ^(Core)
631

632 **III.A.2.b).(1).(a) The prerequisite year must include a minimum of**
633 **36 weeks in direct patient care.** ^(Core)
634

635 **III.A.2.b).(1).(b) During the prerequisite year, elective rotations in**
636 **diagnostic radiology, interventional radiology, or**
637 **nuclear medicine must only occur in radiology**
638 **departments with a diagnostic radiology,**
639 **interventional radiology, or nuclear medicine**
640 **residency program that satisfies the requirements**
641 **in III.A.2., and must not exceed a combined total of**
642 **two months.** ^(Core)
643

644 **III.A.2.b).(1).(b).(i) The elective rotations in radiology should**
645 **involve active resident participation and**
646 **must not be observational only.** ^(Detail)
647

648 **III.A.2.b).(1).(b).(ii) The elective rotations in radiology should be**
649 **supervised by a radiology program faculty**
650 **member.** ^(Detail)
651

Specialty-Specific Background and Intent: When considering whether to count a resident’s participation in elective rotations in interventional radiology, diagnostic radiology, or nuclear medicine taken during the resident’s prerequisite clinical year in radiology departments without an accredited diagnostic radiology, interventional radiology, or nuclear medicine program, it is up to the receiving diagnostic radiology program director to determine whether

the elective experience will count toward the resident's required 12 months of diagnostic radiology education for call responsibilities or interpreting exams without direct supervision.

- III.A.3.** **A physician who has completed a residency program that was not accredited by ACGME, AOA, RCPSC, CFPC, or ACGME-I (with Advanced Specialty Accreditation) may enter an ACGME-accredited residency program in the same specialty at the PGY-1 level and, at the discretion of the program director of the ACGME-accredited program and with approval by the GMEC, may be advanced to the PGY-2 level based on ACGME Milestones evaluations at the ACGME-accredited program. This provision applies only to entry into residency in those specialties for which an initial clinical year is not required for entry. ^(Core)**
- III.B.** **The program director must not appoint more residents than approved by the Review Committee. ^(Core)**
- III.B.1.** **All complement increases must be approved by the Review Committee. ^(Core)**
- III.B.2.** **The program must appoint a minimum of eight residents. ^(Core)**
- III.C.** **Resident Transfers**
- The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring resident, and Milestones evaluations upon matriculation. ^(Core)**
- III.C.1.** **The program director must conduct a Milestones assessment of a resident's clinical competence within three months of transfer into the program. ^(Core)**
- III.C.2.** **Resident transfers from ACGME-accredited integrated interventional radiology programs into diagnostic radiology programs must be limited to transfers within the same Sponsoring Institution and must meet the following qualifications for transfer: ^(Core)**
- III.C.2.a)** **Transfers into the PGY-3 or PGY-4 level must be from the equivalent level in the integrated interventional radiology program. ^(Core)**
- III.C.2.b)** **Residents transferring into the PGY-5 level must have taken or be eligible to take the ABR Core Examination or the AOBR Combined Physics and Diagnostic Imaging Examination. ^(Core)**
- IV. Educational Program**
- The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.***

701
702 ***The educational program must support the development of knowledgeable, skillful***
703 ***physicians who provide compassionate care.***

704
705 ***In addition, the program is expected to define its specific program aims consistent***
706 ***with the overall mission of its Sponsoring Institution, the needs of the community***
707 ***it serves and that its graduates will serve, and the distinctive capabilities of***
708 ***physicians it intends to graduate. While programs must demonstrate substantial***
709 ***compliance with the Common and specialty-specific Program Requirements, it is***
710 ***recognized that within this framework, programs may place different emphasis on***
711 ***research, leadership, public health, etc. It is expected that the program aims will***
712 ***reflect the nuanced program-specific goals for it and its graduates; for example, it***
713 ***is expected that a program aiming to prepare physician-scientists will have a***
714 ***different curriculum from one focusing on community health.***

715
716 **IV.A. The curriculum must contain the following educational components: (Core)**

717
718 **IV.A.1. a set of program aims consistent with the Sponsoring Institution’s**
719 **mission, the needs of the community it serves, and the desired**
720 **distinctive capabilities of its graduates; (Core)**

721
722 **IV.A.1.a) The program’s aims must be made available to program**
723 **applicants, residents, and faculty members. (Core)**

724
725 **IV.A.2. competency-based goals and objectives for each educational**
726 **experience designed to promote progress on a trajectory to**
727 **autonomous practice. These must be distributed, reviewed, and**
728 **available to residents and faculty members; (Core)**

729
Background and Intent: The trajectory to autonomous practice is documented by Milestones evaluation. The Milestones detail the progress of a resident in attaining skill in each competency domain. They are developed by each specialty group and allow evaluation based on observable behaviors. Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific resident.

730
731 **IV.A.3. delineation of resident responsibilities for patient care, progressive**
732 **responsibility for patient management, and graded supervision; (Core)**

733
Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

734
735 **IV.A.4. a broad range of structured didactic activities; (Core)**

736
737 **IV.A.4.a) Residents must be provided with protected time to participate**
738 **in core didactic activities. (Core)**

739

Background and Intent: It is intended that residents will participate in structured didactic activities. It is recognized that there may be circumstances in which this is not possible. Programs should define core didactic activities for which time is protected and the circumstances in which residents may be excused from these didactic activities. Didactic activities may include, but are not limited to, lectures, conferences, courses, labs, asynchronous learning, simulations, drills, case discussions, grand rounds, didactic teaching, and education in critical appraisal of medical evidence.

740

741

IV.A.5. advancement of residents' knowledge of ethical principles foundational to medical professionalism; and, ^(Core)

742

743

744

IV.A.6. advancement in the residents' knowledge of the basic principles of scientific inquiry, including how research is designed, conducted, evaluated, explained to patients, and applied to patient care. ^(Core)

745

746

747

748

IV.B. ACGME Competencies

749

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each specialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each specialty.

750

751

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: ^(Core)

752

753

754

IV.B.1.a) Professionalism

755

756

Residents must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

757

758

759

IV.B.1.a).(1) Residents must demonstrate competence in:

760

761

IV.B.1.a).(1).(a) compassion, integrity, and respect for others; ^(Core)

762

763

764

IV.B.1.a).(1).(b) responsiveness to patient needs that supersedes self-interest; ^(Core)

765

766

Background and Intent: This includes the recognition that under certain circumstances, the interests of the patient may be best served by transitioning care to another provider. Examples include fatigue, conflict or duality of interest, not connecting well with a patient, or when another physician would be better for the situation based on skill set or knowledge base.

767

768

IV.B.1.a).(1).(c) respect for patient privacy and autonomy; ^(Core)

769

- 770 **IV.B.1.a).(1).(d)** **accountability to patients, society, and the**
771 **profession;** (Core)
- 772
- 773 **IV.B.1.a).(1).(e)** **respect and responsiveness to diverse patient**
774 **populations, including but not limited to**
775 **diversity in gender, age, culture, race, religion,**
776 **disabilities, national origin, socioeconomic**
777 **status, and sexual orientation;** (Core)
- 778
- 779 **IV.B.1.a).(1).(f)** **ability to recognize and develop a plan for one’s**
780 **own personal and professional well-being; and,**
781 (Core)
- 782
- 783 **IV.B.1.a).(1).(g)** **appropriately disclosing and addressing**
784 **conflict or duality of interest.** (Core)
- 785
- 786 **IV.B.1.b)** **Patient Care and Procedural Skills**
- 787

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]’s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs. 2008; 27(3):759-769.*) In addition, there should be a focus on improving the clinician’s well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

- 788
- 789 **IV.B.1.b).(1)** **Residents must be able to provide patient care that is**
790 **compassionate, appropriate, and effective for the**
791 **treatment of health problems and the promotion of**
792 **health.** (Core)
- 793
- 794 **IV.B.1.b).(1).(a)** **Residents should demonstrate competent patient**
795 **care through safe, efficient, appropriately utilized,**
796 **quality-controlled diagnostic and/or interventional**
797 **radiological techniques.** (Core)
- 798
- 799 **IV.B.1.b).(1).(b)** **Residents in 60-month programs must demonstrate**
800 **competence in fundamental clinical skills of**
801 **medicine, including:**
- 802
- 803 **IV.B.1.b).(1).(b).(i)** **obtaining a comprehensive medical history;**
804 (Core)
- 805
- 806 **IV.B.1.b).(1).(b).(ii)** **performing a comprehensive physical**
807 **examination;** (Core)

808		
809	IV.B.1.b).(1).(b).(iii)	assessing a patient’s medical conditions; (Core)
810		
811		
812	IV.B.1.b).(1).(b).(iv)	making appropriate use of diagnostic studies and tests; (Core)
813		
814		
815	IV.B.1.b).(1).(b).(v)	integrating information to develop a differential diagnosis; and, (Core)
816		
817		
818	IV.B.1.b).(1).(b).(vi)	implementing a treatment plan. (Core)
819		
820	IV.B.1.b).(2)	Residents must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. (Core)
821		
822		
823		
824	IV.B.1.b).(2).(a)	Residents must demonstrate competence in the:
825		
826	IV.B.1.b).(2).(a).(i)	performance of basic image-guided procedures; (Core)
827		
828		
829	IV.B.1.b).(2).(a).(ii)	interpretation of CT, MRI, radiography, and radionuclide imaging of the cardiovascular system (heart and great vessels); (Core)
830		
831		
832		
833	IV.B.1.b).(2).(a).(iii)	generation of ultrasound images using the transducer and imaging system, and interpretation of ultrasonographic examinations of various types; (Core)
834		
835		
836		
837		
838	IV.B.1.b).(2).(a).(iii).(a)	Residents should have sufficient hands-on scanning experience. (Core)
839		
840		
841	IV.B.1.b).(2).(a).(iii).(a).(i)	This should include the performance of 75 hands-on scans. (Core)
842		
843		
844		
845	IV.B.1.b).(2).(a).(iii).(b)	Programs should incorporate a process to document resident proficiency of ultrasonographic skills. (Core)
846		
847		
848		
849		

Specialty-Specific Background and Intent: The Review Committee has defined “sufficient” hands-on ultrasound scanning experience to mean that residents are to experience the basic aspects of ultrasound such as ultrasound physics, knobology, image generation, and interpretation. Examples of the types of routine ultrasound examinations that could provide these experiences include, but are not limited to, abdominal ultrasound, obstetrical/gynecological ultrasound, pediatric ultrasound, musculoskeletal ultrasound, vascular ultrasound, and breast ultrasound. Ultrasound-guided interventional procedures are also acceptable.

850

851 IV.B.1.b).(2).(a).(iv) management of contrast reactions; and,
852 (Core)
853
854 IV.B.1.b).(2).(a).(v) ongoing awareness of radiation exposure,
855 protection, and safety, and the application of
856 these principles in practice. (Core)
857

858 **IV.B.1.c) Medical Knowledge**

859
860 **Residents must demonstrate knowledge of established and**
861 **evolving biomedical, clinical, epidemiological and social-**
862 **behavioral sciences, as well as the application of this**
863 **knowledge to patient care. (Core)**
864

865 IV.B.1.c).(1) Residents must demonstrate knowledge of:

866
867 IV.B.1.c).(1).(a) the principles of medical imaging physics, including
868 CT, dual-energy X-ray absorptiometry, fluoroscopy,
869 gamma camera and hybrid imaging technologies,
870 MRI, radiography, and ultrasonography; (Core)
871

872 IV.B.1.c).(1).(b) non-interpretive skills, including health care
873 economics, coding and billing compliance, and the
874 business of medicine; (Core)
875

876 IV.B.1.c).(1).(c) appropriate and patient-centered imaging
877 utilization; (Core)
878

879 IV.B.1.c).(1).(d) quality improvement techniques; (Core)

880
881 IV.B.1.c).(1).(e) radiologic/pathologic correlation; and, (Core)
882

883 IV.B.1.c).(1).(f) physiology, utilization, and safety of contrast agents
884 and pharmaceuticals. (Core)
885

886 **IV.B.1.d) Practice-based Learning and Improvement**

887
888 **Residents must demonstrate the ability to investigate and**
889 **evaluate their care of patients, to appraise and assimilate**
890 **scientific evidence, and to continuously improve patient care**
891 **based on constant self-evaluation and lifelong learning. (Core)**
892

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a physician develop the habits of mind required to continuously pursue quality improvement, well past the completion of residency.

893		
894	IV.B.1.d).(1)	Residents must demonstrate competence in:
895		
896	IV.B.1.d).(1).(a)	identifying strengths, deficiencies, and limits in one’s knowledge and expertise; ^(Core)
897		
898		
899	IV.B.1.d).(1).(b)	setting learning and improvement goals; ^(Core)
900		
901	IV.B.1.d).(1).(c)	identifying and performing appropriate learning activities; ^(Core)
902		
903		
904	IV.B.1.d).(1).(d)	systematically analyzing practice using quality improvement methods, and implementing changes with the goal of practice improvement; ^(Core)
905		
906		
907		
908		
909	IV.B.1.d).(1).(e)	incorporating feedback and formative evaluation into daily practice; ^(Core)
910		
911		
912	IV.B.1.d).(1).(f)	locating, appraising, and assimilating evidence from scientific studies related to their patients’ health problems; and, ^(Core)
913		
914		
915		
916	IV.B.1.d).(1).(g)	using information technology to optimize learning. ^(Core)
917		
918		
919	IV.B.1.e)	Interpersonal and Communication Skills
920		
921		Residents must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. ^(Core)
922		
923		
924		
925		
926	IV.B.1.e).(1)	Residents must demonstrate competence in:
927		
928	IV.B.1.e).(1).(a)	communicating effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds; ^(Core)
929		
930		
931		
932		
933	IV.B.1.e).(1).(a).(i)	Residents must demonstrate competence in obtaining informed consent and effectively describing imaging appropriateness, safety issues, and the results of diagnostic imaging and procedures to patients. ^(Core)
934		
935		
936		
937		
938		
939	IV.B.1.e).(1).(b)	communicating effectively with physicians, other health professionals, and health-related agencies; ^(Core)
940		
941		
942		
943	IV.B.1.e).(1).(b).(i)	Residents must demonstrate competence in

- 944 communicating the results of examinations
 945 and procedures to the referring provider
 946 and/or other appropriate individuals
 947 effectively and in a timely manner. ^(Core)
 948
- 949 **IV.B.1.e).(1).(c)** **working effectively as a member or leader of a**
 950 **health care team or other professional group;**
 951 ^(Core)
 952
- 953 **IV.B.1.e).(1).(d)** **educating patients, families, students,**
 954 **residents, and other health professionals;** ^(Core)
 955
- 956 **IV.B.1.e).(1).(e)** **acting in a consultative role to other physicians**
 957 **and health professionals;** ^(Core)
 958
- 959 **IV.B.1.e).(1).(f)** **maintaining comprehensive, timely, and legible**
 960 **medical records, if applicable; and,** ^(Core)
 961
- 962 **IV.B.1.e).(1).(g)** **supervising, providing consultation to, and teaching**
 963 **medical students and/or residents.** ^(Core)
 964
- 965 **IV.B.1.e).(2)** **Residents must learn to communicate with patients**
 966 **and families to partner with them to assess their care**
 967 **goals, including, when appropriate, end-of-life goals.**
 968 ^(Core)
 969

Background and Intent: When there are no more medications or interventions that can achieve a patient’s goals or provide meaningful improvements in quality or length of life, a discussion about the patient’s goals, values, and choices surrounding the end of life is one of the most important conversations that can occur. Residents must learn to participate effectively and compassionately in these meaningful human interactions, for the sake of their patients and themselves.

Programs may teach this skill through direct clinical experience, simulation, or other means of active learning.

- 970
- 971 **IV.B.1.f)** **Systems-based Practice**
 972
- 973 **Residents must demonstrate an awareness of and**
 974 **responsiveness to the larger context and system of health**
 975 **care, including the social determinants of health, as well as**
 976 **the ability to call effectively on other resources to provide**
 977 **optimal health care.** ^(Core)
 978
- 979 **IV.B.1.f).(1)** **Residents must demonstrate competence in:**
 980
- 981 **IV.B.1.f).(1).(a)** **working effectively in various health care**
 982 **delivery settings and systems relevant to their**
 983 **clinical specialty;** ^(Core)
 984

Background and Intent: Medical practice occurs in the context of an increasingly complex clinical care environment where optimal patient care requires attention to compliance with external and internal administrative and regulatory requirements.

985
986
987
988
989

IV.B.1.f).(1).(b) coordinating patient care across the health care continuum and beyond as relevant to their clinical specialty; ^(Core)

Background and Intent: Every patient deserves to be treated as a whole person. Therefore it is recognized that any one component of the health care system does not meet the totality of the patient's needs. An appropriate transition plan requires coordination and forethought by an interdisciplinary team. The patient benefits from proper care and the system benefits from proper use of resources.

1016
1017
1018
1019
1020
1021
1022
1023
1024
1025
1026
1027

IV.B.1.f).(1).(c) advocating for quality patient care and optimal patient care systems; ^(Core)

IV.B.1.f).(1).(d) working in interprofessional teams to enhance patient safety and improve patient care quality; ^(Core)

IV.B.1.f).(1).(e) participating in identifying system errors and implementing potential systems solutions; ^(Core)

IV.B.1.f).(1).(f) incorporating considerations of value, cost awareness, delivery and payment, and risk-benefit analysis in patient and/or population-based care as appropriate; ^(Core)

IV.B.1.f).(1).(g) understanding health care finances and its impact on individual patients' health decisions; and, ^(Core)

IV.B.1.f).(1).(h) compliance with institutional and departmental policies, such as HIPAA, the Joint Commission, patient safety, and infection control. ^(Core)

IV.B.1.f).(2) Residents must learn to advocate for patients within the health care system to achieve the patient's and family's care goals, including, when appropriate, end-of-life goals. ^(Core)

IV.C. Curriculum Organization and Resident Experiences

IV.C.1. The curriculum must be structured to optimize resident educational experiences, the length of these experiences, and supervisory continuity. ^(Core)

IV.C.1.a) The assignment of educational experiences should be structured to minimize the frequency of transitions. ^(Detail)

1028 IV.C.1.b) Educational experiences should be of sufficient length to provide a
1029 quality educational experience defined by ongoing supervision,
1030 longitudinal relationships with faculty members, and high-quality
1031 assessment and feedback. ^(Detail)
1032

Background and Intent: In some specialties, frequent rotational transitions, inadequate continuity of faculty member supervision, and dispersed patient locations within the hospital have adversely affected optimal resident education and effective team-based care. The need for patient care continuity varies from specialty to specialty and by clinical situation, and may be addressed by the individual Review Committee.

1033
1034 **IV.C.2. The program must provide instruction and experience in pain**
1035 **management if applicable for the specialty, including recognition of**
1036 **the signs of addiction.** ^(Core)
1037

1038 IV.C.3. Didactics

1039 IV.C.3.a) The core didactic curriculum:

1040 IV.C.3.a).(1) must be repeated at least every two years; ^(Core)
1041
1042
1043

Specialty-Specific Background and Intent: While the core didactic curriculum must be repeated every two years at a minimum, programs are encouraged to repeat the didactic curriculum on a 1.5-year cycle so that residents can be exposed to all essential topics twice before the ABR Core Examination or the AOBR Combined Physics and Diagnostic Imaging written exam.

1044
1045 IV.C.3.a).(2) must provide at least five hours per week of didactic
1046 activities; ^(Core)
1047

1048 IV.C.3.a).(3) must include interactive conferences; ^(Core)
1049

1050 IV.C.3.a).(4) must be documented; and, ^(Core)
1051

1052 IV.C.3.a).(5) should include interdisciplinary conferences in which both
1053 residents and faculty members participate on a regular
1054 basis. ^(Core)
1055

Specialty-Specific Background and Intent: Interdisciplinary conferences include any clinical or didactic conferences at which representation from multiple clinical specialties is present. Examples include an oncology conference with representation from the medical, surgical, and/or radiation oncology departments, or a peripheral vascular conference with representation from the vascular surgery and/or cardiology departments.

1056
1057 IV.C.3.b) Residents must be provided protected time to attend didactic
1058 activities scheduled by the program. ^(Core)
1059

1060 IV.C.3.c) The program must provide mechanisms for residents to participate
1061 in all scheduled didactic activities either in-person or by electronic

1062		means. (Core)
1063		
1064	IV.C.3.d)	The program should document resident participation in didactic activities for all 48 months of the educational program. (Detail)
1065		
1066		
1067	IV.C.3.e)	The didactic curriculum must include:
1068		
1069	IV.C.3.e).(1)	anatomy, disease processes, imaging, and physiology; (Core)
1070		
1071		
1072	IV.C.3.e).(2)	specialty/subspecialty clinical and general content; (Core)
1073		
1074	IV.C.3.e).(3)	topics related to professionalism, physician well-being, diversity inclusion, and ethics; (Core)
1075		
1076		
1077	IV.C.3.e).(4)	training in the clinical application of medical physics, distributed throughout the 48 months of the educational program; and, (Core)
1078		
1079		
1080		
1081	IV.C.3.e).(4).(a)	A medical physicist must oversee the development of the physics curriculum. (Core)
1082		
1083		
1084	IV.C.3.e).(4).(b)	The curriculum should include real-time expert discussions and interactive educational experiences. (Core)
1085		
1086		
1087		
<p>Specialty-Specific Background and Intent: It is not the Committee's expectation that all physics education be delivered in person by a physicist faculty member or a physicist on site; this resource could be an area physicist at another site or program. Programs can share this resource and collaborate on the curriculum and lectures.</p> <p>Essentially, the physics didactic curriculum should not consist entirely of online-recorded lectures for the residents to review without real-time interaction. While programs are free to use alternative educational tools such as online modules, these tools should provide a real-time and interactive component that allows residents to engage with the lecturer.</p>		
1088		
1089	IV.C.3.f)	a minimum of 80 hours of classroom and laboratory training in basic radionuclide handling techniques applicable to the medical use of unsealed byproduct material for imaging and localization studies (10 CFR 35.290) and oral administration of sodium iodide I-131 for procedures requiring a written directive (10 CFR 35.392, 10 CFR 35.394). 1112		
1113	IV.C.4.a)	60-Month Programs
1114		
1115	IV.C.4.a).(1)	Programs using the 60-month format must provide a
1116		clinical experience during the first 12 months of the
1117		program, including: (Core)
1118		
1119	IV.C.4.a).(1).(a)	at least nine months of rotations designed to
1120		provide the fundamental clinical skills of medicine,
1121		which must include:
1122		
1123	IV.C.4.a).(1).(a).(i)	six months of inpatient care, which must
1124		include at least one month of critical care;
1125		(Core)
1126		
1127	IV.C.4.a).(1).(a).(ii)	one month of emergency medicine; and,
1128		(Core)
1129		
1130	IV.C.4.a).(1).(a).(iii)	two months of additional inpatient or
1131		outpatient care. (Core)
1132		
1133	IV.C.4.a).(1).(b)	the nine months of fundamental clinical skills of
1134		medicine, which should occur in the disciplines of
1135		anesthesiology, emergency medicine, family
1136		medicine, internal medicine or internal medicine
1137		subspecialties, neurology, obstetrics and
1138		gynecology, pediatrics, surgery or surgical
1139		specialties, or any combination of these. (Core)
1140		
1141	IV.C.4.a).(1).(c)	elective rotations in diagnostic radiology,
1142		interventional radiology, or nuclear medicine, which
1143		must only occur in radiology departments with a
1144		diagnostic radiology, interventional radiology, or
1145		nuclear medicine residency program accredited by
1146		the ACGME, AOA, RCPS, or College of Family
1147		Physicians of Canada, or in an ACGME
1148		International (ACGME-I)-accredited program with
1149		Advanced Specialty Accreditation. (Core)
1150		
1151	IV.C.4.a).(1).(c).(i)	These electives must not exceed a
1152		combined total of two months. (Core)
1153		

1154	IV.C.4.a).(1).(c).(ii)	The elective rotations in radiology should involve active resident participation and must not be observational only. ^(Core)
1155		
1156		
1157		
1158	IV.C.4.a).(1).(c).(iii)	The elective rotations in radiology should be supervised by a radiology program faculty member. ^(Detail)
1159		
1160		
1161		
1162	IV.C.4.a).(2)	The program director must maintain oversight of resident education in fundamental clinical skills of medicine. ^(Core)
1163		
1164		
1165	IV.C.4.b)	All Diagnostic Radiology Programs
1166		
1167	IV.C.4.b).(1)	The program and curriculum must demonstrate adherence to all guidelines for Early Specialization in Interventional Radiology (ESIR), if applicable. ^(Core)
1168		
1169		
1170		
1171	IV.C.4.b).(1).(a)	The ESIR curriculum must include:
1172		
1173	IV.C.4.b).(1).(a).(i)	at least 11 interventional radiology and interventional radiology-related rotations; and, ^(Core)
1174		
1175		
1176		
1177	IV.C.4.b).(1).(a).(i).(a)	Of these, at least eight rotations must take place in the interventional radiology section under the supervision of interventional radiology faculty members. ^(Core)
1178		
1179		
1180		
1181		
1182		
1183	IV.C.4.b).(1).(a).(ii)	one critical care rotation of at least four continuous weeks. ^(Core)
1184		
1185		
1186	IV.C.4.b).(1).(b)	ESIR residents must perform a minimum of 500 interventional radiology and/or interventional radiology-related patient procedural encounters. ^(Core)
1187		
1188		
1189		
1190		
1191	IV.C.4.b).(1).(c)	The program must provide residents with written verification of their successful completion of an ESIR curriculum and performance of 500 patient procedural encounters. ^(Core)
1192		
1193		
1194		
1195		
1196	IV.C.4.b).(2)	The program must demonstrate collaboration with the ACGME-accredited interventional radiology program(s), if applicable, to ensure a cohesive curriculum and educational experience for all diagnostic radiology and interventional radiology residents. ^(Core)
1197		
1198		
1199		
1200		
1201		
1202	IV.C.4.b).(3)	The duration of education in a single practice domain or in research must not exceed 16 months. ^(Core)
1203		
1204		

1205	IV.C.4.b).(4)	Each resident must complete a minimum of 12 weeks of clinical rotations in breast imaging. ^(Core)
1206		
1207		
1208	IV.C.4.b).(4).(a)	Each resident must interpret the minimum number of mammograms within the specified time period as designated by the U.S. Food and Drug Administration's (FDA) Mammography Quality Standards Act (MQSA) regulations. ^(Core)
1209		
1210		
1211		
1212		
1213		
1214	IV.C.4.b).(5)	Each resident must complete a minimum of 700 hours of training and work experience under the supervision of an authorized user (AU) in basic radionuclide handling techniques and radiation safety applicable to the medical use of unsealed byproduct material for imaging and localization studies (10 CFR 35.290) and oral administration of sodium iodide I-131 for procedures requiring a written directive (10 CFR 35.392, 10 CFR 35.394). ^(Core)
1215		
1216		
1217		
1218		
1219		
1220		
1221		
1222		
1223		

Specialty-Specific Background and Intent: According to Nuclear Regulatory Commission (NRC) Guidelines § 35.290 Training for imaging and localization studies, the NRC requires "700 hours of training and experience, including a minimum of 80 hours of classroom and laboratory training." Thus, there is the option to count the 80 hours of classroom and laboratory training toward the 700-hour total. In any case, the 80-hour requirement (IV.C.3.f) must be met, either in addition to the 700 hours (more than 700 hours total) or as part of the 700 hours.

1224		
1225	IV.C.4.b).(5).(a)	Supervised work experience, at a minimum, must involve all operational and quality control procedures integral to the practice of nuclear radiology, including but not limited to: ^(Core)

1281	IV.C.4.b).(5).(b).(vi)	determine release criteria; (Core)
1282		
1283	IV.C.4.b).(5).(b).(vii)	arrange patient follow-up; and, (Core)
1284		
1285	IV.C.4.b).(5).(b).(viii)	make pregnancy and breastfeeding
1286		recommendations. (Core)
1287		
1288	IV.C.5.	Resident Experiences
1289		
1290	IV.C.5.a)	Residents must not interpret examinations without direct
1291		supervision until they have completed at least 12 months of
1292		radiology rotations. (Core)
1293		
1294	IV.C.5.b)	Resident participation in on-call activities, including being on-duty
1295		after-hours and on weekends or holidays, should occur throughout
1296		PGY-3-5. (Core)
1297		
1298	IV.C.5.b).(1)	Resident competence must be assessed and documented
1299		prior to residents assuming independent responsibilities.

1300		(Core)
1301		
1302	IV.C.5.b).(2)	Resident supervision during on-call activities must be provided by a senior resident, fellow, or radiology faculty member. (Core)
1303		
1304		
1305		
1306	IV.C.5.b).(2).(a)	A radiology faculty member must be available to residents for direct or indirect supervision. (Core)
1307		
1308		
1309	IV.C.5.b).(3)	Resident on-call experiences must include interpretation, reporting, and management of active cases, and must not include administrative roles or duties consisting primarily of re-review of previously reported cases. (Core)
1310		
1311		
1312		
1313		
1314	IV.C.5.b).(4)	Relief from after-hours duty granted to residents, at the program director's discretion, must not exceed three months preceding the ABR Core Examination. (Core)
1315		
1316		
1317		
1318	IV.C.5.c)	<u>If residents, as an individuals or as a group, must not be are provided with protected study time for the ABR Core Examination or AOBR Combined Physics and Diagnostic Imaging Written Exam, the following must apply:-</u> (Core)
1319		
1320		
1321		
1322		
1323	IV.C.5.c).(1)	<u>the duration of protected study time must not exceed three months, starting three months prior to the examination and ending on the date of the examination;</u> (Core)
1324		
1325		
1326		
1327	IV.C.5.c).(2)	<u>protected study time must not exceed 20 hours per week during the work week, Monday through Friday;</u> (Core)
1328		
1329		
1330	IV.C.5.c).(3)	<u>if residents are relieved of on-call duty during this time, this relief must not exceed three months, beginning three months prior to the examination and ending on the date of the examination; and,</u> (Core)
1331		
1332		
1333		
1334		
1335	IV.C.5.c).(4)	<u>the allowance of independent study time must not adversely affect other radiology residents on the clinical services.</u> (Core)
1336		
1337		
1338		

Specialty-Specific Background and Intent: The Review Committee expects residents to be engaged in clinical (or research-related) work throughout all 48 or 60 months of the educational program. In preparation for the ABR Core examination or AOBR Combined Physics and Diagnostic Imaging Exam, prolonged resident absence from supervised and on-call clinical education beyond what is stated in the requirements above may adversely affect the quality of residency education and training. Faculty member-run examination review sessions or faculty member-directed conferences are acceptable study activities if the time away from clinical service for these activities does not adversely affect other radiology residents on the clinical services.

The Review Committee acknowledges that independent, unsupervised examination preparation is important for learning examination content not readily encountered in the

clinical learning environment. Further, the Committee acknowledges that protected independent study time immediately before the examination may serve to preserve residents' work-life balance and promote their well-being.

These requirements are meant to promote professionalism and fairness within, and between, residency programs. Programs may determine that the amount of independent study time appropriate for their residents is less than three months/20 hours per week. Protected study time is expected to be distributed fairly and equally among all residents in a given residency program who are preparing for the examination.

- 1339
1340 IV.C.5.d) Resident participation in patient care and radiology-related
1341 activities must occur throughout all 48 months of the program. (Core)
1342

Specialty-Specific Background and Intent: The Review Committee expects residents to be engaged in clinical (or research-related) work throughout all 60 months of residency. Examination preparation or other non-research-related activities that do not interfere with clinical training are permitted. Specifically, in preparation for the ABR Core Examination or AOBR Combined Physics and Diagnostic Imaging Exam, faculty member-run review sessions or faculty member-directed conferences are acceptable activities, if this time away from clinical service for these activities does not adversely affect other interventional radiology residents on the clinical services. ~~Residents' protected time away from clinical duties during normal workdays for independent or unsupervised examination preparation is not allowed.~~

- 1343
1344 IV.C.5.e) Residents must maintain current certification in advanced cardiac
1345 life-support (ACLS). (Core)
1346
1347 IV.C.5.f) Residents should have experience in sedation analgesia. (Detail)
1348
1349 IV.C.5.g) Resident procedural experiences must be tracked using the
1350 ACGME Case Log System, and must at least meet the procedural
1351 minimums as defined by the Review Committee. (Core)
1352
1353 IV.C.5.h) Residents must maintain a Resident Learning Portfolio, which
1354 must include, at a minimum, documentation of the following: (Core)
1355
1356 IV.C.5.h).(1) Patient Care
1357
1358 IV.C.5.h).(1).(a) participation in therapies involving oral
1359 administration of sodium iodide I-131, including the
1360 date, diagnosis, and dosage; (Core)
1361
1362 IV.C.5.h).(1).(b) interpretation/multi-reading of mammograms; (Core)
1363
1364 IV.C.5.h).(1).(c) participation in 75 hands-on ultrasonographic
1365 examinations of various types; and, (Core)
1366
1367 IV.C.5.h).(1).(d) performance of invasive procedures and any
1368 complications. (Core)
1369
1370 IV.C.5.h).(2) Medical Knowledge
1371

1372	IV.C.5.h).(2).(a)	conferences/courses/meetings attended, and self-
1373		assessment modules completed; and, ^(Core)
1374		
1375	IV.C.5.h).(2).(b)	performance on rotation-specific and/or annual
1376		objective examinations. ^(Core)
1377		
1378	IV.C.5.h).(3)	Practice-based Learning and Improvement
1379		
1380	IV.C.5.h).(3).(a)	evidence of a reflective process that must result in
1381		the annual documentation of an individual learning
1382		plan and self-assessment; and, ^(Core)
1383		
1384	IV.C.5.h).(3).(b)	scholarly activity, such as publications and/or
1385		presentations. ^(Core)
1386		
1387	IV.C.5.h).(4)	Interpersonal and Communication Skills
1388		
1389	IV.C.5.h).(4).(a)	formal documented assessment of oral and written
1390		communication. ^(Core)
1391		
1392	IV.C.5.h).(5)	Professionalism
1393		
1394		status of medical license, if appropriate. ^(Core)

1396	IV.C.5.h).(6)	Systems-Based Practice
1397		
1398	IV.C.5.h).(6).(a)	a learning activity that involves deriving a solution
1399		to a system problem at the departmental,
1400		institutional, local, regional, national, or
1401		international level; and, ^(Core)
1402		
1403	IV.C.5.h).(6).(b)	compliance with institutional and departmental
1404		policies including, but not limited to HIPAA, Joint
1405		Commission, patient safety, infection control, and
1406		dress code. ^(Core)
1407		

IV.D. Scholarship

Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an environment that fosters the acquisition of such skills through resident participation in scholarly activities. Scholarly activities may include discovery, integration, application, and teaching.

The ACGME recognizes the diversity of residencies and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on

1423 *quality improvement, population health, and/or teaching, while other*
1424 *programs might choose to utilize more classic forms of biomedical*
1425 *research as the focus for scholarship.*

1426
1427 **IV.D.1. Program Responsibilities**

1428
1429 **IV.D.1.a) The program must demonstrate evidence of scholarly**
1430 **activities consistent with its mission(s) and aims. (Core)**

1431
1432 **IV.D.1.b) The program, in partnership with its Sponsoring Institution,**
1433 **must allocate adequate resources to facilitate resident and**
1434 **faculty involvement in scholarly activities. (Core)**

1435
1436 **IV.D.1.c) The program must advance residents' knowledge and**
1437 **practice of the scholarly approach to evidence-based patient**
1438 **care. (Core)**

1439

Background and Intent: The scholarly approach can be defined as a synthesis of teaching, learning, and research with the aim of encouraging curiosity and critical thinking based on an understanding of physiology, pathophysiology, differential diagnosis, treatments, treatment alternatives, efficiency of care, and patient safety. While some faculty members are responsible for fulfilling the traditional elements of scholarship through research, integration, and teaching, all faculty members are responsible for advancing residents' scholarly approach to patient care.

Elements of a scholarly approach to patient care include:

- **Asking meaningful questions to stimulate residents to utilize learning resources to create a differential diagnosis, a diagnostic algorithm, and treatment plan**
- **Challenging the evidence that the residents use to reach their medical decisions so that they understand the benefits and limits of the medical literature**
- **When appropriate, dissemination of scholarly learning in a peer-reviewed manner (publication or presentation)**
- **Improving resident learning by encouraging them to teach using a scholarly approach**

The scholarly approach to patient care begins with curiosity, is grounded in the principles of evidence-based medicine, expands the knowledge base through dissemination, and develops the habits of lifelong learning by encouraging residents to be scholarly teachers.

1440
1441 **IV.D.2. Faculty Scholarly Activity**

1442
1443 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**
1444 **accomplishments in at least three of the following domains:**
1445 **(Core)**

- 1446
- **Research in basic science, education, translational science, patient care, or population health**
 - **Peer-reviewed grants**
 - **Quality improvement and/or patient safety initiatives**
- 1447
1448
1449
1450

- 1451 • **Systematic reviews, meta-analyses, review articles,**
- 1452 **chapters in medical textbooks, or case reports**
- 1453 • **Creation of curricula, evaluation tools, didactic**
- 1454 **educational activities, or electronic educational**
- 1455 **materials**
- 1456 • **Contribution to professional committees, educational**
- 1457 **organizations, or editorial boards**
- 1458 • **Innovations in education**

1460 **IV.D.2.b) The program must demonstrate dissemination of scholarly**
 1461 **activity within and external to the program by the following**
 1462 **methods:**
 1463

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the residents’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

1464
 1465 **IV.D.2.b).(1) faculty participation in grand rounds, posters,**
 1466 **workshops, quality improvement presentations,**
 1467 **podium presentations, grant leadership, non-peer-**
 1468 **reviewed print/electronic resources, articles or**
 1469 **publications, book chapters, textbooks, webinars,**
 1470 **service on professional committees, or serving as a**
 1471 **journal reviewer, journal editorial board member, or**
 1472 **editor; (Outcome)‡**
 1473

1474 **IV.D.2.b).(2) peer-reviewed publication. (Outcome)**

1476 **IV.D.3. Resident Scholarly Activity**

1478 **IV.D.3.a) Residents must participate in scholarship. (Core)**

1480 **IV.D.3.b) Residents must have training in critical thinking skills and research**
 1481 **design. (Core)**

1483 **IV.D.3.c) All residents must engage in a scholarly project under faculty**
 1484 **member supervision. (Core)**

1486 **IV.D.3.c).(1) The results of such projects must be published or**
 1487 **presented at institutional, local, regional, national, or**
 1488 **international meetings, and must be included in each**
 1489 **resident’s Learning Portfolio. (Outcome)**

1491 **IV.D.3.c).(2) The program should specify how each project will be**

1492 evaluated. ^(Detail)

1493
1494 IV.D.3.d) All graduating residents should have submitted at least one
1495 scholarly work to a national, regional, or local meeting, or for
1496 publication. ^(Core)

1497
1498 **V. Evaluation**

1499
1500 **V.A. Resident Evaluation**

1501
1502 **V.A.1. Feedback and Evaluation**

Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower residents to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring resident learning* and providing ongoing feedback that can be used by residents to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- residents identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where residents are struggling and address problems immediately

Summative evaluation is *evaluating a resident's learning* by comparing the residents against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when residents or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the residency program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a neophyte physician to one with growing expertise.

1504
1505 **V.A.1.a) Faculty members must directly observe, evaluate, and**
1506 **frequently provide feedback on resident performance during**
1507 **each rotation or similar educational assignment. ^(Core)**

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Residents require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for residents who have deficiencies that may result in a poor final rotation evaluation.

1508		
1509	V.A.1.b)	Evaluation must be documented at the completion of the assignment. ^(Core)
1510		
1511		
1512	V.A.1.b).(1)	For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)
1513		
1514		
1515		
1516	V.A.1.b).(2)	Longitudinal experiences, such as continuity clinic in the context of other clinical responsibilities, must be evaluated at least every three months and at completion. ^(Core)
1517		
1518		
1519		
1520		
1521	V.A.1.b).(3)	Written end-of-rotation evaluations by faculty members must be provided to residents within one month of completion of each rotation. ^(Core)
1522		
1523		
1524		
1525	V.A.1.c)	The program must provide an objective performance evaluation based on the Competencies and the specialty-specific Milestones, and must: ^(Core)
1526		
1527		
1528		
1529	V.A.1.c).(1)	use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, ^(Core)
1530		
1531		
1532		
1533	V.A.1.c).(2)	provide that information to the Clinical Competency Committee for its synthesis of progressive resident performance and improvement toward unsupervised practice. ^(Core)
1534		
1535		
1536		
1537		
1538	V.A.1.c).(3)	ensure that assessment for progressive resident responsibility or independence is based upon knowledge, skills, and experience; ^(Core)
1539		
1540		
1541		
1542	V.A.1.c).(4)	ensure that resident assessment includes: ^(Core)
1543		
1544	V.A.1.c).(4).(a)	global faculty evaluation (all Competencies); ^(Core)
1545		
1546	V.A.1.c).(4).(b)	multi-source evaluation (for interpersonal skills/communication and professionalism); ^(Core)
1547		
1548		
1549	V.A.1.c).(4).(c)	resident ability to take independent call; and, ^(Core)
1550		
1551	V.A.1.c).(4).(d)	review of the resident Learning Portfolio. ^(Core)
1552		
1553	V.A.1.d)	The program director or their designee, with input from the Clinical Competency Committee, must:
1554		
1555		
1556	V.A.1.d).(1)	meet with and review with each resident their documented semi-annual evaluation of performance,
1557		

1558		including progress along the specialty-specific Milestones; ^(Core)
1559		
1560		
1561	V.A.1.d).(2)	assist residents in developing individualized learning plans to capitalize on their strengths and identify areas for growth; and, ^(Core)
1562		
1563		
1564		
1565	V.A.1.d).(3)	develop plans for residents failing to progress, following institutional policies and procedures. ^(Core)
1566		
1567		
1568	V.A.1.d).(3).(a)	The program must have a clearly defined process for remediation of resident underperformance. ^(Core)
1569		
1570		
1571	V.A.1.d).(3).(a).(i)	The program should provide more frequent performance reviews of residents experiencing difficulties or receiving unfavorable evaluations. ^(Core)
1572		
1573		
1574		
1575		
1576	V.A.1.d).(3).(a).(ii)	When a resident fails to progress satisfactorily, the program should develop a written plan identifying the problems and addressing how they can be corrected, and then discuss this plan with the resident. ^(Core)
1577		
1578		
1579		
1580		
1581		
1582	V.A.1.d).(3).(a).(ii).(a)	This plan should be signed by the resident and placed in his or her individual file. ^(Core)
1583		
1584		
1585		

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a resident's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Residents should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, residents should develop an individualized learning plan.

Residents who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the resident, will take a variety of forms based on the specific learning needs of the resident. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of resident progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1586		
1587	V.A.1.e)	At least annually, there must be a summative evaluation of each resident that includes their readiness to progress to the next year of the program, if applicable. ^(Core)
1588		
1589		
1590		

- 1591 V.A.1.e).(1) This should include a review of the resident procedural
 1592 experiences to ensure complete and accurate tracking in
 1593 the ACGME Case Log System throughout the duration of
 1594 residency education. ^(Core)
 1595
- 1596 **V.A.1.f) The evaluations of a resident’s performance must be**
 1597 **accessible for review by the resident.** ^(Core)
 1598

 1607 **autonomous practice upon completion of the program.**
 1608 ^(Core)
 1609
- 1610 **V.A.2.a).(2) The final evaluation must:**
 1611
- 1612 **V.A.2.a).(2).(a) become part of the resident’s permanent record**
 1613 **maintained by the institution, and must be**
 1614 **accessible for review by the resident in**
 1615 **accordance with institutional policy;** ^(Core)
 1616
- 1617 **V.A.2.a).(2).(b) verify that the resident has demonstrated the**
 1618 **knowledge, skills, and behaviors necessary to**
 1619 **enter autonomous practice;** ^(Core)
 1620
- 1621 **V.A.2.a).(2).(c) consider recommendations from the Clinical**
 1622 **Competency Committee; and,** ^(Core)
 1623
- 1624 **V.A.2.a).(2).(d) be shared with the resident upon completion of**
 1625 **the program.** ^(Core)
 1626
- 1627 **V.A.3. A Clinical Competency Committee must be appointed by the**
 1628 **program director.** ^(Core)
 1629
- 1630 **V.A.3.a) At a minimum, the Clinical Competency Committee must**
 1631 **include three members of the program faculty, at least one of**
 1632 **whom is a core faculty member.** ^(Core)
 1633
- 1634 **V.A.3.a).(1) Additional members must be faculty members from**
 1635 **the same program or other programs, or other health**
 1636 **professionals who have extensive contact and**
 1637 **experience with the program’s residents.** ^(Core)
 1638

Background and Intent: The requirements regarding the Clinical Competency Committee do not preclude or limit a program director’s participation on the Clinical Competency Committee. The intent is to leave flexibility for each program to decide

the best structure for its own circumstances, but a program should consider: its program director's other roles as resident advocate, advisor, and confidante; the impact of the program director's presence on the other Clinical Competency Committee members' discussions and decisions; the size of the program faculty; and other program-relevant factors. The program director has final responsibility for resident evaluation and promotion decisions.

Program faculty may include more than the physician faculty members, such as other physicians and non-physicians who teach and evaluate the program's residents. There may be additional members of the Clinical Competency Committee. Chief residents who have completed core residency programs in their specialty may be members of the Clinical Competency Committee.

- V.A.3.b) The Clinical Competency Committee must:**
- V.A.3.b).(1) review all resident evaluations at least semi-annually;**
(Core)
 - V.A.3.b).(2) determine each resident's progress on achievement of the specialty-specific Milestones; and,** (Core)
 - V.A.3.b).(3) meet prior to the residents' semi-annual evaluations and advise the program director regarding each resident's progress.** (Core)
- V.B. Faculty Evaluation**
- V.B.1. The program must have a process to evaluate each faculty member's performance as it relates to the educational program at least annually.** (Core)

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term "faculty" may be applied to physicians within a given institution for other reasons, it is applied to residency program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the resident and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with residents desire feedback on their education, clinical care, and research. If a faculty member does not interact with residents, feedback is not required. With regard to the diverse operating environments and configurations, the residency program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the residents in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1658

- 1659 **V.B.1.a)** This evaluation must include a review of the faculty member’s
 1660 clinical teaching abilities, engagement with the educational
 1661 program, participation in faculty development related to their
 1662 skills as an educator, clinical performance, professionalism,
 1663 and scholarly activities. ^(Core)
 1664
- 1665 **V.B.1.b)** This evaluation must include written, anonymous, and
 1666 confidential evaluations by the residents. ^(Core)
 1667
- 1668 **V.B.2.** Faculty members must receive feedback on their evaluations at least
 1669 annually. ^(Core)
 1670
- 1671 **V.B.3.** Results of the faculty educational evaluations should be
 1672 incorporated into program-wide faculty development plans. ^(Core)
 1673

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the residents’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

- 1674
- 1675 **V.C. Program Evaluation and Improvement**
 1676
- 1677 **V.C.1.** The program director must appoint the Program Evaluation
 1678 Committee to conduct and document the Annual Program
 1679 Evaluation as part of the program’s continuous improvement
 1680 process. ^(Core)
 1681
- 1682 **V.C.1.a)** The Program Evaluation Committee must be composed of at
 1683 least two program faculty members, at least one of whom is a
 1684 core faculty member, and at least one resident. ^(Core)
 1685
- 1686 **V.C.1.b)** Program Evaluation Committee responsibilities must include:
 1687
- 1688 **V.C.1.b).(1)** acting as an advisor to the program director, through
 1689 program oversight; ^(Core)
 1690
- 1691 **V.C.1.b).(2)** review of the program’s self-determined goals and
 1692 progress toward meeting them; ^(Core)
 1693
- 1694 **V.C.1.b).(3)** guiding ongoing program improvement, including
 1695 development of new goals, based upon outcomes;
 1696 and, ^(Core)
 1697
- 1698 **V.C.1.b).(4)** review of the current operating environment to identify
 1699 strengths, challenges, opportunities, and threats as
 1700 related to the program’s mission and aims. ^(Core)
 1701

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual

Program Evaluation. Performance of residents and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1702
1703 **V.C.1.c)** **The Program Evaluation Committee should consider the**

1748

- 1749 V.C.1.c).(7).(b) professional development. ^(Core)
- 1750
- 1751 V.C.1.d) The Program Evaluation Committee must evaluate the
- 1752 program's mission and aims, strengths, areas for
- 1753 improvement, and threats. ^(Core)
- 1754
- 1755 V.C.1.e) The annual review, including the action plan, must:
- 1756
- 1757 V.C.1.e).(1) be distributed to and discussed with the members of
- 1758 the teaching faculty and the residents; and, ^(Core)
- 1759
- 1760 V.C.1.e).(2) be submitted to the DIO. ^(Core)
- 1761
- 1762 V.C.2. The program must complete a Self-Study prior to its 10-Year
- 1763 Accreditation Site Visit. ^(Core)
- 1764
- 1765 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
- 1766 ^(Core)
- 1767

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the residency program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- 1768
- 1769 V.C.3. *One goal of ACGME-accredited education is to educate physicians*
- 1770 *who seek and achieve board certification. One measure of the*
- 1771 *effectiveness of the educational program is the ultimate pass rate.*
- 1772
- 1773 *The program director should encourage all eligible program*
- 1774 *graduates to take the certifying examination offered by the*
- 1775 *applicable American Board of Medical Specialties (ABMS) member*
- 1776 *board or American Osteopathic Association (AOA) certifying board.*
- 1777
- 1778 V.C.3.a) For specialties in which the ABMS member board and/or AOA
- 1779 certifying board offer(s) an annual written exam, in the
- 1780 preceding three years, the program's aggregate pass rate of
- 1781 those taking the examination for the first time must be higher
- 1782 than the bottom fifth percentile of programs in that specialty.
- 1783 ^(Outcome)
- 1784

Specialty-Specific Background and Intent: For diagnostic radiology programs, the annual written exam referenced in V.C.3.a) will be considered equivalent to the ABR's Core Exam or the AOBR's Combined Physics and Diagnostic Imaging Examination and will be the basis for the aggregate program pass rate.

- 1785
 1786 **V.C.3.b)** For specialties in which the ABMS member board and/or AOA
 1787 certifying board offer(s) a biennial written exam, in the
 1788 preceding six years, the program's aggregate pass rate of
 1789 those taking the examination for the first time must be higher
 1790 than the bottom fifth percentile of programs in that specialty.
 1791 (Outcome)
- 1792
 1793 **V.C.3.c)** For specialties in which the ABMS member board and/or AOA
 1794 certifying board offer(s) an annual oral exam, in the preceding
 1795 three years, the program's aggregate pass rate of those
 1796 taking the examination for the first time must be higher than
 1797 the bottom fifth percentile of programs in that specialty.
 1798 (Outcome)
 1799

Specialty-Specific Background and Intent: For diagnostic radiology programs, while the ABR's certifying examination is not an oral exam, it is the second and final exam that must be taken and passed to obtain certification; therefore, requirement V.C.3.c) will be applicable to the ABR's computer-based certifying exam.

- 1800
 1801 **V.C.3.d)** For specialties in which the ABMS member board and/or AOA
 1802 certifying board offer(s) a biennial oral exam, in the preceding
 1803 six years, the program's aggregate pass rate of those taking
 1804 the examination for the first time must be higher than the
 1805 bottom fifth percentile of programs in that specialty. (Outcome)
 1806
- 1807 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
 1808 whose graduates over the time period specified in the
 1809 requirement have achieved an 80 percent pass rate will have
 1810 met this requirement, no matter the percentile rank of the
 1811 program for pass rate in that specialty. (Outcome)
 1812

Background and Intent: Setting a single standard for pass rate that works across specialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are specialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

- 1813
 1814 **V.C.3.f)** Programs must report, in ADS, board certification status
 1815 annually for the cohort of board-eligible residents that
 1816 graduated seven years earlier. (Core)
 1817

Background and Intent: It is essential that residency programs demonstrate knowledge and skill transfer to their residents. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the

program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from residency graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Residency education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by residents today*
- *Excellence in the safety and quality of care rendered to patients by today's residents in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and residents more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and residents to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, resident education, and resident well-being. The requirements are intended to support the development of a sense of professionalism by encouraging residents to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for residents to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and resident and faculty member

well-being. The requirements are intended to support programs and residents as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and residents. With this flexibility comes a responsibility for residents and faculty members to recognize the need to hand off care of a patient to another provider when a resident is too fatigued to provide safe, high quality care and for programs to ensure that residents remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare residents to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by residents who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Residents must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating residents will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for residents and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.

VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety. (Core)

VI.A.1.a).(1).(b) The program must have a structure that promotes safe, interprofessional, team-based care. (Core)

responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.

Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each resident's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.

VI.A.2.a).(1)

Each patient must have an identifiable and appropriately-credentialed and privileged attending physician (or licensed independent practitioner as specified by the applicable Review Committee) who is responsible and accountable for the patient's care.

(Core)

VI.A.2.a).(1).(a)

This information must be available to residents, faculty members, other members of the health care team, and patients.

(Core)

VI.A.2.a).(1).(b)

Residents and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care.

(Core)

VI.A.2.b)

Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced resident or fellow. Other portions of care provided by the resident can be adequately supervised by the appropriate availability of the supervising faculty member, fellow, or senior resident physician, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of resident-delivered care with feedback.

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of resident patient interactions, education and training locations, and resident skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a resident gains more experience, even with the same patient condition or procedure. All residents have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

2023

2024	VI.A.2.b).(1)	The program must demonstrate that the appropriate level of supervision in place for all residents is based on each resident’s level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. ^(Core)

2069			
2070			
2071			
2072			

- 2073 VI.A.2.c).(3) Oversight – the supervising physician is available to
 2074 provide review of procedures/encounters with
 2075 feedback provided after care is delivered. ^(Core)
 2076
- 2077 VI.A.2.d) The privilege of progressive authority and responsibility,
 2078 conditional independence, and a supervisory role in patient
 2079 care delegated to each resident must be assigned by the
 2080 program director and faculty members. ^(Core)
 2081
- 2082 VI.A.2.d).(1) The program director must evaluate each resident’s
 2083 abilities based on specific criteria, guided by the
 2084 Milestones. ^(Core)
 2085
- 2086 VI.A.2.d).(2) Faculty members functioning as supervising
 2087 physicians must delegate portions of care to residents
 2088 based on the needs of the patient and the skills of
 2089 each resident. ^(Core)
 2090
- 2091 VI.A.2.d).(3) Senior residents or fellows should serve in a
 2092 supervisory role to junior residents in recognition of
 2093 their progress toward independence, based on the
 2094 needs of each patient and the skills of the individual
 2095 resident or fellow. ^(Detail)
 2096
- 2097 VI.A.2.e) Programs must set guidelines for circumstances and events
 2098 in which residents must communicate with the supervising
 2099 faculty member(s). ^(Core)
 2100
- 2101 VI.A.2.e).(1) Each resident must know the limits of their scope of
 2102 authority, and the circumstances under which the
 2103 resident is permitted to act with conditional
 2104 independence. ^(Outcome)
 2105

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 2106
- 2107 VI.A.2.f) Faculty supervision assignments must be of sufficient
 2108 duration to assess the knowledge and skills of each
 2109 resident and to delegate to the resident the appropriate
 2110 level of patient care authority and responsibility. ^(Core)
 2111
- 2112 VI.B. Professionalism
- 2113
- 2114 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
 2115 educate residents and faculty members concerning the professional
 2116 responsibilities of physicians, including their obligation to be
 2117 appropriately rested and fit to provide the care required by their
 2118 patients. ^(Core)
 2119
- 2120 VI.B.2. The learning objectives of the program must:

- 2121
2122 **VI.B.2.a)** be accomplished through an appropriate blend of supervised
2123 patient care responsibilities, clinical teaching, and didactic
2124 educational events; ^(Core)
2125
2126 **VI.B.2.b)** be accomplished without excessive reliance on residents to
2127 fulfill non-physician obligations; and, ^(Core)
2128

Background and Intent: Routine reliance on residents to fulfill non-physician obligations increases work compression for residents and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that residents may be expected to do any of these things on occasion when the need arises, these activities should not be performed by residents routinely and must be kept to a minimum to optimize resident education.

- 2129
2130 **VI.B.2.c)** ensure manageable patient care responsibilities. ^(Core)
2131

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression, especially at the PGY-1 level.

- 2132
2133 **VI.B.3.** The program director, in partnership with the Sponsoring Institution,
2134 must provide a culture of professionalism that supports patient
2135 safety and personal responsibility. ^(Core)
2136
2137 **VI.B.4.** Residents and faculty members must demonstrate an understanding
2138 of their personal role in the:
2139
2140 **VI.B.4.a)** provision of patient- and family-centered care; ^(Outcome)
2141
2142 **VI.B.4.b)** safety and welfare of patients entrusted to their care,
2143 including the ability to report unsafe conditions and adverse
2144 events; ^(Outcome)
2145

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the resident.

- 2146
2147 **VI.B.4.c)** assurance of their fitness for work, including: ^(Outcome)
2148

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and residents to arrive for work adequately rested and ready to care

for patients. It is also the responsibility of faculty members, residents, and other members of the care team to be observant, to intervene, and/or to escalate their concern about resident and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

- 2149
2150 VI.B.4.c).(1) management of their time before, during, and after
2151 clinical assignments; and, (Outcome)
2152
2153 VI.B.4.c).(2) recognition of impairment, including from illness,
2154 fatigue, and substance use, in themselves, their peers,
2155 and other members of the health care team. (Outcome)
2156
2157 VI.B.4.d) commitment to lifelong learning; (Outcome)
2158
2159 VI.B.4.e) monitoring of their patient care performance improvement
2160 indicators; and, (Outcome)
2161
2162 VI.B.4.f) accurate reporting of clinical and educational work hours,
2163 patient outcomes, and clinical experience data. (Outcome)
2164
2165 VI.B.5. All residents and faculty members must demonstrate
2166 responsiveness to patient needs that supersedes self-interest. This
2167 includes the recognition that under certain circumstances, the best
2168 interests of the patient may be served by transitioning that patient's
2169 care to another qualified and rested provider. (Outcome)
2170
2171 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
2172 provide a professional, equitable, respectful, and civil environment
2173 that is free from discrimination, sexual and other forms of
2174 harassment, mistreatment, abuse, or coercion of students,
2175 residents, faculty, and staff. (Core)
2176
2177 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
2178 have a process for education of residents and faculty regarding
2179 unprofessional behavior and a confidential process for reporting,
2180 investigating, and addressing such concerns. (Core)
2181
2182 VI.C. Well-Being
2183
2184 *Psychological, emotional, and physical well-being are critical in the*
2185 *development of the competent, caring, and resilient physician and require*
2186 *proactive attention to life inside and outside of medicine. Well-being*
2187 *requires that physicians retain the joy in medicine while managing their*
2188 *own real-life stresses. Self-care and responsibility to support other*
2189 *members of the health care team are important components of*
2190 *professionalism; they are also skills that must be modeled, learned, and*
2191 *nurtured in the context of other aspects of residency training.*
2192
2193 *Residents and faculty members are at risk for burnout and depression.*
2194 *Programs, in partnership with their Sponsoring Institutions, have the same*
2195 *responsibility to address well-being as other aspects of resident*

2196
2197
2198
2199
2200
2201
2202
2203

competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares residents with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

- VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:**
- VI.C.1.a) efforts to enhance the meaning that each resident finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)**
 - VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts resident well-being; ^(Core)**
 - VI.C.1.c) evaluating workplace safety data and addressing the safety of residents and faculty members; ^(Core)**

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance resident and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

2221
2222
2223

- VI.C.1.d) policies and programs that encourage optimal resident and faculty member well-being; and, ^(Core)**

2224

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one’s own health, including adequate rest, healthy diet, and regular exercise.

2225

2226

VI.C.1.d).(1)

Residents must be given the opportunity to attend medical, mental health, and dental care appointments, including those scheduled during their working hours.
(Core)

2227

2228

2229

2230

Background and Intent: The intent of this requirement is to ensure that residents have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Residents must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

2231

2232

VI.C.1.e)

attention to resident and faculty member burnout, depression, and substance use disorders. The program, in partnership with its Sponsoring Institution, must educate faculty members and residents in identification of the symptoms of burnout, depression, and substance use disorders, including means to assist those who experience these conditions. Residents and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: (Core)

encourage residents and faculty members to alert the program director or other designated personnel or programs when they are concerned that another resident, fellow, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence;
(Core)

2245

2246

2247

2248

2249

2250

2251

Background and Intent: Individuals experiencing burnout, depression, a substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that residents and faculty members are able to report their concerns when another resident or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Residents and faculty members must know which personnel, in addition to the program director, have been designated with this

responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 2252
2253 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
2254 and, ^(Core)
2255
2256 VI.C.1.e).(3) provide access to confidential, affordable mental
2257 health assessment, counseling, and treatment,
2258 including access to urgent and emergent care 24
2259 hours a day, seven days a week. ^(Core)
2260

Background and Intent: The intent of this requirement is to ensure that residents have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 2261
2262 VI.C.2. There are circumstances in which residents may be unable to attend
2263 work, including but not limited to fatigue, illness, family
2264 emergencies, and parental leave. Each program must allow an
2265 appropriate length of absence for residents unable to perform their
2266 patient care responsibilities. ^(Core)
2267
2268 VI.C.2.a) The program must have policies and procedures in place to
2269 ensure coverage of patient care. ^(Core)
2270
2271 VI.C.2.b) These policies must be implemented without fear of negative
2272 consequences for the resident who is or was unable to
2273 provide the clinical work. ^(Core)
2274

Background and Intent: Residents may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 2275
2276 VI.D. Fatigue Mitigation
2277
2278 VI.D.1. Programs must:
2279
2280 VI.D.1.a) educate all faculty members and residents to recognize the
2281 signs of fatigue and sleep deprivation; ^(Core)
2282

2283 VI.D.1.b) educate all faculty members and residents in alertness
2284 management and fatigue mitigation processes; and, ^(Core)

2285
2286 VI.D.1.c) encourage residents to use fatigue mitigation processes to
2287 manage the potential negative effects of fatigue on patient
2288 care and learning. ^(Detail)
2289

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares residents for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

2290
2291 VI.D.2. Each program must ensure continuity of patient care, consistent
2292 with the program's policies and procedures referenced in VI.C.2–
2293 VI.C.2.b), in the event that a resident may be unable to perform their
2294 patient care responsibilities due to excessive fatigue. ^(Core)
2295

2296 VI.D.3. The program, in partnership with its Sponsoring Institution, must
2297 ensure adequate sleep facilities and safe transportation options for
2298 residents who may be too fatigued to safely return home. ^(Core)
2299

2300 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care

2301
2302 VI.E.1. Clinical Responsibilities

2303
2304 The clinical responsibilities for each resident must be based on PGY
2305 level, patient safety, resident ability, severity and complexity of
2306 patient illness/condition, and available support services. ^(Core)
2307

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on residents. Faculty members and program directors need to make sure residents function in an environment that has safe patient care and a sense of resident well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor resident workload. Workload should be distributed among the resident team and interdisciplinary teams to minimize work compression.

2308
2309 VI.E.2. Teamwork

2310
2311 Residents must care for patients in an environment that maximizes
2312 communication. This must include the opportunity to work as a
2313 member of effective interprofessional teams that are appropriate to
2314 the delivery of care in the specialty and larger health system. ^(Core)
2315

2316 **VI.E.3. Transitions of Care**

2317
2318 **VI.E.3.a) Programs must design clinical assignments to optimize**
2319 **transitions in patient care, including their safety, frequency,**
2320 **and structure. ^(Core)**

2321
2322 **VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,**
2323 **must ensure and monitor effective, structured hand-over**
2324 **processes to facilitate both continuity of care and patient**
2325 **safety. ^(Core)**

2326
2327 **VI.E.3.c) Programs must ensure that residents are competent in**
2328 **communicating with team members in the hand-over process.**
2329 **^(Outcome)**

2330
2331 **VI.E.3.d) Programs and clinical sites must maintain and communicate**
2332 **schedules of attending physicians and residents currently**
2333 **responsible for care. ^(Core)**

2334
2335 **VI.E.3.e) Each program must ensure continuity of patient care,**
2336 **consistent with the program’s policies and procedures**
2337 **referenced in VI.C.2-VI.C.2.b), in the event that a resident may**
2338 **be unable to perform their patient care responsibilities due to**
2339 **excessive fatigue or illness, or family emergency. ^(Core)**

2340
2341 **VI.F. Clinical Experience and Education**

2342
2343 *Programs, in partnership with their Sponsoring Institutions, must design*
2344 *an effective program structure that is configured to provide residents with*
2345 *educational and clinical experience opportunities, as well as reasonable*
2346 *opportunities for rest and personal activities.*
2347

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that residents’ duty to “clock out” on time superseded their duty to their patients.

2348
2349 **VI.F.1. Maximum Hours of Clinical and Educational Work per Week**

2350
2351 **Clinical and educational work hours must be limited to no more than**
2352 **80 hours per week, averaged over a four-week period, inclusive of all**
2353 **in-house clinical and educational activities, clinical work done from**
2354 **home, and all moonlighting. ^(Core)**

Background and Intent: Programs and residents have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing residents to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a resident may work in excess of 80 hours in a given week, all programs and residents utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule residents to work 80 hours per week and still permit residents to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that residents are scheduled to work fewer than 80 hours per week, which would allow residents to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for residents to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that residents are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work residents choose to do from home. The requirement provides flexibility for residents to do this while ensuring that the time spent by residents completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Resident decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the resident's supervisor. In such circumstances, residents should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a resident spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the resident need to report that

time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by residents. The new requirements are not an attempt to micromanage this process. Residents are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual resident. Programs will need to factor in time residents are spending on clinical work at home when schedules are developed to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that residents report their time from home and that schedules are structured to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks.

PGY-1 and PGY-2 Residents

PGY-1 and PGY-2 residents may not have the experience to make decisions about when it is appropriate to utilize flexibility or may feel pressured to use it when unnecessary. Programs are responsible for ensuring that residents are provided with manageable workloads that can be accomplished during scheduled work hours. This includes ensuring that a resident's assigned direct patient load is manageable, that residents have appropriate support from their clinical teams, and that residents are not overburdened with clerical work and/or other non-physician duties.

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide residents with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)

VI.F.2.b) Residents should have eight hours off between scheduled clinical work and education periods. ^(Detail)

VI.F.2.b).(1) There may be circumstances when residents choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)

Background and Intent: While it is expected that resident schedules will be structured to ensure that residents are provided with a minimum of eight hours off between scheduled work periods, it is recognized that residents may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for residents to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

2374

2375 VI.F.2.c) Residents must have at least 14 hours free of clinical work
2376 and education after 24 hours of in-house call. (Core)
2377

Background and Intent: Residents have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, residents are encouraged to prioritize sleep over other discretionary activities.

2378 VI.F.2.d) Residents must be scheduled for a minimum of one day in
2379 seven free of clinical work and required education (when
2380 averaged over four weeks). At-home call cannot be assigned
2381 on these free days. (Core)
2382
2383

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and resident needs. It is strongly recommended that residents' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some residents may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide residents with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes resident well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

2384 VI.F.3. Maximum Clinical Work and Education Period Length
2385
2386 VI.F.3.a) Clinical and educational work periods for residents must not
2387 exceed 24 hours of continuous scheduled clinical
2388 assignments. (Core)
2389
2390

Background and Intent: The Task Force examined the question of "consecutive time on task." It examined the research supporting the current limit of 16 consecutive hours of time on task for PGY-1 residents; the range of often conflicting impacts of this requirement on patient safety, clinical care, and continuity of care by resident teams; and resident learning found in the literature. Finally, it heard a uniform request by the specialty societies, certifying boards, membership societies and organizations, and senior residents to repeal this requirement. It heard conflicting perspectives from resident unions, a medical student association, and a number of public advocacy groups, some arguing for continuation of the requirement, others arguing for extension of the requirement to all residents.

Of greatest concern to the Task Force were the observations of disruption of team care and patient care continuity brought about with residents beyond the PGY-1 level adhering to differing requirements. The graduate medical education community uniformly requested that the Task Force remove this requirement. The most frequently-cited reason for this request was the complete disruption of the team, separating the PGY-1 from supervisory faculty members and residents who were best able to judge the

ability of the resident and customize the supervision of patient care for each PGY-1. Cited nearly as frequently was the separation of the PGY-1 from the team, delaying maturation of clinical skills, and threatening to create a “shift” mentality in disciplines where overnight availability to patients is essential in delivery of care.

The Task Force examined the impact of the request to consider 16-consecutive-hour limits for all residents, and rejected the proposition. It found that model incompatible with the actual practice of medicine and surgery in many specialties, excessively limiting in configuration of clinical services in many disciplines, and potentially disruptive of the inculcation of responsibility and professional commitment to altruism and placing the needs of patients above those of the physician.

After careful consideration of the information available, the testimony and position of all parties submitting information, and presentations to the Task Force, the Task Force removed the 16-hour-consecutive-time-on-task requirement for PGY-1 residents. It remains crucial that programs ensure that PGY-1 residents are supervised in compliance with the applicable Program Requirements, and that resident well-being is prioritized as described in Section VI.C. of these requirements.

- 2391
2392 VI.F.3.a).(1) Up to four hours of additional time may be used for
2393 activities related to patient safety, such as providing
2394 effective transitions of care, and/or resident education.
2395 (Core)
2396
2397 VI.F.3.a).(1).(a) Additional patient care responsibilities must not
2398 be assigned to a resident during this time. (Core)
2399

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the resident continue to function as a member of the team in an environment where other members of the team can assess resident fatigue, and that supervision for post-call residents is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- 2400
2401 VI.F.4. Clinical and Educational Work Hour Exceptions
2402
2403 VI.F.4.a) In rare circumstances, after handing off all other
2404 responsibilities, a resident, on their own initiative, may elect
2405 to remain or return to the clinical site in the following
2406 circumstances:
2407
2408 VI.F.4.a).(1) to continue to provide care to a single severely ill or
2409 unstable patient; (Detail)
2410
2411 VI.F.4.a).(2) humanistic attention to the needs of a patient or
2412 family; or, (Detail)
2413
2414 VI.F.4.a).(3) to attend unique educational events. (Detail)
2415

2416 VI.F.4.b) These additional hours of care or education will be counted
2417 toward the 80-hour weekly limit. ^(Detail)
2418

Background and Intent: This requirement is intended to provide residents with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a resident may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Residents must not be required to stay. Programs allowing residents to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the resident and that residents are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

2419
2420 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
2421 for up to 10 percent or a maximum of 88 clinical and
2422 educational work hours to individual programs based on a
2423 sound educational rationale.
2424
2425 The Review Committee for Radiology will not consider requests
2426 for exceptions to the 80-hour limit to the residents' work week.
2427

2428 VI.F.5. Moonlighting

2429
2430 VI.F.5.a) Moonlighting must not interfere with the ability of the resident
2431 to achieve the goals and objectives of the educational
2432 program, and must not interfere with the resident's fitness for
2433 work nor compromise patient safety. ^(Core)
2434

2435 VI.F.5.b) Time spent by residents in internal and external moonlighting
2436 (as defined in the ACGME Glossary of Terms) must be
2437 counted toward the 80-hour maximum weekly limit. ^(Core)
2438

2439 VI.F.5.c) PGY-1 residents are not permitted to moonlight. ^(Core)
2440

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

2441
2442 VI.F.6. In-House Night Float
2443
2444 Night float must occur within the context of the 80-hour and one-
2445 day-off-in-seven requirements. ^(Core)
2446

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

2447
2448 VI.F.7. Maximum In-House On-Call Frequency
2449
2450 Residents must be scheduled for in-house call no more frequently
2451 than every third night (when averaged over a four-week period). ^(Core)

2452	VI.F.8.	At-Home Call
2453		
2454	VI.F.8.a)	Time spent on patient care activities by residents on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. ^(Core)
2455		
2456		
2457		
2458		
2459		
2460		
2461	VI.F.8.a).(1)	At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each resident. ^(Core)
2462		
2463		
2464		
2465	VI.F.8.b)	Residents are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. ^(Detail)
2466		
2467		
2468		
2469		

Background and Intent: This requirement has been modified to specify that clinical work done from home when a resident is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time residents devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in residents routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of residency/fellowship programs, Review Committees will look at the overall impact of at-home call on resident/fellow rest and personal time.
