1
2 **Proposed ACGME Program Requirements for Graduate Medical Education**
3 **in Occupational and Environmental Medicine**

4
5 **Common Program Requirements (Residency) are in BOLD**
6

7 Where applicable, text in italics describes the underlying philosophy of the requirements in that
8 section. These philosophic statements are not program requirements and are therefore not
9 citable.

10
11 **Introduction**

12
13 **Int.A.** *Graduate medical education is the crucial step of professional*
14 *development between medical school and autonomous clinical practice. It*
15 *is in this vital phase of the continuum of medical education that residents*
16 *learn to provide optimal patient care under the supervision of faculty*
17 *members who not only instruct, but serve as role models of excellence,*
18 *compassion, professionalism, and scholarship.*

19
20 *Graduate medical education transforms medical students into physician*
21 *scholars who care for the patient, family, and a diverse community; create*
22 *and integrate new knowledge into practice; and educate future generations*
23 *of physicians to serve the public. Practice patterns established during*
24 *graduate medical education persist many years later.*

25
26 *Graduate medical education has as a core tenet the graded authority and*
27 *responsibility for patient care. The care of patients is undertaken with*
28 *appropriate faculty supervision and conditional independence, allowing*
29 *residents to attain the knowledge, skills, attitudes, and empathy required*
30 *for autonomous practice. Graduate medical education develops physicians*
31 *who focus on excellence in delivery of safe, equitable, affordable, quality*
32 *care; and the health of the populations they serve. Graduate medical*
33 *education values the strength that a diverse group of physicians brings to*
34 *medical care.*

35
36 *Graduate medical education occurs in clinical settings that establish the*
37 *foundation for practice-based and lifelong learning. The professional*
38 *development of the physician, begun in medical school, continues through*
39 *faculty modeling of the effacement of self-interest in a humanistic*
40 *environment that emphasizes joy in curiosity, problem-solving, academic*
41 *rigor, and discovery. This transformation is often physically, emotionally,*
42 *and intellectually demanding and occurs in a variety of clinical learning*
43 *environments committed to graduate medical education and the well-being*
44 *of patients, residents, fellows, faculty members, students, and all members*
45 *of the health care team.*

46
47 **Int.B.** **Definition of Specialty**

48
49 The medical specialty of occupational and environmental medicine focuses on
50 the relationships among the health of workers; the arrangements of work; the

51 physical, chemical, and social environments in the workplace; and the health
52 outcomes of environmental exposures.

53
54 **Int.C. Length of Educational Program**

55
56 Educational programs in occupational and environmental medicine are
57 configured in 24-month and 36-month formats. The latter includes 12 months of
58 education in fundamental clinical skills of medicine, and both include 24 months
59 of education in clinical occupational and environmental medicine (PM-1 and PM-
60 2). (Core)*

61
62 **I. Oversight**

63
64 **I.A. Sponsoring Institution**

65
66 *The Sponsoring Institution is the organization or entity that assumes the*
67 *ultimate financial and academic responsibility for a program of graduate*
68 *medical education, consistent with the ACGME Institutional Requirements.*

69
70 *When the Sponsoring Institution is not a rotation site for the program, the*
71 *most commonly utilized site of clinical activity for the program is the*
72 *primary clinical site.*

73
Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the residents. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner’s office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

74
75 **I.A.1. The program must be sponsored by one ACGME-accredited**
76 **Sponsoring Institution. (Core)**

77
78 **I.B. Participating Sites**

79
80 *A participating site is an organization providing educational experiences or*
81 *educational assignments/rotations for residents.*

82
83 **I.B.1. The program, with approval of its Sponsoring Institution, must**
84 **designate a primary clinical site. (Core)**

85
86 **I.B.2. There must be a program letter of agreement (PLA) between the**
87 **program and each participating site that governs the relationship**
88 **between the program and the participating site providing a required**
89 **assignment. (Core)**

90
91 **I.B.2.a) The PLA must:**

93 I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)
94
95 I.B.2.a).(2) be approved by the designated institutional official
96 (DIO). ^(Core)
97
98 I.B.3. The program must monitor the clinical learning and working
99 environment at all participating sites. ^(Core)

100
101 I.B.3.a) At each participating site there must be one faculty member,
102 designated by the program director as the site director, who
103 is accountable for resident education at that site, in
104 collaboration with the program director. ^(Core)
105

Background and Intent: While all residency programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites the program must ensure the quality of the educational experience. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Directors' Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for residents
- Specifying the responsibilities for teaching, supervision, and formal evaluation of residents
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern resident education during the assignment

106
107 I.B.4. The program director must submit any additions or deletions of
108 participating sites routinely providing an educational experience,
109 required for all residents, of one month full time equivalent (FTE) or
110 more through the ACGME's Accreditation Data System (ADS). ^(Core)
111

112 I.C. The program, in partnership with its Sponsoring Institution, must engage in
113 practices that focus on mission-driven, ongoing, systematic recruitment
114 and retention of a diverse and inclusive workforce of residents, fellows (if
115 present), faculty members, senior administrative staff members, and other
116 relevant members of its academic community. ^(Core)
117

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

118

- 119 **I.D. Resources**
 120
 121 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
 122 **ensure the availability of adequate resources for resident education.**
 123 **(Core)**
 124
 125 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
 126 **ensure healthy and safe learning and working environments that**
 127 **promote resident well-being and provide for: (Core)**
 128
 129 **I.D.2.a) access to food while on duty; (Core)**
 130
 131 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
 132 **and accessible for residents with proximity appropriate for**
 133 **safe patient care; (Core)**
 134

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that residents function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while residents are working. Residents should have access to refrigeration where food may be stored. Food should be available when residents are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued resident.

- 135
 136 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
 137 **capabilities, with proximity appropriate for safe patient care;**
 138 **(Core)**
 139

Background and Intent: Sites must provide private and clean locations where residents may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the resident with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the resident and the resident's family, as outlined in VI.C.1.d).(1).

- 140
 141 **I.D.2.d) security and safety measures appropriate to the participating**
 142 **site; and, (Core)**
 143
 144 **I.D.2.e) accommodations for residents with disabilities consistent**
 145 **with the Sponsoring Institution's policy. (Core)**
 146
 147 **I.D.3. Residents must have ready access to specialty-specific and other**
 148 **appropriate reference material in print or electronic format. This**
 149 **must include access to electronic medical literature databases with**
 150 **full text capabilities. (Core)**
 151

- 152 I.D.4. The program’s educational and clinical resources must be adequate
153 to support the number of residents appointed to the program. (Core)
154
- 155 I.E. The presence of other learners and other care providers, including, but not
156 limited to, residents from other programs, subspecialty fellows, and
157 advanced practice providers, must enrich the appointed residents’
158 education. (Core)
159
- 160 I.E.1. The program must report circumstances when the presence of other
161 learners has interfered with the residents’ education to the DIO and
162 Graduate Medical Education Committee (GMEC). (Core)
163

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that residents’ education is not compromised by the presence of other providers and learners.

- 164
- 165 II. Personnel
- 166
- 167 II.A. Program Director
- 168
- 169 II.A.1. There must be one faculty member appointed as program director
170 with authority and accountability for the overall program, including
171 compliance with all applicable program requirements. (Core)
172
- 173 II.A.1.a) The Sponsoring Institution’s GMEC must approve a change in
174 program director. (Core)
175
- 176 II.A.1.b) Final approval of the program director resides with the
177 Review Committee. (Core)
178

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a residency, a single individual must be designated as program director and have overall responsibility for the program. The program director’s nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

- 179
- 180 II.A.1.c) The program must demonstrate retention of the program
181 director for a length of time adequate to maintain continuity
182 of leadership and program stability. (Core)
183

Background and Intent: The success of residency programs is generally enhanced by continuity in the program director position. The professional activities required of a program director are unique and complex and take time to master. All programs are encouraged to undertake succession planning to facilitate program stability when there is necessary turnover in the program director position.

184

185 **II.A.2. The program director and, as applicable, the program’s leadership**
186 **team, must be provided with support adequate for administration of**
187 **the program based upon its size and configuration.** (Core)

188
189 **II.A.2.a)** Program leadership, in aggregate, must be provided with support
190 equal to a dedicated minimum time as specified below for
191 administration of the program. This may be time spent by the
192 program director only or divided between the program director and
193 one or more associate (or assistant) program directors. (Core)

194
195 **II.A.2.a).(1)** Programs with up to seven approved resident positions
196 must be provided with a minimum of 20 percent time.
197 Programs with seven or more approved resident positions
198 must be provided with a minimum of 20 percent time and
199 an additional one percent time for each approved position.
200 (Core)
201

Specialty-Specific Background and Intent: The additional one percent time is for each approved resident position in the program, not just the approved resident positions over seven. For example, a program with an approved complement of seven resident positions must be provided at least 27 percent time for program leadership. A program approved for 20 resident positions must be provided with at least 40 percent time for program leadership; and a program approved for 35 resident positions must be provided with at least 55 percent time for program leadership.

202
Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of residency programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of residents, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in resident education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the residency program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed

203
204 **II.A.3. Qualifications of the program director:**
205

206 II.A.3.a) must include specialty expertise and at least three years of
207 documented educational and/or administrative experience, or
208 qualifications acceptable to the Review Committee; ^(Core)
209

Background and Intent: Leading a program requires knowledge and skills that are established during residency and subsequently further developed. The time period from completion of residency until assuming the role of program director allows the individual to cultivate leadership abilities while becoming professionally established. The three-year period is intended for the individual's professional maturation.

The broad allowance for educational and/or administrative experience recognizes that strong leaders arise through diverse pathways. These areas of expertise are important when identifying and appointing a program director. The choice of a program director should be informed by the mission of the program and the needs of the community.

In certain circumstances, the program and Sponsoring Institution may propose and the Review Committee may accept a candidate for program director who fulfills these goals but does not meet the three-year minimum.

210
211 II.A.3.b) must include current certification in the specialty for which
212 they are the program director by the American Board of
213 Preventive Medicine or by the American Osteopathic Board of
214 Preventive Medicine, or specialty qualifications that are
215 acceptable to the Review Committee; ^(Core)
216

217 II.A.3.c) must include current medical licensure and appropriate
218 medical staff appointment; and, ^(Core)
219

220 II.A.3.d) must include ongoing clinical activity. ^(Core)
221

Background and Intent: A program director is a role model for faculty members and residents. The program director must participate in clinical activity consistent with the specialty. This activity will allow the program director to role model the Core Competencies for the faculty members and residents.

222
223 II.A.4. Program Director Responsibilities
224

225 The program director must have responsibility, authority, and
226 accountability for: administration and operations; teaching and
227 scholarly activity; resident recruitment and selection, evaluation,
228 and promotion of residents, and disciplinary action; supervision of
229 residents; and resident education in the context of patient care. ^(Core)
230

231 II.A.4.a) The program director must:

232
233 II.A.4.a).(1) be a role model of professionalism; ^(Core)
234

Background and Intent: The program director, as the leader of the program, must serve as a role model to residents in addition to fulfilling the technical aspects of the role. As residents are expected to demonstrate compassion, integrity, and respect for

others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

235
236
237
238
239
240

- II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

241
242
243
244
245

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the residents in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Residency programs can be highly complex. In a complex organization, the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

246

256
257
258
259
260
261
262
263

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the residency program education and at least annually thereafter, as outlined in V.B.; ^(Core)

- II.A.4.a).(5) have the authority to approve program faculty members for participation in the residency program education at all sites; ^(Core)

- II.A.4.a).(6) have the authority to remove program faculty members from participation in the residency program education at all sites; ^(Core)

- II.A.4.a).(7) have the authority to remove residents from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate residents effectively role model the Core Competencies. Working with a resident is a privilege that is earned through effective teaching and professional role

modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

280
281
282
283
284
285
286
287
- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)
 - II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant specialty board examination(s); ^(Core)
 - II.A.4.a).(10) provide a learning and working environment in which residents have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; ^(Core)
 - II.A.4.a).(11) ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; ^(Core)
 - II.A.4.a).(12) ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a resident; ^(Core)

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and residents.

303
- II.A.4.a).(13) ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; ^(Core)
 - II.A.4.a).(13).(a) Residents must not be required to sign a non-competition guarantee or restrictive covenant. ^(Core)
 - II.A.4.a).(14) document verification of program completion for all graduating residents within 30 days; ^(Core)
 - II.A.4.a).(15) provide verification of an individual resident's completion upon the resident's request, within 30 days; and, ^(Core)

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of residents who have previously completed the program. Residents who leave the program prior to completion also require timely documentation of their summative evaluation.

334

II.A.4.a).(16) obtain review and approval of the Sponsoring Institution’s DIO before submitting information or requests to the ACGME, as required in the Institutional Requirements and outlined in the ACGME Program Directors’ Guide to the Common Program Requirements. ^(Core)

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach residents how to care for patients. Faculty members provide an important bridge allowing residents to grow and become practice-ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, residents, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the residents and themselves.

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating residents. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.

335
336
337
338
339
340
341
342
343
344
345

II.B.1. At each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all residents at that location. ^(Core)

II.B.2. Faculty members must:

II.B.2.a) be role models of professionalism; ^(Core)

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

346

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

347

348

II.B.2.c) demonstrate a strong interest in the education of residents;
(Core)

349

350

351

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; (Core)

352

353

354

II.B.2.e) administer and maintain an educational environment conducive to educating residents; (Core)

355

356

357

II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, (Core)

358

359

360

II.B.2.g) pursue faculty development designed to enhance their skills at least annually; (Core)

361

362

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the residency program faculty in the aggregate.

363

364

II.B.2.g).(1) as educators; (Core)

365

366

II.B.2.g).(2) in quality improvement and patient safety; (Core)

367

368

II.B.2.g).(3) in fostering their own and their residents' well-being; and, (Core)

369

370

371

II.B.2.g).(4) in patient care based on their practice-based learning and improvement efforts. (Core)

372

373

Background and Intent: Practice-based learning serves as the foundation for the practice of medicine. Through a systematic analysis of one's practice and review of the literature, one is able to make adjustments that improve patient outcomes and care. Thoughtful consideration to practice-based analysis improves quality of care, as well as patient safety. This allows faculty members to serve as role models for residents in practice-based learning.

374

375

II.B.3. Faculty Qualifications

376

377 **II.B.3.a) Faculty members must have appropriate qualifications in**
378 **their field and hold appropriate institutional appointments.**
379 **(Core)**

380
381 **II.B.3.b) Physician faculty members must:**
382

383 **II.B.3.b).(1) have current certification in the specialty by the**
384 **American Board of Preventive Medicine or the American**
385 **Osteopathic Board of Preventive Medicine, or possess**
386 **qualifications judged acceptable to the Review**
387 **Committee. (Core)**
388

389 **II.B.3.c) Any non-physician faculty members who participate in**
390 **residency program education must be approved by the**
391 **program director. (Core)**
392

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of residents by non-physician educators enables the resident to better manage patient care and provides valuable advancement of the residents' knowledge. Furthermore, other individuals contribute to the education of the resident in the basic science of the specialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the residents, the program director may designate the individual as a program faculty member or a program core faculty member.

393
394 **II.B.4. Core Faculty**
395

396 **Core faculty members must have a significant role in the education**
397 **and supervision of residents and must devote a significant portion**
398 **of their entire effort to resident education and/or administration, and**
399 **must, as a component of their activities, teach, evaluate, and**
400 **provide formative feedback to residents. (Core)**
401

Background and Intent: Core faculty members are critical to the success of resident education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring residents, and assessing residents' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of residents, and also participate in non-clinical activities related to resident education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting resident applicants, providing didactic instruction, mentoring residents, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

402

403 **II.B.4.a) Core faculty members must be designated by the program**
404 **director.** ^(Core)

405
406 **II.B.4.b) Core faculty members must complete the annual ACGME**
407 **Faculty Survey.** ^(Core)
408

409 **II.B.4.c)** Not including the program director, programs with up to eight
410 residents must have a minimum of two core faculty members, and
411 programs with more than eight residents must have a core faculty
412 member-to-resident ratio of at least one-to-four. ^(Core)
413

414 **II.C. Program Coordinator**

415
416 **II.C.1. There must be a program coordinator.** ^(Core)
417

418 **II.C.2. The program coordinator must be provided with dedicated time and**
419 **support adequate for administration of the program based upon its**
420 **size and configuration.** ^(Core)
421

422 **II.C.2.a)** The program coordinator must be provided with support equal to a
423 dedicated minimum of 50 percent time for administration of the
424 program. ^(Core)
425

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of residents.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer residents may not require a full-time coordinator; one coordinator may support more than one program.

426
427 **II.D. Other Program Personnel**
428

429
430
431
432

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

III. Resident Appointments

III.A. Eligibility Requirements

III.A.1. An applicant must meet one of the following qualifications to be eligible for appointment to an ACGME-accredited program: ^(Core)

III.A.1.a) graduation from a medical school in the United States or Canada, accredited by the Liaison Committee on Medical Education (LCME) or graduation from a college of osteopathic medicine in the United States, accredited by the American Osteopathic Association Commission on Osteopathic College Accreditation (AOACOCA); or, ^(Core)

III.A.1.b) graduation from a medical school outside of the United States or Canada, and meeting one of the following additional qualifications: ^(Core)

III.A.1.b).(1) holding a currently valid certificate from the Educational Commission for Foreign Medical Graduates (ECFMG) prior to appointment; or, ^(Core)

III.A.1.b).(2) holding a full and unrestricted license to practice medicine in the United States licensing jurisdiction in which the ACGME-accredited program is located. ^(Core)

III.A.2. All prerequisite post-graduate clinical education required for initial entry or transfer into ACGME-accredited residency programs must be completed in ACGME-accredited residency programs, AOA-approved residency programs, Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency programs located in Canada, or in residency programs with ACGME International (ACGME-I) Advanced Specialty Accreditation. ^(Core)

III.A.2.a) Residency programs must receive verification of each resident's level of competency in the required clinical field using ACGME, CanMEDS, or ACGME-I Milestones evaluations from the prior training program upon matriculation. ^(Core)

- 474 III.A.2.b) Residents entering a 24-month program that does not include
 475 education in fundamental clinical skills of medicine must have
 476 successfully completed at least 12 months of clinical education in
 477 a residency program that satisfies III.A.2. (Core)
 478
- 479 III.A.2.b).(1) PGY-1 resident experience must include at least 10
 480 months of direct patient care in both inpatient and
 481 outpatient settings. (Core)
 482
- 483 III.A.2.c) To be eligible for appointment at the PM-2 level, residents must
 484 have completed:
 485
- 486 III.A.2.c).(1) a residency program that satisfies the requirements in
 487 III.A.2.; and, (Core)
 488
- 489 III.A.2.c).(1).(a) This must include at least 10 months of direct
 490 patient care in both inpatient and outpatient
 491 settings. (Core)
 492
- 493 III.A.2.c).(2) at least 50 percent of the requirements for a Master of
 494 Public Health or another equivalent degree. (Core)
 495

Background and Intent: Programs with ACGME-I Foundational Accreditation or from institutions with ACGME-I accreditation do not qualify unless the program has also achieved ACGME-I Advanced Specialty Accreditation. To ensure entrants into ACGME-accredited programs from ACGME-I programs have attained the prerequisite milestones for this training, they must be from programs that have ACGME-I Advanced Specialty Accreditation.

- 496
- 497 **III.A.3. A physician who has completed a residency program that was not**
 498 **accredited by ACGME, AOA, RCPSC, CFPC, or ACGME-I (with**
 499 **Advanced Specialty Accreditation) may enter an ACGME-accredited**
 500 **residency program in the same specialty at the PGY-1 level and, at**
 501 **the discretion of the program director of the ACGME-accredited**
 502 **program and with approval by the GMEC, may be advanced to the**
 503 **PGY-2 level based on ACGME Milestones evaluations at the ACGME-**
 504 **accredited program. This provision applies only to entry into**
 505 **residency in those specialties for which an initial clinical year is not**
 506 **required for entry. (Core)**
 507
- 508 **III.A.4. Resident Eligibility Exception**
 509
- 510 **The Review Committee for Preventive Medicine will allow the**
 511 **following exception to the resident eligibility requirements (for**
 512 **residents entering the program via III.A.2.c)): (Core)**
 513
- 514 **III.A.4.a) An ACGME-accredited residency program may accept an**
 515 **exceptionally qualified international graduate applicant who**
 516 **does not satisfy the eligibility requirements listed in III.A.1.-**
 517 **III.A.3., but who does meet all of the following additional**
 518 **qualifications and conditions: (Core)**

- 519
520 **III.A.4.a).(1)** evaluation by the program director and residency
521 selection committee of the applicant’s suitability to
522 enter the program, based on prior training and review
523 of the summative evaluations of this training; and, ^(Core)
524
- 525 **III.A.4.a).(2)** review and approval of the applicant’s exceptional
526 qualifications by the GMEC; and, ^(Core)
527
- 528 **III.A.4.a).(3)** verification of Educational Commission for Foreign
529 Medical Graduates (ECFMG) certification. ^(Core)
530
- 531 **III.A.4.b)** Applicants accepted through this exception must have an
532 evaluation of their performance by the Clinical Competency
533 Committee within 12 weeks of matriculation. ^(Core)
534
- 535 **III.B.** The program director must not appoint more residents than approved by
536 the Review Committee. ^(Core)
537
- 538 **III.B.1.** All complement increases must be approved by the Review
539 Committee. ^(Core)
540
- 541 **III.C.** Resident Transfers
542
- 543 The program must obtain verification of previous educational experiences
544 and a summative competency-based performance evaluation prior to
545 acceptance of a transferring resident, and Milestones evaluations upon
546 matriculation. ^(Core)
547
- 548 **IV. Educational Program**
549
- 550 *The ACGME accreditation system is designed to encourage excellence and*
551 *innovation in graduate medical education regardless of the organizational*
552 *affiliation, size, or location of the program.*
553
- 554 *The educational program must support the development of knowledgeable, skillful*
555 *physicians who provide compassionate care.*
556
- 557 *In addition, the program is expected to define its specific program aims consistent*
558 *with the overall mission of its Sponsoring Institution, the needs of the community*
559 *it serves and that its graduates will serve, and the distinctive capabilities of*
560 *physicians it intends to graduate. While programs must demonstrate substantial*
561 *compliance with the Common and specialty-specific Program Requirements, it is*
562 *recognized that within this framework, programs may place different emphasis on*
563 *research, leadership, public health, etc. It is expected that the program aims will*
564 *reflect the nuanced program-specific goals for it and its graduates; for example, it*
565 *is expected that a program aiming to prepare physician-scientists will have a*
566 *different curriculum from one focusing on community health.*
567
- 568 **IV.A.** The curriculum must contain the following educational components: ^(Core)
569

570 IV.A.1. a set of program aims consistent with the Sponsoring Institution's
571 mission, the needs of the community it serves, and the desired
572 distinctive capabilities of its graduates; ^(Core)

573
574 IV.A.1.a) The program's aims must be made available to program
575 applicants, residents, and faculty members. ^(Core)

576
577 IV.A.2. competency-based goals and objectives for each educational
578 experience designed to promote progress on a trajectory to
579 autonomous practice. These must be distributed, reviewed, and
580 available to residents and faculty members; ^(Core)

581

Background and Intent: The trajectory to autonomous practice is documented by Milestones evaluation. The Milestones detail the progress of a resident in attaining skill in each competency domain. They are developed by each specialty group and allow evaluation based on observable behaviors. Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific resident.

582
583 IV.A.3. delineation of resident responsibilities for patient care, progressive
584 responsibility for patient management, and graded supervision; ^(Core)

585

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

586
587 IV.A.4. a broad range of structured didactic activities; ^(Core)

588
589 IV.A.4.a) Residents must be provided with protected time to participate
590 in core didactic activities. ^(Core)

591

Background and Intent: It is intended that residents will participate in structured didactic activities. It is recognized that there may be circumstances in which this is not possible. Programs should define core didactic activities for which time is protected and the circumstances in which residents may be excused from these didactic activities. Didactic activities may include, but are not limited to, lectures, conferences, courses, labs, asynchronous learning, simulations, drills, case discussions, grand rounds, didactic teaching, and education in critical appraisal of medical evidence.

592
593 IV.A.5. advancement of residents' knowledge of ethical principles
594 foundational to medical professionalism; and, ^(Core)

595
596 IV.A.6. advancement in the residents' knowledge of the basic principles of
597 scientific inquiry, including how research is designed, conducted,
598 evaluated, explained to patients, and applied to patient care. ^(Core)

599
600
601

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each specialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each specialty.

609
610
611
612
613
614
615
616
617
618

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: ^(Core)

IV.B.1.a) Professionalism

Residents must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

IV.B.1.a).(1) Residents must demonstrate competence in:

IV.B.1.a).(1).(a) compassion, integrity, and respect for others; ^(Core)

IV.B.1.a).(1).(b) responsiveness to patient needs that supersedes self-interest; ^(Core)

Background and Intent: This includes the recognition that under certain circumstances, the interests of the patient may be best served by transitioning care to another provider. Examples include fatigue, conflict or duality of interest, not connecting well with a patient, or when another physician would be better for the situation based on skill set or knowledge base.

619

633
634
635
636
637
638
639

IV.B.1.a).(1).(c) respect for patient privacy and autonomy; ^(Core)

IV.B.1.a).(1).(d) accountability to patients, society, and the profession; ^(Core)

IV.B.1.a).(1).(e) respect and responsiveness to diverse patient populations, including but not limited to diversity in gender, age, culture, race, religion, disabilities, national origin, socioeconomic status, and sexual orientation; ^(Core)

IV.B.1.a).(1).(f) ability to recognize and develop a plan for one's own personal and professional well-being; and, ^(Core)

IV.B.1.a).(1).(g) appropriately disclosing and addressing conflict or duality of interest. ^(Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]’s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality*. *Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician’s well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

640		
641	IV.B.1.b).(1)	Residents must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. ^(Core)
642		
643		
644		
645		
646	IV.B.1.b).(1).(a)	If the prerequisite clinical education is integrated into a 36-month program format, residents must demonstrate competence in:
647		
648		
649		
650	IV.B.1.b).(1).(a).(i)	obtaining a comprehensive medical history;
651		^(Core)
652		
653	IV.B.1.b).(1).(a).(ii)	performing a comprehensive physical examination;
654		^(Core)
655		
656	IV.B.1.b).(1).(a).(iii)	assessing a patient’s medical conditions;
657		^(Core)
658		
659	IV.B.1.b).(1).(a).(iv)	making appropriate use of diagnostic studies and tests;
660		^(Core)
661		
662	IV.B.1.b).(1).(a).(v)	integrating information to develop a differential diagnosis; and,
663		^(Core)
664		
665	IV.B.1.b).(1).(a).(vi)	developing, implementing, and evaluating a treatment plan.
666		^(Core)
667		
668	IV.B.1.b).(1).(b)	Residents must demonstrate competence in:
669		
670	IV.B.1.b).(1).(b).(i)	assessing and responding to individual and population risks for common occupational and environmental disorders;
671		^(Core)
672		
673		
674	IV.B.1.b).(1).(b).(ii)	conducting research for innovative solutions to health problems;
675		^(Core)
676		

677	IV.B.1.b).(1).(b).(iii)	diagnosing and investigating medical problems and medical hazards in the community; (Core)
678		
679		
680		
681	IV.B.1.b).(1).(b).(iv)	directing individuals to needed personal health services; (Core)
682		
683		
684	IV.B.1.b).(1).(b).(v)	informing and educating populations about health threats and risks; (Core)
685		
686		
687	IV.B.1.b).(1).(b).(vi)	planning and evaluating the medical portion of emergency preparedness programs and training exercises; (Core)
688		
689		
690		
691	IV.B.1.b).(1).(b).(vii)	providing clinical preventive medicine services, including the ability to: (Core)
692		
693		
694	IV.B.1.b).(1).(b).(vii).(a)	diagnose and treat medical problems and chronic conditions for both individuals and populations; (Core)
695		
696		
697		
698		
699	IV.B.1.b).(1).(b).(vii).(b)	apply primary, secondary, and tertiary preventive approaches to individual and population-based disease prevention and health promotion; and, (Core)
700		
701		
702		
703		
704		
705	IV.B.1.b).(1).(b).(vii).(c)	evaluate the effectiveness of clinical preventive services for both individuals and populations. (Core)
706		
707		
708		
709	IV.B.1.b).(1).(b).(viii)	developing policies and plans to support individual and community health efforts; (Core)
710		
711		
712		
713	IV.B.1.b).(1).(b).(ix)	applying the principles of ergonomics in a real or simulated workplace setting to reduce or prevent worker injury; (Core)
714		
715		
716		
717	IV.B.1.b).(1).(b).(x)	applying the principles of toxicology in a real or simulated workplace setting to reduce or prevent worker injury; (Core)
718		
719		
720		
721	IV.B.1.b).(1).(b).(xi)	approaching the practice of occupational medicine from an ethical base that promotes the health and welfare of the individual worker in the context of the workplace environment and public health and public safety, including the ability to: (Core)
722		
723		
724		
725		
726		
727		

728		
729	IV.B.1.b).(1).(b).(xi).(a)	apply an ethical approach to workers' rights and privacy in the context of overriding public health and safety; and, (Core)
730		
731		
732		
733		
734	IV.B.1.b).(1).(b).(xi).(b)	conduct a thorough musculoskeletal examination. (Core)
735		
736		
737	IV.B.1.b).(1).(b).(xii)	assembling and working with a team to evaluate and identify workplace causes of injury and illness; (Core)
738		
739		
740		
741	IV.B.1.b).(1).(b).(xiii)	conducting a real or simulated workplace walk-through to identify and mitigate hazards and relay this information to worksite administration; (Core)
742		
743		
744		
745		
746	IV.B.1.b).(1).(b).(xiii).(a)	Residents must apply toxicologic and risk assessment principles in the evaluation of hazards. (Core)
747		
748		
749		
750	IV.B.1.b).(1).(b).(xiv)	developing plans in response to sentinel events using primary, secondary, and tertiary prevention methods; (Core)
751		
752		
753		
754	IV.B.1.b).(1).(b).(xv)	managing the health status of individuals employed in diverse work settings, including; (Core)
755		
756		
757		
758	IV.B.1.b).(1).(b).(xv).(a)	preventing, mitigating, and managing medical problems of workers; and, (Core)
759		
760		
761		
762	IV.B.1.b).(1).(b).(xv).(b)	using appropriate techniques to assess safe and unsafe work practices. (Core)
763		
764		
765		
766	IV.B.1.b).(1).(b).(xvi)	managing workers' compensation insurance documentation and paperwork, including the ability to: (Core)
767		
768		
769		
770	IV.B.1.b).(1).(b).(xvi).(a)	open, manage, and direct workers' compensation treatment plans, and close workers' compensation injury/illness cases following the relevant state, federal, and public workers' compensation insurance rules; and, (Core)
771		
772		
773		
774		
775		
776		
777		

778	IV.B.1.b).(1).(b).(xvi).(b)	apply evidence-based clinical practice guidelines in the treatment and management of workers' compensation cases. (Core)
779		
780		
781		
782		
783	IV.B.1.b).(1).(b).(xvii)	participating in emergency preparedness programs in at least one workplace setting. (Core)
784		
785		
786		
787	IV.B.1.b).(2)	Residents must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. (Core)
788		
789		
790		
791	IV.B.1.c)	Medical Knowledge
792		
793		Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. (Core)
794		
795		
796		
797		
798	IV.B.1.c).(1)	Residents must demonstrate competence in their knowledge of all content areas included in the required graduate courses for completion of the program. (Core)
799		
800		
801		
802	IV.B.1.c).(2)	Residents must demonstrate competence in their knowledge of factors that impact the health of individuals and populations, including:
803		
804		
805		
806	IV.B.1.c).(2).(a)	lifestyle management; and, (Core)
807		
808	IV.B.1.c).(2).(b)	social determinants of health. (Core)
809		
810	IV.B.1.c).(3)	Residents must demonstrate competence in their knowledge of the use of available technology such as telemedicine to reduce health disparities. (Core)
811		
812		
813		
814	IV.B.1.c).(4)	Residents must demonstrate competence in their knowledge of principles of:
815		
816		
817	IV.B.1.c).(4).(a)	industrial hygiene, safety, and ergonomics; (Core)
818

822		
823	IV.B.1.c).(4).(d)	toxicology. (Core)
824		
825	IV.B.1.d)	Practice-based Learning and Improvement
826		
827		Residents must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate
828		

829
830
831

scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. ^(Core)

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a physician develop the habits of mind required to continuously pursue quality improvement, well past the completion of residency.

IV.B.1.e)

Interpersonal and Communication Skills

Residents must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. ^(Core)

IV.B.1.e).(1)

Residents must demonstrate competence in:

- 898 **IV.B.1.e).(1).(a)** communicating effectively with patients,
- 899 families, and the public, as appropriate, across
- 900 a broad range of socioeconomic and cultural
- 901 backgrounds; ^(Core)
- 902
- 903
- 904
- 905 **IV.B.1.e).(1).(b)** communicating effectively with physicians,
- 906 other health professionals, and health-related
- 907 agencies; ^(Core)
- 908
- 909 **IV.B.1.e).(1).(c)** working effectively as a member or leader of a
- 910 health care team or other professional group;
- 911 ^(Core)
- 912
- 913 **IV.B.1.e).(1).(d)** educating patients, families, students,
- 914 residents, and other health professionals; ^(Core)
- 915
- 916 **IV.B.1.e).(1).(e)** acting in a consultative role to other physicians
- 917 and health professionals; and, ^(Core)
- 918
- 919 **IV.B.1.e).(1).(f)** maintaining comprehensive, timely, and legible
- 920 medical records, if applicable. ^(Core)

921
922 **IV.B.1.e).(2)** Residents must learn to communicate with patients
923 and families to partner with them to assess their care
924 goals, including, when appropriate, end-of-life goals.
925 (Core)
926

Background and Intent: When there are no more medications or interventions that can achieve a patient's goals or provide meaningful improvements in quality or length of life, a discussion about the patient's goals, values, and choices surrounding the end of life is one of the most important conversations that can occur. Residents must learn to participate effectively and compassionately in these meaningful human interactions, for the sake of their patients and themselves.

Programs may teach this skill through direct clinical experience, simulation, or other means of active learning.

927
928 **IV.B.1.e).(3)** Residents must demonstrate competence in:

929 **IV.B.1.e).(3).(a)** advising employers concerning summary results or
930 trends in disability, disease, or risk that may have
931 public health significance; and, (Core)
932

933 **IV.B.1.e).(3).(b)** reporting outcome findings of clinical significance
934 and surveillance evaluations to affected workers as
935 ethically required. (Core)
936
937

938 **IV.B.1.f)** **Systems-based Practice**

939 Residents must demonstrate an awareness of and
940 responsiveness to the larger context and system of health
941 care, including the social determinants of health, as well as
942 the ability to call effectively on other resources to provide
943 optimal health care. (Core)
944

945 **IV.B.1.f).(1)** Residents must demonstrate competence in:

946 **IV.B.1.f).(1).(a)** working effectively in various health care
947 delivery settings and systems relevant to their
948 clinical specialty; (Core)
949
950
951

Background and Intent: Medical practice occurs in the context of an increasingly complex clinical care environment where optimal patient care requires attention to compliance with external and internal administrative and regulatory requirements.

952
953 **IV.B.1.f).(1).(b)** coordinating patient care across the health care
954 continuum and beyond as relevant to their
955 clinical specialty; (Core)
956

Background and Intent: Every patient deserves to be treated as a whole person. Therefore it is recognized that any one component of the health care system does not

meet the totality of the patient's needs. An appropriate transition plan requires coordination and forethought by an interdisciplinary team. The patient benefits from proper care and the system benefits from proper use of resources.

957

1022		
1023		
1024	IV.C.	Curriculum Organization and Resident Experiences
1025		
1026	IV.C.1.	The curriculum must be structured to optimize resident educational experiences, the length of these experiences, and supervisory continuity. ^(Core)
1027		
1028		
1029		
1030	IV.C.1.a)	Rotations in direct patient care should be of sufficient length to allow residents to develop skills in providing ongoing, prevention-oriented care. ^{(Detail)†}
1031		
1032		
1033		

Background and Intent: In some specialties, frequent rotational transitions, inadequate continuity of faculty member supervision, and dispersed patient locations within the hospital have adversely affected optimal resident education and effective team-based care. The need for patient care continuity varies from specialty to specialty and by clinical situation, and may be addressed by the individual Review Committee.

1034		
1035	IV.C.2.	The program must provide instruction and experience in pain management if applicable for the specialty, including recognition of the signs of addiction. ^(Core)
1036		
1037		
1038		
1039	IV.C.3.	If the prerequisite clinical education is integrated into a 36-month program format, the PGY-1 must provide broad education in fundamental clinical skills of medicine relevant to the practice of preventive medicine. ^(Core)
1040		
1041		
1042		
1043	IV.C.3.a)	The program director must oversee and ensure the quality of didactic and clinical education in the PGY-1. ^(Core)
1044		
1045		
1046	IV.C.3.b)	At least 10 months of the PGY-1 must include experience providing direct patient care in the inpatient and outpatient settings in family medicine, internal medicine, obstetrics and gynecology, pediatrics, or surgery. ^(Core)
1047		
1048		
1049		

1050		
1051	IV.C.4.	The program must assess the knowledge, skills, and competence of each
1052		incoming resident as they relate to the educational goals of the program.
1053		(Core)
1054		
1055	IV.C.4.a)	This should include a self-assessment, an in-service examination,
1056		and a structured interview or other method to assess knowledge,
1057		skills, and competence. (Detail)
1058		
1059	IV.C.4.b)	The assessment should be used by the program director and
1060		faculty members to guide the development of an individualized
1061		educational plan for each resident, which should: (Detail)
1062		
1063	IV.C.4.b).(1)	direct the acquisition of a core set of competencies, skills,
1064		and knowledge appropriate to the objectives of the
1065		individual resident based on assessment of each resident;
1066		(Detail)
1067		
1068	IV.C.4.b).(2)	denote the courses, rotations, and activities to which the
1069		resident will be assigned to develop the designated clinical
1070		skills, knowledge, and competencies; and, (Detail)
1071		
1072	IV.C.4.b).(3)	be reviewed as part of the semiannual evaluation. (Detail)
1073		
1074	IV.C.5.	Residents must have educational experiences within a patient care
1075		environment that address direct clinical issues relevant to occupational
1076		and environmental medicine. (Core)
1077		
1078	IV.C.5.a)	Each resident must have progressive responsibility for direct
1079		patient care and the management of health and provision of health
1080		care for a defined population. (Core)
1081		
1082	IV.C.6.	Residents must complete a Master of Public Health or another equivalent
1083		degree program prior to completion of the residency program. (Core)
1084		
1085	IV.C.6.a)	All residents must complete graduate-level courses that include
1086		the five content areas of: epidemiology; biostatistics; health
1087		services management and administration; environmental health;
1088		and the behavioral aspects of health. (Core)
1089		
1090	IV.C.7.	Didactic conferences must be structured to facilitate interactions between
1091		faculty members and residents. (Detail)
1092		
1093	IV.C.8.	Resident education must take place in settings that provide opportunities
1094		for residents to manage the clinical, scientific, social, legal, and
1095		administrative issues from the perspectives of workers, employers, and
1096		regulatory or legal authorities. (Core)
1097		
1098	IV.C.8.a)	Residents must have a minimum of four months of direct patient
1099		care experience in an occupational setting during each year of the
1100		program. (Core)

- 1101
 1102 IV.C.8.b) Residents' clinical experiences must include participation in the
 1103 following learning activities:
 1104
 1105 IV.C.8.b).(1) clinical occupational and environmental medicine; (Core)
 1106
 1107 IV.C.8.b).(2) disaster preparedness and emergency management; (Core)
 1108
 1109 IV.C.8.b).(3) environmental health; (Core)

 1123 IV.C.8.b).(9) work fitness and disability integration; and, (Core)
 1124
 1125 IV.C.8.b).(10) worker health and productivity. (Core)

1126
 1127 **IV.D. Scholarship**

1128
 1129 ***Medicine is both an art and a science. The physician is a humanistic***
 1130 ***scientist who cares for patients. This requires the ability to think critically,***
 1131 ***evaluate the literature, appropriately assimilate new knowledge, and***
 1132 ***practice lifelong learning. The program and faculty must create an***
 1133 ***environment that fosters the acquisition of such skills through resident***
 1134 ***participation in scholarly activities. Scholarly activities may include***
 1135 ***discovery, integration, application, and teaching.***

1136
 1137 ***The ACGME recognizes the diversity of residencies and anticipates that***
 1138 ***programs prepare physicians for a variety of roles, including clinicians,***
 1139 ***scientists, and educators. It is expected that the program's scholarship will***
 1140 ***reflect its mission(s) and aims, and the needs of the community it serves.***
 1141 ***For example, some programs may concentrate their scholarly activity on***
 1142 ***quality improvement, population health, and/or teaching, while other***
 1143 ***programs might choose to utilize more classic forms of biomedical***
 1144 ***research as the focus for scholarship.***

1145
 1146 **IV.D.1. Program Responsibilities**

- 1147
 1148 **IV.D.1.a) The program must demonstrate evidence of scholarly**
 1149 **activities consistent with its mission(s) and aims. (Core)**
 1150

- 1151 **IV.D.1.b)** **The program, in partnership with its Sponsoring Institution,**
 1152 **must allocate adequate resources to facilitate resident and**
 1153 **faculty involvement in scholarly activities.** ^(Core)
 1154
 1155 **IV.D.1.b).(1)** This includes providing funds for each resident to attend at
 1156 least one national professional meeting with the
 1157 opportunity to present original scholarship. ^(Detail)
 1158
 1159 **IV.D.1.c)** **The program must advance residents' knowledge and**
 1160 **practice of the scholarly approach to evidence-based patient**
 1161 **care.** ^(Core)
 1162

Background and Intent: The scholarly approach can be defined as a synthesis of teaching, learning, and research with the aim of encouraging curiosity and critical thinking based on an understanding of physiology, pathophysiology, differential diagnosis, treatments, treatment alternatives, efficiency of care, and patient safety. While some faculty members are responsible for fulfilling the traditional elements of scholarship through research, integration, and teaching, all faculty members are responsible for advancing residents' scholarly approach to patient care.

Elements of a scholarly approach to patient care include:

- **Asking meaningful questions to stimulate residents to utilize learning resources to create a differential diagnosis, a diagnostic algorithm, and treatment plan**
- **Challenging the evidence that the residents use to reach their medical decisions so that they understand the benefits and limits of the medical literature**
- **When appropriate, dissemination of scholarly learning in a peer-reviewed manner (publication or presentation)**
- **Improving resident learning by encouraging them to teach using a scholarly approach**

The scholarly approach to patient care begins with curiosity, is grounded in the principles of evidence-based medicine, expands the knowledge base through dissemination, and develops the habits of lifelong learning by encouraging residents to be scholarly teachers.

- 1163
 1164 **IV.D.2. Faculty Scholarly Activity**
 1165
 1166 **IV.D.2.a)** **Among their scholarly activity, programs must demonstrate**
 1167 **accomplishments in at least three of the following domains:**
 1168 ^(Core)
 1169
 1170 • **Research in basic science, education, translational**
 1171 **science, patient care, or population health**
 1172 • **Peer-reviewed grants**
 1173 • **Quality improvement and/or patient safety initiatives**
 1174 • **Systematic reviews, meta-analyses, review articles,**
 1175 **chapters in medical textbooks, or case reports**
 1176 • **Creation of curricula, evaluation tools, didactic**
 1177 **educational activities, or electronic educational**
 1178 **materials**

- Contribution to professional committees, educational organizations, or editorial boards
- Innovations in education

IV.D.2.b) The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the residents’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

IV.D.2.b).(1) faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor; ^{(Outcome)‡}

IV.D.2.b).(2) peer-reviewed publication. ^(Outcome)

IV.D.3. Resident Scholarly Activity

IV.D.3.a) Residents must participate in scholarship. ^(Core)

V. Evaluation

V.A. Resident Evaluation

V.A.1. Feedback and Evaluation

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower residents to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring resident learning* and providing ongoing feedback that can be used by residents to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- residents identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where residents are struggling and address problems immediately

Summative evaluation is *evaluating a resident's learning* by comparing the residents against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when residents or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the residency program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a neophyte physician to one with growing expertise.

1209
1210
1211
1212
1213

- V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on resident performance during each rotation or similar educational assignment. ^(Core)**

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Residents require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for residents who have deficiencies that may result in a poor final rotation evaluation.

1214
1215
1216
1217
1218
1219
1220
1221
1222
1223

1225
1226
1227
1228
1229
1230
1231
1232
1233
1234

- V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)**
- V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)**
- V.A.1.b).(2) Longitudinal experiences, such as continuity clinic in the context of other clinical responsibilities, must be evaluated at least every three months and at completion. ^(Core)**
- V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the specialty-specific Milestones, and must: ^(Core)**
- V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, ^(Core)**

- 1235 **V.A.1.c).(2)** provide that information to the Clinical Competency
 1236 Committee for its synthesis of progressive resident
 1237 performance and improvement toward unsupervised
 1238 practice. ^(Core)
 1239
- 1240 **V.A.1.d)** The program director or their designee, with input from the
 1241 Clinical Competency Committee, must:
 1242
- 1243 **V.A.1.d).(1)** meet with and review with each resident their
 1244 documented semi-annual evaluation of performance,
 1245 including progress along the specialty-specific
 1246 Milestones; ^(Core)
 1247
- 1248 **V.A.1.d).(2)** assist residents in developing individualized learning
 1249 plans to capitalize on their strengths and identify areas
 1250 for growth; and, ^(Core)
 1251
- 1252 **V.A.1.d).(3)** develop plans for residents failing to progress,
 1253 following institutional policies and procedures. ^(Core)
 1254

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a resident's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Residents should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, residents should develop an individualized learning plan.

Residents who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the resident, will take a variety of forms based on the specific learning needs of the resident. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of resident progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1255
- 1256 **V.A.1.e)** At least annually, there must be a summative evaluation of
 1257 each resident that includes their readiness to progress to the
 1258 next year of the program, if applicable. ^(Core)
 1259
- 1260 **V.A.1.f)** The evaluations of a resident's performance must be
 1261 accessible for review by the resident. ^(Core)
 1262
- 1263 **V.A.2.** Final Evaluation
- 1264
- 1265 **V.A.2.a)** The program director must provide a final evaluation for each
 1266 resident upon completion of the program. ^(Core)
 1267

- 1268 **V.A.2.a).(1)** The specialty-specific Milestones, and when applicable
1269 the specialty-specific Case Logs, must be used as
1270 tools to ensure residents are able to engage in
1271 autonomous practice upon completion of the program.
1272 (Core)
1273
- 1274 **V.A.2.a).(2)** The final evaluation must:
- 1275
- 1276 **V.A.2.a).(2).(a)** become part of the resident’s permanent record
1277 maintained by the institution, and must be
1278 accessible for review by the resident in
1279 accordance with institutional policy; (Core)
1280
- 1281 **V.A.2.a).(2).(b)** verify that the resident has demonstrated the
1282 knowledge, skills, and behaviors necessary to
1283 enter autonomous practice; (Core)
1284
- 1285 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
1286 Competency Committee; and, (Core)
1287
- 1288 **V.A.2.a).(2).(d)** be shared with the resident upon completion of
1289 the program. (Core)
1290
- 1291 **V.A.3.** A Clinical Competency Committee must be appointed by the
1292 program director. (Core)
1293
- 1294 **V.A.3.a)** At a minimum, the Clinical Competency Committee must
1295 include three members of the program faculty, at least one of
1296 whom is a core faculty member. (Core)
1297
- 1298 **V.A.3.a).(1)** Additional members must be faculty members from
1299 the same program or other programs, or other health
1300 professionals who have extensive contact and
1301 experience with the program’s residents. (Core)
1302

Background and Intent: The requirements regarding the Clinical Competency Committee do not preclude or limit a program director’s participation on the Clinical Competency Committee. The intent is to leave flexibility for each program to decide the best structure for its own circumstances, but a program should consider: its program director’s other roles as resident advocate, advisor, and confidante; the impact of the program director’s presence on the other Clinical Competency Committee members’ discussions and decisions; the size of the program faculty; and other program-relevant factors. The program director has final responsibility for resident evaluation and promotion decisions.

Program faculty may include more than the physician faculty members, such as other physicians and non-physicians who teach and evaluate the program’s residents. There may be additional members of the Clinical Competency Committee. Chief residents who have completed core residency programs in their specialty may be members of the Clinical Competency Committee.

1303

- 1304 **V.A.3.b)** **The Clinical Competency Committee must:**
 1305
 1306 **V.A.3.b).(1)** **review all resident evaluations at least semi-annually;**
 1307 **(Core)**
 1308
 1309 **V.A.3.b).(2)** **determine each resident’s progress on achievement of**
 1310 **the specialty-specific Milestones; and, ^(Core)**
 1311
 1312 **V.A.3.b).(3)** **meet prior to the residents’ semi-annual evaluations**
 1313 **and advise the program director regarding each**
 1314 **resident’s progress. ^(Core)**
 1315
 1316 **V.B. Faculty Evaluation**
 1317
 1318 **V.B.1. The program must have a process to evaluate each faculty**
 1319 **member’s performance as it relates to the educational program at**
 1320 **least annually. ^(Core)**
 1321

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term “faculty” may be applied to physicians within a given institution for other reasons, it is applied to residency program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the resident and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with residents desire feedback on their education, clinical care, and research. If a faculty member does not interact with residents, feedback is not required. With regard to the diverse operating environments and configurations, the residency program director may need to work with others to determine the effectiveness of the program’s faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the residents in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1322
 1323 **V.B.1.a)** **This evaluation must include a review of the faculty member’s**
 1324 **clinical teaching abilities, engagement with the educational**
 1325 **program, participation in faculty development related to their**
 1326 **skills as an educator, clinical performance, professionalism,**
 1327 **and scholarly activities. ^(Core)**
 1328
 1329 **V.B.1.b)** **This evaluation must include written, anonymous, and**
 1330 **confidential evaluations by the residents. ^(Core)**
 1331
 1332 **V.B.2. Faculty members must receive feedback on their evaluations at least**
 1333 **annually. ^(Core)**
 1334

1335 **V.B.3. Results of the faculty educational evaluations should be**
1336 **incorporated into program-wide faculty development plans. (Core)**
1337

Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the residents’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1338
1339 **V.C. Program Evaluation and Improvement**
1340

1341 **V.C.1. The program director must appoint the Program Evaluation**
1342 **Committee to conduct and document the Annual Program**
1343 **Evaluation as part of the program’s continuous improvement**
1344 **process. (Core)**
1345

1346 **V.C.1.a) The Program Evaluation Committee must be composed of at**
1347 **least two program faculty members, at least one of whom is a**
1348 **core faculty member, and at least one resident. (Core)**
1349

1350 **V.C.1.b) Program Evaluation Committee responsibilities must include:**
1351

1352 **V.C.1.b).(1) acting as an advisor to the program director, through**
1353 **program oversight; (Core)**
1354

1355 **V.C.1.b).(2) review of the program’s self-determined goals and**
1356 **progress toward meeting them; (Core)**
1357

1358 **V.C.1.b).(3) guiding ongoing program improvement, including**
1359 **development of new goals, based upon outcomes;**
1360 **and, (Core)**
1361

1362 **V.C.1.b).(4) review of the current operating environment to identify**
1363 **strengths, challenges, opportunities, and threats as**
1364 **related to the program’s mission and aims. (Core)**
1365

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of residents and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program’s progress toward achievement of its goals and aims.

1366
1367 **V.C.1.c) The Program Evaluation Committee should consider the**
1368 **following elements in its assessment of the program:**
1369

1370 **V.C.1.c).(1) curriculum; (Core)**
1371

1372 **V.C.1.c).(2) outcomes from prior Annual Program Evaluation(s);**
1373 **(Core)**

1374		
1375	V.C.1.c).(3)	ACGME letters of notification, including citations, Areas for Improvement, and comments; ^(Core)
1376		
1377		
1378	V.C.1.c).(4)	quality and safety of patient care; ^(Core)
1379		
1380	V.C.1.c).(5)	aggregate resident and faculty:
1381		
1382	V.C.1.c).(5).(a)	well-being; ^(Core)
1383		
1384	V.C.1.c).(5).(b)	recruitment and retention; ^(Core)
1385		
1386	V.C.1.c).(5).(c)	workforce diversity; ^(Core)
1387		
1388	V.C.1.c).(5).(d)	engagement in quality improvement and patient safety; ^(Core)
1389		
1390		
1391	V.C.1.c).(5).(e)	scholarly activity; ^(Core)
1392		
1393	V.C.1.c).(5).(f)	ACGME Resident and Faculty Surveys; and, ^(Core)
1394		
1395		
1396	V.C.1.c).(5).(g)	written evaluations of the program. ^(Core)
1397		
1398	V.C.1.c).(6)	aggregate resident:
1399		
1400	V.C.1.c).(6).(a)	achievement of the Milestones; ^(Core)
1401		
1402	V.C.1.c).(6).(b)	in-training examinations (where applicable); ^(Core)
1403		
1404		
1405	V.C.1.c).(6).(c)	board pass and certification rates; and, ^(Core)
1406		
1407	V.C.1.c).(6).(d)	graduate performance. ^(Core)
1408		
1409	V.C.1.c).(7)	aggregate faculty:
1410		
1411	V.C.1.c).(7).(a)	evaluation; and, ^(Core)
1412		
1413	V.C.1.c).(7).(b)	professional development. ^(Core)
1414		
1415	V.C.1.d)	The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. ^(Core)
1416		
1417		
1418		
1419	V.C.1.e)	The annual review, including the action plan, must:
1420		
1421	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the residents; and, ^(Core)
1422		
1423		
1424	V.C.1.e).(2)	be submitted to the DIO. ^(Core)

1425
1426 **V.C.2.** **The program must complete a Self-Study prior to its 10-Year**
1427 **Accreditation Site Visit.** *(Core)*

1428
1429 **V.C.2.a)** **A summary of the Self-Study must be submitted to the DIO.**
1430 *(Core)*
1431

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the residency program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1432
1433 **V.C.3.** ***One goal of ACGME-accredited education is to educate physicians***
1434 ***who seek and achieve board certification. One measure of the***
1435 ***effectiveness of the educational program is the ultimate pass rate.***

1436
1437 ***The program director should encourage all eligible program***
1438 ***graduates to take the certifying examination offered by the***
1439 ***applicable American Board of Medical Specialties (ABMS) member***
1440 ***board or American Osteopathic Association (AOA) certifying board.***

1441
1442 **V.C.3.a)** **For specialties in which the ABMS member board and/or AOA**
1443 **certifying board offer(s) an annual written exam, in the**
1444 **preceding three years, the program’s aggregate pass rate of**
1445 **those taking the examination for the first time must be higher**
1446 **than the bottom fifth percentile of programs in that specialty.**
1447 *(Outcome)*

1448
1449 **V.C.3.b)** **For specialties in which the ABMS member board and/or AOA**
1450 **certifying board offer(s) a biennial written exam, in the**
1451 **preceding six years, the program’s aggregate pass rate of**
1452 **those taking the examination for the first time must be higher**
1453 **than the bottom fifth percentile of programs in that specialty.**
1454 *(Outcome)*

1455
1456 **V.C.3.c)** **For specialties in which the ABMS member board and/or AOA**
1457 **certifying board offer(s) an annual oral exam, in the preceding**
1458 **three years, the program’s aggregate pass rate of those**
1459 **taking the examination for the first time must be higher than**
1460 **the bottom fifth percentile of programs in that specialty.**
1461 *(Outcome)*

1462
1463 **V.C.3.d)** **For specialties in which the ABMS member board and/or AOA**
1464 **certifying board offer(s) a biennial oral exam, in the preceding**

1465 six years, the program's aggregate pass rate of those taking
1466 the examination for the first time must be higher than the
1467 bottom fifth percentile of programs in that specialty. ^(Outcome)

1468
1469 **V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program
1470 whose graduates over the time period specified in the
1471 requirement have achieved an 80 percent pass rate will have
1472 met this requirement, no matter the percentile rank of the
1473 program for pass rate in that specialty. ^(Outcome)

1474

Background and Intent: Setting a single standard for pass rate that works across specialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are specialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1475
1476 **V.C.3.f)** Programs must report, in ADS, board certification status
1477 annually for the cohort of board-eligible residents that
1478 graduated seven years earlier. ^(Core)

1479

Background and Intent: It is essential that residency programs demonstrate knowledge and skill transfer to their residents. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from residency graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

1480
1481 **VI. The Learning and Working Environment**

1482
1483 ***Residency education must occur in the context of a learning and working***
1484 ***environment that emphasizes the following principles:***

- 1485
- 1486 • ***Excellence in the safety and quality of care rendered to patients by residents***
1487 ***today***
 - 1488
 - 1489 • ***Excellence in the safety and quality of care rendered to patients by today's***
1490 ***residents in their future practice***

1491
1492
1493
1494
1495
1496
1497
1498
1499
1500
1501

- ***Excellence in professionalism through faculty modeling of:***
 - ***the effacement of self-interest in a humanistic environment that supports the professional development of physicians***
 - ***the joy of curiosity, problem-solving, intellectual rigor, and discovery***
- ***Commitment to the well-being of the students, residents, faculty members, and all members of the health care team***

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and residents more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and residents to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, resident education, and resident well-being. The requirements are intended to support the development of a sense of professionalism by encouraging residents to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for residents to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and resident and faculty member well-being. The requirements are intended to support programs and residents as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and residents. With this flexibility comes a responsibility for residents and faculty members to recognize the need to hand off care of a patient to another provider when a resident is too fatigued to provide safe, high quality care and for programs to ensure that residents remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare residents to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by residents who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

1517 **Residents must demonstrate the ability to analyze the care they**
1518 **provide, understand their roles within health care teams, and play an**
1519 **active role in system improvement processes. Graduating residents**
1520 **will apply these skills to critique their future unsupervised practice**
1521 **and effect quality improvement measures.**

1522
1523 **It is necessary for residents and faculty members to consistently**
1524 **work in a well-coordinated manner with other health care**
1525 **professionals to achieve organizational patient safety goals.**

1526
1527 **VI.A.1.a) Patient Safety**

1528
1529 **VI.A.1.a).(1) Culture of Safety**

1530
1531 **A culture of safety requires continuous identification**
1532 **of vulnerabilities and a willingness to transparently**
1533 **deal with them. An effective organization has formal**
1534 **mechanisms to assess the knowledge, skills, and**
1535 **attitudes of its personnel toward safety in order to**
1536 **identify areas for improvement.**

1537
1538 **VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows**
1539 **must actively participate in patient safety**
1540 **systems and contribute to a culture of safety.**
1541 **(Core)**

1542
1543 **VI.A.1.a).(1).(b) The program must have a structure that**
1544 **promotes safe, interprofessional, team-based**
1545 **care. (Core)**

1546
1547 **VI.A.1.a).(2) Education on Patient Safety**

1548
1549 **Programs must provide formal educational activities**
1550 **that promote patient safety-related goals, tools, and**
1551 **techniques. (Core)**

Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.

1553
1554 **VI.A.1.a).(3) Patient Safety Events**

1555
1556 **Reporting, investigation, and follow-up of adverse**
1557 **events, near misses, and unsafe conditions are pivotal**
1558 **mechanisms for improving patient safety, and are**
1559 **essential for the success of any patient safety**
1560 **program. Feedback and experiential learning are**
1561 **essential to developing true competence in the ability**
1562 **to identify causes and institute sustainable systems-**
1563 **based changes to ameliorate patient safety**
1564 **vulnerabilities.**

1565

1566	VI.A.1.a).(3).(a)	Residents, fellows, faculty members, and other clinical staff members must:
1567		
1568		
1569	VI.A.1.a).(3).(a).(i)	know their responsibilities in reporting patient safety events at the clinical site;
1570		(Core)
1571		
1572		
1573	VI.A.1.a).(3).(a).(ii)	know how to report patient safety events, including near misses, at the clinical site; and,
1574		(Core)
1575		
1576		
1577	VI.A.1.a).(3).(a).(iii)	be provided with summary information of their institution’s patient safety reports.
1578		(Core)
1579		
1580		
1581	VI.A.1.a).(3).(b)	Residents must participate as team members in real and/or simulated interprofessional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions.

1605	VI.A.1.b)	Quality Improvement
1606		
1607	VI.A.1.b).(1)	Education in Quality Improvement
1608		
1609		<i>A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary in order for health care professionals to achieve quality improvement goals.</i>
1610		
1611		
1612		
1613		
1614	VI.A.1.b).(1).(a)	Residents must receive training and experience in quality improvement processes, including an understanding of health care disparities.
1615		(Core)
1616		

1617		
1618	VI.A.1.b).(2)	Quality Metrics
1619		
1620		<i>Access to data is essential to prioritizing activities for</i>
1621		<i>care improvement and evaluating success of</i>
1622		<i>improvement efforts.</i>
1623		
1624	VI.A.1.b).(2).(a)	Residents and faculty members must receive
1625		data on quality metrics and benchmarks related
1626		to their patient populations. ^(Core)
1627		
1628	VI.A.1.b).(3)	Engagement in Quality Improvement Activities
1629		
1630		<i>Experiential learning is essential to developing the</i>
1631		<i>ability to identify and institute sustainable systems-</i>
1632		<i>based changes to improve patient care.</i>
1633		
1634	VI.A.1.b).(3).(a)	Residents must have the opportunity to
1635		participate in interprofessional quality
1636		improvement activities. ^(Core)
1637		
1638	VI.A.1.b).(3).(a).(i)	This should include activities aimed at
1639		reducing health care disparities. ^(Detail)
1640		
1641	VI.A.2.	Supervision and Accountability
1642		
1643	VI.A.2.a)	<i>Although the attending physician is ultimately responsible for</i>
1644		<i>the care of the patient, every physician shares in the</i>
1645		<i>responsibility and accountability for their efforts in the</i>
1646		<i>provision of care. Effective programs, in partnership with</i>
1647		<i>their Sponsoring Institutions, define, widely communicate,</i>
1648		<i>and monitor a structured chain of responsibility and</i>
1649		<i>accountability as it relates to the supervision of all patient</i>
1650		<i>care.</i>
1651		
1652		<i>Supervision in the setting of graduate medical education</i>
1653		<i>provides safe and effective care to patients; ensures each</i>
1654		<i>resident's development of the skills, knowledge, and attitudes</i>
1655		<i>required to enter the unsupervised practice of medicine; and</i>
1656		<i>establishes a foundation for continued professional growth.</i>
1657		
1658	VI.A.2.a).(1)	Each patient must have an identifiable and
1659		appropriately-credentialed and privileged attending
1660		physician (or licensed independent practitioner as
1661		specified by the applicable Review Committee) who is
1662		responsible and accountable for the patient's care.
1663		^(Core)
1664		
1665	VI.A.2.a).(1).(a)	This information must be available to residents,
1666		faculty members, other members of the health
1667		care team, and patients. ^(Core)

1668
1669 VI.A.2.a).(1).(b) Residents and faculty members must inform
1670 each patient of their respective roles in that
1671 patient's care when providing direct patient
1672 care. ^(Core)
1673

1674 VI.A.2.b) *Supervision may be exercised through a variety of methods.*
1675 *For many aspects of patient care, the supervising physician*
1676 *may be a more advanced resident or fellow. Other portions of*
1677 *care provided by the resident can be adequately supervised*
1678 *by the appropriate availability of the supervising faculty*
1679 *member, fellow, or senior resident physician, either on site or*
1680 *by means of telecommunication technology. Some activities*
1681 *require the physical presence of the supervising faculty*
1682 *member. In some circumstances, supervision may include*
1683 *post-hoc review of resident-delivered care with feedback.*
1684

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of resident patient interactions, education and training locations, and resident skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a resident gains more experience, even with the same patient condition or procedure. All residents have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1685
1686 VI.A.2.b).(1) The program must demonstrate that the appropriate
1687 level of supervision in place for all residents is based
1688 on each resident's level of training and ability, as well
1689 as patient complexity and acuity. Supervision may be
1690 exercised through a variety of methods, as appropriate
1691 to the situation. ^(Core)
1692

1693 VI.A.2.b).(2) The program must define when physical presence of a
1694 supervising physician is required. ^(Core)
1695

1696 VI.A.2.c) Levels of Supervision
1697

1698 To promote appropriate resident supervision while providing
1699 for graded authority and responsibility, the program must use
1700 the following classification of supervision: ^(Core)
1701

1702 VI.A.2.c).(1) Direct Supervision:
1703

1704 VI.A.2.c).(1).(a) the supervising physician is physically present
1705 with the resident during the key portions of the
1706 patient interaction; or, ^(Core)
1707

1708	VI.A.2.c).(1).(a).(i)	PGY-1 residents must initially be supervised directly, only as described in VI.A.2.c).(1).(a). ^(Core)
1709		
1710		
1711		
1712	VI.A.2.c).(1).(b)	the supervising physician and/or patient is not physically present with the resident and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. ^(Core)
1713		
1714		
1715		
1716		
1717		
1718	VI.A.2.c).(2)	Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the resident for guidance and is available to provide appropriate direct supervision. ^(Core)
1719		
1720		
1721		
1722		
1723		
1724	VI.A.2.c).(3)	Oversight – the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. ^(Core)
1725		
1726		
1727		
1728	VI.A.2.d)	The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each resident must be assigned by the program director and faculty members. ^(Core)
1729		
1730		
1731		
1732		
1733	VI.A.2.d).(1)	The program director must evaluate each resident’s abilities based on specific criteria, guided by the Milestones. ^(Core)
1734		
1735		
1736		
1737	VI.A.2.d).(2)	Faculty members functioning as supervising physicians must delegate portions of care to residents based on the needs of the patient and the skills of each resident. ^(Core)
1738		
1739		
1740		
1741		
1742	VI.A.2.d).(3)	Senior residents or fellows should serve in a supervisory role to junior residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow. ^(Detail)
1743		
1744		
1745		
1746		
1747		
1748	VI.A.2.e)	Programs must set guidelines for circumstances and events in which residents must communicate with the supervising faculty member(s). ^(Core)
1749		
1750		
1751		
1752	VI.A.2.e).(1)	Each resident must know the limits of their scope of authority, and the circumstances under which the resident is permitted to act with conditional independence. ^(Outcome)
1753		
1754		
1755		
1756		

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

1757
1758 **VI.A.2.f) Faculty supervision assignments must be of sufficient**
1759 **duration to assess the knowledge and skills of each resident**
1760 **and to delegate to the resident the appropriate level of patient**
1761 **care authority and responsibility.** (Core)

1762
1763 **VI.B. Professionalism**

1764
1765 **VI.B.1. Programs, in partnership with their Sponsoring Institutions, must**
1766 **educate residents and faculty members concerning the professional**
1767 **responsibilities of physicians, including their obligation to be**
1768 **appropriately rested and fit to provide the care required by their**
1769 **patients.** (Core)

1770
1771 **VI.B.2. The learning objectives of the program must:**

1772
1773 **VI.B.2.a) be accomplished through an appropriate blend of supervised**
1774 **patient care responsibilities, clinical teaching, and didactic**
1775 **educational events;** (Core)

1776
1777 **VI.B.2.b) be accomplished without excessive reliance on residents to**
1778 **fulfill non-physician obligations; and,** (Core)
1779

Background and Intent: Routine reliance on residents to fulfill non-physician obligations increases work compression for residents and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that residents may be expected to do any of these things on occasion when the need arises, these activities should not be performed by residents routinely and must be kept to a minimum to optimize resident education.

1780
1781 **VI.B.2.c) ensure manageable patient care responsibilities.** (Core)
1782

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression, especially at the PGY-1 level.

1783
1784 **VI.B.3. The program director, in partnership with the Sponsoring Institution,**
1785 **must provide a culture of professionalism that supports patient**
1786 **safety and personal responsibility.** (Core)

- 1787
 1788 **VI.B.4. Residents and faculty members must demonstrate an understanding**
 1789 **of their personal role in the:**
 1790
 1791 **VI.B.4.a) provision of patient- and family-centered care;** (Outcome)
 1792
 1793 **VI.B.4.b) safety and welfare of patients entrusted to their care,**
 1794 **including the ability to report unsafe conditions and adverse**
 1795 **events;** (Outcome)
 1796

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the resident.

- 1797
 1798 **VI.B.4.c) assurance of their fitness for work, including:** (Outcome)
 1799

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and residents to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, residents, and other members of the care team to be observant, to intervene, and/or to escalate their concern about resident and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

- 1800
 1801 **VI.B.4.c).(1) management of their time before, during, and after**
 1802 **clinical assignments; and,** (Outcome)
 1803
 1804 **VI.B.4.c).(2) recognition of impairment, including from illness,**
 1805 **fatigue, and substance use, in themselves, their peers,**
 1806 **and other members of the health care team.** (Outcome)
 1807
 1808 **VI.B.4.d) commitment to lifelong learning;** (Outcome)
 1809
 1810 **VI.B.4.e) monitoring of their patient care performance improvement**
 1811 **indicators; and,** (Outcome)
 1812
 1813 **VI.B.4.f) accurate reporting of clinical and educational work hours,**
 1814 **patient outcomes, and clinical experience data.** (Outcome)
 1815
 1816 **VI.B.5. All residents and faculty members must demonstrate**
 1817 **responsiveness to patient needs that supersedes self-interest. This**
 1818 **includes the recognition that under certain circumstances, the best**
 1819 **interests of the patient may be served by transitioning that patient's**
 1820 **care to another qualified and rested provider.** (Outcome)
 1821
 1822 **VI.B.6. Programs, in partnership with their Sponsoring Institutions, must**
 1823 **provide a professional, equitable, respectful, and civil environment**
 1824 **that is free from discrimination, sexual and other forms of**
 1825 **harassment, mistreatment, abuse, or coercion of students,**
 1826 **residents, faculty, and staff.** (Core)
 1827

1828 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1829 have a process for education of residents and faculty regarding
1830 unprofessional behavior and a confidential process for reporting,
1831 investigating, and addressing such concerns. ^(Core)
1832

1833 VI.C. Well-Being
1834

1835 *Psychological, emotional, and physical well-being are critical in the*
1836 *development of the competent, caring, and resilient physician and require*
1837 *proactive attention to life inside and outside of medicine. Well-being*
1838 *requires that physicians retain the joy in medicine while managing their*
1839 *own real-life stresses. Self-care and responsibility to support other*
1840 *members of the health care team are important components of*
1841 *professionalism; they are also skills that must be modeled, learned, and*
1842 *nurtured in the context of other aspects of residency training.*
1843

1844 *Residents and faculty members are at risk for burnout and depression.*
1845 *Programs, in partnership with their Sponsoring Institutions, have the same*
1846 *responsibility to address well-being as other aspects of resident*
1847 *competence. Physicians and all members of the health care team share*
1848 *responsibility for the well-being of each other. For example, a culture which*
1849 *encourages covering for colleagues after an illness without the expectation*
1850 *of reciprocity reflects the ideal of professionalism. A positive culture in a*
1851 *clinical learning environment models constructive behaviors, and prepares*
1852 *residents with the skills and attitudes needed to thrive throughout their*
1853 *careers.*
1854

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

1855 VI.C.1. The responsibility of the program, in partnership with the
1856 Sponsoring Institution, to address well-being must include:
1857
1858

1859 VI.C.1.a) efforts to enhance the meaning that each resident finds in the
1860 experience of being a physician, including protecting time
1861 with patients, minimizing non-physician obligations,
1862 providing administrative support, promoting progressive

1863 autonomy and flexibility, and enhancing professional
1864 relationships; ^(Core)

1865
1866 VI.C.1.b) attention to scheduling, work intensity, and work
1867 compression that impacts resident well-being; ^(Core)
1868

1869 VI.C.1.c) evaluating workplace safety data and addressing the safety of
1870 residents and faculty members; ^(Core)
1871

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance resident and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1872
1873 VI.C.1.d) policies and programs that encourage optimal resident and
1874 faculty member well-being; and, ^(Core)
1875

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1876
1877 VI.C.1.d).(1) Residents must be given the opportunity to attend
1878 medical, mental health, and dental care appointments,
1879 including those scheduled during their working hours.
1880 ^(Core)
1881

Background and Intent: The intent of this requirement is to ensure that residents have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Residents must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1882
1883 VI.C.1.e) attention to resident and faculty member burnout,
1884 depression, and substance use disorders. The program, in
1885 partnership with its Sponsoring Institution, must educate
1886 faculty members and residents in identification of the
1887 symptoms of burnout, depression, and substance use
1888 disorders, including means to assist those who experience
1889 these conditions. Residents and faculty members must also
1890 be educated to recognize those symptoms in themselves and
1891 how to seek appropriate care. The program, in partnership
1892 with its Sponsoring Institution, must: ^(Core)
1893

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials to create systems for identification of burnout, depression, and substance use disorders. Materials and more information are available in Learn at ACGME (<https://dl.acgme.org/pages/well-being-tools-resources>).

1894

1895 VI.C.1.e).(1) encourage residents and faculty members to alert the
1896 program director or other designated personnel or
1897 programs when they are concerned that another
1898 resident, fellow, or faculty member may be displaying
1899 signs of burnout, depression, a substance use
1900 disorder, suicidal ideation, or potential for violence;
1901 (Core)
1902

Background and Intent: Individuals experiencing burnout, depression, a substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that residents and faculty members are able to report their concerns when another resident or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Residents and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1903
1904 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1905 and, (Core)
1906

1907 VI.C.1.e).(3) provide access to confidential, affordable mental
1908 health assessment, counseling, and treatment,
1909 including access to urgent and emergent care 24
1910 hours a day, seven days a week. (Core)
1911

Background and Intent: The intent of this requirement is to ensure that residents have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

1912
1913 VI.C.2. There are circumstances in which residents may be unable to attend
1914 work, including but not limited to fatigue, illness, family
1915 emergencies, and parental leave. Each program must allow an
1916 appropriate length of absence for residents unable to perform their
1917 patient care responsibilities. (Core)
1918

- 1919 VI.C.2.a) The program must have policies and procedures in place to
 1920 ensure coverage of patient care. ^(Core)
 1921
 1922 VI.C.2.b) These policies must be implemented without fear of negative
 1923 consequences for the resident who is or was unable to
 1924 provide the clinical work. ^(Core)
 1925

Background and Intent: Residents may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1926
 1927 VI.D. Fatigue Mitigation
 1928
 1929 VI.D.1. Programs must:
 1930
 1931 VI.D.1.a) educate all faculty members and residents to recognize the
 1932 signs of fatigue and sleep deprivation; ^(Core)
 1933
 1934 VI.D.1.b) educate all faculty members and residents in alertness
 1935 management and fatigue mitigation processes; and, ^(Core)
 1936
 1937 VI.D.1.c) encourage residents to use fatigue mitigation processes to
 1938 manage the potential negative effects of fatigue on patient
 1939 care and learning. ^(Detail)
 1940

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares residents for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1941
 1942 VI.D.2. Each program must ensure continuity of patient care, consistent
 1943 with the program's policies and procedures referenced in VI.C.2–
 1944 VI.C.2.b), in the event that a resident may be unable to perform their
 1945 patient care responsibilities due to excessive fatigue. ^(Core)
 1946
 1947 VI.D.3. The program, in partnership with its Sponsoring Institution, must
 1948 ensure adequate sleep facilities and safe transportation options for
 1949 residents who may be too fatigued to safely return home. ^(Core)

1952		
1953	VI.E.1.	Clinical Responsibilities
1954		
1955		The clinical responsibilities for each resident must be based on PGY level, patient safety, resident ability, severity and complexity of patient illness/condition, and available support services. ^(Core)
1956		
1957		
1958		
1959	VI.E.1.a)	The clinical workload must allow residents to develop the required competence in patient care with a focus on learning over meeting service obligations. ^(Detail)
1960		
1961		
1962		

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on residents. Faculty members and program directors need to make sure residents function in an environment that has safe patient care and a sense of resident well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor resident workload. Workload should be distributed among the resident team and interdisciplinary teams to minimize work compression.

1963		
1964	VI.E.2.	Teamwork
1965		
1966		Residents must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the specialty and larger health system. ^(Core)

1983		
1984		
1985		
1986	VI.E.3.d)	Programs and clinical sites must maintain and communicate schedules of attending physicians and residents currently responsible for care. ^(Core)
1987		
1988		
1989		
1990	VI.E.3.e)	Each program must ensure continuity of patient care, consistent with the program's policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a resident may
1991		
1992		

1993 be unable to perform their patient care responsibilities due to
1994 excessive fatigue or illness, or family emergency. ^(Core)

1995
1996 **VI.F. Clinical Experience and Education**

1997
1998 *Programs, in partnership with their Sponsoring Institutions, must design*
1999 *an effective program structure that is configured to provide residents with*
2000 *educational and clinical experience opportunities, as well as reasonable*
2001 *opportunities for rest and personal activities.*
2002

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that residents’ duty to “clock out” on time superseded their duty to their patients.

2003
2004 **VI.F.1. Maximum Hours of Clinical and Educational Work per Week**

2005
2006 Clinical and educational work hours must be limited to no more than
2007 80 hours per week, averaged over a four-week period, inclusive of all
2008 in-house clinical and educational activities, clinical work done from
2009 home, and all moonlighting. ^(Core)
2010

Background and Intent: Programs and residents have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing residents to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a resident may work in excess of 80 hours in a given week, all programs and residents utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule residents to work 80 hours per week and still permit residents to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that residents are scheduled to work fewer than 80 hours per week, which would allow residents to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for residents to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations

of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that residents are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work residents choose to do from home. The requirement provides flexibility for residents to do this while ensuring that the time spent by residents completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Resident decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the resident's supervisor. In such circumstances, residents should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a resident spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the resident need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by residents. The new requirements are not an attempt to micromanage this process. Residents are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual resident. Programs will need to factor in time residents are spending on clinical work at home when schedules are developed to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that residents report their time from home and that schedules are structured to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks.

PGY-1 and PGY-2 Residents

PGY-1 and PGY-2 residents may not have the experience to make decisions about when it is appropriate to utilize flexibility or may feel pressured to use it when unnecessary. Programs are responsible for ensuring that residents are provided with manageable workloads that can be accomplished during scheduled work hours. This includes ensuring that a resident's assigned direct patient load is manageable, that residents have appropriate support from their clinical teams, and that residents are not overburdened with clerical work and/or other non-physician duties.

2011		
2012	VI.F.2.	Mandatory Time Free of Clinical Work and Education
2013		
2014	VI.F.2.a)	The program must design an effective program structure that
2015		is configured to provide residents with educational

2016 opportunities, as well as reasonable opportunities for rest
2017 and personal well-being. ^(Core)

2018
2019 **VI.F.2.b)** Residents should have eight hours off between scheduled
2020 clinical work and education periods. ^(Detail)

2021
2022 **VI.F.2.b).(1)** There may be circumstances when residents choose
2023 to stay to care for their patients or return to the
2024 hospital with fewer than eight hours free of clinical
2025 experience and education. This must occur within the
2026 context of the 80-hour and the one-day-off-in-seven
2027 requirements. ^(Detail)

2028

Background and Intent: While it is expected that resident schedules will be structured to ensure that residents are provided with a minimum of eight hours off between scheduled work periods, it is recognized that residents may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for residents to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

2029
2030 **VI.F.2.c)** Residents must have at least 14 hours free of clinical work
2031 and education after 24 hours of in-house call. ^(Core)

2032

Background and Intent: Residents have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, residents are encouraged to prioritize sleep over other discretionary activities.

2033
2034 **VI.F.2.d)** Residents must be scheduled for a minimum of one day in
2035 seven free of clinical work and required education (when
2036 averaged over four weeks). At-home call cannot be assigned
2037 on these free days. ^(Core)

2038

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and resident needs. It is strongly recommended that residents' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some residents may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide residents with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes resident well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

2040 **VI.F.3. Maximum Clinical Work and Education Period Length**
 2041
 2042 **VI.F.3.a) Clinical and educational work periods for residents must not**
 2043 **exceed 24 hours of continuous scheduled clinical**
 2044 **assignments. (Core)**
 2045

Background and Intent: The Task Force examined the question of “consecutive time on task.” It examined the research supporting the current limit of 16 consecutive hours of time on task for PGY-1 residents; the range of often conflicting impacts of this requirement on patient safety, clinical care, and continuity of care by resident teams; and resident learning found in the literature. Finally, it heard a uniform request by the specialty societies, certifying boards, membership societies and organizations, and senior residents to repeal this requirement. It heard conflicting perspectives from resident unions, a medical student association, and a number of public advocacy groups, some arguing for continuation of the requirement, others arguing for extension of the requirement to all residents.

Of greatest concern to the Task Force were the observations of disruption of team care and patient care continuity brought about with residents beyond the PGY-1 level adhering to differing requirements. The graduate medical education community uniformly requested that the Task Force remove this requirement. The most frequently-cited reason for this request was the complete disruption of the team, separating the PGY-1 from supervisory faculty members and residents who were best able to judge the ability of the resident and customize the supervision of patient care for each PGY-1. Cited nearly as frequently was the separation of the PGY-1 from the team, delaying maturation of clinical skills, and threatening to create a “shift” mentality in disciplines where overnight availability to patients is essential in delivery of care.

The Task Force examined the impact of the request to consider 16-consecutive-hour limits for all residents, and rejected the proposition. It found that model incompatible with the actual practice of medicine and surgery in many specialties, excessively limiting in configuration of clinical services in many disciplines, and potentially disruptive of the inculcation of responsibility and professional commitment to altruism and placing the needs of patients above those of the physician.

After careful consideration of the information available, the testimony and position of all parties submitting information, and presentations to the Task Force, the Task Force removed the 16-hour-consecutive-time-on-task requirement for PGY-1 residents. It remains crucial that programs ensure that PGY-1 residents are supervised in compliance with the applicable Program Requirements, and that resident well-being is prioritized as described in Section VI.C. of these requirements.

2046
 2047 **VI.F.3.a).(1) Up to four hours of additional time may be used for**
 2048 **activities related to patient safety, such as providing**
 2049 **effective transitions of care, and/or resident education.**
 2050 **(Core)**
 2051
 2052 **VI.F.3.a).(1).(a) Additional patient care responsibilities must not**
 2053 **be assigned to a resident during this time. (Core)**
 2054

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the resident continue to function as a member of the team in an environment where other members of the team can assess resident fatigue, and that supervision for post-call residents is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- VI.F.4. Clinical and Educational Work Hour Exceptions**
- VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a resident, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**
- VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient;** (Detail)
- VI.F.4.a).(2) humanistic attention to the needs of a patient or family;** (Detail) **or,**
- VI.F.4.a).(3) to attend unique educational events.** (Detail)
- VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit.** (Detail)

Background and Intent: This requirement is intended to provide residents with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a resident may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Residents must not be required to stay. Programs allowing residents to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the resident and that residents are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- VI.F.4.c) A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.**
- The Review Committee for Preventive Medicine will not consider requests for exceptions to the 80-hour limit to the residents' work week.
- VI.F.5. Moonlighting**
- VI.F.5.a) Moonlighting must not interfere with the ability of the resident to achieve the goals and objectives of the educational program, and must not interfere with the resident's fitness for work nor compromise patient safety.** (Core)

2090
2091 **VI.F.5.b)** Time spent by residents in internal and external moonlighting
2092 (as defined in the ACGME Glossary of Terms) must be
2093 counted toward the 80-hour maximum weekly limit. ^(Core)

2094
2095 **VI.F.5.c)** PGY-1 residents are not permitted to moonlight. ^(Core)
2096

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

2097
2098 **VI.F.6.** In-House Night Float
2099
2100 Night float must occur within the context of the 80-hour and one-
2101 day-off-in-seven requirements. ^(Core)
2102

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

2103
2104 **VI.F.7.** Maximum In-House On-Call Frequency
2105
2106 Residents must be scheduled for in-house call no more frequently
2107 than every third night (when averaged over a four-week period). ^(Core)

2108 **VI.F.8.** At-Home Call

2109
2110 **VI.F.8.a)** Time spent on patient care activities by residents on at-home
2111 call must count toward the 80-hour maximum weekly limit.
2112 The frequency of at-home call is not subject to the every-
2113 third-night limitation, but must satisfy the requirement for one
2114 day in seven free of clinical work and education, when
2115 averaged over four weeks. ^(Core)

2116
2117 **VI.F.8.a).(1)** At-home call must not be so frequent or taxing as to
2118 preclude rest or reasonable personal time for each
2119 resident. ^(Core)

2120
2121 **VI.F.8.b)** Residents are permitted to return to the hospital while on at-
2122 home call to provide direct care for new or established
2123 patients. These hours of inpatient patient care must be
2124 included in the 80-hour maximum weekly limit. ^(Detail)
2125

Background and Intent: This requirement has been modified to specify that clinical work done from home when a resident is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time residents devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in residents routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of residency/fellowship programs, Review Committees will look at the overall impact of at-home call on resident/fellow rest and personal time.

***Core Requirements:** Statements that define structure, resource, or process elements essential to every graduate medical educational program.

†Detail Requirements: Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

‡Outcome Requirements: Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

Osteopathic Recognition

For programs with or applying for Osteopathic Recognition, the Osteopathic Recognition Requirements also apply (www.acgme.org/OsteopathicRecognition).
