1
2 **Proposed ACGME Program Requirements for Graduate Medical Education**
3 **in Public Health and General Preventive Medicine**

4
5 **Common Program Requirements (Residency) are in BOLD**

6
7 Where applicable, text in italics describes the underlying philosophy of the requirements in that
8 section. These philosophic statements are not program requirements and are therefore not
9 citable.

10
11 **Introduction**

12
13 **Int.A.** *Graduate medical education is the crucial step of professional*
14 *development between medical school and autonomous clinical practice. It*
15 *is in this vital phase of the continuum of medical education that residents*
16 *learn to provide optimal patient care under the supervision of faculty*
17 *members who not only instruct, but serve as role models of excellence,*
18 *compassion, professionalism, and scholarship.*

19
20 *Graduate medical education transforms medical students into physician*
21 *scholars who care for the patient, family, and a diverse community; create*
22 *and integrate new knowledge into practice; and educate future generations*
23 *of physicians to serve the public. Practice patterns established during*
24 *graduate medical education persist many years later.*

25
26 *Graduate medical education has as a core tenet the graded authority and*
27 *responsibility for patient care. The care of patients is undertaken with*
28 *appropriate faculty supervision and conditional independence, allowing*
29 *residents to attain the knowledge, skills, attitudes, and empathy required*
30 *for autonomous practice. Graduate medical education develops physicians*
31 *who focus on excellence in delivery of safe, equitable, affordable, quality*
32 *care; and the health of the populations they serve. Graduate medical*
33 *education values the strength that a diverse group of physicians brings to*
34 *medical care.*

35
36 *Graduate medical education occurs in clinical settings that establish the*
37 *foundation for practice-based and lifelong learning. The professional*
38 *development of the physician, begun in medical school, continues through*
39 *faculty modeling of the effacement of self-interest in a humanistic*
40 *environment that emphasizes joy in curiosity, problem-solving, academic*
41 *rigor, and discovery. This transformation is often physically, emotionally,*
42 *and intellectually demanding and occurs in a variety of clinical learning*
43 *environments committed to graduate medical education and the well-being*
44 *of patients, residents, fellows, faculty members, students, and all members*
45 *of the health care team.*

46
47 **Int.B.** **Definition of Specialty**

48
49 The medical specialty of public health and general preventive medicine focuses
50 on the promotion, protection, and maintenance of health and well-being, the

51 prevention of disease and disability, and the premature death of individuals in
52 defined populations.

53
54 **Int.C. Length of Educational Program**

55
56 Educational programs in public health and general preventive medicine are
57 configured in 24-month and 36-month formats. The latter includes 12 months of
58 education in fundamental clinical skills of medicine, and both include 24 months
59 of education in clinical public health and general preventive medicine (PM-1 and
60 PM-2). (Core)*

61
62 **I. Oversight**

63
64 **I.A. Sponsoring Institution**

65
66 *The Sponsoring Institution is the organization or entity that assumes the*
67 *ultimate financial and academic responsibility for a program of graduate*
68 *medical education, consistent with the ACGME Institutional Requirements.*

69
70 *When the Sponsoring Institution is not a rotation site for the program, the*
71 *most commonly utilized site of clinical activity for the program is the*
72 *primary clinical site.*

73
Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the residents. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner’s office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

74
75 **I.A.1. The program must be sponsored by one ACGME-accredited**
76 **Sponsoring Institution. (Core)**

77
78 **I.B. Participating Sites**

79
80 *A participating site is an organization providing educational experiences or*
81 *educational assignments/rotations for residents.*

82
83 **I.B.1. The program, with approval of its Sponsoring Institution, must**
84 **designate a primary clinical site. (Core)**

85
86 **I.B.2. There must be a program letter of agreement (PLA) between the**
87 **program and each participating site that governs the relationship**
88 **between the program and the participating site providing a required**
89 **assignment. (Core)**

90
91 **I.B.2.a) The PLA must:**

- 93 I.B.2.a).(1) be renewed at least every 10 years; and, ^(Core)
 94
 95 I.B.2.a).(2) be approved by the designated institutional official
 96 (DIO). ^(Core)
 97
 98 I.B.3. The program must monitor the clinical learning and working
 99 environment at all participating sites. ^(Core)

- 100
 101 I.B.3.a) At each participating site there must be one faculty member,
 102 designated by the program director as the site director, who
 103 is accountable for resident education at that site, in
 104 collaboration with the program director. ^(Core)
 105

Background and Intent: While all residency programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites the program must ensure the quality of the educational experience. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Directors' Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for residents
- Specifying the responsibilities for teaching, supervision, and formal evaluation of residents
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern resident education during the assignment

- 106
 107 I.B.4. The program director must submit any additions or deletions of
 108 participating sites routinely providing an educational experience,
 109 required for all residents, of one month full time equivalent (FTE) or
 110 more through the ACGME's Accreditation Data System (ADS). ^(Core)
 111
 112 I.C. The program, in partnership with its Sponsoring Institution, must engage in
 113 practices that focus on mission-driven, ongoing, systematic recruitment
 114 and retention of a diverse and inclusive workforce of residents, fellows (if
 115 present), faculty members, senior administrative staff members, and other
 116 relevant members of its academic community. ^(Core)
 117

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution's mission and aims. The program's annual evaluation must include an assessment of the program's efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

118

- 119 **I.D. Resources**
 120
 121 **I.D.1. The program, in partnership with its Sponsoring Institution, must**
 122 **ensure the availability of adequate resources for resident education.**
 123 **(Core)**
 124
 125 **I.D.2. The program, in partnership with its Sponsoring Institution, must**
 126 **ensure healthy and safe learning and working environments that**
 127 **promote resident well-being and provide for: (Core)**
 128
 129 **I.D.2.a) access to food while on duty; (Core)**
 130
 131 **I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available**
 132 **and accessible for residents with proximity appropriate for**
 133 **safe patient care; (Core)**
 134

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that residents function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while residents are working. Residents should have access to refrigeration where food may be stored. Food should be available when residents are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued resident.

- 135
 136 **I.D.2.c) clean and private facilities for lactation that have refrigeration**
 137 **capabilities, with proximity appropriate for safe patient care;**
 138 **(Core)**
 139

Background and Intent: Sites must provide private and clean locations where residents may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the resident with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the resident and the resident's family, as outlined in VI.C.1.d).(1).

- 140
 141 **I.D.2.d) security and safety measures appropriate to the participating**
 142 **site; and, (Core)**
 143
 144 **I.D.2.e) accommodations for residents with disabilities consistent**
 145 **with the Sponsoring Institution's policy. (Core)**
 146
 147 **I.D.3. Residents must have ready access to specialty-specific and other**
 148 **appropriate reference material in print or electronic format. This**
 149 **must include access to electronic medical literature databases with**
 150 **full text capabilities. (Core)**
 151

- 152 I.D.4. The program’s educational and clinical resources must be adequate
153 to support the number of residents appointed to the program. (Core)
154
- 155 I.E. The presence of other learners and other care providers, including, but not
156 limited to, residents from other programs, subspecialty fellows, and
157 advanced practice providers, must enrich the appointed residents’
158 education. (Core)
159
- 160 I.E.1. The program must report circumstances when the presence of other
161 learners has interfered with the residents’ education to the DIO and
162 Graduate Medical Education Committee (GMEC). (Core)
163

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that residents’ education is not compromised by the presence of other providers and learners.

- 164
- 165 II. Personnel
- 166
- 167 II.A. Program Director
- 168
- 169 II.A.1. There must be one faculty member appointed as program director
170 with authority and accountability for the overall program, including
171 compliance with all applicable program requirements. (Core)
172
- 173 II.A.1.a) The Sponsoring Institution’s GMEC must approve a change in
174 program director. (Core)
175
- 176 II.A.1.b) Final approval of the program director resides with the
177 Review Committee. (Core)
178

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a residency, a single individual must be designated as program director and have overall responsibility for the program. The program director’s nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.

- 179
- 180 II.A.1.c) The program must demonstrate retention of the program
181 director for a length of time adequate to maintain continuity
182 of leadership and program stability. (Core)
183

Background and Intent: The success of residency programs is generally enhanced by continuity in the program director position. The professional activities required of a program director are unique and complex and take time to master. All programs are encouraged to undertake succession planning to facilitate program stability when there is necessary turnover in the program director position.

184

185 **II.A.2. The program director and, as applicable, the program’s leadership**
186 **team, must be provided with support adequate for administration of**
187 **the program based upon its size and configuration.** (Core)

188
189 **II.A.2.a)** Program leadership, in aggregate, must be provided with support
190 equal to a dedicated minimum time as specified below for
191 administration of the program. This may be time spent by the
192 program director only or divided between the program director and
193 one or more associate (or assistant) program directors. (Core)

194
195 **II.A.2.a).(1)** Programs with up to seven approved resident positions
196 must be provided with a minimum of 20 percent time.
197 Programs with seven or more approved resident positions
198 must be provided with a minimum of 20 percent time and
199 an additional one percent time for each approved position.
200 (Core)
201

Specialty-Specific Background and Intent: The additional one percent time is for each approved resident position in the program, not just the approved resident positions over seven. For example, a program with an approved complement of seven resident positions must be provided at least 27 percent time for program leadership. A program approved for 20 resident positions must be provided with at least 40 percent time for program leadership; and a program approved for 35 resident positions must be provided with at least 55 percent time for program leadership.

202
Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of residency programs, as well as those significantly engaged in the education, supervision, evaluation, and mentoring of residents, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in resident education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the residency program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

203
204 **II.A.3. Qualifications of the program director:**
205

206 II.A.3.a) must include specialty expertise and at least three years of
207 documented educational and/or administrative experience, or
208 qualifications acceptable to the Review Committee; ^(Core)
209

Background and Intent: Leading a program requires knowledge and skills that are established during residency and subsequently further developed. The time period from completion of residency until assuming the role of program director allows the individual to cultivate leadership abilities while becoming professionally established. The three-year period is intended for the individual's professional maturation.

The broad allowance for educational and/or administrative experience recognizes that strong leaders arise through diverse pathways. These areas of expertise are important when identifying and appointing a program director. The choice of a program director should be informed by the mission of the program and the needs of the community.

In certain circumstances, the program and Sponsoring Institution may propose and the Review Committee may accept a candidate for program director who fulfills these goals but does not meet the three-year minimum.

210
211 II.A.3.b) must include current certification in the specialty for which
212 they are the program director by the American Board of
213 Preventive Medicine or by the American Osteopathic Board of
214 Preventive Medicine, or specialty qualifications that are
215 acceptable to the Review Committee; ^(Core)
216

217 II.A.3.c) must include current medical licensure and appropriate
218 medical staff appointment; and, ^(Core)
219

220 II.A.3.d) must include ongoing clinical activity. ^(Core)
221

Background and Intent: A program director is a role model for faculty members and residents. The program director must participate in clinical activity consistent with the specialty. This activity will allow the program director to role model the Core Competencies for the faculty members and residents.

222
223 II.A.4. Program Director Responsibilities
224

225 The program director must have responsibility, authority, and
226 accountability for: administration and operations; teaching and
227 scholarly activity; resident recruitment and selection, evaluation,
228 and promotion of residents, and disciplinary action; supervision of
229 residents; and resident education in the context of patient care. ^(Core)
230

231 II.A.4.a) The program director must:

232
233 II.A.4.a).(1) be a role model of professionalism; ^(Core)
234

Background and Intent: The program director, as the leader of the program, must serve as a role model to residents in addition to fulfilling the technical aspects of the role. As residents are expected to demonstrate compassion, integrity, and respect for

others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

235
236
237
238
239
240

- II.A.4.a).(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

241
242
243
244
245

- II.A.4.a).(3) administer and maintain a learning environment conducive to educating the residents in each of the ACGME Competency domains; ^(Core)

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Residency programs can be highly complex. In a complex organization, the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

246
247
248
249
250
251
252
253
254
255
256
257
258
259
260
261
262
263

- II.A.4.a).(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the residency program education and at least annually thereafter, as outlined in V.B.; ^(Core)

- II.A.4.a).(5) have the authority to approve program faculty members for participation in the residency program education at all sites; ^(Core)

- II.A.4.a).(6) have the authority to remove program faculty members from participation in the residency program education at all sites; ^(Core)

- II.A.4.a).(7) have the authority to remove residents from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: The program director has the responsibility to ensure that all who educate residents effectively role model the Core Competencies. Working with a resident is a privilege that is earned through effective teaching and professional role

modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

- 264
265
266
267
268
269
270
271
272
273
274
275
276
277
278
279
280
281
282
283
284
285
286
287
- II.A.4.a).(8) submit accurate and complete information required and requested by the DIO, GMEC, and ACGME; ^(Core)
 - II.A.4.a).(9) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant specialty board examination(s); ^(Core)
 - II.A.4.a).(10) provide a learning and working environment in which residents have the opportunity to raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; ^(Core)
 - II.A.4.a).(11) ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; ^(Core)
 - II.A.4.a).(12) ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a resident; ^(Core)

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and residents.

- 288
289
290
291
292
293
294
295
296
297
298
299
300
301
302
303
- II.A.4.a).(13) ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; ^(Core)
 - II.A.4.a).(13).(a) Residents must not be required to sign a non-competition guarantee or restrictive covenant. ^(Core)
 - II.A.4.a).(14) document verification of program completion for all graduating residents within 30 days; ^(Core)
 - II.A.4.a).(15) provide verification of an individual resident's completion upon the resident's request, within 30 days; and, ^(Core)

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of residents who have previously completed the program. Residents who leave the program prior to completion also require timely documentation of their summative evaluation.

304
305 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
306 Institution’s DIO before submitting information or
307 requests to the ACGME, as required in the Institutional
308 Requirements and outlined in the ACGME Program
309 Directors’ Guide to the Common Program
310 Requirements. ^(Core)

311
312 **II.B. Faculty**

313
314 *Faculty members are a foundational element of graduate medical education*
315 *– faculty members teach residents how to care for patients. Faculty*
316 *members provide an important bridge allowing residents to grow and*
317 *become practice-ready, ensuring that patients receive the highest quality of*
318 *care. They are role models for future generations of physicians by*
319 *demonstrating compassion, commitment to excellence in teaching and*
320 *patient care, professionalism, and a dedication to lifelong learning. Faculty*
321 *members experience the pride and joy of fostering the growth and*
322 *development of future colleagues. The care they provide is enhanced by*
323 *the opportunity to teach. By employing a scholarly approach to patient*
324 *care, faculty members, through the graduate medical education system,*
325 *improve the health of the individual and the population.*

326
327 *Faculty members ensure that patients receive the level of care expected*
328 *from a specialist in the field. They recognize and respond to the needs of*
329 *the patients, residents, community, and institution. Faculty members*
330 *provide appropriate levels of supervision to promote patient safety. Faculty*
331 *members create an effective learning environment by acting in a*
332 *professional manner and attending to the well-being of the residents and*
333 *themselves.*

334
335 **Background and Intent: “Faculty” refers to the entire teaching force responsible for educating residents. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.**

336 **II.B.1.** At each participating site, there must be a sufficient number of
337 faculty members with competence to instruct and supervise all
338 residents at that location. ^(Core)

339
340 **II.B.2. Faculty members must:**

341
342 **II.B.2.a)** be role models of professionalism; ^(Core)

343
344 **II.B.2.b)** demonstrate commitment to the delivery of safe, quality,
345 cost-effective, patient-centered care; ^(Core)

346

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

347

348

II.B.2.c) demonstrate a strong interest in the education of residents;
(Core)

349

350

351

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; (Core)

352

353

354

II.B.2.e) administer and maintain an educational environment conducive to educating residents; (Core)

355

356

357

II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; and, (Core)

358

359

360

II.B.2.g) pursue faculty development designed to enhance their skills at least annually; (Core)

361

362

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the residency program faculty in the aggregate.

363

364

II.B.2.g).(1) as educators; (Core)

365

366

II.B.2.g).(2) in quality improvement and patient safety; (Core)

367

368

II.B.2.g).(3) in fostering their own and their residents' well-being; and, (Core)

369

370

371

II.B.2.g).(4) in patient care based on their practice-based learning and improvement efforts. (Core)

372

373

Background and Intent: Practice-based learning serves as the foundation for the practice of medicine. Through a systematic analysis of one's practice and review of the literature, one is able to make adjustments that improve patient outcomes and care. Thoughtful consideration to practice-based analysis improves quality of care, as well as patient safety. This allows faculty members to serve as role models for residents in practice-based learning.

374

375

II.B.3. Faculty Qualifications

376

377 **II.B.3.a) Faculty members must have appropriate qualifications in**
378 **their field and hold appropriate institutional appointments.**
379 **(Core)**

380
381 **II.B.3.b) Physician faculty members must:**
382

383 **II.B.3.b).(1) have current certification in the specialty by the**
384 **American Board of Preventive Medicine or the American**
385 **Osteopathic Board of Preventive Medicine, or possess**
386 **qualifications judged acceptable to the Review**
387 **Committee. (Core)**
388

389 **II.B.3.c) Any non-physician faculty members who participate in**
390 **residency program education must be approved by the**
391 **program director. (Core)**
392

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of residents by non-physician educators enables the resident to better manage patient care and provides valuable advancement of the residents' knowledge. Furthermore, other individuals contribute to the education of the resident in the basic science of the specialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the residents, the program director may designate the individual as a program faculty member or a program core faculty member.

393
394 **II.B.4. Core Faculty**
395

396 **Core faculty members must have a significant role in the education**
397 **and supervision of residents and must devote a significant portion**
398 **of their entire effort to resident education and/or administration, and**
399 **must, as a component of their activities, teach, evaluate, and**
400 **provide formative feedback to residents. (Core)**
401

Background and Intent: Core faculty members are critical to the success of resident education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring residents, and assessing residents' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of residents, and also participate in non-clinical activities related to resident education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting resident applicants, providing didactic instruction, mentoring residents, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.

402

- 403 **II.B.4.a)** **Core faculty members must be designated by the program**
 404 **director.** ^(Core)
 405
 406 **II.B.4.b)** **Core faculty members must complete the annual ACGME**
 407 **Faculty Survey.** ^(Core)
 408
 409 **II.B.4.c)** Not including the program director, programs with up to eight
 410 residents must have a minimum of two core faculty members, and
 411 programs with more than eight residents must have a core faculty
 412 member-to-resident ratio of at least one-to-four. ^(Core)
 413
 414 **II.C. Program Coordinator**
 415
 416 **II.C.1.** **There must be a program coordinator.** ^(Core)
 417
 418 **II.C.2.** **The program coordinator must be provided with dedicated time and**
 419 **support adequate for administration of the program based upon its**
 420 **size and configuration.** ^(Core)
 421
 422 **II.C.2.a)** The program coordinator must be provided with support equal to a
 423 dedicated minimum of 50 percent time for administration of the
 424 program. ^(Core)
 425

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of residents.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer residents may not require a full-time coordinator; one coordinator may support more than one program.

- 426
 427 **II.D. Other Program Personnel**
 428

429 The program, in partnership with its Sponsoring Institution, must jointly
430 ensure the availability of necessary personnel for the effective
431 administration of the program. ^(Core)
432

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

- 433
434 **III. Resident Appointments**
435
436 **III.A. Eligibility Requirements**
437
438 **III.A.1. An applicant must meet one of the following qualifications to be**
439 **eligible for appointment to an ACGME-accredited program: ^(Core)**
440
441 **III.A.1.a) graduation from a medical school in the United States or**
442 **Canada, accredited by the Liaison Committee on Medical**
443 **Education (LCME) or graduation from a college of**
444 **osteopathic medicine in the United States, accredited by the**
445 **American Osteopathic Association Commission on**
446 **Osteopathic College Accreditation (AOACOCA); or, ^(Core)**
447
448 **III.A.1.b) graduation from a medical school outside of the United**
449 **States or Canada, and meeting one of the following additional**
450 **qualifications: ^(Core)**
451
452 **III.A.1.b).(1) holding a currently valid certificate from the**
453 **Educational Commission for Foreign Medical**
454 **Graduates (ECFMG) prior to appointment; or, ^(Core)**
455
456 **III.A.1.b).(2) holding a full and unrestricted license to practice**
457 **medicine in the United States licensing jurisdiction in**
458 **which the ACGME-accredited program is located. ^(Core)**
459
460 **III.A.2. All prerequisite post-graduate clinical education required for initial**
461 **entry or transfer into ACGME-accredited residency programs must**
462 **be completed in ACGME-accredited residency programs, AOA-**
463 **approved residency programs, Royal College of Physicians and**
464 **Surgeons of Canada (RCPSC)-accredited or College of Family**
465 **Physicians of Canada (CFPC)-accredited residency programs**
466 **located in Canada, or in residency programs with ACGME**
467 **International (ACGME-I) Advanced Specialty Accreditation. ^(Core)**
468
469 **III.A.2.a) Residency programs must receive verification of each**
470 **resident's level of competency in the required clinical field**
471 **using ACGME, CanMEDS, or ACGME-I Milestones evaluations**
472 **from the prior training program upon matriculation. ^(Core)**
473

- 474 III.A.2.b) Residents entering a 24-month program that does not include
 475 education in fundamental clinical skills of medicine must have
 476 successfully completed at least 12 months of clinical education in
 477 a residency program that satisfies III.A.2. (Core)
 478
- 479 III.A.2.b).(1) PGY-1 resident experience must include at least 10
 480 months of direct patient care in both inpatient and
 481 outpatient settings. (Core)
 482
- 483 III.A.2.c) To be eligible for appointment at the PM-2 level, residents must
 484 have completed:
 485
- 486 III.A.2.c).(1) a residency program that satisfies the requirements in
 487 III.A.2.; and, (Core)
 488
- 489 III.A.2.c).(1).(a) This must include at least 10 months of direct
 490 patient care in both inpatient and outpatient
 491 settings. (Core)
 492
- 493 III.A.2.c).(2) at least 50 percent of the requirements for a Master of
 494 Public Health or another equivalent degree. (Core)
 495

Background and Intent: Programs with ACGME-I Foundational Accreditation or from institutions with ACGME-I accreditation do not qualify unless the program has also achieved ACGME-I Advanced Specialty Accreditation. To ensure entrants into ACGME-accredited programs from ACGME-I programs have attained the prerequisite milestones for this training, they must be from programs that have ACGME-I Advanced Specialty Accreditation.

- 496
- 497 **III.A.3. A physician who has completed a residency program that was not**
 498 **accredited by ACGME, AOA, RCPSC, CFPC, or ACGME-I (with**
 499 **Advanced Specialty Accreditation) may enter an ACGME-accredited**
 500 **residency program in the same specialty at the PGY-1 level and, at**
 501 **the discretion of the program director of the ACGME-accredited**
 502 **program and with approval by the GMC, may be advanced to the**
 503 **PGY-2 level based on ACGME Milestones evaluations at the ACGME-**
 504 **accredited program. This provision applies only to entry into**
 505 **residency in those specialties for which an initial clinical year is not**
 506 **required for entry. (Core)**
 507
- 508 **III.A.4. Resident Eligibility Exception**
 509
- 510 **The Review Committee for Preventive Medicine will allow the**
 511 **following exception to the resident eligibility requirements (for**
 512 **residents entering the program via III.A.2.c)): (Core)**
 513
- 514 **III.A.4.a) An ACGME-accredited residency program may accept an**
 515 **exceptionally qualified international graduate applicant who**
 516 **does not satisfy the eligibility requirements listed in III.A.1.-**
 517 **III.A.3., but who does meet all of the following additional**
 518 **qualifications and conditions: (Core)**

- 519
520 **III.A.4.a).(1)** evaluation by the program director and residency
521 selection committee of the applicant’s suitability to
522 enter the program, based on prior training and review
523 of the summative evaluations of this training; and, ^(Core)
524
525 **III.A.4.a).(2)** review and approval of the applicant’s exceptional
526 qualifications by the GMEC; and, ^(Core)
527
528 **III.A.4.a).(3)** verification of Educational Commission for Foreign
529 Medical Graduates (ECFMG) certification. ^(Core)
530
531 **III.A.4.b)** Applicants accepted through this exception must have an
532 evaluation of their performance by the Clinical Competency
533 Committee within 12 weeks of matriculation. ^(Core)
534
535 **III.B.** The program director must not appoint more residents than approved by
536 the Review Committee. ^(Core)
537
538 **III.B.1.** All complement increases must be approved by the Review
539 Committee. ^(Core)
540
541 **III.C.** Resident Transfers
542
543 The program must obtain verification of previous educational experiences
544 and a summative competency-based performance evaluation prior to
545 acceptance of a transferring resident, and Milestones evaluations upon
546 matriculation. ^(Core)
547
548 **IV. Educational Program**
549
550 *The ACGME accreditation system is designed to encourage excellence and*
551 *innovation in graduate medical education regardless of the organizational*
552 *affiliation, size, or location of the program.*
553
554 *The educational program must support the development of knowledgeable, skillful*
555 *physicians who provide compassionate care.*
556
557 *In addition, the program is expected to define its specific program aims consistent*
558 *with the overall mission of its Sponsoring Institution, the needs of the community*
559 *it serves and that its graduates will serve, and the distinctive capabilities of*
560 *physicians it intends to graduate. While programs must demonstrate substantial*
561 *compliance with the Common and specialty-specific Program Requirements, it is*
562 *recognized that within this framework, programs may place different emphasis on*
563 *research, leadership, public health, etc. It is expected that the program aims will*
564 *reflect the nuanced program-specific goals for it and its graduates; for example, it*
565 *is expected that a program aiming to prepare physician-scientists will have a*
566 *different curriculum from one focusing on community health.*
567
568 **IV.A.** The curriculum must contain the following educational components: ^(Core)
569

570 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution’s
571 mission, the needs of the community it serves, and the desired
572 distinctive capabilities of its graduates; ^(Core)

573
574 **IV.A.1.a)** The program’s aims must be made available to program
575 applicants, residents, and faculty members. ^(Core)

576
577 **IV.A.2.** competency-based goals and objectives for each educational
578 experience designed to promote progress on a trajectory to
579 autonomous practice. These must be distributed, reviewed, and
580 available to residents and faculty members; ^(Core)

581

Background and Intent: The trajectory to autonomous practice is documented by Milestones evaluation. The Milestones detail the progress of a resident in attaining skill in each competency domain. They are developed by each specialty group and allow evaluation based on observable behaviors. Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific resident.

582
583 **IV.A.3.** delineation of resident responsibilities for patient care, progressive
584 responsibility for patient management, and graded supervision; ^(Core)

585

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

586
587 **IV.A.4.** a broad range of structured didactic activities; ^(Core)

588
589 **IV.A.4.a)** Residents must be provided with protected time to participate
590 in core didactic activities. ^(Core)

591

Background and Intent: It is intended that residents will participate in structured didactic activities. It is recognized that there may be circumstances in which this is not possible. Programs should define core didactic activities for which time is protected and the circumstances in which residents may be excused from these didactic activities. Didactic activities may include, but are not limited to, lectures, conferences, courses, labs, asynchronous learning, simulations, drills, case discussions, grand rounds, didactic teaching, and education in critical appraisal of medical evidence.

592
593 **IV.A.5.** advancement of residents’ knowledge of ethical principles
594 foundational to medical professionalism; and, ^(Core)

595
596 **IV.A.6.** advancement in the residents’ knowledge of the basic principles of
597 scientific inquiry, including how research is designed, conducted,
598 evaluated, explained to patients, and applied to patient care. ^(Core)

599
600
601

IV.B. ACGME Competencies

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each specialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each specialty.

602
603
604
605
606
607
608
609
610
611
612
613
614
615
616
617
618

IV.B.1. The program must integrate the following ACGME Competencies into the curriculum: ^(Core)

IV.B.1.a) Professionalism

Residents must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

IV.B.1.a).(1) Residents must demonstrate competence in:

IV.B.1.a).(1).(a) compassion, integrity, and respect for others; ^(Core)

IV.B.1.a).(1).(b) responsiveness to patient needs that supersedes self-interest; ^(Core)

Background and Intent: This includes the recognition that under certain circumstances, the interests of the patient may be best served by transitioning care to another provider. Examples include fatigue, conflict or duality of interest, not connecting well with a patient, or when another physician would be better for the situation based on skill set or knowledge base.

619
620

632
633
634
635
636
637
638
639

IV.B.1.a).(1).(c) respect for patient privacy and autonomy; ^(Core)

IV.B.1.a).(1).(d) accountability to patients, society, and the profession; ^(Core)

IV.B.1.a).(1).(e) respect and responsiveness to diverse patient populations, including but not limited to diversity in gender, age, culture, race, religion, disabilities, national origin, socioeconomic status, and sexual orientation; ^(Core)

IV.B.1.a).(1).(f) ability to recognize and develop a plan for one's own personal and professional well-being; and, ^(Core)

IV.B.1.a).(1).(g) appropriately disclosing and addressing conflict or duality of interest. ^(Core)

IV.B.1.b) Patient Care and Procedural Skills

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]’s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality*. *Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician’s well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

640		
641	IV.B.1.b).(1)	Residents must be able to provide patient care that is
642		compassionate, appropriate, and effective for the
643		treatment of health problems and the promotion of
644		health. <small>(Core)</small>
645		
646	IV.B.1.b).(1).(a)	If the prerequisite clinical education is integrated
647		into a 36-month program format, residents must
648		demonstrate competence in:
649		
650	IV.B.1.b).(1).(a).(i)	obtaining a comprehensive medical history;
651		<small>(Core)</small>
652		
653	IV.B.1.b).(1).(a).(ii)	performing a comprehensive physical
654		examination; <small>(Core)</small>
655		
656	IV.B.1.b).(1).(a).(iii)	assessing a patient’s medical conditions;
657		<small>(Core)</small>
658		
659	IV.B.1.b).(1).(a).(iv)	making appropriate use of diagnostic
660		studies and tests; <small>(Core)</small>
661		
662	IV.B.1.b).(1).(a).(v)	integrating information to develop a
663		differential diagnosis; and, <small>(Core)</small>
664		
665	IV.B.1.b).(1).(a).(vi)	developing, implementing, and evaluating a
666		treatment plan. <small>(Core)</small>
667		
668	IV.B.1.b).(1).(b)	Residents must demonstrate competence in:
669		
670	IV.B.1.b).(1).(b).(i)	assessing and responding to individual and
671		population risks for common occupational
672		and environmental disorders; <small>(Core)</small>
673		
674	IV.B.1.b).(1).(b).(ii)	conducting research for innovative solutions
675		to health problems; <small>(Core)</small>
676		

677	IV.B.1.b).(1).(b).(iii)	diagnosing and investigating medical problems and medical hazards in the community; (Core)
678		
679		
680		
681	IV.B.1.b).(1).(b).(iv)	directing individuals to needed personal health services; (Core)
682		
683		
684	IV.B.1.b).(1).(b).(v)	informing and educating populations about health threats and risks; (Core)
685		
686		
687	IV.B.1.b).(1).(b).(vi)	planning and evaluating the medical portion of emergency preparedness programs and training exercises; (Core)
688		
689		
690		
691	IV.B.1.b).(1).(b).(vii)	providing clinical preventive medicine services, including the ability to: (Core)
692		
693		
694	IV.B.1.b).(1).(b).(vii).(a)	diagnose and treat medical problems and chronic conditions for both individuals and populations; (Core)
695		
696		
697		
698		
699	IV.B.1.b).(1).(b).(vii).(b)	apply primary, secondary, and tertiary preventive approaches to individual and population-based disease prevention and health promotion; and, (Core)
700		
701		
702		
703		
704		
705	IV.B.1.b).(1).(b).(vii).(c)	evaluate the effectiveness of clinical preventive services for both individuals and populations. (Core)
706		
707		
708		
709	IV.B.1.b).(1).(b).(viii)	developing policies and plans to support individual and community health efforts; (Core)
710		
711		
712		
713	IV.B.1.b).(1).(b).(ix)	public health practices, including the ability to: (Core)
714		
715		
716	IV.B.1.b).(1).(b).(ix).(a)	develop plans to reduce the exposure to risk factors for an illness or condition in a population; and, (Core)
717		
718		
719		
720		
721	IV.B.1.b).(1).(b).(ix).(b)	recognize and respond to a disease outbreak, involving individual patients and populations. (Core)
722		
723		
724		
725	IV.B.1.b).(1).(b).(x)	clinical preventive medicine, including the ability to: (Core)
726		
727		

728	IV.B.1.b).(1).(b).(x).(a)	analyze evidence regarding the performance of proposed clinical preventive services for individuals and populations; ^(Core)
729		
730		
731		
732		
733	IV.B.1.b).(1).(b).(x).(b)	recommend immunizations, chemoprophylaxis, and screening tests to individuals and appropriate populations; and, ^(Core)
734		
735		
736		
737		
738	IV.B.1.b).(1).(b).(x).(c)	select appropriate, evidence-based, clinical preventive services for individuals and populations. ^(Core)
739		
740		
741		
742	IV.B.1.b).(2)	Residents must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. ^(Core)
743		
744		
745		
746	IV.B.1.c)	Medical Knowledge
747		
748		Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care. ^(Core)
749		
750		
751		
752		
753	IV.B.1.c).(1)	Residents must demonstrate competence in their knowledge of all content areas included in the required graduate courses for completion of the program. ^(Core)
754		
755		
756		
757	IV.B.1.c).(2)	Residents must demonstrate competence in their knowledge of factors that impact the health of individuals and populations, including:
758		
759		
760		
761	IV.B.1.c).(2).(a)	lifestyle management; and, ^(Core)
762		
763	IV.B.1.c).(2).(b)	social determinants of health. ^(Core)
764		
765	IV.B.1.c).(3)	Residents must demonstrate competence in their knowledge of the use of available technology, such as telemedicine, to reduce health disparities. ^(Core)
766		
767		
768		
769	IV.B.1.c).(4)	Residents must demonstrate competence in their knowledge of principles of:
770		
771		
772	IV.B.1.c).(4).(a)	application of biostatistics; ^(Core)
773		
774	IV.B.1.c).(4).(b)	applied epidemiology, including acute and chronic disease; ^(Core)
775		
776		
777	IV.B.1.c).(4).(c)	clinical preventive services; ^(Core)
778		

779 IV.B.1.c).(4).(d) health services management; and, (Core)
780
781 IV.B.1.c).(4).(e) risk/hazard control and communication. (Core)
782

783 **IV.B.1.d) Practice-based Learning and Improvement**
784

785 **Residents must demonstrate the ability to investigate and**
786 **evaluate their care of patients, to appraise and assimilate**
787 **scientific evidence, and to continuously improve patient care**
788 **based on constant self-evaluation and lifelong learning. (Core)**
789

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a physician develop the habits of mind required to continuously pursue quality improvement, well past the completion of residency.

790
791 **IV.B.1.d).(1) Residents must demonstrate competence in:**
792
793 **IV.B.1.d).(1).(a) identifying strengths, deficiencies, and limits in**
794 **one’s knowledge and expertise; (Core)**
795
796 **IV.B.1.d).(1).(b) setting learning and improvement goals; (Core)**
797
798 **IV.B.1.d).(1).(c) identifying and performing appropriate learning**
799 **activities; (Core)**
800
801 **IV.B.1.d).(1).(d) systematically analyzing practice using quality**
802 **improvement methods, and implementing**
803 **changes with the goal of practice improvement;**
804 **(Core)**
805
806 **IV.B.1.d).(1).(e) incorporating feedback and formative**
807 **evaluation into daily practice; (Core)**
808
809 **IV.B.1.d).(1).(f) locating, appraising, and assimilating evidence**
810 **from scientific studies related to their patients’**
811 **health problems; (Core)**
812

844		and, ^(Core)
845		
846	IV.B.1.d).(1).(k)	conducting an advanced literature search for
847		research on a preventive medicine topic. ^(Core)
848		
849	IV.B.1.e)	Interpersonal and Communication Skills
850		
851		Residents must demonstrate interpersonal and
852		communication skills that result in the effective exchange of
853		information and collaboration with patients, their families,
854		and health professionals. ^(Core)
855		
856	IV.B.1.e).(1)	Residents must demonstrate competence in:
857		
858	IV.B.1.e).(1).(a)	communicating effectively with patients,
859		families, and the public, as appropriate, across
860		a broad range of socioeconomic and cultural
861		backgrounds; ^(Core)
862		
863	IV.B.1.e).(1).(b)	communicating effectively with physicians,
864		other health professionals, and health-related
865		agencies; ^(Core)
866		
867	IV.B.1.e).(1).(c)	working effectively as a member or leader of a
868		health care team or other professional group;
869		^(Core)
870		

- 871 **IV.B.1.e).(1).(d)** educating patients, families, students,
872 residents, and other health professionals; ^(Core)
873
- 874 **IV.B.1.e).(1).(e)** acting in a consultative role to other physicians
875 and health professionals; and, ^(Core)
876
- 877 **IV.B.1.e).(1).(f)** maintaining comprehensive, timely, and legible
878 medical records, if applicable. ^(Core)
879
- 880 **IV.B.1.e).(2)** Residents must learn to communicate with patients
881 and families to partner with them to assess their care
882 goals, including, when appropriate, end-of-life goals.
883 ^(Core)
884

Background and Intent: When there are no more medications or interventions that can achieve a patient's goals or provide meaningful improvements in quality or length of life, a discussion about the patient's goals, values, and choices surrounding the end of life is one of the most important conversations that can occur. Residents must learn to participate effectively and compassionately in these meaningful human interactions, for the sake of their patients and themselves.

Programs may teach this skill through direct clinical experience, simulation, or other means of active learning.

- 885
- 886 **IV.B.1.e).(3)** Residents must demonstrate competence in counseling
887 individuals regarding the appropriate use of clinical
888 preventive services and health promoting behavior
889 changes, and providing immunizations, chemoprophylaxis,
890 and screening services, as appropriate. ^(Core)
891

- 892 **IV.B.1.f)** **Systems-based Practice**
893
- 894 Residents must demonstrate an awareness of and
895 responsiveness to the larger context and system of health
896 care, including the social determinants of health, as well as
897 the ability to call effectively on other resources to provide
898 optimal health care. ^(Core)
899

- 900 **IV.B.1.f).(1)** Residents must demonstrate competence in:

- 901
- 902 **IV.B.1.f).(1).(a)** working effectively in various health care
903 delivery settings and systems relevant to their
904 clinical specialty; ^(Core)
905

Background and Intent: Medical practice occurs in the context of an increasingly complex clinical care environment where optimal patient care requires attention to compliance with external and internal administrative and regulatory requirements.

- 906
- 907 **IV.B.1.f).(1).(b)** coordinating patient care across the health care
908 continuum and beyond as relevant to their
909 clinical specialty; ^(Core)

Background and Intent: Every patient deserves to be treated as a whole person. Therefore it is recognized that any one component of the health care system does not meet the totality of the patient's needs. An appropriate transition plan requires coordination and forethought by an interdisciplinary team. The patient benefits from proper care and the system benefits from proper use of resources.

911		
912	IV.B.1.f).(1).(c)	advocating for quality patient care and optimal patient care systems; ^(Core)

943		^(Core)
944		
945		
946	IV.B.1.f).(1).(l)	management and administration, including the ability to: ^(Core)
947		
948		
949	IV.B.1.f).(1).(l).(i)	assess data and formulate policy for a given health issue; ^(Core)
950		
951		
952	IV.B.1.f).(1).(l).(ii)	assess the human and financial resources for the operation of a program or project;
953		^(Core)
954		
955		

- 956 IV.B.1.f).(1).(l).(iii) apply and use management information
- 957 systems; and, ^(Core)
- 958
- 959 IV.B.1.f).(1).(l).(iv) plan, manage, and evaluate health services
- 960 to improve the health of a defined
- 961 population using quality improvement and
- 962 assurance systems. ^(Core)
- 963
- 964 IV.B.1.f).(1).(m) analyzing policy options for their health impact and
- 965 economic costs; and, ^(Core)
- 966
- 967 IV.B.1.f).(1).(n) participating in the evaluation of applicants and the
- 968 performance of staff members, and understanding
- 969 the legal and ethical use of this information in
- 970 decisions for hiring, managing, and discharging
- 971 staff members. ^(Core)
- 972

973 **IV.B.1.f).(2) Residents must learn to advocate for patients within**
 974 **the health care system to achieve the patient's and**
 975 **family's care goals, including, when appropriate, end-**
 976 **of-life goals.** ^(Core)
 977

978 **IV.C. Curriculum Organization and Resident Experiences**

979

980 **IV.C.1. The curriculum must be structured to optimize resident educational**
 981 **experiences, the length of these experiences, and supervisory**
 982 **continuity.** ^(Core)
 983

984 IV.C.1.a) Rotations in direct patient care should be of sufficient length to

985 allow residents to develop skills in providing ongoing, prevention-

986 oriented care. ^{(Detail)†}
 987

Background and Intent: In some specialties, frequent rotational transitions, inadequate continuity of faculty member supervision, and dispersed patient locations within the hospital have adversely affected optimal resident education and effective team-based care. The need for patient care continuity varies from specialty to specialty and by clinical situation, and may be addressed by the individual Review Committee.

988

989 **IV.C.2. The program must provide instruction and experience in pain**
 990 **management if applicable for the specialty, including recognition of**
 991 **the signs of addiction.** ^(Core)
 992

993 IV.C.3. If the prerequisite clinical education is integrated into a 36-month program

994 format, the PGY-1 must provide broad education in fundamental clinical

995 skills of medicine relevant to the practice of preventive medicine. ^(Core)
 996

997 IV.C.3.a) The program director must oversee and ensure the quality of

998 didactic and clinical education in the PGY-1. ^(Core)
 999

1000	IV.C.3.b)	At least 10 months of the PGY-1 must include experience
1001		providing direct patient care in the inpatient and outpatient settings
1002		in family medicine, internal medicine, obstetrics and gynecology,
1003		pediatrics, or surgery. <small>(Core)</small>
1004		
1005	IV.C.4.	The program must assess the knowledge, skills, and competence of each
1006		incoming resident as they relate to the educational goals of the program.
1007		<small>(Core)</small>
1008		
1009	IV.C.4.a)	This should include a self-assessment, an in-service examination,
1010		and a structured interview or other method that assesses
1011		knowledge, skills, and competence. <small>(Detail)</small>
1012		
1013	IV.C.4.b)	The assessment should be used by the program director and
1014		faculty members to guide development of an individualized
1015		educational plan for each resident, which should: <small>(Detail)</small>
1016		
1017	IV.C.4.b).(1)	direct the acquisition of a core set of competencies, skills,
1018		and knowledge appropriate to the objectives of the
1019		individual resident based on assessment of each resident;
1020		<small>(Detail)</small>
1021		
1022	IV.C.4.b).(2)	denote the courses, rotations, and activities to which the
1023		resident will be assigned to develop the designated clinical
1024		skills, knowledge, and competencies; and, <small>(Detail)</small>
1025		
1026	IV.C.4.b).(3)	be reviewed as part of the semiannual evaluation. <small>(Detail)</small>
1027		
1028	IV.C.5.	Residents must have educational experiences within a patient care
1029		environment that address direct clinical issues relevant to public health
1030		and general preventive medicine. <small>(Core)</small>
1031		
1032	IV.C.5.a)	Each resident must have progressive responsibility for direct
1033		patient care and the management of health and provision of health
1034		care for a defined population. <small>(Core)</small>
1035		
1036	IV.C.6.	Residents must complete a Master of Public Health or another equivalent
1037		degree program prior to completion of the residency program. <small>(Core)</small>
1038		
1039	IV.C.6.a)	All residents must complete graduate-level courses that include
1040		the five content areas of: epidemiology; biostatistics; health
1041		services management and administration; environmental health;
1042		and the behavioral aspects of health. <small>(Core)</small>
1043		
1044	IV.C.7.	Didactic conferences must be structured to facilitate interaction between
1045		faculty members and residents. <small>(Detail)</small>
1046		
1047	IV.C.8.	Resident education must take place in settings where decisions about the
1048		health of defined populations are routinely made and where analyses and
1049		policies affecting the health of these individuals are under active study
1050		and development. <small>(Core)</small>

1051		
1052	IV.C.8.a)	Residents must have a minimum of two months of direct patient care experience during each year of the program. ^(Core)
1053		
1054		
1055	IV.C.8.b)	Residents must have a minimum of two months (or equivalent) experience at a governmental public health agency. ^(Core)
1056		
1057		
1058	IV.C.8.c)	Resident experiences must include participation in learning activities related to the current recommendations of the US Preventive Services Task Force. ^(Core)
1059		
1060		
1061		
1062	IV.C.8.d)	Residents should be assigned to sites appropriate for specific learning activities, which may include hospitals, managed care organizations, health departments, non-governmental organizations, and community-based organizations. ^(Detail)
1063		
1064		
1065		
1066		
1067	IV.D.	Scholarship
1068		
1069		<i>Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an environment that fosters the acquisition of such skills through resident participation in scholarly activities. Scholarly activities may include discovery, integration, application, and teaching.</i>
1070		
1071		
1072		
1073		
1074		
1075		
1076		
1077		<i>The ACGME recognizes the diversity of residencies and anticipates that programs prepare physicians for a variety of roles, including clinicians, scientists, and educators. It is expected that the program's scholarship will reflect its mission(s) and aims, and the needs of the community it serves. For example, some programs may concentrate their scholarly activity on quality improvement, population health, and/or teaching, while other programs might choose to utilize more classic forms of biomedical research as the focus for scholarship.</i>
1078		
1079		
1080		
1081		
1082		
1083		
1084		
1085		
1086	IV.D.1.	Program Responsibilities
1087		
1088	IV.D.1.a)	The program must demonstrate evidence of scholarly activities consistent with its mission(s) and aims. ^(Core)
1089		
1090		
1091	IV.D.1.b)	The program, in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate resident and faculty involvement in scholarly activities. ^(Core)
1092		
1093		
1094		
1095	IV.D.1.b).(1)	This includes providing funds for each resident to attend at least one national professional meeting with the opportunity to present original scholarship. ^(Detail)
1096		
1097		
1098		
1099	IV.D.1.c)	The program must advance residents' knowledge and practice of the scholarly approach to evidence-based patient care. ^(Core)
1100		
1101		

Background and Intent: The scholarly approach can be defined as a synthesis of teaching, learning, and research with the aim of encouraging curiosity and critical thinking based on an understanding of physiology, pathophysiology, differential diagnosis, treatments, treatment alternatives, efficiency of care, and patient safety. While some faculty members are responsible for fulfilling the traditional elements of scholarship through research, integration, and teaching, all faculty members are responsible for advancing residents' scholarly approach to patient care.

Elements of a scholarly approach to patient care include:

- Asking meaningful questions to stimulate residents to utilize learning resources to create a differential diagnosis, a diagnostic algorithm, and treatment plan
- Challenging the evidence that the residents use to reach their medical decisions so that they understand the benefits and limits of the medical literature
- When appropriate, dissemination of scholarly learning in a peer-reviewed manner (publication or presentation)
- Improving resident learning by encouraging them to teach using a scholarly approach

The scholarly approach to patient care begins with curiosity, is grounded in the principles of evidence-based medicine, expands the knowledge base through dissemination, and develops the habits of lifelong learning by encouraging residents to be scholarly teachers.

1126

IV.D.2. Faculty Scholarly Activity

IV.D.2.a) Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains:
(Core)

- Research in basic science, education, translational science, patient care, or population health
- Peer-reviewed grants
- Quality improvement and/or patient safety initiatives
- Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
- Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
- Contribution to professional committees, educational organizations, or editorial boards
- Innovations in education

IV.D.2.b) The program must demonstrate dissemination of scholarly activity within and external to the program by the following methods:

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the residents' scholarly approach to patient

care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

- 1127
1128 IV.D.2.b).(1) faculty participation in grand rounds, posters,
1129 workshops, quality improvement presentations,
1130 podium presentations, grant leadership, non-peer-
1131 reviewed print/electronic resources, articles or
1132 publications, book chapters, textbooks, webinars,
1133 service on professional committees, or serving as a
1134 journal reviewer, journal editorial board member, or
1135 editor; (Outcome)‡
1136
1137 IV.D.2.b).(2) peer-reviewed publication. (Outcome)
1138
1139 IV.D.3. Resident Scholarly Activity
1140
1141 IV.D.3.a) Residents must participate in scholarship. (Core)
1142
1143 V. Evaluation
1144
1145 V.A. Resident Evaluation
1146
1147 V.A.1. Feedback and Evaluation
1148

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower residents to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring resident learning* and providing ongoing feedback that can be used by residents to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- residents identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where residents are struggling and address problems immediately

Summative evaluation is *evaluating a resident’s learning* by comparing the residents against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when

residents or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the residency program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a neophyte physician to one with growing expertise.

1149
1150
1151
1152
1153

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on resident performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Residents require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for residents who have deficiencies that may result in a poor final rotation evaluation.

1154
1155
1156
1157

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

1158
1159
1160
1161

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

1162
1163
1164
1165
1166

V.A.1.b).(2) Longitudinal experiences, such as continuity clinic in the context of other clinical responsibilities, must be evaluated at least every three months and at completion. ^(Core)

1167
1168
1169
1170

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the specialty-specific Milestones, and must: ^(Core)

1171
1172
1173
1174

V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, ^(Core)

1175
1176
1177
1178

V.A.1.c).(2) provide that information to the Clinical Competency Committee for its synthesis of progressive resident performance and improvement toward unsupervised practice. ^(Core)

1179
1180
1181
1182

V.A.1.d) The program director or their designee, with input from the Clinical Competency Committee, must:

1183
1184
1185
1186
1187

V.A.1.d).(1) meet with and review with each resident their documented semi-annual evaluation of performance, including progress along the specialty-specific Milestones; ^(Core)

- 1188 V.A.1.d).(2) assist residents in developing individualized learning
 1189 plans to capitalize on their strengths and identify areas
 1190 for growth; and, ^(Core)
 1191
 1192 V.A.1.d).(3) develop plans for residents failing to progress,
 1193 following institutional policies and procedures. ^(Core)
 1194

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a resident's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Residents should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, residents should develop an individualized learning plan.

Residents who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the resident, will take a variety of forms based on the specific learning needs of the resident. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of resident progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

- 1195
 1196 V.A.1.e) At least annually, there must be a summative evaluation of
 1197 each resident that includes their readiness to progress to the
 1198 next year of the program, if applicable. ^(Core)
 1199
 1200 V.A.1.f) The evaluations of a resident's performance must be
 1201 accessible for review by the resident. ^(Core)
 1202
 1203 V.A.2. Final Evaluation
 1204
 1205 V.A.2.a) The program director must provide a final evaluation for each
 1206 resident upon completion of the program. ^(Core)
 1207
 1208 V.A.2.a).(1) The specialty-specific Milestones, and when applicable
 1209 the specialty-specific Case Logs, must be used as
 1210 tools to ensure residents are able to engage in
 1211 autonomous practice upon completion of the program.
 1212 ^(Core)
 1213
 1214 V.A.2.a).(2) The final evaluation must:
 1215
 1216 V.A.2.a).(2).(a) become part of the resident's permanent record
 1217 maintained by the institution, and must be
 1218 accessible for review by the resident in
 1219 accordance with institutional policy; ^(Core)
 1220

- 1221 **V.A.2.a).(2).(b)** verify that the resident has demonstrated the
 1222 knowledge, skills, and behaviors necessary to
 1223 enter autonomous practice; ^(Core)
 1224
 1225 **V.A.2.a).(2).(c)** consider recommendations from the Clinical
 1226 Competency Committee; and, ^(Core)
 1227
 1228 **V.A.2.a).(2).(d)** be shared with the resident upon completion of
 1229 the program. ^(Core)
 1230
 1231 **V.A.3.** **A Clinical Competency Committee must be appointed by the**
 1232 **program director.** ^(Core)
 1233
 1234 **V.A.3.a)** **At a minimum, the Clinical Competency Committee must**
 1235 **include three members of the program faculty, at least one of**
 1236 **whom is a core faculty member.** ^(Core)
 1237
 1238 **V.A.3.a).(1)** **Additional members must be faculty members from**
 1239 **the same program or other programs, or other health**
 1240 **professionals who have extensive contact and**
 1241 **experience with the program’s residents.** ^(Core)
 1242

Background and Intent: The requirements regarding the Clinical Competency Committee do not preclude or limit a program director’s participation on the Clinical Competency Committee. The intent is to leave flexibility for each program to decide the best structure for its own circumstances, but a program should consider: its program director’s other roles as resident advocate, advisor, and confidante; the impact of the program director’s presence on the other Clinical Competency Committee members’ discussions and decisions; the size of the program faculty; and other program-relevant factors. The program director has final responsibility for resident evaluation and promotion decisions.

Program faculty may include more than the physician faculty members, such as other physicians and non-physicians who teach and evaluate the program’s residents. There may be additional members of the Clinical Competency Committee. Chief residents who have completed core residency programs in their specialty may be members of the Clinical Competency Committee.

- 1243
 1244 **V.A.3.b)** **The Clinical Competency Committee must:**
 1245
 1246 **V.A.3.b).(1)** **review all resident evaluations at least semi-annually;**
 1247 ^(Core)
 1248

 1253 **and advise the program director regarding each**
 1254 **resident’s progress.** ^(Core)
 1255
 1256 **V.B. Faculty Evaluation**

1257
1258
1259
1260
1261

- V.B.1. The program must have a process to evaluate each faculty member's performance as it relates to the educational program at least annually. (Core)**

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term "faculty" may be applied to physicians within a given institution for other reasons, it is applied to residency program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the resident and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with residents desire feedback on their education, clinical care, and research. If a faculty member does not interact with residents, feedback is not required. With regard to the diverse operating environments and configurations, the residency program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the residents in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1276
1277

- V.B.1.a) This evaluation must include a review of the faculty member's clinical teaching abilities, engagement with the educational program, participation in faculty development related to their skills as an educator, clinical performance, professionalism, and scholarly activities. (Core)**
- V.B.1.b) This evaluation must include written, anonymous, and confidential evaluations by the residents. (Core)**
- V.B.2. Faculty members must receive feedback on their evaluations at least annually. (Core)**
- V.B.3. Results of the faculty educational evaluations should be incorporated into program-wide faculty development plans. (Core)**

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the residents' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1278
1279
1280
1281
1282

- V.C. Program Evaluation and Improvement**
- V.C.1. The program director must appoint the Program Evaluation Committee to conduct and document the Annual Program**

- 1283 Evaluation as part of the program's continuous improvement
 1284 process. ^(Core)
 1285
 1286 V.C.1.a) The Program Evaluation Committee must be composed of at
 1287 least two program faculty members, at least one of whom is a
 1288 core faculty member, and at least one resident. ^(Core)
 1289
 1290 V.C.1.b) Program Evaluation Committee responsibilities must include:
 1291
 1292 V.C.1.b).(1) acting as an advisor to the program director, through
 1293 program oversight; ^(Core)
 1294
 1295 V.C.1.b).(2) review of the program's self-determined goals and
 1296 progress toward meeting them; ^(Core)
 1297
 1298 V.C.1.b).(3) guiding ongoing program improvement, including

1343 (Core)
- 1344
- 1345 V.C.1.c).(6).(c) board pass and certification rates; and, (Core)
- 1346
- 1347 V.C.1.c).(6).(d) graduate performance. (Core)
- 1348
- 1349 V.C.1.c).(7) aggregate faculty:
- 1350
- 1351 V.C.1.c).(7).(a) evaluation; and, (Core)
- 1352
- 1353 V.C.1.c).(7).(b) professional development. (Core)
- 1354
- 1355 V.C.1.d) The Program Evaluation Committee must evaluate the
1356 program's mission and aims, strengths, areas for
1357 improvement, and threats. (Core)
- 1358
- 1359 V.C.1.e) The annual review, including the action plan, must:
- 1360
- 1361 V.C.1.e).(1) be distributed to and discussed with the members of
1362 the teaching faculty and the residents; and, (Core)
- 1363
- 1364 V.C.1.e).(2) be submitted to the DIO. (Core)
- 1365
- 1366 V.C.2. The program must complete a Self-Study prior to its 10-Year
1367 Accreditation Site Visit. (Core)
- 1368
- 1369 V.C.2.a) A summary of the Self-Study must be submitted to the DIO.
1370 (Core)
- 1371

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the residency program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the

Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

1412
1413
1414

V.C.3. *One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.*

The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.

V.C.3.a) For specialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that specialty.
(Outcome)

V.C.3.b) For specialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that specialty.
(Outcome)

V.C.3.c) For specialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that specialty.
(Outcome)

V.C.3.d) For specialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that specialty. (Outcome)

V.C.3.e) For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that specialty. (Outcome)

Background and Intent: Setting a single standard for pass rate that works across specialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five

percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are specialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1415
1416
1417
1418
1419

V.C.3.f) Programs must report, in ADS, board certification status annually for the cohort of board-eligible residents that graduated seven years earlier. ^(Core)

Background and Intent: It is essential that residency programs demonstrate knowledge and skill transfer to their residents. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from residency graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Residency education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by residents today*
- *Excellence in the safety and quality of care rendered to patients by today's residents in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and residents more

discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and residents to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, resident education, and resident well-being. The requirements are intended to support the development of a sense of professionalism by encouraging residents to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for residents to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and resident and faculty member well-being. The requirements are intended to support programs and residents as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and residents. With this flexibility comes a responsibility for residents and faculty members to recognize the need to hand off care of a patient to another provider when a resident is too fatigued to provide safe, high quality care and for programs to ensure that residents remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare residents to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by residents who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Residents must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating residents will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for residents and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

1471 *A culture of safety requires continuous identification*
 1472 *of vulnerabilities and a willingness to transparently*
 1473 *deal with them. An effective organization has formal*
 1474 *mechanisms to assess the knowledge, skills, and*
 1475 *attitudes of its personnel toward safety in order to*
 1476 *identify areas for improvement.*

1477

1478 **VI.A.1.a).(1).(a)** **The program, its faculty, residents, and fellows**
 1479 **must actively participate in patient safety**
 1480 **systems and contribute to a culture of safety.**
 1481 (Core)

1482

1483 **VI.A.1.a).(1).(b)** **The program must have a structure that**

1579 reducing health care disparities. ^(Detail)

1580
1581 **VI.A.2.** **Supervision and Accountability**

1582
1583 **VI.A.2.a)** *Although the attending physician is ultimately responsible for*
1584 *the care of the patient, every physician shares in the*
1585 *responsibility and accountability for their efforts in the*
1586 *provision of care. Effective programs, in partnership with*
1587 *their Sponsoring Institutions, define, widely communicate,*
1588 *and monitor a structured chain of responsibility and*
1589 *accountability as it relates to the supervision of all patient*
1590 *care.*

1591
1592 *Supervision in the setting of graduate medical education*
1593 *provides safe and effective care to patients; ensures each*
1594 *resident's development of the skills, knowledge, and attitudes*
1595 *required to enter the unsupervised practice of medicine; and*
1596 *establishes a foundation for continued professional growth.*

1597
1598 **VI.A.2.a).(1)** Each patient must have an identifiable and
1599 appropriately-credentialed and privileged attending
1600 physician (or licensed independent practitioner as
1601 specified by the applicable Review Committee) who is
1602 responsible and accountable for the patient's care.
1603 ^(Core)

1604
1605 **VI.A.2.a).(1).(a)** This information must be available to residents,
1606 faculty members, other members of the health
1607 care team, and patients. ^(Core)

1608
1609 **VI.A.2.a).(1).(b)** Residents and faculty members must inform
1610 each patient of their respective roles in that
1611 patient's care when providing direct patient
1612 care. ^(Core)

1613
1614 **VI.A.2.b)** *Supervision may be exercised through a variety of methods.*
1615 *For many aspects of patient care, the supervising physician*
1616 *may be a more advanced resident or fellow. Other portions of*
1617 *care provided by the resident can be adequately supervised*
1618 *by the appropriate availability of the supervising faculty*
1619 *member, fellow, or senior resident physician, either on site or*
1620 *by means of telecommunication technology. Some activities*

1621
1622
1623
1624

require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of resident-delivered care with feedback.

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of resident patient interactions, education and training locations, and resident skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a resident gains more experience, even with the same patient condition or procedure. All residents have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

- VI.A.2.b).(2)** The program must define when physical presence of a supervising physician is required. ^(Core)
- VI.A.2.c)** **Levels of Supervision**
- To promote appropriate resident supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: ^(Core)
- VI.A.2.c).(1)** **Direct Supervision:**
- VI.A.2.c).(1).(a)** the supervising physician is physically present with the resident during the key portions of the patient interaction; or, ^(Core)
- VI.A.2.c).(1).(a).(i)** PGY-1 residents must initially be supervised directly, only as described in VI.A.2.c).(1).(a). ^(Core)
- VI.A.2.c).(1).(b)** the supervising physician and/or patient is not physically present with the resident and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. ^(Core)
- VI.A.2.c).(2)** **Indirect Supervision:** the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the resident for guidance and is available to provide appropriate direct supervision. ^(Core)

- 1663
1664 **VI.A.2.c).(3)** **Oversight – the supervising physician is available to**
1665 **provide review of procedures/encounters with**
1666 **feedback provided after care is delivered. (Core)**
1667
- 1668 **VI.A.2.d)** **The privilege of progressive authority and responsibility,**
1669 **conditional independence, and a supervisory role in patient**
1670 **care delegated to each resident must be assigned by the**
1671 **program director and faculty members. (Core)**
1672
- 1673 **VI.A.2.d).(1)** **The program director must evaluate each resident’s**
1674 **abilities based on specific criteria, guided by the**
1675 **Milestones. (Core)**
1676
- 1677 **VI.A.2.d).(2)** **Faculty members functioning as supervising**
1678 **physicians must delegate portions of care to residents**
1679 **based on the needs of the patient and the skills of**
1680 **each resident. (Core)**
1681
- 1682 **VI.A.2.d).(3)** **Senior residents or fellows should serve in a**
1683 **supervisory role to junior residents in recognition of**
1684 **their progress toward independence, based on the**
1685 **needs of each patient and the skills of the individual**
1686 **resident or fellow. (Detail)**
1687
- 1688 **VI.A.2.e)** **Programs must set guidelines for circumstances and events**
1689 **in which residents must communicate with the supervising**
1690 **faculty member(s). (Core)**
1691
- 1692 **VI.A.2.e).(1)** **Each resident must know the limits of their scope of**
1693 **authority, and the circumstances under which the**
1694 **resident is permitted to act with conditional**
1695 **independence. (Outcome)**
1696

<p>Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.</p>

- 1697
1698 **VI.A.2.f)** **Faculty supervision assignments must be of sufficient**
1699 **duration to assess the knowledge and skills of each resident**
1700 **and to delegate to the resident the appropriate level of patient**
1701 **care authority and responsibility. (Core)**
1702
- 1703 **VI.B. Professionalism**
- 1704
1705 **VI.B.1.** **Programs, in partnership with their Sponsoring Institutions, must**
1706 **educate residents and faculty members concerning the professional**
1707 **responsibilities of physicians, including their obligation to be**
1708 **appropriately rested and fit to provide the care required by their**
1709 **patients. (Core)**
1710

- 1711 VI.B.2. The learning objectives of the program must:
 1712
 1713 VI.B.2.a) be accomplished through an appropriate blend of supervised
 1714 patient care responsibilities, clinical teaching, and didactic
 1715 educational events; ^(Core)
 1716
 1717 VI.B.2.b) be accomplished without excessive reliance on residents to
 1718 fulfill non-physician obligations; and, ^(Core)
 1719

Background and Intent: Routine reliance on residents to fulfill non-physician obligations increases work compression for residents and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that residents may be expected to do any of these things on occasion when the need arises, these activities should not be performed by residents routinely and must be kept to a minimum to optimize resident education.

- 1720
 1721 VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)
 1722

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression, especially at the PGY-1 level.

- 1723
 1724 VI.B.3. The program director, in partnership with the Sponsoring Institution,
 1725 must provide a culture of professionalism that supports patient
 1726 safety and personal responsibility. ^(Core)
 1727
 1728 VI.B.4. Residents and faculty members must demonstrate an understanding
 1729 of their personal role in the:
 1730
 1731 VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)
 1732
 1733 VI.B.4.b) safety and welfare of patients entrusted to their care,
 1734 including the ability to report unsafe conditions and adverse
 1735 events; ^(Outcome)
 1736

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the resident.

- 1737
 1738 VI.B.4.c) assurance of their fitness for work, including: ^(Outcome)
 1739

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and residents to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, residents, and other members of the care team to be observant, to intervene, and/or to escalate their concern about resident and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

- 1740
1741 VI.B.4.c).(1) management of their time before, during, and after
1742 clinical assignments; and, (Outcome)
1743
1744 VI.B.4.c).(2) recognition of impairment, including from illness,
1745 fatigue, and substance use, in themselves, their peers,
1746 and other members of the health care team. (Outcome)
1747
1748 VI.B.4.d) commitment to lifelong learning; (Outcome)
1749
1750 VI.B.4.e) monitoring of their patient care performance improvement
1751 indicators; and, (Outcome)
1752
1753 VI.B.4.f) accurate reporting of clinical and educational work hours,
1754 patient outcomes, and clinical experience data. (Outcome)
1755
1756 VI.B.5. All residents and faculty members must demonstrate
1757 responsiveness to patient needs that supersedes self-interest. This
1758 includes the recognition that under certain circumstances, the best
1759 interests of the patient may be served by transitioning that patient's
1760 care to another qualified and rested provider. (Outcome)
1761
1762 VI.B.6. Programs, in partnership with their Sponsoring Institutions, must
1763 provide a professional, equitable, respectful, and civil environment
1764 that is free from discrimination, sexual and other forms of
1765 harassment, mistreatment, abuse, or coercion of students,
1766 residents, faculty, and staff. (Core)
1767
1768 VI.B.7. Programs, in partnership with their Sponsoring Institutions, should
1769 have a process for education of residents and faculty regarding
1770 unprofessional behavior and a confidential process for reporting,
1771 investigating, and addressing such concerns. (Core)
1772
1773 VI.C. Well-Being
1774
1775 *Psychological, emotional, and physical well-being are critical in the*
1776 *development of the competent, caring, and resilient physician and require*
1777 *proactive attention to life inside and outside of medicine. Well-being*
1778 *requires that physicians retain the joy in medicine while managing their*
1779 *own real-life stresses. Self-care and responsibility to support other*
1780 *members of the health care team are important components of*
1781 *professionalism; they are also skills that must be modeled, learned, and*
1782 *nurtured in the context of other aspects of residency training.*

1793
1794

Residents and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture in a clinical learning environment models constructive behaviors, and prepares residents with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website: www.acgme.org/physicianwellbeing.

The ACGME also created a repository for well-being materials, assessments, presentations, and more on the [Well-Being Tools and Resources page](#) in Learn at ACGME for programs seeking to develop or strengthen their own well-being initiatives. There are many activities that programs can implement now to assess and support physician well-being. These include the distribution and analysis of culture of safety surveys, ensuring the availability of counseling services, and paying attention to the safety of the entire health care team.

VI.C.1.e).(1) encourage residents and faculty members to alert the program director or other designated personnel or programs when they are concerned that another resident, fellow, or faculty member may be displaying signs of burnout, depression, a substance use disorder, suicidal ideation, or potential for violence; ^(Core)

Background and Intent: Individuals experiencing burnout, depression, a substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that residents and faculty members are able to report their concerns when another resident or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the

department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Residents and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1843
1844 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
1845 and, ^(Core)
1846
1847 VI.C.1.e).(3) provide access to confidential, affordable mental
1848 health assessment, counseling, and treatment,
1849 including access to urgent and emergent care 24
1850 hours a day, seven days a week. ^(Core)
1851

Background and Intent: The intent of this requirement is to ensure that residents have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1852
1853 VI.C.2. There are circumstances in which residents may be unable to attend
1854 work, including but not limited to fatigue, illness, family
1855 emergencies, and parental leave. Each program must allow an
1856 appropriate length of absence for residents unable to perform their
1857 patient care responsibilities. ^(Core)
1858
1859 VI.C.2.a) The program must have policies and procedures in place to
1860 ensure coverage of patient care. ^(Core)
1861
1862 VI.C.2.b) These policies must be implemented without fear of negative
1863 consequences for the resident who is or was unable to
1864 provide the clinical work. ^(Core)
1865

Background and Intent: Residents may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1866
1867 VI.D. Fatigue Mitigation
1868
1869 VI.D.1. Programs must:
1870

- 1871 VI.D.1.a) educate all faculty members and residents to recognize the
 1872 signs of fatigue and sleep deprivation; ^(Core)
 1873
 1874 VI.D.1.b) educate all faculty members and residents in alertness
 1875 management and fatigue mitigation processes; and, ^(Core)
 1876
 1877 VI.D.1.c) encourage residents to use fatigue mitigation processes to
 1878 manage the potential negative effects of fatigue on patient
 1879 care and learning. ^(Detail)
 1880

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares residents for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

- 1881
 1882 VI.D.2. Each program must ensure continuity of patient care, consistent
 1883 with the program’s policies and procedures referenced in VI.C.2–
 1884 VI.C.2.b), in the event that a resident may be unable to perform their
 1885 patient care responsibilities due to excessive fatigue. ^(Core)
 1886
 1887 VI.D.3. The program, in partnership with its Sponsoring Institution, must
 1888 ensure adequate sleep facilities and safe transportation options for
 1889 residents who may be too fatigued to safely return home. ^(Core)
 1890
 1891 VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care
 1892
 1893 VI.E.1. Clinical Responsibilities
 1894
 1895 The clinical responsibilities for each resident must be based on PGY
 1896 level, patient safety, resident ability, severity and complexity of
 1897 patient illness/condition, and available support services. ^(Core)
 1898
 1899 VI.E.1.a) The clinical workload must allow residents to develop the required
 1900 competence in patient care with a focus on learning over meeting
 1901 service obligations. ^(Detail)
 1902

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on residents. Faculty members and program directors need to make sure residents function in an

environment that has safe patient care and a sense of resident well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor resident workload. Workload should be distributed among the resident team and interdisciplinary teams to minimize work compression.

- VI.E.2. Teamwork**
- Residents must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the specialty and larger health system. ^(Core)
- VI.E.3. Transitions of Care**
- VI.E.3.a)** Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. ^(Core)
- VI.E.3.b)** Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. ^(Core)
- VI.E.3.c)** Programs must ensure that residents are competent in communicating with team members in the hand-over process. ^(Outcome)
- VI.E.3.d)** Programs and clinical sites must maintain and communicate schedules of attending physicians and residents currently responsible for care. ^(Core)
- VI.E.3.e)** Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2-VI.C.2.b), in the event that a resident may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. ^(Core)
- VI.F. Clinical Experience and Education**
- Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide residents with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.*

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to

number of hours worked may have led some to conclude that residents' duty to "clock out" on time superseded their duty to their patients.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and residents have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing residents to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a resident may work in excess of 80 hours in a given week, all programs and residents utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule residents to work 80 hours per week and still permit residents to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that residents are scheduled to work fewer than 80 hours per week, which would allow residents to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for residents to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that residents are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work residents choose to do from home. The requirement provides flexibility for residents to do this while ensuring that the time spent by residents completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the

80 hours. Resident decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the resident's supervisor. In such circumstances, residents should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a resident spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the resident need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by residents. The new requirements are not an attempt to micromanage this process. Residents are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual resident. Programs will need to factor in time residents are spending on clinical work at home when schedules are developed to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that residents report their time from home and that schedules are structured to ensure that residents are not working in excess of 80 hours per week, averaged over four weeks.

PGY-1 and PGY-2 Residents

PGY-1 and PGY-2 residents may not have the experience to make decisions about when it is appropriate to utilize flexibility or may feel pressured to use it when unnecessary. Programs are responsible for ensuring that residents are provided with manageable workloads that can be accomplished during scheduled work hours. This includes ensuring that a resident's assigned direct patient load is manageable, that residents have appropriate support from their clinical teams, and that residents are not overburdened with clerical work and/or other non-physician duties.

1951		
1952	VI.F.2.	Mandatory Time Free of Clinical Work and Education
1953		
1954	VI.F.2.a)	The program must design an effective program structure that is configured to provide residents with educational opportunities, as well as reasonable opportunities for rest and personal well-being. ^(Core)
1955		
1956		
1957		
1958		
1959	VI.F.2.b)	Residents should have eight hours off between scheduled clinical work and education periods. ^(Detail)
1960		
1961		
1962	VI.F.2.b).(1)	There may be circumstances when residents choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. ^(Detail)
1963		
1964		
1965		
1966		
1967		
1968		

Background and Intent: While it is expected that resident schedules will be structured to ensure that residents are provided with a minimum of eight hours off between scheduled work periods, it is recognized that residents may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for residents to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1969
1970
1971
1972

VI.F.2.c) Residents must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

Background and Intent: Residents have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, residents are encouraged to prioritize sleep over other discretionary activities.

1978

VI.F.2.d) Residents must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and resident needs. It is strongly recommended that residents' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some residents may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide residents with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes resident well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for residents must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

Background and Intent: The Task Force examined the question of "consecutive time on task." It examined the research supporting the current limit of 16 consecutive hours of time on task for PGY-1 residents; the range of often conflicting impacts of this requirement on patient safety, clinical care, and continuity of care by resident teams; and resident learning found in the literature. Finally, it heard a uniform request by the specialty societies, certifying boards, membership societies and organizations, and senior residents to repeal this requirement. It heard conflicting perspectives from

resident unions, a medical student association, and a number of public advocacy groups, some arguing for continuation of the requirement, others arguing for extension of the requirement to all residents.

Of greatest concern to the Task Force were the observations of disruption of team care and patient care continuity brought about with residents beyond the PGY-1 level adhering to differing requirements. The graduate medical education community uniformly requested that the Task Force remove this requirement. The most frequently-cited reason for this request was the complete disruption of the team, separating the PGY-1 from supervisory faculty members and residents who were best able to judge the ability of the resident and customize the supervision of patient care for each PGY-1. Cited nearly as frequently was the separation of the PGY-1 from the team, delaying maturation of clinical skills, and threatening to create a “shift” mentality in disciplines where overnight availability to patients is essential in delivery of care.

The Task Force examined the impact of the request to consider 16-consecutive-hour limits for all residents, and rejected the proposition. It found that model incompatible with the actual practice of medicine and surgery in many specialties, excessively limiting in configuration of clinical services in many disciplines, and potentially disruptive of the inculcation of responsibility and professional commitment to altruism and placing the needs of patients above those of the physician.

After careful consideration of the information available, the testimony and position of all parties submitting information, and presentations to the Task Force, the Task Force removed the 16-hour-consecutive-time-on-task requirement for PGY-1 residents. It remains crucial that programs ensure that PGY-1 residents are supervised in compliance with the applicable Program Requirements, and that resident well-being is prioritized as described in Section VI.C. of these requirements.

VI.F.3.a).(1)

Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or resident education.
(Core)

VI.F.3.a).(1).(a)

Additional patient care responsibilities must not be assigned to a resident during this time. (Core)

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the resident continue to function as a member of the team in an environment where other members of the team can assess resident fatigue, and that supervision for post-call residents is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

VI.F.4.

Clinical and Educational Work Hour Exceptions

VI.F.4.a)

In rare circumstances, after handing off all other responsibilities, a resident, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

- 2002
2003 VI.F.4.a).(1) to continue to provide care to a single severely ill or
2004 unstable patient; ^(Detail)
2005
2006 VI.F.4.a).(2) humanistic attention to the needs of a patient or
2007 family; or, ^(Detail)
2008
2009 VI.F.4.a).(3) to attend unique educational events. ^(Detail)
2010
2011 VI.F.4.b) These additional hours of care or education will be counted
2012 toward the 80-hour weekly limit. ^(Detail)
2013

Background and Intent: This requirement is intended to provide residents with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a resident may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Residents must not be required to stay. Programs allowing residents to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the resident and that residents are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 2014
2015 VI.F.4.c) A Review Committee may grant rotation-specific exceptions
2016 for up to 10 percent or a maximum of 88 clinical and
2017 educational work hours to individual programs based on a
2018 sound educational rationale.
2019
2020 The Review Committee for Preventive Medicine will not consider
2021 requests for exceptions to the 80-hour limit to the residents' work
2022 week.
2023
2024 VI.F.5. Moonlighting
2025
2026 VI.F.5.a) Moonlighting must not interfere with the ability of the resident
2027 to achieve the goals and objectives of the educational
2028 program, and must not interfere with the resident's fitness for
2029 work nor compromise patient safety. ^(Core)
2030
2031 VI.F.5.b) Time spent by residents in internal and external moonlighting
2032 (as defined in the ACGME Glossary of Terms) must be
2033 counted toward the 80-hour maximum weekly limit. ^(Core)
2034
2035 VI.F.5.c) PGY-1 residents are not permitted to moonlight. ^(Core)
2036

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

- 2037
2038 VI.F.6. In-House Night Float
2039

2040
2041
2042

Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. ^(Core)

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

VI.F.7. Maximum In-House On-Call Frequency

Residents must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). ^(Core)

VI.F.8. At-Home Call

VI.F.8.a) Time spent on patient care activities by residents on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks. ^(Core)

VI.F.8.a).(1) At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each resident. ^(Core)

VI.F.8.b) Residents are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. ^(Detail)

Background and Intent: This requirement has been modified to specify that clinical work done from home when a resident is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time residents devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in residents routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of residency/fellowship programs, Review Committees will look at the overall impact of at-home call on resident/fellow rest and personal time.
