1 **Proposed ACGME Program Requirements for Graduate Medical Education**
2 **in Pediatric Hospital Medicine**

3
4 **Common Program Requirements (Fellowship) are in BOLD**

5
6 Where applicable, text in italics describes the underlying philosophy of the requirements in that
7 section. These philosophic statements are not program requirements and are therefore not
8 citable.
9

Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.

10
11 **Introduction**

12
13 **Int.A.** *Fellowship is advanced graduate medical education beyond a core*
14 *residency program for physicians who desire to enter more specialized*
15 *practice. Fellowship-trained physicians serve the public by providing*
16 *subspecialty care, which may also include core medical care, acting as a*
17 *community resource for expertise in their field, creating and integrating*
18 *new knowledge into practice, and educating future generations of*
19 *physicians. Graduate medical education values the strength that a diverse*
20 *group of physicians brings to medical care.*

21
22 *Fellows who have completed residency are able to practice independently*
23 *in their core specialty. The prior medical experience and expertise of*
24 *fellows distinguish them from physicians entering into residency training.*
25 *The fellow's care of patients within the subspecialty is undertaken with*
26 *appropriate faculty supervision and conditional independence. Faculty*
27 *members serve as role models of excellence, compassion,*
28 *professionalism, and scholarship. The fellow develops deep medical*
29 *knowledge, patient care skills, and expertise applicable to their focused*
30 *area of practice. Fellowship is an intensive program of subspecialty clinical*
31 *and didactic education that focuses on the multidisciplinary care of*
32 *patients. Fellowship education is often physically, emotionally, and*
33 *intellectually demanding, and occurs in a variety of clinical learning*
34 *environments committed to graduate medical education and the well-being*
35 *of patients, residents, fellows, faculty members, students, and all members*
36 *of the health care team.*

37
38 *In addition to clinical education, many fellowship programs advance*
39 *fellows' skills as physician-scientists. While the ability to create new*
40 *knowledge within medicine is not exclusive to fellowship-educated*
41 *physicians, the fellowship experience expands a physician's abilities to*
42 *pursue hypothesis-driven scientific inquiry that results in contributions to*
43 *the medical literature and patient care. Beyond the clinical subspecialty*
44 *expertise achieved, fellows develop mentored relationships built on an*
45 *infrastructure that promotes collaborative research.*

46
47 **Int.B.** **Definition of Subspecialty**

48
49 Pediatric hospital medicine delivers comprehensive medical care to hospitalized
50 children. In addition to core expertise managing the clinical problems of acutely
51 ill, hospitalized patients, pediatric hospitalists work to enhance the performance
52 of hospitals and health care systems through teaching, scholarly activity,
53 quality/process improvement, efficient health care resource utilization, and
54 leadership.

55
56 **Int.C. Length of Educational Program**

57
58 The educational program must be 24 months in length. ^{(Core)*}

59
60 **I. Oversight**

61
62 **I.A. Sponsoring Institution**

63
64 *The Sponsoring Institution is the organization or entity that assumes the*
65 *ultimate financial and academic responsibility for a program of graduate*
66 *medical education consistent with the ACGME Institutional Requirements.*

67
68 *When the Sponsoring Institution is not a rotation site for the program, the*
69 *most commonly utilized site of clinical activity for the program is the*
70 *primary clinical site.*

Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.

71
72
73 **I.A.1. The program must be sponsored by one ACGME-accredited**
74 **Sponsoring Institution.** ^(Core)

75
76 **I.B. Participating Sites**
77
78 *A participating site is an organization providing educational experiences or*
79 *educational assignments/rotations for fellows.*

80
81 **I.B.1. The program, with approval of its Sponsoring Institution, must**
82 **designate a primary clinical site.** ^(Core)

83
84 **I.B.1.a)** An accredited pediatric hospital medicine program must be an
85 integral part of a core pediatric residency program, and should be
86 sponsored by the same ACGME-accredited Sponsoring
87 Institution. ^(Core)

- 89 **I.B.2.** There must be a program letter of agreement (PLA) between the
 90 program and each participating site that governs the relationship
 91 between the program and the participating site providing a required
 92 assignment. ^(Core)
 93
- 94 **I.B.2.a)** The PLA must:
- 95
- 96 **I.B.2.a).(1)** be renewed at least every 10 years; and, ^(Core)
 97
- 98 **I.B.2.a).(2)** be approved by the designated institutional official
 99 (DIO). ^(Core)
 100
- 101 **I.B.3.** The program must monitor the clinical learning and working
 102 environment at all participating sites. ^(Core)
 103
- 104 **I.B.3.a)** At each participating site there must be one faculty member,
 105 designated by the program director, who is accountable for
 106 fellow education for that site, in collaboration with the
 107 program director. ^(Core)
 108

Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.

Suggested elements to be considered in PLAs will be found in the ACGME Program Directors' Guide to the Common Program Requirements. These include:

- Identifying the faculty members who will assume educational and supervisory responsibility for fellows
- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

- 109
- 110 **I.B.4.** The program director must submit any additions or deletions of
 111 participating sites routinely providing an educational experience,
 112 required for all fellows, of one month full time equivalent (FTE) or
 113 more through the ACGME's Accreditation Data System (ADS). ^(Core)
 114
- 115 **I.C.** The program, in partnership with its Sponsoring Institution, must engage in
 116 practices that focus on mission-driven, ongoing, systematic recruitment
 117 and retention of a diverse and inclusive workforce of residents (if present),

118
119
120

fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. ^(Core)

Background and Intent: It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

121
122
123
124
125
126
127
128
129
130
131
132
133
134
135
136
137
138
139
140
141
142
143

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. ^(Core)

I.D.1.a) There must be an acute care hospital with dedicated general pediatric inpatient service. ^(Core)

I.D.1.b) Facilities and services, including a comprehensive laboratory, pathology, and imaging, must be available. ^(Core)

I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: ^(Core)

I.D.2.a) access to food while on duty; ^(Core)

I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care; ^(Core)

Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.

144
145
146
147
148

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; ^(Core)

Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients,

such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).

- 149
150 I.D.2.d) security and safety measures appropriate to the participating
151 site; and, ^(Core)
152
153 I.D.2.e) accommodations for fellows with disabilities consistent with
154 the Sponsoring Institution's policy. ^(Core)
155
156 I.D.3. Fellows must have ready access to subspecialty-specific and other
157 appropriate reference material in print or electronic format. This
158 must include access to electronic medical literature databases with
159 full text capabilities. ^(Core)
160
161 I.D.4. The program's educational and clinical resources must be adequate
162 to support the number of fellows appointed to the program. ^(Core)
163
164 I.D.4.a) An adequate number and variety of pediatric hospital medicine
165 patients ranging in age from newborn through young adulthood
166 must be available to provide a broad experience for the fellows.
167 ^(Core)
168
169 I.E. *A fellowship program usually occurs in the context of many learners and
170 other care providers and limited clinical resources. It should be structured
171 to optimize education for all learners present.*
172
173 I.E.1. Fellows should contribute to the education of residents in core
174 programs, if present. ^(Core)
175

Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.

- 176
177 II. Personnel
178
179 II.A. Program Director
180
181 II.A.1. There must be one faculty member appointed as program director
182 with authority and accountability for the overall program, including
183 compliance with all applicable program requirements. ^(Core)
184
185 II.A.1.a) The Sponsoring Institution's Graduate Medical Education
186 Committee (GMEC) must approve a change in program
187 director. ^(Core)
188

189 **II.A.1.b) Final approval of the program director resides with the**
190 **Review Committee.** (Core)
191

Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and made responsible for the program. This individual will have dedicated time for the leadership of the fellowship, and it is this individual's responsibility to communicate with the fellows, faculty members, DIO, GMEC, and the ACGME. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Review Committee.

192
193 **II.A.2. The program director must be provided with support adequate for**
194 **administration of the program based upon its size and configuration.**
195 (Core)
196

197 **II.A.2.a)** At a minimum, the program director must be provided with the
198 salary support required to devote 20 percent FTE of non-clinical
199 time to the administration of the program. Additional support for
200 the program director and the associate program director(s) must
201 be provided based on program size as follows: (Core)
202

Number of Approved Fellow Positions	Minimum Aggregate Program Director/Associate Program Director FTE
1-3	0.2
4-6	0.25
7-9	0.3
≥ 10	0.35

203 **Background and Intent: Twenty percent FTE is defined as one day per week.**
“Administrative time” is defined as non-clinical time spent meeting the responsibilities of the program director as detailed in requirements II.A.4.-II.A.4.a).(16).
The requirement does not address the source of funding required to provide the specified salary support.

204
205 **II.A.3. Qualifications of the program director:**
206

207 **II.A.3.a) must include subspecialty expertise and qualifications**
208 **acceptable to the Review Committee;** (Core)
209

210 **II.A.3.b) must include current certification in the subspecialty for**
211 **which they are the program director by the American Board**
212 **of Pediatrics, or subspecialty qualifications that are**
213 **acceptable to the Review Committee; and,** (Core)
214

215 [Note that while the Common Program Requirements deem
216 certification by a certifying board of the American Osteopathic

217
218
219

Association (AOA) acceptable, there is no AOA board that offers certification in this subspecialty]

Subspecialty-Specific Background and Intent: Prior to 2024, the program director must hold current certification by the American Board of Pediatrics (ABP), and is expected to take the pediatric hospital medicine certifying examination by 2023.

Effective 2024, the program director is expected to hold current subspecialty certification in pediatric hospital medicine. Qualifications other than pediatric hospital medicine certification by the ABP will be considered only in exceptional circumstances. For a program director who has not achieved pediatric hospital medicine certification from the ABP, the Review Committee will consider the following criteria in determining whether alternate qualifications are acceptable:

- completion of a pediatric hospital medicine fellowship program
- scholarship within the field of pediatric hospital medicine; specifically, evidence of on-going scholarship documented by contributions to the peer-reviewed literature in pediatric hospital medicine, and pediatric hospital medicine presentations at national meetings
- leadership and/or participation on committees in national pediatric subspecialty organizations
- current clinical activity in pediatric hospital medicine

Years of practice are not an equivalent to specialty board certification, and the Review Committee does not accept the phrase "board eligible."

220
221
222
223
224
225
226
227
228
229
230
231
232
233
234
235

II.A.3.c) must include a record of ongoing involvement in scholarly activities. ^(Core)

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for: administration and operations; teaching and scholarly activity; fellow recruitment and selection, evaluation, and promotion of fellows, and disciplinary action; supervision of fellows; and fellow education in the context of patient care. ^(Core)

II.A.4.a) The program director must:

II.A.4.a).(1) be a role model of professionalism; ^(Core)

Background and Intent: The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

236

237 II.A.4.a).(2) design and conduct the program in a fashion
238 consistent with the needs of the community, the
239 mission(s) of the Sponsoring Institution, and the
240 mission(s) of the program; ^(Core)
241

Background and Intent: The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

242
243 II.A.4.a).(3) administer and maintain a learning environment
244 conducive to educating the fellows in each of the
245 ACGME Competency domains; ^(Core)
246

Background and Intent: The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

247
248 II.A.4.a).(4) develop and oversee a process to evaluate candidates
249 prior to approval as program faculty members for
250 participation in the fellowship program education and
251 at least annually thereafter, as outlined in V.B.; ^(Core)
252

253 II.A.4.a).(5) have the authority to approve program faculty
254 members for participation in the fellowship program
255 education at all sites; ^(Core)
256

257 II.A.4.a).(6) have the authority to remove program faculty
258 members from participation in the fellowship program
259 education at all sites; ^(Core)
260

261 II.A.4.a).(7) have the authority to remove fellows from supervising
262 interactions and/or learning environments that do not
263 meet the standards of the program; ^(Core)
264

Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

265
266 II.A.4.a).(8) submit accurate and complete information required
267 and requested by the DIO, GMEC, and ACGME; ^(Core)

- 268
269 **II.A.4.a).(9)** provide applicants who are offered an interview with
270 information related to the applicant’s eligibility for the
271 relevant subspecialty board examination(s); ^(Core)
272
- 273 **II.A.4.a).(10)** provide a learning and working environment in which
274 fellows have the opportunity to raise concerns and
275 provide feedback in a confidential manner as
276 appropriate, without fear of intimidation or retaliation;
277 ^(Core)
278
- 279 **II.A.4.a).(11)** ensure the program’s compliance with the Sponsoring
280 Institution’s policies and procedures related to
281 grievances and due process; ^(Core)
282
- 283 **II.A.4.a).(12)** ensure the program’s compliance with the Sponsoring
284 Institution’s policies and procedures for due process
285 when action is taken to suspend or dismiss, not to
286 promote, or not to renew the appointment of a fellow;
287 ^(Core)
288

Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution’s policies and procedures, and will ensure they are followed by the program’s leadership, faculty members, support personnel, and fellows.

- 289
290 **II.A.4.a).(13)** ensure the program’s compliance with the Sponsoring
291 Institution’s policies and procedures on employment
292 and non-discrimination; ^(Core)
293
- 294 **II.A.4.a).(13).(a)** Fellows must not be required to sign a non-
295 competition guarantee or restrictive covenant.
296 ^(Core)
297
- 298 **II.A.4.a).(14)** document verification of program completion for all
299 graduating fellows within 30 days; ^(Core)
300
- 301 **II.A.4.a).(15)** provide verification of an individual fellow’s
302 completion upon the fellow’s request, within 30 days;
303 and, ^(Core)
304

Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.

- 305
306 **II.A.4.a).(16)** obtain review and approval of the Sponsoring
307 Institution’s DIO before submitting information or
308 requests to the ACGME, as required in the Institutional

Requirements and outlined in the ACGME Program
Directors' Guide to the Common Program
Requirements. ^(Core)

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach fellows how to care for patients. Faculty members provide an important bridge allowing fellows to grow and become practice ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, fellows, community, and institution. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the fellows and themselves.

Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment or salary support.

336
337
338
339
340
341
342
343
344
345
346
347

II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location. ^(Core)

II.B.2. Faculty members must:

II.B.2.a) be role models of professionalism; ^(Core)

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.

348
349
350

II.B.2.c) demonstrate a strong interest in the education of fellows; ^(Core)

- 351 **II.B.2.d)** devote sufficient time to the educational program to fulfill
 352 their supervisory and teaching responsibilities; ^(Core)
 353
- 354 **II.B.2.e)** administer and maintain an educational environment
 355 conducive to educating fellows; ^(Core)
 356
- 357 **II.B.2.f)** regularly participate in organized clinical discussions,
 358 rounds, journal clubs, and conferences; ^(Core)
 359
- 360 **II.B.2.g)** pursue faculty development designed to enhance their skills
 361 at least annually; and, ^(Core)
 362

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

- 363
- 364 **II.B.2.h)** mentor fellows in the application of scientific principles,
 365 epidemiology, biostatistics, and evidence-based medicine to the
 366 clinical care of patients. ^(Core)
 367

368 **II.B.3. Faculty Qualifications**

- 369
- 370 **II.B.3.a)** Faculty members must have appropriate qualifications in
 371 their field and hold appropriate institutional appointments.
 372 ^(Core)
 373
- 374 **II.B.3.b)** Subspecialty physician faculty members must:
- 375
- 376 **II.B.3.b).(1)** have current certification in the subspecialty by the
 377 American Board of Pediatrics or possess qualifications
 378 judged acceptable to the Review Committee. ^(Core)
 379

380 [Note that while the Common Program Requirements
 381 deem certification by a certifying board of the American
 382 Osteopathic Association (AOA) acceptable, there is no
 383 AOA board that offers certification in this subspecialty]
 384

Subspecialty-Specific Background and Intent: Prior to 2024, faculty members must hold current certification by the ABP and are expected to take the pediatric hospital medicine certifying examination by 2023.

Effective 2024, faculty members are expected to hold current subspecialty certification in pediatric hospital medicine. The onus of documenting alternate qualifications is the responsibility of the program director. For a faculty member without pediatric hospital medicine certification from the ABP, the Review Committee will consider the following criteria in determining whether alternate qualifications are acceptable:

- completion of a pediatric hospital medicine fellowship program
- scholarship within the field of pediatric hospital medicine; specifically, evidence of on-going scholarship documented by contributions to the peer-reviewed literature in pediatric hospital medicine, and pediatric hospital medicine presentations at national meetings
- leadership and/or participation on committees in national pediatric subspecialty organizations
- experience in providing clinical activity in pediatric hospital medicine

For a faculty member who is a recent graduates of an ACGME-accredited pediatric hospital medicine program, the Review Committee expects that individual to take and pass the next available ABP pediatric hospital medicine certifying examination. If the faculty member is unable to take the next administration of the certifying examination, an explanation must be provided.

Years of practice are not an equivalent to specialty board certification, and the Review Committee does not accept the phrase "board eligible."

385
386
387
388
389

II.B.3.c) Any non-physician faculty members who participate in fellowship program education must be approved by the program director. ^(Core)

Background and Intent: The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

449		
450	II.B.3.d).(3)	Consultants should be available for transition care of
451		young adults. ^(Detail)
452		

Subspecialty-Specific Background and Intent: The Review Committee recognizes that some programs may not have access to board-certified pediatric subspecialists in some disciplines, and will allow adult subspecialists with pediatric expertise. However, it is expected that faculty members have pediatric subspecialty certification in those subspecialties where pediatric subspecialty board certification is available whenever possible. Adult subspecialists should not be appointed as faculty members or consultants if pediatric subspecialists are available.

453

454 **II.B.4. Core Faculty**
455
456 **Core faculty members must have a significant role in the education**
457 **and supervision of fellows and must devote a significant portion of**
458 **their entire effort to fellow education and/or administration, and**
459 **must, as a component of their activities, teach, evaluate, and provide**
460 **formative feedback to fellows. (Core)**
461

Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing fellows' progress toward achievement of competence in the subspecialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual ACGME Faculty Survey.

462
463 **II.B.4.a) Core faculty members must be designated by the program**
464 **director. (Core)**
465
466 **II.B.4.b) Core faculty members must complete the annual ACGME**
467 **Faculty Survey. (Core)**
468
469 **II.B.4.c)** To ensure the quality of the educational and scholarly activity of
470 the program, and to provide adequate supervision of fellows, there
471 must be at least four core faculty members, including the program
472 director, who are certified in pediatric hospital medicine by the
473 ABP, or who have qualifications acceptable to the Review
474 Committee. (Core)
475
476 **II.C. Program Coordinator**
477
478 **II.C.1. There must be a program coordinator. (Core)**
479
480 **II.C.2. The program coordinator must be provided with support adequate**
481 **for administration of the program based upon its size and**
482 **configuration. (Core)**
483

Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.

Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the ACGME and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

II.D.1. In order to enhance fellows' understanding of the multidisciplinary nature of pediatric hospital medicine, the following personnel with pediatric focus and experience should be available:

- II.D.1.a) advanced practice provider(s); ^(Detail)
- II.D.1.b) audiologist(s); ^(Detail)
- II.D.1.c) child life therapist(s); ^(Detail)
- II.D.1.d) dietitian(s); ^(Detail)
- II.D.1.e) hospice and palliative care professional(s); ^(Detail)
- II.D.1.f) mental health professional(s); ^(Core)
- II.D.1.g) nurse(s); ^(Core)
- II.D.1.h) personnel for care coordination and utilization management; ^(Core)
- II.D.1.i) pharmacist(s); ^(Detail)
- II.D.1.j) physical and occupational therapist(s); ^(Detail)
- II.D.1.k) public health liaison(s); ^(Detail)
- II.D.1.l) respiratory therapist(s); ^(Detail)
- II.D.1.m) school and special education contacts; ^(Detail)
- II.D.1.n) social worker(s); and, ^(Core)
- II.D.1.o) speech and language therapist(s). ^(Detail)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

525
526 **III. Fellow Appointments**
527
528 **III.A. Eligibility Criteria**

529
530 **III.A.1. Eligibility Requirements – Fellowship Programs**
531

532 **All required clinical education for entry into ACGME-accredited**
533 **fellowship programs must be completed in an ACGME-accredited**
534 **residency program, an AOA-approved residency program, a**
535 **program with ACGME International (ACGME-I) Advanced Specialty**
536 **Accreditation, or a Royal College of Physicians and Surgeons of**
537 **Canada (RCPSC)-accredited or College of Family Physicians of**
538 **Canada (CFPC)-accredited residency program located in Canada.**
539 **(Core)**
540

Background and Intent: Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

541
542 **III.A.1.a) Fellowship programs must receive verification of each**
543 **entering fellow’s level of competence in the required field,**
544 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**
545 **Milestones evaluations from the core residency program. (Core)**
546

547 **III.A.1.b) Prerequisite education for entry into a pediatric hospital medicine**
548 **program must include the satisfactory completion of a pediatrics or**
549 **combined internal medicine-pediatrics residency program that**
550 **satisfies the requirements listed in III.A.1. (Core)**
551

552 **III.A.1.c) Fellow Eligibility Exception**
553

554 **The Review Committee for Pediatrics will allow the following**
555 **exception to the fellowship eligibility requirements:**
556

557 **III.A.1.c).(1) An ACGME-accredited fellowship program may accept**
558 **an exceptionally qualified international graduate**
559 **applicant who does not satisfy the eligibility**
560 **requirements listed in III.A.1., but who does meet all of**
561 **the following additional qualifications and conditions:**
562 **(Core)**
563

564 **III.A.1.c).(1).(a) evaluation by the program director and**
565 **fellowship selection committee of the**
566 **applicant’s suitability to enter the program,**
567 **based on prior training and review of the**
568 **summative evaluations of training in the core**
569 **specialty; and, (Core)**
570

- 571 III.A.1.c).(1).(b) review and approval of the applicant's
 572 exceptional qualifications by the GMEC; and,
 573 (Core)
 574
 575 III.A.1.c).(1).(c) verification of Educational Commission for
 576 Foreign Medical Graduates (ECFMG)
 577 certification. (Core)
 578
 579 III.A.1.c).(2) Applicants accepted through this exception must have
 580 an evaluation of their performance by the Clinical
 581 Competency Committee within 12 weeks of
 582 matriculation. (Core)
 583

Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty; (b) demonstrated scholarship in the specialty or subspecialty; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.

In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.

- 584
 585 III.B. The program director must not appoint more fellows than approved by the
 586 Review Committee. (Core)
 587
 588 III.B.1. All complement increases must be approved by the Review
 589 Committee. (Core)
 590
 591 III.C. Fellow Transfers
 592
 593 The program must obtain verification of previous educational experiences
 594 and a summative competency-based performance evaluation prior to
 595 acceptance of a transferring fellow, and Milestones evaluations upon
 596 matriculation. (Core)
 597
 598 IV. Educational Program
 599
 600 *The ACGME accreditation system is designed to encourage excellence and*
 601 *innovation in graduate medical education regardless of the organizational*
 602 *affiliation, size, or location of the program.*
 603
 604 *The educational program must support the development of knowledgeable, skillful*
 605 *physicians who provide compassionate care.*

606
607
608
609
610
611
612
613
614
615
616
617

625
626
627
628
629
630
631
632
633
634
635
636

In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.

IV.A. The curriculum must contain the following educational components: (Core)

IV.A.1. a set of program aims consistent with the Sponsoring Institution’s mission, the needs of the community it serves, and the desired distinctive capabilities of its graduates; (Core)

IV.A.1.a) The program’s aims must be made available to program applicants, fellows, and faculty members. (Core)

IV.A.2. competency-based goals and objectives for each educational experience designed to promote progress on a trajectory to autonomous practice in their subspecialty. These must be distributed, reviewed, and available to fellows and faculty members; (Core)

IV.A.3. delineation of fellow responsibilities for patient care, progressive responsibility for patient management, and graded supervision in their subspecialty; (Core)

Background and Intent: These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

637
638
639
640

IV.A.4. structured educational activities beyond direct patient care; and, (Core)

Background and Intent: Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

641
642
643
644

IV.A.5. advancement of fellows’ knowledge of ethical principles foundational to medical professionalism. (Core)

645 **IV.B. ACGME Competencies**
646

Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.

647
648 **IV.B.1. The program must integrate the following ACGME Competencies**
649 **into the curriculum: (Core)**

650
651 **IV.B.1.a) Professionalism**

652
653 **Fellows must demonstrate a commitment to professionalism**
654 **and an adherence to ethical principles. (Core)**

655
656 **IV.B.1.b) Patient Care and Procedural Skills**
657

Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.

These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.

658
659 **IV.B.1.b).(1) Fellows must be able to provide patient care that is**
660 **compassionate, appropriate, and effective for the**
661 **treatment of health problems and the promotion of**
662 **health. (Core)**

663
664 **IV.B.1.b).(1).(a) Fellows must develop competence in the clinical**
665 **skills needed in pediatric hospital medicine. (Core)**

666
667 **IV.B.1.b).(1).(b) Fellows must demonstrate the ability to provide**
668 **consultation, perform a history and physical**
669 **examination, make informed diagnostic and**
670 **therapeutic decisions that result in optimal clinical**
671 **judgement, and develop and carry out management**
672 **plans. (Core)**

673
674 **IV.B.1.b).(1).(c) Fellows must demonstrate the ability to provide**
675 **transfer of care that ensures seamless transitions.**
676 **(Core)**
677

678	IV.B.1.b).(1).(d)	In order to promote emotional resilience in children, adolescents, and their families, fellows must:
679		
680		
681	IV.B.1.b).(1).(d).(i)	provide care that is sensitive to the developmental stage of the patient with common behavioral and mental health issues, and the cultural context of the patient and family; and, ^(Core)
682		
683		
684		
685		
686		
687	IV.B.1.b).(1).(d).(ii)	demonstrate the ability to refer and/or co-manage patients with common behavioral and mental health issues along with appropriate specialists when indicated. ^(Core)
688		
689		
690		
691		
692	IV.B.1.b).(1).(e)	Fellows must demonstrate competence in providing or coordinating care with a medical home for patients with complex and chronic diseases. ^(Core)
693		
694		
695		
696	IV.B.1.b).(1).(f)	Fellows must competently use and interpret laboratory tests and imaging, and other diagnostic procedures. ^(Core)
697		
698		
699		
700	IV.B.1.b).(1).(g)	Fellows must demonstrate the ability to provide compassionate end-of-life care. ^(Core)
701		
702		
703	IV.B.1.b).(1).(h)	Fellows must be able to recognize, evaluate, and manage patients with the following:
704		
705		
706	IV.B.1.b).(1).(h).(i)	children with multiple comorbidities; ^(Core)
707		
708	IV.B.1.b).(1).(h).(ii)	children with special healthcare needs; ^(Core)
709		
710	IV.B.1.b).(1).(h).(iii)	children with complex conditions and diseases; ^(Core)
711		
712		
713	IV.B.1.b).(1).(h).(iv)	children requiring palliative care; ^(Core)
714		
715	IV.B.1.b).(1).(h).(v)	children requiring sedation and pain management; ^(Core)
716		
717		
718	IV.B.1.b).(1).(h).(vi)	children with serious acute complications of common conditions; and ^(Core)
719		
720		
721	IV.B.1.b).(1).(h).(vii)	children with technology-dependencies. ^(Core)
722		
723	IV.B.1.b).(1).(i)	Fellows must demonstrate competence and effective participation in team-based care of patients whose primary problem is surgical. ^{(Outcome)‡}
724		
725		
726		
727	IV.B.1.b).(1).(i).(i)	To meet these objectives, there must be coordination of care and collegial
728		

729 relationships among pediatric surgeons and
730 pediatric hospitalists concerning the
731 management of medical problems in these
732 patients. ^(Detail)

733
734 **IV.B.1.b).(2)** **Fellows must be able to perform all medical,**
735 **diagnostic, and surgical procedures considered**
736 **essential for the area of practice.** ^(Core)

737
738 IV.B.1.b).(2).(a) Fellows must demonstrate the necessary
739 procedural skills, and develop an understanding of
740 the indications, risks, and limitations, including, but
741 not limited to:

742
743 IV.B.1.b).(2).(a).(i) arterial puncture; ^(Core)

744
745 IV.B.1.b).(2).(a).(ii) bag mask ventilation; ^(Core)

746
747 IV.B.1.b).(2).(a).(iii) bladder catheterization; ^(Core)

748
749 IV.B.1.b).(2).(a).(iv) intubation; ^(Core)

750
751 IV.B.1.b).(2).(a).(v) lumbar puncture; ^(Core)

752
753 IV.B.1.b).(2).(a).(vi) neonatal resuscitation; ^(Core)

754
755 IV.B.1.b).(2).(a).(vii) pediatric resuscitation and stabilization; ^(Core)

756
757 IV.B.1.b).(2).(a).(viii) placement and/or replacement of feeding
758 tubes, including nasogastric, orogastric, and
759 gastrostomy; ^(Core)

760
761 IV.B.1.b).(2).(a).(ix) placement of intravenous or intraosseous
762 access; ^(Core)

763
764 IV.B.1.b).(2).(a).(x) procedural sedation; and, ^(Core)

765
766 IV.B.1.b).(2).(a).(xi) tracheostomy tube replacement. ^(Core)

767
768 **IV.B.1.c)** **Medical Knowledge**

769
770 **Fellows must demonstrate knowledge of established and**
771 **evolving biomedical, clinical, epidemiological and social-**
772 **behavioral sciences, as well as the application of this**
773 **knowledge to patient care.** ^(Core)

774
775 IV.B.1.c).(1) Fellows must demonstrate knowledge of biostatistics,
776 clinical and laboratory research methodology, study
777 design, preparation of applications for funding and/or
778 approval of clinical research protocols, critical literature
779 review, principles of evidence-based medicine, ethical

780 principles involving clinical research, and teaching
781 methods. ^(Core)

782
783 **IV.B.1.d) Practice-based Learning and Improvement**

784
785 **Fellows must demonstrate the ability to investigate and**
786 **evaluate their care of patients, to appraise and assimilate**
787 **scientific evidence, and to continuously improve patient care**
788 **based on constant self-evaluation and lifelong learning.** ^(Core)
789

Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.

790
791 **IV.B.1.e) Interpersonal and Communication Skills**

792
793 **Fellows must demonstrate interpersonal and communication**
794 **skills that result in the effective exchange of information and**
795 **collaboration with patients, their families, and health**
796 **professionals.** ^(Core)
797

798 **IV.B.1.f) Systems-based Practice**

799
800 **Fellows must demonstrate an awareness of and**
801 **responsiveness to the larger context and system of health**
802 **care, including the social determinants of health, as well as**
803 **the ability to call effectively on other resources to provide**
804 **optimal health care.** ^(Core)
805

806 **IV.C. Curriculum Organization and Fellow Experiences**

807
808 **IV.C.1. The curriculum must be structured to optimize fellow educational**
809 **experiences, the length of these experiences, and supervisory**
810 **continuity.** ^(Core)
811

812 **IV.C.1.a) Assignment of rotations must be structured to minimize the**
813 **frequency of rotational transitions, and rotations must be of**
814 **sufficient length to provide a quality educational experience,**
815 **defined by continuity of patient care, ongoing supervision,**
816 **longitudinal relationships with faculty members, and meaningful**
817 **assessment and feedback.** ^(Core)
818

819 **IV.C.1.b) Clinical experiences should be structured to facilitate learning in a**
820 **manner that allows the fellows to function as part of an effective**
821 **interprofessional team that works together longitudinally with**
822 **shared goals of patient safety and quality improvement.** ^(Core)

- 823
824 **IV.C.2. The program must provide instruction and experience in pain**
825 **management if applicable for the subspecialty, including recognition**
826 **of the signs of addiction.** (Core)
827
- 828 IV.C.3. Fellows must have 32 weeks of clinical experiences that focus on core
829 pediatric hospital medicine skills, ~~of which at least four weeks must occur~~
830 ~~at a community site and at least 12 weeks must occur at a site that~~
831 ~~provides subspecialty and complex pediatric care.~~ (Core)
832
- 833 IV.C.3.a) Of these, There must be 24 weeks of experiences must be in the
834 full spectrum of general pediatric inpatient medicine, content of
835 which should include care of newborns, care of patients with
836 complex chronic diseases, care of patients with surgical problems,
837 performance of procedural sedation, and care of patients receiving
838 palliative care and must include:- (Core)
839
- 840 IV.C.3.a).(1) a minimum of 12 weeks of experiences at a site that
841 provides subspecialty and complex care; and, (Core)
842
- 843 IV.C.3.a).(2) a minimum of four weeks of experiences at a community
844 site that has elements of pediatric care, including a general
845 pediatrics service without the pediatric subspecialty care of
846 a tertiary care center. (Core)
847
- 848 IV.C.3.a).(2).(a) This may include, but should not be limited to,
849 newborn care experiences or emergency room
850 evaluations. (Core)
851
- 852 IV.C.3.b) The remaining eight weeks of clinical experiences ~~hospital~~
853 ~~medicine rotations~~ should be used to advance a meet a fellow's
854 pediatric hospital medicine skills, consistent with program aims
855 individual goals. (Detail)
856
- 857 IV.C.4. Fellows must have an additional 32 weeks of individualized curriculum
858 determined by the learning needs and career plans of each fellow and
859 developed with the guidance of a faculty mentor. (Core)
860

<p><u>Subspecialty-Specific Background and Intent: The expectation is that fellows' individualized curriculum be tailored to each fellow, with a focus on providing clinical, scholarly, or other experiences (e.g., administration, quality improvement and patient safety, medical education) that will help fellows be better prepared for the next step in their career.</u></p>
--

- 861
862 IV.C.5. Fellows must have a formally structured educational program in the
863 clinical and basic sciences related to pediatric hospital medicine. (Core)
864
- 865 IV.C.5.a) Pediatric hospital medicine conferences must occur regularly, and
866 must involve active fellow participation in planning and
867 implementation. (Core)
868
- 869 IV.C.5.b) Fellow education must include instruction in:

- 870
 871 IV.C.5.b).(1) basic and fundamental disciplines as appropriate to
 872 pediatric hospital medicine, such as anatomy,
 873 biochemistry, embryology, genetics, immunology,
 874 microbiology, nutrition/metabolism; pathology,
 875 pharmacology, and physiology; ^(Core)
 876
 877 IV.C.5.b).(2) pathophysiology of disease, reviews of recent advances in
 878 clinical medicine and biomedical research, and
 879 conferences dealing with complications and death, as well
 880 as the scientific, ethical, and legal implications of
 881 confidentiality and informed consent; ^(Core)
 882
 883 IV.C.5.b).(3) bioethics; and, ^(Core)
 884
 885 IV.C.5.b).(3).(a) This should include attention to physician-patient,
 886 physician-family, physician-physician/allied health
 887 professional, and physician-society relationships.
 888 ^(Detail)
 889
 890 IV.C.5.b).(4) the economics of health care and current health care
 891 management issues, such as cost-effective patient care,
 892 practice management, preventive care, population health,
 893 quality improvement, resource allocation, and clinical
 894 outcomes. ^(Core)
 895

896 **IV.D. Scholarship**

897
 898 ***Medicine is both an art and a science. The physician is a humanistic***
 899 ***scientist who cares for patients. This requires the ability to think critically,***
 900 ***evaluate the literature, appropriately assimilate new knowledge, and***
 901 ***practice lifelong learning. The program and faculty must create an***
 902 ***environment that fosters the acquisition of such skills through fellow***
 903 ***participation in scholarly activities as defined in the subspecialty-specific***
 904 ***Program Requirements. Scholarly activities may include discovery,***
 905 ***integration, application, and teaching.***
 906

907
 908 ***The ACGME recognizes the diversity of fellowships and anticipates that***
 909 ***programs prepare physicians for a variety of roles, including clinicians,***
 910 ***scientists, and educators. It is expected that the program's scholarship will***
 911 ***reflect its mission(s) and aims, and the needs of the community it serves.***
 912 ***For example, some programs may concentrate their scholarly activity on***
 913 ***quality improvement, population health, and/or teaching, while other***
 914 ***programs might choose to utilize more classic forms of biomedical***
 915 ***research as the focus for scholarship.***

916 **IV.D.1. Program Responsibilities**

- 917
 918 **IV.D.1.a) The program must demonstrate evidence of scholarly**
 919 **activities, consistent with its mission(s) and aims. ^(Core)**
 920

921 **IV.D.1.b)** The program in partnership with its Sponsoring Institution,
922 must allocate adequate resources to facilitate fellow and
923 faculty involvement in scholarly activities. ^(Core)
924

925 **IV.D.2. Faculty Scholarly Activity**
926

927 **IV.D.2.a)** Among their scholarly activity, programs must demonstrate
928 accomplishments in at least three of the following domains:
929 ^(Core)
930

- Research in basic science, education, translational science, patient care, or population health
- Peer-reviewed grants
- Quality improvement and/or patient safety initiatives
- Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
- Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
- Contribution to professional committees, educational organizations, or editorial boards
- Innovations in education

944 **IV.D.2.b)** The program must demonstrate dissemination of scholarly
945 activity within and external to the program by the following
946 methods:
947

Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program's effectiveness in the creation of an environment of inquiry that advances the fellows' scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty.

948
949 **IV.D.2.b).(1)** faculty participation in grand rounds, posters,
950 workshops, quality improvement presentations,
951 podium presentations, grant leadership, non-peer-
952 reviewed print/electronic resources, articles or
953 publications, book chapters, textbooks, webinars,
954 service on professional committees, or serving as a
955 journal reviewer, journal editorial board member, or
956 editor; and, ^(Outcome)
957

958 **IV.D.2.b).(1).(a)** Scholarly activity must be in a field such as basic
959 science, clinical, health services, health policy,
960 quality improvement, or education, as relates to
961 pediatric hospital medicine. ^(Core)

962		
963	IV.D.2.b).(2)	peer-reviewed publication. ^(Outcome)
964		
965	IV.D.3.	Fellow Scholarly Activity
966		
967	IV.D.3.a)	Where appropriate, the core curriculum in scholarly activity should be a collaborative effort involving all of the pediatric subspecialty programs at the Sponsoring Institution. ^(Detail)
968		
969		
970		
971	IV.D.3.b)	Each fellow must design and conduct a scholarly project under the guidance of the program director and a designated mentor. ^(Core)
972		
973		
974	IV.D.3.c)	The program must provide a Scholarship Oversight Committee for each fellow to oversee and evaluate their progress as related to the scholarly project. ^(Core)
975		
976		
977		
978	IV.D.3.c).(1)	Where applicable, the process of establishing fellow Scholarship Oversight Committees should be a collaborative effort involving other pediatric subspecialty programs or experts. ^(Detail)
979		
980		
981		
982		
983	IV.D.3.d)	The scholarly experience must begin in the first year and continue throughout the duration of the educational program. ^(Core)
984		
985		
986	IV.D.3.d).(1)	Fellows must have at least 32 weeks dedicated to scholarly activity, including the development of requisite skills, project completion, and presentation of results to the Scholarship Oversight Committee. ^(Core)
987		
988		
989		
990		
991	V. Evaluation	
992		
993	V.A. Fellow Evaluation	
994		
995	V.A.1. Feedback and Evaluation	
996		

Background and Intent: Feedback is ongoing information provided regarding aspects of one’s performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.

Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:

- **fellows identify their strengths and weaknesses and target areas that need work**
- **program directors and faculty members recognize where fellows are struggling and address problems immediately**

Summative evaluation is *evaluating a fellow’s learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative

evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty expertise.

997
998
999
1000
1001

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. ^(Core)

Background and Intent: Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

1024
1025
1026
1027

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

V.A.1.b).(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

V.A.1.b).(2) Longitudinal experiences such as continuity clinic in the context of other clinical responsibilities must be evaluated at least every three months and at completion. ^(Core)

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the subspecialty-specific Milestones, and must: ^(Core)

V.A.1.c).(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, ^(Core)

V.A.1.c).(2) provide that information to the Clinical Competency Committee for its synthesis of progressive fellow performance and improvement toward unsupervised practice. ^(Core)

Background and Intent: The trajectory to autonomous practice in a subspecialty is documented by the subspecialty-specific Milestones evaluation during fellowship.

These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

1039
1040
1041
1042
1043
- V.A.1.d)** The program director or their designee, with input from the Clinical Competency Committee, must:
- V.A.1.d).(1)** meet with and review with each fellow their documented semi-annual evaluation of performance, including progress along the subspecialty-specific Milestones. ^(Core)
- V.A.1.d).(2)** assist fellows in developing individualized learning plans to capitalize on their strengths and identify areas for growth; and, ^(Core)
- V.A.1.d).(3)** develop plans for fellows failing to progress, following institutional policies and procedures. ^(Core)

Background and Intent: Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1059		
1060		
1061		
1062		
1063	V.A.2.a).(2)	The final evaluation must:
1064		
1065	V.A.2.a).(2).(a)	become part of the fellow’s permanent record maintained by the institution, and must be accessible for review by the fellow in accordance with institutional policy; ^(Core)
1066		
1067		
1068		
1069		
1070	V.A.2.a).(2).(b)	verify that the fellow has demonstrated the knowledge, skills, and behaviors necessary to enter autonomous practice; ^(Core)
1071		
1072		
1073		
1074	V.A.2.a).(2).(c)	consider recommendations from the Clinical Competency Committee; and, ^(Core)
1075		
1076		
1077	V.A.2.a).(2).(d)	be shared with the fellow upon completion of the program. ^(Core)
1078		
1079		
1080	V.A.3.	A Clinical Competency Committee must be appointed by the program director. ^(Core)
1081		
1082		
1083	V.A.3.a)	At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program’s fellows. ^(Core)
1084		
1085		
1086		
1087		
1088		
1089		
1090	V.A.3.b)	The Clinical Competency Committee must:
1091		
1092	V.A.3.b).(1)	review all fellow evaluations at least semi-annually; ^(Core)
1093		
1094		
1095	V.A.3.b).(2)	determine each fellow’s progress on achievement of the subspecialty-specific Milestones; and, ^(Core)
1096		
1097		
1098	V.A.3.b).(3)	meet prior to the fellows’ semi-annual evaluations and advise the program director regarding each fellow’s progress. ^(Core)
1099		
1100		
1101		
1102	V.B.	Faculty Evaluation
1103		

1104 **V.B.1.** The program must have a process to evaluate each faculty
1105 member's performance as it relates to the educational program at
1106 least annually. ^(Core)
1107

Background and Intent: The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

1108
1109 **V.B.1.a)** This evaluation must include a review of the faculty member's
1110 clinical teaching abilities, engagement with the educational
1111 program, participation in faculty development related to their
1112 skills as an educator, clinical performance, professionalism,
1113 and scholarly activities. ^(Core)
1114

1115 **V.B.1.b)** This evaluation must include written, confidential evaluations
1116 by the fellows. ^(Core)
1117

1118 **V.B.2.** Faculty members must receive feedback on their evaluations at least
1119 annually. ^(Core)
1120

1121 **V.B.3.** Results of the faculty educational evaluations should be
1122 incorporated into program-wide faculty development plans. ^(Core)
1123

Background and Intent: The quality of the faculty's teaching and clinical care is a determinant of the quality of the program and the quality of the fellows' future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program's faculty members for this purpose, and can be used as input into the Annual Program Evaluation.

1124
1125 **V.C.** Program Evaluation and Improvement
1126

1127 **V.C.1.** The program director must appoint the Program Evaluation
1128 Committee to conduct and document the Annual Program

- 1129 **Evaluation as part of the program's continuous improvement**
 1130 **process.** ^(Core)
 1131
 1132 **V.C.1.a)** **The Program Evaluation Committee must be composed of at**
 1133 **least two program faculty members, at least one of whom is a**
 1134 **core faculty member, and at least one fellow.** ^(Core)
 1135
 1136 **V.C.1.b)** **Program Evaluation Committee responsibilities must include:**
 1137
 1138 **V.C.1.b).(1)** **acting as an advisor to the program director, through**
 1139 **program oversight;** ^(Core)
 1140
 1141 **V.C.1.b).(2)** **review of the program's self-determined goals and**
 1142 **progress toward meeting them;** ^(Core)
 1143
 1144 **V.C.1.b).(3)** **guiding ongoing program improvement, including**
 1145 **development of new goals, based upon outcomes;**
 1146 **and,** ^(Core)
 1147
 1148 **V.C.1.b).(4)** **review of the current operating environment to identify**
 1149 **strengths, challenges, opportunities, and threats as**
 1150 **related to the program's mission and aims.** ^(Core)
 1151

Background and Intent: In order to achieve its mission and train quality physicians, a program must evaluate its performance and plan for improvement in the Annual Program Evaluation. Performance of fellows and faculty members is a reflection of program quality, and can use metrics that reflect the goals that a program has set for itself. The Program Evaluation Committee utilizes outcome parameters and other data to assess the program's progress toward achievement of its goals and aims.

- 1152
 1153 **V.C.1.c)** **The Program Evaluation Committee should consider the**
 1154 **following elements in its assessment of the program:**
 1155
 1156 **V.C.1.c).(1)** **curriculum;** ^(Core)
 1157
 1158 **V.C.1.c).(2)** **outcomes from prior Annual Program Evaluation(s);**
 1159 ^(Core)

1192		
1193	V.C.1.c).(6).(d)	graduate performance. ^(Core)
1194		
1195	V.C.1.c).(7)	aggregate faculty:
1196		
1197	V.C.1.c).(7).(a)	evaluation; and, ^(Core)
1198		
1199	V.C.1.c).(7).(b)	professional development ^(Core)
1200		
1201	V.C.1.d)	The Program Evaluation Committee must evaluate the program’s mission and aims, strengths, areas for improvement, and threats. ^(Core)
1202		
1203		
1204		
1205	V.C.1.e)	The annual review, including the action plan, must:
1206		
1207	V.C.1.e).(1)	be distributed to and discussed with the members of the teaching faculty and the fellows; and, ^(Core)
1208		
1209		
1210	V.C.1.e).(2)	be submitted to the DIO. ^(Core)
1211		
1212	V.C.2.	The program must participate in a Self-Study prior to its 10-Year Accreditation Site Visit. ^(Core)
1213		
1214		
1215	V.C.2.a)	A summary of the Self-Study must be submitted to the DIO. ^(Core)
1216		
1217		

Background and Intent: Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the

Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

- V.C.3.** *One goal of ACGME-accredited education is to educate physicians who seek and achieve board certification. One measure of the effectiveness of the educational program is the ultimate pass rate.*
- The program director should encourage all eligible program graduates to take the certifying examination offered by the applicable American Board of Medical Specialties (ABMS) member board or American Osteopathic Association (AOA) certifying board.*
- V.C.3.a)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual written exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.b)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial written exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.c)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) an annual oral exam, in the preceding three years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.d)** For subspecialties in which the ABMS member board and/or AOA certifying board offer(s) a biennial oral exam, in the preceding six years, the program’s aggregate pass rate of those taking the examination for the first time must be higher than the bottom fifth percentile of programs in that subspecialty. *(Outcome)*
- V.C.3.e)** For each of the exams referenced in V.C.3.a)-d), any program whose graduates over the time period specified in the requirement have achieved an 80 percent pass rate will have met this requirement, no matter the percentile rank of the program for pass rate in that subspecialty. *(Outcome)*

Background and Intent: Setting a single standard for pass rate that works across subspecialties is not supportable based on the heterogeneity of the psychometrics of different examinations. By using a percentile rank, the performance of the lower five

percent (fifth percentile) of programs can be identified and set on a path to curricular and test preparation reform.

There are subspecialties where there is a very high board pass rate that could leave successful programs in the bottom five percent (fifth percentile) despite admirable performance. These high-performing programs should not be cited, and V.C.3.e) is designed to address this.

1262
1263
1264
1265
1266

V.C.3.f) Programs must report, in ADS, board certification status annually for the cohort of board-eligible fellows that graduated seven years earlier. ^(Core)

Background and Intent: It is essential that fellowship programs demonstrate knowledge and skill transfer to their fellows. One measure of that is the qualifying or initial certification exam pass rate. Another important parameter of the success of the program is the ultimate board certification rate of its graduates. Graduates are eligible for up to seven years from fellowship graduation for initial certification. The ACGME will calculate a rolling three-year average of the ultimate board certification rate at seven years post-graduation, and the Review Committees will monitor it.

The Review Committees will track the rolling seven-year certification rate as an indicator of program quality. Programs are encouraged to monitor their graduates' performance on board certification examinations.

In the future, the ACGME may establish parameters related to ultimate board certification rates.

VI. The Learning and Working Environment

Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
 - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
 - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

Background and Intent: The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more

discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a).(1) Culture of Safety

1318 ***A culture of safety requires continuous identification***
1319 ***of vulnerabilities and a willingness to transparently***
1320 ***deal with them. An effective organization has formal***
1321 ***mechanisms to assess the knowledge, skills, and***
1322 ***attitudes of its personnel toward safety in order to***
1323 ***identify areas for improvement.***
1324

1325 **VI.A.1.a).(1).(a)**

**The program, its faculty, residents, and fellows
must actively participate in patient safety
systems and contribute to a culture of safety.**
(Core)

1330 **VI.A.1.a).(1).(b)**

**The program must have a structure that
promotes safe, interprofessional, team-based
care.** (Core)

1334 **VI.A.1.a).(2)**

Education on Patient Safety

**Programs must provide formal educational activities
that promote patient safety-related goals, tools, and
techniques.** (Core)

**Background and Intent: Optimal patient safety occurs in the setting of a coordinated
interprofessional learning and working environment.**

1341 **VI.A.1.a).(3)**

Patient Safety Events

***Reporting, investigation, and follow-up of adverse
events, near misses, and unsafe conditions are pivotal
mechanisms for improving patient safety, and are
essential for the success of any patient safety
program. Feedback and experiential learning are
essential to developing true competence in the ability
to identify causes and institute sustainable systems-
based changes to ameliorate patient safety
vulnerabilities.***

1353 **VI.A.1.a).(3).(a)**

**Residents, fellows, faculty members, and other
clinical staff members must:**

1470
1471

provided by the fellow can be adequately supervised by the appropriate availability of the supervising faculty member or fellow, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of fellow-delivered care with feedback.

Background and Intent: Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

- VI.A.2.b).(1)** The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow’s level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. ^(Core)
- VI.A.2.b).(2)** The program must define when physical presence of a supervising physician is required. ^(Core)
- VI.A.2.c)** **Levels of Supervision**
- To promote appropriate fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: ^(Core)
- VI.A.2.c).(1)** **Direct Supervision:**
- VI.A.2.c).(1).(a)** the supervising physician is physically present with the fellow during the key portions of the patient interaction. ^(Core)
- VI.A.2.c).(2)** **Indirect Supervision:** the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. ^(Core)
- VI.A.2.c).(3)** **Oversight –** the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. ^(Core)

- 1505 VI.A.2.d) The privilege of progressive authority and responsibility,
 1506 conditional independence, and a supervisory role in patient
 1507 care delegated to each fellow must be assigned by the
 1508 program director and faculty members. ^(Core)
 1509
- 1510 VI.A.2.d).(1) The program director must evaluate each fellow's
 1511 abilities based on specific criteria, guided by the
 1512 Milestones. ^(Core)
 1513
- 1514 VI.A.2.d).(2) Faculty members functioning as supervising
 1515 physicians must delegate portions of care to fellows
 1516 based on the needs of the patient and the skills of
 1517 each fellow. ^(Core)
 1518
- 1519 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior
 1520 fellows and residents in recognition of their progress
 1521 toward independence, based on the needs of each
 1522 patient and the skills of the individual resident or
 1523 fellow. ^(Detail)
 1524
- 1525 VI.A.2.e) Programs must set guidelines for circumstances and events
 1526 in which fellows must communicate with the supervising
 1527 faculty member(s). ^(Core)
 1528
- 1529 VI.A.2.e).(1) Each fellow must know the limits of their scope of
 1530 authority, and the circumstances under which the
 1531 fellow is permitted to act with conditional
 1532 independence. ^(Outcome)
 1533

Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.

- 1534
- 1535 VI.A.2.f) Faculty supervision assignments must be of sufficient
 1536 duration to assess the knowledge and skills of each fellow
 1537 and to delegate to the fellow the appropriate level of patient
 1538 care authority and responsibility. ^(Core)
 1539
- 1540 VI.B. Professionalism
- 1541
- 1542 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must
 1543 educate fellows and faculty members concerning the professional
 1544 responsibilities of physicians, including their obligation to be
 1545 appropriately rested and fit to provide the care required by their
 1546 patients. ^(Core)
 1547
- 1548 VI.B.2. The learning objectives of the program must:
- 1549
- 1550 VI.B.2.a) be accomplished through an appropriate blend of supervised
 1551 patient care responsibilities, clinical teaching, and didactic
 1552 educational events; ^(Core)

1553
1554
1555
1556

VI.B.2.b) be accomplished without excessive reliance on fellows to fulfill non-physician obligations; and, ^(Core)

Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.

1557
1558
1559

VI.B.2.c) ensure manageable patient care responsibilities. ^(Core)

Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. ^(Core)

VI.B.4. Fellows and faculty members must demonstrate an understanding of their personal role in the:

VI.B.4.a) provision of patient- and family-centered care; ^(Outcome)

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; ^(Outcome)

Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.

1574
1575
1576

VI.B.4.c) assurance of their fitness for work, including: ^(Outcome)

Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.

- 1577
1578 **VI.B.4.c).(1)** management of their time before, during, and after
1579 clinical assignments; and, ^(Outcome)
1580
- 1581 **VI.B.4.c).(2)** recognition of impairment, including from illness,
1582 fatigue, and substance use, in themselves, their peers,
1583 and other members of the health care team. ^(Outcome)
1584
- 1585 **VI.B.4.d)** commitment to lifelong learning; ^(Outcome)
1586
- 1587 **VI.B.4.e)** monitoring of their patient care performance improvement
1588 indicators; and, ^(Outcome)
1589
- 1590 **VI.B.4.f)** accurate reporting of clinical and educational work hours,
1591 patient outcomes, and clinical experience data. ^(Outcome)
1592
- 1593 **VI.B.5.** All fellows and faculty members must demonstrate responsiveness
1594 to patient needs that supersedes self-interest. This includes the
1595 recognition that under certain circumstances, the best interests of
1596 the patient may be served by transitioning that patient's care to
1597 another qualified and rested provider. ^(Outcome)
1598
- 1599 **VI.B.6.** Programs, in partnership with their Sponsoring Institutions, must
1600 provide a professional, equitable, respectful, and civil environment
1601 that is free from discrimination, sexual and other forms of
1602 harassment, mistreatment, abuse, or coercion of students, fellows,
1603 faculty, and staff. ^(Core)
1604
- 1605 **VI.B.7.** Programs, in partnership with their Sponsoring Institutions, should
1606 have a process for education of fellows and faculty regarding
1607 unprofessional behavior and a confidential process for reporting,
1608 investigating, and addressing such concerns. ^(Core)

1629
1630
1631

clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.

Background and Intent: The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1648

- VI.C.1.** The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:
- VI.C.1.a)** efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)
- VI.C.1.b)** attention to scheduling, work intensity, and work compression that impacts fellow well-being; ^(Core)
- VI.C.1.c)** evaluating workplace safety data and addressing the safety of fellows and faculty members; ^(Core)

Background and Intent: This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1649
1650
1651
1652

- VI.C.1.d)** policies and programs that encourage optimal fellow and faculty member well-being; and, ^(Core)

Background and Intent: Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1653

1654 VI.C.1.d).(1) Fellows must be given the opportunity to attend
1655 medical, mental health, and dental care appointments,
1656 including those scheduled during their working hours.
1657 (Core)
1658

Background and Intent: The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1659 VI.C.1.e) attention to fellow and faculty member burnout, depression,
1660 and substance abuse. The program, in partnership with its
1661 Sponsoring Institution, must educate faculty members and
1662 fellows in identification of the symptoms of burnout,
1663 depression, and substance abuse, including means to assist
1664 those who experience these conditions. Fellows and faculty
1665 members must also be educated to recognize those
1666 symptoms in themselves and how to seek appropriate care.
1667 The program, in partnership with its Sponsoring Institution,
1668 must: (Core)
1669
1670

Background and Intent: Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance abuse. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1671 VI.C.1.e).(1) encourage fellows and faculty members to alert the
1672 program director or other designated personnel or
1673 programs when they are concerned that another
1674 fellow, resident, or faculty member may be displaying
1675 signs of burnout, depression, substance abuse,
1676 suicidal ideation, or potential for violence; (Core)
1677
1678

Background and Intent: Individuals experiencing burnout, depression, substance abuse, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

1679

- 1680 VI.C.1.e).(2) provide access to appropriate tools for self-screening;
 1681 and, ^(Core)
 1682
 1683 VI.C.1.e).(3) provide access to confidential, affordable mental
 1684 health assessment, counseling, and treatment,
 1685 including access to urgent and emergent care 24
 1686 hours a day, seven days a week. ^(Core)
 1687

Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.

The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.

- 1688
 1689 VI.C.2. There are circumstances in which fellows may be unable to attend
 1690 work, including but not limited to fatigue, illness, family
 1691 emergencies, and parental leave. Each program must allow an
 1692 appropriate length of absence for fellows unable to perform their
 1693 patient care responsibilities. ^(Core)
 1694
 1695 VI.C.2.a) The program must have policies and procedures in place to
 1696 ensure coverage of patient care. ^(Core)
 1697
 1698 VI.C.2.b) These policies must be implemented without fear of negative
 1699 consequences for the fellow who is or was unable to provide
 1700 the clinical work. ^(Core)
 1701

Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.

- 1702
 1703 VI.D. Fatigue Mitigation
 1704
 1705 VI.D.1. Programs must:
 1706
 1707 VI.D.1.a) educate all faculty members and fellows to recognize the
 1708 signs of fatigue and sleep deprivation; ^(Core)
 1709
 1710 VI.D.1.b) educate all faculty members and fellows in alertness
 1711 management and fatigue mitigation processes; and, ^(Core)
 1712
 1713 VI.D.1.c) encourage fellows to use fatigue mitigation processes to
 1714 manage the potential negative effects of fatigue on patient
 1715 care and learning. ^(Detail)
 1716

Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.

This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.

1733
1734

- VI.D.2. Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2–VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue. ^(Core)**
- VI.D.3. The program, in partnership with its Sponsoring Institution, must ensure adequate sleep facilities and safe transportation options for fellows who may be too fatigued to safely return home. ^(Core)**
- VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
- VI.E.1. Clinical Responsibilities**
 - The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. ^(Core)**

Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.

1735
1736
1737
1738
1739
1740

- VI.E.1.a) The program director must have the authority and responsibility to set and adjust fellows’ clinical responsibilities and ensure that the fellows have appropriate clinical responsibilities and an appropriate patient load. ^(Core)**

Subspecialty-Specific Background and Intent: Insufficient patient experiences do not meet educational needs; an excessive patient load suggests an inappropriate reliance on fellows for service obligations, which may jeopardize the educational experience.

1741
1742 VI.E.1.a).(1) This must include progressive clinical, technical, and
1743 consultative experiences that will enable each fellow to
1744 develop expertise as a pediatric hospital medicine
1745 consultant. ^(Core)

1786
1787
1788
1789
1790

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide fellows with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

Background and Intent: In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

1794
1795
1796
1797
1798

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities, clinical work done from home, and all moonlighting. ^(Core)

Background and Intent: Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

Scheduling

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

Oversight

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

Work from Home

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be

structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1799		
1800	VI.F.2.	Mandatory Time Free of Clinical Work and Education
1801		
1802	VI.F.2.a)	The program must design an effective program structure that
1803		is configured to provide fellows with educational
1804		opportunities, as well as reasonable opportunities for rest
1805		and personal well-being. ^(Core)
1806		
1807	VI.F.2.b)	Fellows should have eight hours off between scheduled
1808		clinical work and education periods. ^(Detail)
1809		
1810	VI.F.2.b).(1)	There may be circumstances when fellows choose to
1811		stay to care for their patients or return to the hospital
1812		with fewer than eight hours free of clinical experience
1813		and education. This must occur within the context of
1814		the 80-hour and the one-day-off-in-seven
1815		requirements. ^(Detail)
1816		

Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.

1817
1818
1819
1820

VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.

1821
1822
1823
1824
1825
1826

VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. (Core)

Background and Intent: The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows' preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a "golden weekend," meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as "one (1) continuous 24-hour period free from all administrative, clinical, and educational activities."

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. (Core)

VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. (Core)

VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)

1841

Background and Intent: The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

1842

1843

VI.F.4. Clinical and Educational Work Hour Exceptions

1844

1845

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

1846

1847

1848

1849

1850

VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; (Detail)

1851

1852

1853

VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, (Detail)

1854

1855

1856

VI.F.4.a).(3) to attend unique educational events. (Detail)

1857

1858

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. (Detail)

1859

1860

Background and Intent: This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

1861

1862

VI.F.4.c) A Review Committee may grant rotation-specific exceptions for up to 10 percent or a maximum of 88 clinical and educational work hours to individual programs based on a sound educational rationale.

1863

1864

1865

1866

1867

The Review Committee for Pediatrics will not consider requests for exceptions to the 80-hour limit to the fellows' work week.

1868

1869

1870

VI.F.4.c).(1) In preparing a request for an exception, the program director must follow the clinical and educational work hour exception policy from the *ACGME Manual of Policies and Procedures*. (Core)

1871

1872

1873

1874

1875 VI.F.4.c).(2) Prior to submitting the request to the Review
1876 Committee, the program director must obtain approval
1877 from the Sponsoring Institution's GMEC and DIO. (Core)
1878

Background and Intent: The provision for exceptions for up to 88 hours per week has been modified to specify that exceptions may be granted for specific rotations if the program can justify the increase based on criteria specified by the Review Committee. As in the past, Review Committees may opt not to permit exceptions. The underlying philosophy for this requirement is that while it is expected that all fellows should be able to train within an 80-hour work week, it is recognized that some programs may include rotations with alternate structures based on the nature of the specialty. DIO/GMEC approval is required before the request will be considered by the Review Committee.

1879
1880 VI.F.5. Moonlighting
1881
1882 VI.F.5.a) Moonlighting must not interfere with the ability of the fellow
1883 to achieve the goals and objectives of the educational
1884 program, and must not interfere with the fellow's fitness for
1885 work nor compromise patient safety. (Core)
1886

1887 VI.F.5.b) Time spent by fellows in internal and external moonlighting
1888 (as defined in the ACGME Glossary of Terms) must be
1889 counted toward the 80-hour maximum weekly limit. (Core)
1890

Background and Intent: For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

1891
1892 VI.F.6. In-House Night Float
1893
1894 Night float must occur within the context of the 80-hour and one-
1895 day-off-in-seven requirements. (Core)
1896

Background and Intent: The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

1897
1898 VI.F.7. Maximum In-House On-Call Frequency
1899
1900 Fellows must be scheduled for in-house call no more frequently than
1901 every third night (when averaged over a four-week period). (Core)
1902

1903 VI.F.8. At-Home Call

1904
1905 VI.F.8.a) Time spent on patient care activities by fellows on at-home
1906 call must count toward the 80-hour maximum weekly limit.
1907 The frequency of at-home call is not subject to the every-
1908 third-night limitation, but must satisfy the requirement for one
1909 day in seven free of clinical work and education, when
1910 averaged over four weeks. (Core)

1911
1912 **VI.F.8.a).(1)** **At-home call must not be so frequent or taxing as to**
1913 **preclude rest or reasonable personal time for each**
1914 **fellow. ^(Core)**

1915
1916 **VI.F.8.b)** **Fellows are permitted to return to the hospital while on at-**
1917 **home call to provide direct care for new or established**
1918 **patients. These hours of inpatient patient care must be**
1919 **included in the 80-hour maximum weekly limit. ^(Detail)**
1920

Background and Intent: This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day's case, studying, or research activities do not count toward the 80-hour weekly limit.

In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.
