\* In these requirements, where denoted by an asterisk (\*), the term “subspecialty” should be substituted with “Sponsoring Institution-based fellowship,” which is defined in ACGME Policies and Procedures § 11.30 as an accreditation designation for programs providing “educational experiences that promote the integration of clinical, administrative, and leadership competencies that address the broad healthcare needs in the United States.” As a Sponsoring Institution-based fellowship, the fellowship in health care administration, leadership, and management is not a subspecialty, as it is not related to any specific primary medical specialty. A diesis (‡) indicates a requirement that does not apply to Sponsoring Institution-based fellowships in health care administration, leadership, and management.

1                   **Proposed ACGME Program Requirements for Graduate Medical Education in**  
2                   **Health Care Administration, Leadership, and Management**  
3                   **Common Program Requirements (Fellowship) are in BOLD**  
4

5 Where applicable, text in italics describes the underlying philosophy of the requirements in that  
6 section. These philosophic statements are not program requirements and are therefore not  
7 citable.  
8

**Background and Intent: These fellowship requirements reflect the fact that these learners have already completed the first phase of graduate medical education. Thus, the Common Program Requirements (Fellowship) are intended to explain the differences.**

9  
10 **Introduction**

11  
12 **Int.A.       *Fellowship is advanced graduate medical education beyond a core***  
13 ***residency program for physicians who desire to enter more specialized***  
14 ***practice. Fellowship-trained physicians serve the public by providing***  
15 ***subspecialty\* care, which may also include core medical care, acting as a***  
16 ***community resource for expertise in their field, creating and integrating***  
17 ***new knowledge into practice, and educating future generations of***  
18 ***physicians. Graduate medical education values the strength that a diverse***  
19 ***group of physicians brings to medical care.***

20  
21 ***Fellows who have completed residency are able to practice independently***  
22 ***in their core specialty. The prior medical experience and expertise of***  
23 ***fellows distinguish them from physicians entering into residency training.***  
24 ***The fellow’s care of patients within the subspecialty\* is undertaken with***  
25 ***appropriate faculty supervision and conditional independence. Faculty***  
26 ***members serve as role models of excellence, compassion,***  
27 ***professionalism, and scholarship. The fellow develops deep medical***  
28 ***knowledge, patient care skills, and expertise applicable to their focused***  
29 ***area of practice. Fellowship is an intensive program of subspecialty\****  
30 ***clinical and didactic education that focuses on the multidisciplinary care of***  
31 ***patients. Fellowship education is often physically, emotionally, and***  
32 ***intellectually demanding, and occurs in a variety of clinical learning***  
33 ***environments committed to graduate medical education and the well-being***  
34 ***of patients, residents, fellows, faculty members, students, and all members***  
35 ***of the health care team.***

36  
37 ***In addition to clinical education, many fellowship programs advance***  
38 ***fellows’ skills as physician-scientists. While the ability to create new***  
39 ***knowledge within medicine is not exclusive to fellowship-educated***  
40 ***physicians, the fellowship experience expands a physician’s abilities to***  
41 ***pursue hypothesis-driven scientific inquiry that results in contributions to***  
42 ***the medical literature and patient care. Beyond the clinical subspecialty\****  
43 ***expertise achieved, fellows***

44 ***develop mentored relationships built on an infrastructure that promotes***  
45 ***collaborative research.***

46  
47 *For programs in Health Care Administration, Leadership, and Management*  
48 *“subspecialty care” refers to health care services based on learning acquired in a*  
49 *Sponsoring Institution-based fellowship program.*

50  
51 **Int.B. Definition of Subspecialty\***

52  
53 Fellowship programs in health care administration, leadership, and management  
54 include experiential and didactic education that integrates medical knowledge  
55 with health systems science, allowing fellows to develop skills of physician  
56 executives who manage patient care operations across medical specialties and  
57 health care professions. Consistent with the Quadruple Aim<sup>†</sup>, these fellowships  
58 follow a balanced approach to health care quality and safety that optimizes the  
59 improvement of population health, patient and family experience, and provider  
60 well-being while reducing health care costs.

61  
62 Health care administration, leadership, and management represents a body of  
63 knowledge that addresses the system-based needs of health care environments.  
64 Fellowships in health care administration, leadership, and management integrate  
65 learning from medicine, business, public health, communication, computer  
66 science, economics, law, and other disciplines in a singular educational program.  
67 Health care administration, leadership, and management utilizes a health  
68 systems science framework that defines the knowledge and skills required of  
69 physician executives, and the academic structures of these Sponsoring  
70 Institution-based fellowships.

71  
72 Health care administration, leadership, and management fellowships include  
73 experiences that allow fellows to assume progressive responsibility for projects  
74 across different areas of health care operations. Fellowship accreditation allows  
75 flexibility to customize learning experiences aligned with fellows’ career goals as  
76 well as with the health care system’s needs for physicians with expertise in  
77 health care administration, leadership, and management.

78  
79 Fellows attain competence in essential aspects of administration of complex  
80 health care organizations. Under faculty member supervision, fellows obtain  
81 practical experience working with individuals and business units that have broad  
82 responsibility for health care, workforce, and public safety in health care settings.  
83 Programs provide fellows with opportunities to develop skills at participating sites  
84 that may include, but are not limited to, hospitals, community-based centers, and  
85 government-operated facilities.

---

† The Quadruple Aim is the goal of improving patient experience of care, population health, and health care provider well-being while reducing health care costs.

87 Fellows gain experience during rotations in the offices of health care executives  
88 and other administrative and operational departments of health care facilities. In  
89 these settings, fellows learn to manage institutional systems that are critical to  
90 health care delivery, including systems critical for the promotion of patient safety,  
91 such as those related to event reporting, event investigations, care transitions,  
92 and patient safety education. Rotations also train fellows to provide leadership of  
93 organizational quality improvement activities in alignment with strategic goals,  
94 and through interprofessional team collaboration. Fellows learn techniques for  
95 measuring health care quality through the effective use of institutional,  
96 population-level data to drive performance improvement and to reduce health  
97 care disparities.

98  
99 Didactic education anchors fellows' experiences in theoretical and practical  
100 knowledge relevant to their subsequent leadership roles. Local, regional, and/or  
101 national educational programming introduces fellows to foundational concepts of  
102 health systems science and other relevant disciplines. Fellowship programs may  
103 also include master's-level coursework and project-based learning, certificates,  
104 or other components that emphasize institutional leadership in the administration,  
105 leadership, and management of health care and health systems.

#### 106 107 **Int.C. Length of Educational Program**

108  
109 The educational program in health care administration, leadership, and  
110 management is configured in 12- and 24-month formats. (Core)\*\*

#### 111 112 **I. Oversight**

#### 113 114 **I.A. Sponsoring Institution**

115  
116 *The Sponsoring Institution is the organization or entity that assumes the*  
117 *ultimate financial and academic responsibility for a program of graduate*  
118 *medical education consistent with the ACGME Institutional Requirements.*

119  
120 *When the Sponsoring Institution is not a rotation site for the program, the*  
121 *most commonly utilized site of clinical activity for the program is the*  
122 *primary clinical site.*

123  
**Background and Intent: Participating sites will reflect the health care needs of the community and the educational needs of the fellows. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings including, but not limited to a university, a medical school, a teaching hospital, a nursing home, a school of public health, a health department, a public health agency, an organized health care delivery system, a medical examiner's office, an educational consortium, a teaching health center, a physician group practice, federally qualified health center, or an educational foundation.**

124

Sponsoring Institution-Based Fellowship-Specific Background and Intent: In addition to the settings listed above, educational experiences for fellowships in health care administration, leadership, and management may occur in business schools or graduate programs in health care administration and policy.

150  
151  
152  
153  
154  
155  
156
- I.A.1. The program must be sponsored by one ACGME-accredited Sponsoring Institution. <sup>(Core)</sup>**
  - I.B. Participating Sites**

*A participating site is an organization providing educational experiences or educational assignments/rotations for fellows.*
  - I.B.1. The program, with approval of its Sponsoring Institution, must designate a primary clinical site. <sup>(Core)</sup>**
  - I.B.2. There must be a program letter of agreement (PLA) between the program and each participating site that governs the relationship between the program and the participating site providing a required assignment. <sup>(Core)</sup>**
    - I.B.2.a) The PLA must:**
      - I.B.2.a).(1) be renewed at least every 10 years; and, <sup>(Core)</sup>**
      - I.B.2.a).(2) be approved by the designated institutional official (DIO). <sup>(Core)</sup>**
    - I.B.3. The program must monitor the clinical learning and working environment at all participating sites. <sup>(Core)</sup>**
      - I.B.3.a) At each participating site there must be one faculty member, designated by the program director, who is accountable for fellow education for that site, in collaboration with the program director. <sup>(Core)</sup>**

**Background and Intent: While all fellowship programs must be sponsored by a single ACGME-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must designate a faculty member responsible for ensuring the quality of the educational experience. In some circumstances, the person charged with this responsibility may not be physically present at the site, but remains responsible for fellow education occurring at the site. The requirements under I.B.3. are intended to ensure that this will be the case.**

**Suggested elements to be considered in PLAs will be found in the ACGME Program Director's Guide to the Common Program Requirements. These include:**

- **Identifying the faculty members who will assume educational and supervisory responsibility for fellows**

- Specifying the responsibilities for teaching, supervision, and formal evaluation of fellows
- Specifying the duration and content of the educational experience
- Stating the policies and procedures that will govern fellow education during the assignment

163  
164  
165  
166  
167  
168

**I.B.4.** The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all fellows, of one month full time equivalent (FTE) or more through the ACGME’s Accreditation Data System (ADS). <sup>(Core)</sup>

**I.C.** The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents (if present), fellows, faculty members, senior administrative staff members, and other relevant members of its academic community. <sup>(Core)</sup>

**Background and Intent:** It is expected that the Sponsoring Institution has, and programs implement, policies and procedures related to recruitment and retention of minorities underrepresented in medicine and medical leadership in accordance with the Sponsoring Institution’s mission and aims. The program’s annual evaluation must include an assessment of the program’s efforts to recruit and retain a diverse workforce, as noted in V.C.1.c).(5).(c).

193  
194  
195

**I.D. Resources**

**I.D.1.** The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for fellow education. <sup>(Core)</sup>

**I.D.1.a)** There must be a letter of support demonstrating a commitment of resources for fellow education in health care administration, leadership, and management for each participating site contributing 12 weeks or more of fellows’ educational experiences, which must be signed by the chief executive officer of the participating site and include resources for each office responsible for providing fellow education in finance, human resources, operations, legal counsel, patient safety, quality improvement, and governance. <sup>(Core)</sup>

**I.D.2.** The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote fellow well-being and provide for: <sup>(Core)</sup>

**I.D.2.a)** access to food while on duty; <sup>(Core)</sup>

**I.D.2.b)** safe, quiet, clean, and private sleep/rest facilities available and accessible for fellows with proximity appropriate for safe patient care; <sup>(Core)</sup>

**Background and Intent: Care of patients within a hospital or health system occurs continually through the day and night. Such care requires that fellows function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities. Access to food and rest are examples of these basic needs, which must be met while fellows are working. Fellows should have access to refrigeration where food may be stored. Food should be available when fellows are required to be in the hospital overnight. Rest facilities are necessary, even when overnight call is not required, to accommodate the fatigued fellow.**

196

Sponsoring Institution-Based Fellowship-Specific Background and Intent: For Sponsoring Institution-based fellowships, the requirements addressing access to food and sleep/rest facilities are specific to fellow assignments in a hospital or health system.

197

198

199

200

201

- I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care;**  
(Core)

**Background and Intent: Sites must provide private and clean locations where fellows may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the fellow with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the fellow and the fellow's family, as outlined in VI.C.1.d).(1).**

202

Sponsoring Institution-Based Fellowship-Specific Background and Intent: For Sponsoring Institution-based fellowships, the requirements addressing lactation facilities are specific to fellow assignments in a hospital or health system.

203

204

205

206

207

- I.D.2.d) security and safety measures appropriate to the participating site; and,** (Core)

208

209

210

- I.D.2.e) accommodations for fellows with disabilities consistent with the Sponsoring Institution's policy.** (Core)

211

212

213

214

215

- I.D.3. Fellows must have ready access to subspecialty\*-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities.** (Core)

216

217

218

- I.D.4. The program's educational and clinical resources must be adequate to support the number of fellows appointed to the program.** (Core)

219

220

221

- I.D.5. Fellows must have adequate workspace in proximity to the offices of the executive team.** (Core)

222 I.E. *A fellowship program usually occurs in the context of many learners and*  
223 *other care providers and limited clinical resources. It should be structured*  
224 *to optimize education for all learners present.*

226 I.E.1. **Fellows should contribute to the education of residents in core**  
227 **programs, if present.** <sup>(Core)</sup>  
228

**Background and Intent: The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that fellows' education is not compromised by the presence of other providers and learners, and that fellows' education does not compromise core residents' education.**

229  
230 **II. Personnel**

231  
232 **II.A. Program Director**

233  
234 **II.A.1. There must be one faculty member appointed as program director**  
235 **with authority and accountability for the overall program, including**  
236 **compliance with all applicable program requirements.** <sup>(Core)</sup>  
237

238 **II.A.1.a) The Sponsoring Institution's Graduate Medical Education**  
239 **Committee (GMEC) must approve a change in program**  
240 **director.** <sup>(Core)</sup>  
241

242 **II.A.1.b) Final approval of the program director resides with the**  
243 **Review Committee.** <sup>(Core)</sup>  
244

245 **II.A.1.b).(1) For Sponsoring Institution-based fellowships, final approval**  
246 **of the program director resides with the DIO in**  
247 **collaboration with the GMEC.** <sup>(Core)</sup>  
248

**Background and Intent: While the ACGME recognizes the value of input from numerous individuals in the management of a fellowship, a single individual must be designated as program director and have overall responsibility for the program. The program director's nomination is reviewed and approved by the GMEC. Final approval of the program director resides with the applicable ACGME Review Committee.**

249  
250 **II.A.2. The program director and, as applicable, the program's leadership**  
251 **team, must be provided with support adequate for administration of**  
252 **the program based upon its size and configuration.** <sup>(Core)</sup>  
253

254 **II.A.2.a) At a minimum, the program director must be provided with support**  
255 **equal to a dedicated minimum of 0.1 FTE for administration of the**  
256 **program.** <sup>(Core)</sup>  
257

**Background and Intent: To achieve successful graduate medical education, individuals serving as education and administrative leaders of fellowship programs, as well as those**

significantly engaged in the education, supervision, evaluation, and mentoring of fellows, must have sufficient dedicated professional time to perform the vital activities required to sustain an accredited program.

The ultimate outcome of graduate medical education is excellence in fellow education and patient care.

The program director and, as applicable, the program leadership team, devote a portion of their professional effort to the oversight and management of the fellowship program, as defined in II.A.4.-II.A.4.a).(16). Both provision of support for the time required for the leadership effort and flexibility regarding how this support is provided are important. Programs, in partnership with their Sponsoring Institutions, may provide support for this time in a variety of ways. Examples of support may include, but are not limited to, salary support, supplemental compensation, educational value units, or relief of time from other professional duties.

Program directors and, as applicable, members of the program leadership team, who are new to the role may need to devote additional time to program oversight and management initially as they learn and become proficient in administering the program. It is suggested that during this initial period the support described above be increased as needed.

258

259

**II.A.3. Qualifications of the program director:**

260

261

**II.A.3.a) must include subspecialty\* expertise and qualifications acceptable to the Review Committee;** <sup>(Core)</sup>

262

263

264

**II.A.3.b) must include current certification by a member Board of the American Board of Medical Subspecialties or by a certifying Board of the American Osteopathic Association, or subspecialty qualifications that are acceptable to the Review Committee;** <sup>(Core)</sup>

265

266

267

268

269

**II.A.3.c) must include experience of at least five years as a physician executive leader;** <sup>(Core)</sup>

270

271

272

**II.A.3.d) must include experience of at least five years (part-time or full-time) of medical practice; and,** <sup>(Core)</sup>

273

274

275

**II.A.3.e) should include experience of at least three years as an educator (not necessarily specific to graduate medical education (GME)).** <sup>(Core)</sup>

276

277

278

279

**II.A.3.e).(1) A mentorship plan for the program director must be developed and implemented by the Sponsoring Institution if the program director has fewer than three years' experience as an educator at the time of appointment.** <sup>(Core)</sup>

280

281

282

283

284

**II.A.4. Program Director Responsibilities**

285

286

287 The program director must have responsibility, authority, and  
288 accountability for: administration and operations; teaching and  
289 scholarly activity; fellow recruitment and selection, evaluation, and  
290 promotion of fellows, and disciplinary action; supervision of fellows;  
291 and fellow education in the context of patient care. <sup>(Core)</sup>  
292

293 **II.A.4.a) The program director must:**

294 **II.A.4.a).(1) be a role model of professionalism;** <sup>(Core)</sup>  
295  
296

**Background and Intent:** The program director, as the leader of the program, must serve as a role model to fellows in addition to fulfilling the technical aspects of the role. As fellows are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplar. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.

297  
298 **II.A.4.a).(2) design and conduct the program in a fashion**  
299 **consistent with the needs of the community, the**  
300 **mission(s) of the Sponsoring Institution, and the**  
301 **mission(s) of the program;** <sup>(Core)</sup>  
302

**Background and Intent:** The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the ultimate goal of addressing these needs and health disparities.

303  
**Sponsoring Institution-Based Fellowship-Specific Background and Intent:** For Sponsoring Institution-based fellowships, this includes the learning and working environments of the Sponsoring Institution.

304  
305 **II.A.4.a).(3) administer and maintain a learning environment**  
306 **conducive to educating the fellows in each of the**  
307 **ACGME Competency domains;** <sup>(Core)</sup>  
308

**Background and Intent:** The program director may establish a leadership team to assist in the accomplishment of program goals. Fellowship programs can be highly complex. In a complex organization the leader typically has the ability to delegate authority to others, yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.

309  
310 **II.A.4.a).(4) develop and oversee a process to evaluate candidates**  
311 **prior to approval as program faculty members for**  
312 **participation in the fellowship program education and**  
313 **at least annually thereafter, as outlined in V.B.;** <sup>(Core)</sup>  
314

- 315 **II.A.4.a).(5)** have the authority to approve program faculty  
 316 members for participation in the fellowship program  
 317 education at all sites; <sup>(Core)</sup>  
 318
- 319 **II.A.4.a).(6)** have the authority to remove program faculty  
 320 members from participation in the fellowship program  
 321 education at all sites; <sup>(Core)</sup>  
 322
- 323 **II.A.4.a).(7)** have the authority to remove fellows from supervising  
 324 interactions and/or learning environments that do not  
 325 meet the standards of the program; <sup>(Core)</sup>  
 326

**Background and Intent: The program director has the responsibility to ensure that all who educate fellows effectively role model the Core Competencies. Working with a fellow is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.**

**There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.**

- 327
- 328 **II.A.4.a).(8)** submit accurate and complete information required  
 329 and requested by the DIO, GMEC, and ACGME; <sup>(Core)</sup>  
 330
- 331 **II.A.4.a).(9)** provide applicants who are offered an interview with  
 332 information related to the applicant's eligibility for the  
 333 relevant subspecialty board examination(s); <sup>(Core)</sup>  
 334
- 335 **II.A.4.a).(10)** provide a learning and working environment in which  
 336 fellows have the opportunity to raise concerns and  
 337 provide feedback in a confidential manner as  
 338 appropriate, without fear of intimidation or retaliation;  
 339 <sup>(Core)</sup>  
 340
- 341 **II.A.4.a).(11)** ensure the program's compliance with the Sponsoring  
 342 Institution's policies and procedures related to  
 343 grievances and due process; <sup>(Core)</sup>  
 344
- 345 **II.A.4.a).(12)** ensure the program's compliance with the Sponsoring  
 346 Institution's policies and procedures for due process  
 347 when action is taken to suspend or dismiss, not to  
 348 promote, or not to renew the appointment of a fellow;  
 349 <sup>(Core)</sup>  
 350

**Background and Intent: A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures, and will ensure they are followed by the program's leadership, faculty members, support personnel, and fellows.**

351

- 352 II.A.4.a).(13) ensure the program’s compliance with the Sponsoring  
 353 Institution’s policies and procedures on employment  
 354 and non-discrimination; (Core)  
 355  
 356 II.A.4.a).(13).(a) Fellows must not be required to sign a non-  
 357 competition guarantee or restrictive covenant.  
 358 (Core)  
 359  
 360 II.A.4.a).(14) document verification of program completion for all  
 361 graduating fellows within 30 days; (Core)  
 362  
 363 II.A.4.a).(15) provide verification of an individual fellow’s  
 364 completion upon the fellow’s request, within 30 days;  
 365 and, (Core)  
 366

**Background and Intent: Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of fellows who have previously completed the program. Fellows who leave the program prior to completion also require timely documentation of their summative evaluation.**

- 367  
 368 II.A.4.a).(16) obtain review and approval of the Sponsoring  
 369 Institution’s DIO before submitting information or  
 370 requests to the ACGME, as required in the Institutional  
 371 Requirements and outlined in the ACGME Program  
 372 Director’s Guide to the Common Program  
 373 Requirements. (Core)  
 374

375 **II.B. Faculty**

376  
 377 *Faculty members are a foundational element of graduate medical education*  
 378 *– faculty members teach fellows how to care for patients. Faculty members*  
 379 *provide an important bridge allowing fellows to grow and become practice*  
 380 *ready, ensuring that patients receive the highest quality of care. They are*  
 381 *role models for future generations of physicians by demonstrating*  
 382 *compassion, commitment to excellence in teaching and patient care,*  
 383 *professionalism, and a dedication to lifelong learning. Faculty members*  
 384 *experience the pride and joy of fostering the growth and development of*  
 385 *future colleagues. The care they provide is enhanced by the opportunity to*  
 386 *teach. By employing a scholarly approach to patient care, faculty members,*  
 387 *through the graduate medical education system, improve the health of the*  
 388 *individual and the population.*

389  
 390 *Faculty members ensure that patients receive the level of care expected*  
 391 *from a specialist in the field. They recognize and respond to the needs of*  
 392 *the patients, fellows, community, and institution. Faculty members provide*  
 393 *appropriate levels of supervision to promote patient safety. Faculty*  
 394 *members create an effective learning environment by acting in a*  
 395 *professional manner and attending to the well-being of the fellows and*  
 396 *themselves.*

397

**Background and Intent: “Faculty” refers to the entire teaching force responsible for educating fellows. The term “faculty,” including “core faculty,” does not imply or require an academic appointment.**

398

399

**II.B.1. For each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all fellows at that location.** <sup>(Core)</sup>

400

401

402

403

**II.B.1.a)** There must be at least one faculty member at each participating site who is accountable and responsible for fellows’ achievement of the goals of the educational experience at that participating site. <sup>(Core)</sup>

404

405

406

407

408

**II.B.1.b)** There must be at least one core faculty member at each participating site where fellows will rotate for 12 weeks or more. <sup>(Core)</sup>

409

410

411

412

**II.B.1.c)** Among the faculty there must be:

413

414

**II.B.1.c).(1)** in the aggregate, individuals who possess expertise in the medical knowledge content areas (IV.B.); <sup>(Core)</sup>

415

416

417

**II.B.1.c).(2)** at least one senior administrative physician leader based professionally at the primary clinical site; and, <sup>(Core)</sup>

418

419

420

**II.B.1.c).(3)** at least one senior leader, other than a physician, based professionally at the primary clinical site. <sup>(Core)</sup>

421

422

423

**II.B.2. Faculty members must:**

424

425

**II.B.2.a)** be role models of professionalism; <sup>(Core)</sup>

426

427

**II.B.2.b)** demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; <sup>(Core)</sup>

428

429

**Background and Intent: Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.**

430

431

**II.B.2.c)** demonstrate a strong interest in the education of fellows; <sup>(Core)</sup>

432

433

**II.B.2.d)** devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; <sup>(Core)</sup>

434

435

436

**II.B.2.e)** administer and maintain an educational environment conducive to educating fellows; <sup>(Core)</sup>

437

438

- 439 **II.B.2.f)** regularly participate in organized clinical discussions,  
 440 rounds, journal clubs, and conferences; and, <sup>(Core)</sup>  
 441  
 442 **II.B.2.g)** pursue faculty development designed to enhance their skills  
 443 at least annually. <sup>(Core)</sup>  
 444

**Background and Intent:** Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the fellowship program faculty in the aggregate.

- 445  
 446 **II.B.3. Faculty Qualifications**  
 447  
 448 **II.B.3.a)** Faculty members must have appropriate qualifications in  
 449 their field and hold appropriate institutional appointments.  
 450 <sup>(Core)</sup>  
 451  
 452 **II.B.3.b)** Subspecialty\* physician faculty members must:  
 453  
 454 **II.B.3.b).(1)** have current certification by a member board of the  
 455 ABMS or a certifying board of the AOA, or possess  
 456 qualifications judged acceptable to the Review  
 457 Committee. <sup>(Core)</sup>  
 458  
 459 **II.B.3.c)** Any non-physician faculty members who participate in  
 460 fellowship program education must be approved by the  
 461 program director. <sup>(Core)</sup>  
 462

**Background and Intent:** The provision of optimal and safe patient care requires a team approach. The education of fellows by non-physician educators enables the fellows to better manage patient care and provides valuable advancement of the fellows' knowledge. Furthermore, other individuals contribute to the education of the fellow in the basic science of the subspecialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the fellow, the program director may designate the individual as a program faculty member or a program core faculty member.

463  
 Sponsoring Institution-Based Fellowship-Specific Background and Intent: For Sponsoring Institution-based fellowships, other individuals contribute to the education of the fellow in health systems sciences and/or health services research methodology.

- 464  
 465 **II.B.3.d)** Any other specialty physician faculty members must have  
 466 current certification in their specialty by the appropriate  
 467 American Board of Medical Specialties (ABMS) member  
 468 board or American Osteopathic Association (AOA) certifying  
 469 board, or possess qualifications judged acceptable to the  
 470 Review Committee. <sup>(Core)</sup>

471  
472  
473  
474  
475  
476  
477  
478  
479

**II.B.4. Core Faculty**

**Core faculty members must have a significant role in the education and supervision of fellows and must devote a significant portion of their entire effort to fellow education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to fellows. <sup>(Core)</sup>**

**Background and Intent: Core faculty members are critical to the success of fellow education. They support the program leadership in developing, implementing, and assessing curriculum, mentoring fellows, and assessing fellows' progress toward achievement of competence in and the independent practice of the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program. Core faculty members may also be selected for their specific expertise and unique contribution to the program. Core faculty members are engaged in a broad range of activities, which may vary across programs and specialties. Core faculty members provide clinical teaching and supervision of fellows, and also participate in non-clinical activities related to fellow education and program administration. Examples of these non-clinical activities include, but are not limited to, interviewing and selecting fellow applicants, providing didactic instruction, mentoring fellows, simulation exercises, completing the annual ACGME Faculty Survey, and participating on the program's Clinical Competency Committee, Program Evaluation Committee, and other GME committees.**

480  
481  
482  
483  
484

491  
492  
493  
494  
495  
496  
497  
498  
499  
500  
501

**II.B.4.a) Core faculty members must be designated by the program director. <sup>(Core)</sup>**

**II.B.4.b) Core faculty members must complete the annual ACGME Faculty Survey. <sup>(Core)</sup>**

**II.B.4.c) There must be one core faculty member with experience in the senior leadership of a health care organization. <sup>(Core)</sup>**

**II.C. Program Coordinator**

**II.C.1. There must be a program coordinator. <sup>(Core)</sup>**

**II.C.2. The program coordinator must be provided with dedicated time and support adequate for administration of the program based upon its size and configuration. <sup>(Core)</sup>**

**II.C.2.a) At a minimum, the program coordinator must be provided with support equal to a dedicated minimum of 0.2 FTE for administration of the program. <sup>(Core)</sup>**

**Background and Intent: The requirement does not address the source of funding required to provide the specified salary support.**

**Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as otherwise titled by the institution. This person will**

frequently manage the day-to-day operations of the program and serve as an important liaison and facilitator between the learners, faculty and other staff members, and the ACGME. Individuals serving in this role are recognized as program coordinators by the ACGME.

The program coordinator is a key member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management appropriate to the complexity of the program. Program coordinators are expected to develop in-depth knowledge of the ACGME and Program Requirements, including policies and procedures. Program coordinators assist the program director in meeting accreditation requirements, educational programming, and support of fellows.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer fellows may not require a full-time coordinator; one coordinator may support more than one program.

502  
503  
504  
505  
506  
507

## **II.D. Other Program Personnel**

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. (Core)

**Background and Intent:** Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

508

521  
522  
523

## **III. Fellow Appointments**

### **III.A. Eligibility Criteria**

#### **III.A.1. Eligibility Requirements – Fellowship Programs**

All required clinical education for entry into ACGME-accredited fellowship programs must be completed in an ACGME-accredited residency program, an AOA-approved residency program, a program with ACGME International (ACGME-I) Advanced Specialty Accreditation, or a Royal College of Physicians and Surgeons of Canada (RCPSC)-accredited or College of Family Physicians of Canada (CFPC)-accredited residency program located in Canada.  
(Core)

**Background and Intent:** Eligibility for ABMS or AOA Board certification may not be satisfied by fellowship training. Applicants must be notified of this at the time of application, as required in II.A.4.a).(9).

524  
525  
526

**III.A.1.a) Fellowship programs must receive verification of each entering fellow's level of competence in the required field,**

527 **upon matriculation, using ACGME, ACGME-I, or CanMEDS**  
528 **Milestones evaluations from the core residency program.** (Core)  
529  
530 III.A.1.b) A fellow completing a fellowship in the 12- or 24-month format  
531 must have completed a residency program from among those  
532 listed in III.A.1. (Core)  
533  
534 III.A.1.c) For a fellow’s prior educational experience in health care  
535 administration, leadership, and management to be counted to  
536 permit completion of the fellowship in a 12-month format, the  
537 fellow must have a master’s degree in business administration or  
538 another field related to health care administration, leadership, and  
539 management, and that fellow’s prior educational experience must:  
540 (Core)  
541  
542 III.A.1.c).(1) be limited to a maximum of 12 months; and, (Core)  
543  
544 III.A.1.c).(2) be approved by the program director and DIO. (Core)  
545  
546 **III.A.1.d) Fellow Eligibility Exception**  
547  
548 **The Institutional Review Committee will allow the following**  
549 **exception to the fellowship eligibility requirements:**  
550  
551 **III.A.1.d).(1) An ACGME-accredited fellowship program may accept**  
552 **an exceptionally qualified international graduate**  
553 **applicant who does not satisfy the eligibility**  
554 **requirements listed in III.A.1., but who does meet all of**  
555 **the following additional qualifications and conditions:**  
556 (Core)  
557  
558 **III.A.1.d).(1).(a) evaluation by the program director and**  
559 **fellowship selection committee of the**  
560 **applicant’s suitability to enter the program,**  
561 **based on prior training and review of the**  
562 **summative evaluations of training in the core**  
563 **specialty; and,** (Core)  
564  
565 **III.A.1.d).(1).(b) review and approval of the applicant’s**  
566 **exceptional qualifications by the GMEC; and,**  
567 (Core)  
568  
569 **III.A.1.d).(1).(c) verification of Educational Commission for**  
570 **Foreign Medical Graduates (ECFMG)**  
571 **certification.** (Core)  
572  
573 **III.A.1.d).(2) Applicants accepted through this exception must have**  
574 **an evaluation of their performance by the Clinical**  
575 **Competency Committee within 12 weeks of**  
576 **matriculation.** (Core)  
577

**Background and Intent: An exceptionally qualified international graduate applicant has (1) completed a residency program in the core specialty outside the continental United States that was not accredited by the ACGME, AOA, ACGME-I, RCPSC or CFPC, and (2) demonstrated clinical excellence, in comparison to peers, throughout training. Additional evidence of exceptional qualifications is required, which may include one of the following: (a) participation in additional clinical or research training in the specialty or subspecialty\*; (b) demonstrated scholarship in the specialty or subspecialty\*; and/or (c) demonstrated leadership during or after residency. Applicants being considered for these positions must be informed of the fact that their training may not lead to certification by ABMS member boards or AOA certifying boards.**

**In recognition of the diversity of medical education and training around the world, this early evaluation of clinical competence required for these applicants ensures they can provide quality and safe patient care. Any gaps in competence should be addressed as per policies for fellows already established by the program in partnership with the Sponsoring Institution.**

610  
611  
612

**III.B. The program director must not appoint more fellows than approved by the Review Committee. (Core)**

**III.B.1. All complement increases must be approved by the Review Committee. (Core)**

**III.C. Fellow Transfers**

**The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring fellow, and Milestones evaluations upon matriculation. (Core)**

**IV. Educational Program**

***The ACGME accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.***

***The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.***

***In addition, the program is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. While programs must demonstrate substantial compliance with the Common and subspecialty\*-specific Program Requirements, it is recognized that within this framework, programs may place different emphasis on research, leadership, public health, etc. It is expected that the program aims will reflect the nuanced program-specific goals for it and its graduates; for example, it is expected that a program aiming to prepare physician-scientists will have a different curriculum from one focusing on community health.***

**IV.A. The curriculum must contain the following educational components: (Core)**

613  
614 **IV.A.1.** a set of program aims consistent with the Sponsoring Institution’s  
615 mission, the needs of the community it serves, and the desired  
616 distinctive capabilities of its graduates; <sup>(Core)</sup>

617  
618 **IV.A.1.a)** The program’s aims must be made available to program  
619 applicants, fellows, and faculty members. <sup>(Core)</sup>

620  
621 **IV.A.2.** competency-based goals and objectives for each educational  
622 experience designed to promote progress on a trajectory to  
623 autonomous practice in their subspecialty. These must be  
624 distributed, reviewed, and available to fellows and faculty members;  
625 <sup>(Core)</sup>  
626

Sponsoring Institution-Based Fellowship-Specific Background and Intent: For Sponsoring Institution-based fellowships, these would include competency-based goals and objectives consistent with the fellowship’s goals.

627  
628 **IV.A.3.** delineation of fellow responsibilities for patient care, progressive  
629 responsibility for patient management, and graded supervision in  
630 their subspecialty.; <sup>(Core)</sup>  
631

**Background and Intent:** These responsibilities may generally be described by PGY level and specifically by Milestones progress as determined by the Clinical Competency Committee. This approach encourages the transition to competency-based education. An advanced learner may be granted more responsibility independent of PGY level and a learner needing more time to accomplish a certain task may do so in a focused rather than global manner.

632  
Sponsoring Institution-Based Fellowship-Specific Background and Intent: For Sponsoring Institution-based fellowships, this would include delineation of graded fellow responsibilities consistent with the fellowship’s goals. These responsibilities would include Milestones that are defined in the fellowship program’s goals and objectives and progress toward these Milestones would be determined by the Clinical Competency Committee (CCC).

633  
634 **IV.A.4.** structured educational activities beyond direct patient care; and,  
635 <sup>(Core)</sup>  
636

**Background and Intent:** Patient care-related educational activities, such as morbidity and mortality conferences, tumor boards, surgical planning conferences, case discussions, etc., allow fellows to gain medical knowledge directly applicable to the patients they serve. Programs should define those educational activities in which fellows are expected to participate and for which time is protected. Further specification can be found in IV.C.

637  
Sponsoring Institution-Based Fellowship-Specific Background and Intent: For Sponsoring Institution based-fellowships, educational activities include administrative, managerial, and leadership educational programs and events.

638

639 **IV.A.5.** advancement of fellows' knowledge of ethical principles  
640 foundational to medical professionalism. (Core)

641  
642 **IV.B.** **ACGME Competencies**  
643

**Background and Intent: The Competencies provide a conceptual framework describing the required domains for a trusted physician to enter autonomous practice. These Competencies are core to the practice of all physicians, although the specifics are further defined by each subspecialty. The developmental trajectories in each of the Competencies are articulated through the Milestones for each subspecialty. The focus in fellowship is on subspecialty-specific patient care and medical knowledge, as well as refining the other competencies acquired in residency.**

644  
Sponsoring Institution-Based Fellowship-Specific Background and Intent: These responsibilities include Milestones that are defined in the fellowship program's goals and objectives and progress toward these Milestones would be determined by the CCC.

645  
646 **IV.B.1.** **The program must integrate the following ACGME Competencies**  
647 **into the curriculum:** (Core)

648  
649 **IV.B.1.a)** **Professionalism**

650  
651 **Fellows must demonstrate a commitment to professionalism**  
652 **and an adherence to ethical principles.** (Core)

653  
654 **IV.B.1.b)** **Patient Care and Procedural Skills**  
655

**Background and Intent: Quality patient care is safe, effective, timely, efficient, patient-centered, equitable, and designed to improve population health, while reducing per capita costs. (See the Institute of Medicine [IOM]'s *Crossing the Quality Chasm: A New Health System for the 21st Century*, 2001 and Berwick D, Nolan T, Whittington J. *The Triple Aim: care, cost, and quality. Health Affairs*. 2008; 27(3):759-769.). In addition, there should be a focus on improving the clinician's well-being as a means to improve patient care and reduce burnout among residents, fellows, and practicing physicians.**

**These organizing principles inform the Common Program Requirements across all Competency domains. Specific content is determined by the Review Committees with input from the appropriate professional societies, certifying boards, and the community.**

656  
657 **IV.B.1.b).(1)** **Fellows must be able to provide patient care that is**  
658 **compassionate, appropriate, and effective for the**  
659 **treatment of health problems and the promotion of**  
660 **health.** (Core)

661  
662 **IV.B.1.b).(1).(a)** **Fellows must demonstrate competence in essential**  
663 **aspects of health care administration, leadership,**  
664 **and management at the organizational level,**  
665 **including operations, finance, and human**  
666 **resources; effective interprofessional teamwork;**  
667 **and interactions with institutional governance.** (Core)

668		
669	IV.B.1.b).(1).(b)	Fellows must demonstrate competence in managing institutional systems that are critical to the promotion of patient safety and health care quality. <sup>(Core)</sup>
670		
671		
672		
673

769		

770 **IV.B.1.d) Practice-based Learning and Improvement**  
771  
772 **Fellows must demonstrate the ability to investigate and**  
773 **evaluate their care of patients, to appraise and assimilate**  
774 **scientific evidence, and to continuously improve patient care**  
775 **based on constant self-evaluation and lifelong learning.** <sup>(Core)</sup>  
776

**Background and Intent: Practice-based learning and improvement is one of the defining characteristics of being a physician. It is the ability to investigate and evaluate the care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.**

**The intention of this Competency is to help a fellow refine the habits of mind required to continuously pursue quality improvement, well past the completion of fellowship.**

777  
778 **IV.B.1.e) Interpersonal and Communication Skills**  
779  
780 **Fellows must demonstrate interpersonal and communication**  
781 **skills that result in the effective exchange of information and**  
782 **collaboration with patients, their families, and health**  
783 **professionals.** <sup>(Core)</sup>  
784

785 **IV.B.1.f) Systems-based Practice**  
786  
787 **Fellows must demonstrate an awareness of and**  
788 **responsiveness to the larger context and system of health**  
789 **care, including the social determinants of health, as well as**  
790 **the ability to call effectively on other resources to provide**  
791 **optimal health care.** <sup>(Core)</sup>  
792

793 **IV.C. Curriculum Organization and Fellow Experiences**  
794

795 **IV.C.1. The curriculum must be structured to optimize fellow educational**  
796 **experiences, the length of these experiences, and supervisory**  
797 **continuity.** <sup>(Core)</sup>  
798

799 **IV.C.1.a) Curricular design must be consistent with the program's aims and**  
800 **each fellow's goals and must demonstrate a systematic approach**  
801 **with attention to evidence-based principles and scientific literature.**  
802 <sup>(Core)</sup>  
803

804 **IV.C.2. The program must provide instruction and experience in pain**  
805 **management if applicable for the subspecialty\*, including**  
806 **recognition of the signs of addiction.** <sup>(Core)</sup>  
807

808 **IV.C.3. The program must provide a course of regular didactic instruction that is**  
809 **consistent with the medical knowledge of health care administration,**  
810 **leadership, and management, and that is coordinated with experiences**  
811 **appropriate for each fellow's level of education.** <sup>(Core)</sup>  
812

813 Sponsoring Institution-Based Fellowship-Specific Background and Intent: Master's degree-  
814 oriented formal educational courses and national and regional leadership organizations may  
815 provide a substantial portion of the fellowship program's didactic instruction.

816  
817 IV.C.3.a) If a degree- or certificate-granting graduate-level educational  
818 program or equivalent has been integrated into the fellowship,  
819 then the fellow's experiential education in health care  
820 administration, leadership, and management must not be  
821 compromised by participation in that program. <sup>(Core)</sup>  
822

823 IV.C.4. Educational experiences must include:

824  
825 IV.C.4.a) mentorship provided by multiple members of an organization's  
826 senior executive leadership; <sup>(Core)</sup>  
827

828 IV.C.4.a).(1) In organizations that provide 24-hour health care services,  
829 mentorship experience should include exposure to  
830 overnight administrative call responsibilities. <sup>(Core)</sup>  
831

832 IV.C.4.b) longitudinal participation in organization-level committees, with  
833 progressive responsibility for committee administration and  
834 leadership; <sup>(Core)</sup>  
835

836 IV.C.4.c) longitudinal participation in executive-level daily team meetings,  
837 as applicable; <sup>(Core)</sup>  
838

839 IV.C.4.d) longitudinal observation of health systems governance; <sup>(Core)</sup>  
840

841 IV.C.4.e) longitudinal observation of a patient safety or quality committee of  
842 health systems governance; and, <sup>(Core)</sup>  
843

844 IV.C.4.f) rotational experiences that are designed to enable fellows to  
845 achieve competence in major departmental functions in key  
846 business units. <sup>(Core)</sup>  
847

848 IV.C.4.f).(1) Rotation experiences must include rotations in at least 50  
849 percent of one organization's primary administrative,  
850 operational, and managerial business units. <sup>(Core)</sup>  
851

852 IV.C.5. Educational experiences used to satisfy requirements for completion of  
853 the fellowship must be limited to content areas within health care  
854 administration, leadership, and management. <sup>(Core)</sup>  
855

#### 856 IV.D. Scholarship

857  
858 ***Medicine is both an art and a science. The physician is a humanistic***  
859 ***scientist who cares for patients. This requires the ability to think critically,***  
860 ***evaluate the literature, appropriately assimilate new knowledge, and***  
861 ***practice lifelong learning. The program and faculty must create an***  
862 ***environment that fosters the acquisition of such skills through fellow***

863 *participation in scholarly activities as defined in the subspecialty\*-specific*  
864 *Program Requirements. Scholarly activities may include discovery,*  
865 *integration, application, and teaching.*

866  
867 *The ACGME recognizes the diversity of fellowships and anticipates that*  
868 *programs prepare physicians for a variety of roles, including clinicians,*  
869 *scientists, and educators. It is expected that the program's scholarship will*  
870 *reflect its mission(s) and aims, and the needs of the community it serves.*  
871 *For example, some programs may concentrate their scholarly activity on*  
872 *quality improvement, population health, and/or teaching, while other*  
873 *programs might choose to utilize more classic forms of biomedical*  
874 *research as the focus for scholarship.*

875  
876 *In addition to the roles above, Sponsoring Institution-based fellowships prepare*  
877 *physicians to be managers and executives.*  
878

879 **IV.D.1. Program Responsibilities**

880  
881 **IV.D.1.a) The program must demonstrate evidence of scholarly**  
882 **activities, consistent with its mission(s) and aims. (Core)**

883  
884  
885 **IV.D.1.b) The program in partnership with its Sponsoring Institution,**  
886 **must allocate adequate resources to facilitate fellow and**  
887 **faculty involvement in scholarly activities. (Core)**

888  
889 **IV.D.1.b).(1) The program must ensure adequate resources for each**  
890 **fellow's capstone project. (Core)**

891  
892 **IV.D.2. Faculty Scholarly Activity**

893  
894 **IV.D.2.a) Among their scholarly activity, programs must demonstrate**  
895 **accomplishments in at least three of the following domains:**  
896 **(Core)**

- 897  
898  
899  
900  
901  
902  
903  
904  
905  
906  
907  
908  
909  
910
- **Research in basic science, education, translational science, patient care, or population health**
  - **Peer-reviewed grants**
  - **Quality improvement and/or patient safety initiatives**
  - **Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports**
  - **Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials**
  - **Contribution to professional committees, educational organizations, or editorial boards**
  - **Innovations in education**

- 911 IV.D.2.a).(1) In addition to the domains above, program  
 912 accomplishments in Sponsoring Institution-based  
 913 fellowships may include:  
 914  
 915 • Research in health systems and related business  
 916 sciences  
 917 • Innovations in health care administration, leadership,  
 918 and management  
 919 • Contribution to public and/or health care policy  
 920  
 921 IV.D.2.b) **The program must demonstrate dissemination of scholarly**  
 922 **activity within and external to the program by the following**  
 923 **methods:**  
 924

**Background and Intent: For the purposes of education, metrics of scholarly activity represent one of the surrogates for the program’s effectiveness in the creation of an environment of inquiry that advances the fellows’ scholarly approach to patient care. The Review Committee will evaluate the dissemination of scholarship for the program as a whole, not for individual faculty members, for a five-year interval, for both core and non-core faculty members, with the goal of assessing the effectiveness of the creation of such an environment. The ACGME recognizes that there may be differences in scholarship requirements between different specialties and between residencies and fellowships in the same specialty\*.**

- 925  
 926 IV.D.2.b).(1) **faculty participation in grand rounds, posters,**  
 927 **workshops, quality improvement presentations,**  
 928 **podium presentations, grant leadership, non-peer-**  
 929 **reviewed print/electronic resources, articles or**  
 930 **publications, book chapters, textbooks, webinars,**  
 931 **service on professional committees, or serving as a**  
 932 **journal reviewer, journal editorial board member, or**  
 933 **editor; (Outcome)\*\*\***  
 934  
 935 IV.D.2.b).(2) **peer-reviewed publication. (Outcome)**  
 936  
 937 IV.D.3. **Fellow Scholarly Activity**  
 938  
 939 IV.D.3.a) Fellows must complete at least one capstone project that includes:  
 940 (Core)  
 941  
 942 IV.D.3.a).(1) the fellow’s leadership role in managing an organization-  
 943 wide, interprofessional project; and, (Core)  
 944  
 945 IV.D.3.a).(2) the fellow’s identification and implementation of solutions  
 946 for an identified area for improvement in the health system.  
 947 (Core)  
 948  
 949 IV.D.3.b) The capstone proposal must be sponsored by a member of the  
 950 executive team and approved by the program director. (Core)  
 951

952 **IV.E. Fellowship programs may assign fellows to engage in the independent**  
953 **practice of their core specialty during their fellowship program.**

954  
955 **IV.E.1. If programs permit their fellows to utilize the independent practice**  
956 **option, it must not exceed 20 percent of their time per week or 10**  
957 **weeks of an academic year. <sup>(Core)</sup>**

958  
959 IV.E.1.a) If Sponsoring Institution-based fellowship programs permit their  
960 fellows to utilize the independent practice option, it must not  
961 exceed 50 percent of their time for fellows completing the  
962 fellowship in the 24-month format. <sup>(Core)</sup>

963  
964 IV.E.1.b) Fellows completing the fellowship in the 12-month format may not  
965 exceed 25 percent of their time utilizing the independent practice  
966 option. <sup>(Core)</sup>  
967

**Background and Intent: Fellows who have previously completed residency programs have demonstrated sufficient competence to enter autonomous practice within their core specialty. This option is designed to enhance fellows' maturation and competence in their core specialty. This enables fellows to occupy a dual role in the health system: as learners in their subspecialty\*, and as credentialed practitioners in their core specialty. Hours worked in independent practice during fellowship still fall under the clinical and educational work hour limits. See Program Director Guide for more details.**

968  
969 Sponsoring Institution-Based Fellowship-Specific Background and Intent: Fellows in health  
970 care administration, leadership, and management programs should have opportunities to  
971 pursue ongoing clinical practice in their individual specialty and/or subspecialty area while  
972 completing the program. While responsibilities for direct patient care are outside the scope of  
973 the fellowship, fellows' optional engagement in medical practice may facilitate their continued  
974 professional development as physician leaders. The Sponsoring Institution and program  
975 should provide oversight of ongoing clinical practice to ensure that fellows have adequate time  
976 to complete their fellowship responsibilities.

977  
978 **V. Evaluation**

979  
980 **V.A. Fellow Evaluation**

981  
982 **V.A.1. Feedback and Evaluation**  
983

**Background and Intent: Feedback is ongoing information provided regarding aspects of one's performance, knowledge, or understanding. The faculty empower fellows to provide much of that feedback themselves in a spirit of continuous learning and self-reflection. Feedback from faculty members in the context of routine clinical care should be frequent, and need not always be formally documented.**

**Formative and summative evaluation have distinct definitions. Formative evaluation is *monitoring fellow learning* and providing ongoing feedback that can be used by fellows to improve their learning in the context of provision of patient care or other educational opportunities. More specifically, formative evaluations help:**

- fellows identify their strengths and weaknesses and target areas that need work
- program directors and faculty members recognize where fellows are struggling and address problems immediately

Summative evaluation is *evaluating a fellow's learning* by comparing the fellows against the goals and objectives of the rotation and program, respectively. Summative evaluation is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when fellows or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the fellowship program.

Feedback, formative evaluation, and summative evaluation compare intentions with accomplishments, enabling the transformation of a new specialist to one with growing subspecialty\* expertise.

984  
985  
986  
987  
988

**V.A.1.a)** Faculty members must directly observe, evaluate, and frequently provide feedback on fellow performance during each rotation or similar educational assignment. <sup>(Core)</sup>

**Background and Intent:** Faculty members should provide feedback frequently throughout the course of each rotation. Fellows require feedback from faculty members to reinforce well-performed duties and tasks, as well as to correct deficiencies. This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for fellows who have deficiencies that may result in a poor final rotation evaluation.

989  
990  
991  
992  
993  
994  
995  
996  
997  
998  
999  
1000  
1001  
1002  
1003  
1004  
1005  
1006  
1007  
1008  
1009

**V.A.1.b)** Evaluation must be documented at the completion of the assignment. <sup>(Core)</sup>

**V.A.1.b).(1)** For block rotations of greater than three months in duration, evaluation must be documented at least every three months. <sup>(Core)</sup>

**V.A.1.b).(2)** Longitudinal experiences, such as continuity clinic in the context of other clinical responsibilities, must be evaluated at least every three months and at completion. <sup>(Core)</sup>

**V.A.1.c)** The program must provide an objective performance evaluation based on the Competencies and the subspecialty\*-specific Milestones, and must: <sup>(Core)</sup>

**V.A.1.c).(1)** use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members); and, <sup>(Core)</sup>

1010 V.A.1.c).(2) provide that information to the Clinical Competency  
1011 Committee for its synthesis of progressive fellow  
1012 performance and improvement toward unsupervised  
1013 practice. (Core)  
1014

**Background and Intent:** The trajectory to autonomous practice in a subspecialty\* is documented by the subspecialty\*-specific Milestones evaluation during fellowship. These Milestones detail the progress of a fellow in attaining skill in each competency domain. It is expected that the most growth in fellowship education occurs in patient care and medical knowledge, while the other four domains of competency must be ensured in the context of the subspecialty. They are developed by a subspecialty group and allow evaluation based on observable behaviors. The Milestones are considered formative and should be used to identify learning needs. This may lead to focused or general curricular revision in any given program or to individualized learning plans for any specific fellow.

1015  
1016 V.A.1.d) The program director or their designee, with input from the  
1017 Clinical Competency Committee, must:  
1018

1019 V.A.1.d).(1) meet with and review with each fellow their  
1020 documented semi-annual evaluation of performance,  
1021 including progress along the subspecialty\*-specific  
1022 Milestones. (Core)  
1023

1024 V.A.1.d).(2) assist fellows in developing individualized learning  
1025 plans to capitalize on their strengths and identify areas  
1026 for growth; and, (Core)  
1027

1028 V.A.1.d).(3) develop plans for fellows failing to progress, following  
1029 institutional policies and procedures. (Core)  
1030

**Background and Intent:** Learning is an active process that requires effort from the teacher and the learner. Faculty members evaluate a fellow's performance at least at the end of each rotation. The program director or their designee will review those evaluations, including their progress on the Milestones, at a minimum of every six months. Fellows should be encouraged to reflect upon the evaluation, using the information to reinforce well-performed tasks or knowledge or to modify deficiencies in knowledge or practice. Working together with the faculty members, fellows should develop an individualized learning plan.

Fellows who are experiencing difficulties with achieving progress along the Milestones may require intervention to address specific deficiencies. Such intervention, documented in an individual remediation plan developed by the program director or a faculty mentor and the fellow, will take a variety of forms based on the specific learning needs of the fellow. However, the ACGME recognizes that there are situations which require more significant intervention that may alter the time course of fellow progression. To ensure due process, it is essential that the program director follow institutional policies and procedures.

1031

1032	<b>V.A.1.e)</b>	<b>At least annually, there must be a summative evaluation of each fellow that includes their readiness to progress to the next year of the program, if applicable. (Core)</b>

1071		
1072		
1073	<b>V.A.3.a)</b>	<b>At a minimum the Clinical Competency Committee must include three members, at least one of whom is a core faculty member. Members must be faculty members from the same program or other programs, or other health professionals who have extensive contact and experience with the program’s fellows. (Core)</b>
1074		
1075		
1076		
1077		
1078		
1079		
1080	<b>V.A.3.b)</b>	<b>The Clinical Competency Committee must:</b>
1081		

- 1082 **V.A.3.b).(1)** review all fellow evaluations at least semi-annually;  
1083 (Core)
- 1084
- 1085 **V.A.3.b).(2)** determine each fellow's progress on achievement of  
1086 the subspecialty\*-specific Milestones; and, (Core)
- 1087
- 1088 **V.A.3.b).(3)** meet prior to the fellows' semi-annual evaluations and  
1089 advise the program director regarding each fellow's  
1090 progress. (Core)
- 1091

**V.B. Faculty Evaluation**

- 1092
- 1093
- 1094 **V.B.1.** The program must have a process to evaluate each faculty  
1095 member's performance as it relates to the educational program at  
1096 least annually. (Core)
- 1097

**Background and Intent:** The program director is responsible for the education program and for whom delivers it. While the term faculty may be applied to physicians within a given institution for other reasons, it is applied to fellowship program faculty members only through approval by a program director. The development of the faculty improves the education, clinical, and research aspects of a program. Faculty members have a strong commitment to the fellow and desire to provide optimal education and work opportunities. Faculty members must be provided feedback on their contribution to the mission of the program. All faculty members who interact with fellows desire feedback on their education, clinical care, and research. If a faculty member does not interact with fellows, feedback is not required. With regard to the diverse operating environments and configurations, the fellowship program director may need to work with others to determine the effectiveness of the program's faculty performance with regard to their role in the educational program. All teaching faculty members should have their educational efforts evaluated by the fellows in a confidential and anonymous manner. Other aspects for the feedback may include research or clinical productivity, review of patient outcomes, or peer review of scholarly activity. The process should reflect the local environment and identify the necessary information. The feedback from the various sources should be summarized and provided to the faculty on an annual basis by a member of the leadership team of the program.

- 1098
- 1099 **V.B.1.a)** This evaluation must include a review of the faculty member's  
1100 clinical teaching abilities, engagement with the educational  
1101 program, participation in faculty development related to their  
1102 skills as an educator, clinical performance, professionalism,  
1103 and scholarly activities. (Core)
- 1104
- 1105 **V.B.1.b)** This evaluation must include written, confidential evaluations  
1106 by the fellows. (Core)
- 1107
- 1108 **V.B.2.** Faculty members must receive feedback on their evaluations at least  
1109 annually. (Core)
- 1110
- 1111 **V.B.3.** Results of the faculty educational evaluations should be  
1112 incorporated into program-wide faculty development plans. (Core)
- 1113

**Background and Intent: The quality of the faculty’s teaching and clinical care is a determinant of the quality of the program and the quality of the fellows’ future clinical care. Therefore, the program has the responsibility to evaluate and improve the program faculty members’ teaching, scholarship, professionalism, and quality care. This section mandates annual review of the program’s faculty members for this purpose, and can be used as input into the Annual Program Evaluation.**

- 1114  
1115 **V.C. Program Evaluation and Improvement**  
1116  
1117 **V.C.1. The program director must appoint the Program Evaluation**  
1118 **Committee to conduct and document the Annual Program**  
1119 **Evaluation as part of the program’s continuous improvement**  
1120 **process. (Core)**  
1121  
1122 **V.C.1.a) The Program Evaluation Committee must be composed of at**  
1123 **least two program faculty members, at least one of whom is a**  
1124 **core faculty member, and at least one fellow. (Core)**  
1125  
1126 **V.C.1.b) Program Evaluation Committee responsibilities must include:**  
1127  
1128 **V.C.1.b).(1) acting as an advisor to the program director, through**  
1129 **program oversight; (Core)**  
1130  
1131 **V.C.1.b).(2) review of the program’s self-determined goals and**

1207

V.C.2.a)

A summary of the Self-Study must be submitted to the DIO.  
(Core)

**Background and Intent:** Outcomes of the documented Annual Program Evaluation can be integrated into the 10-year Self-Study process. The Self-Study is an objective, comprehensive evaluation of the fellowship program, with the aim of improving it. Underlying the Self-Study is this longitudinal evaluation of the program and its learning environment, facilitated through sequential Annual Program Evaluations that focus on the required components, with an emphasis on program strengths and self-identified areas for improvement. Details regarding the timing and expectations for the Self-Study and the 10-Year Accreditation Site Visit are provided in the *ACGME Manual of Policies and Procedures*. Additionally, a description of the [Self-Study process](#), as well as information on how to prepare for the [10-Year Accreditation Site Visit](#), is available on the ACGME website.

VI. The Learning and Working Environment

*Fellowship education must occur in the context of a learning and working environment that emphasizes the following principles:*

- *Excellence in the safety and quality of care rendered to patients by fellows today*
- *Excellence in the safety and quality of care rendered to patients by today's fellows in their future practice*
- *Excellence in professionalism through faculty modeling of:*
  - *the effacement of self-interest in a humanistic environment that supports the professional development of physicians*
  - *the joy of curiosity, problem-solving, intellectual rigor, and discovery*
- *Commitment to the well-being of the students, residents, fellows, faculty members, and all members of the health care team*

**Background and Intent:** The revised requirements are intended to provide greater flexibility within an established framework, allowing programs and fellows more discretion to structure clinical education in a way that best supports the above principles of professional development. With this increased flexibility comes the responsibility for programs and fellows to adhere to the 80-hour maximum weekly limit (unless a rotation-specific exception is granted by a Review Committee), and to utilize flexibility in a manner that optimizes patient safety, fellow education, and fellow well-being. The requirements are intended to support the development of a sense of professionalism by encouraging fellows to make decisions based on patient needs and their own well-being, without fear of jeopardizing their program's accreditation status. In addition, the proposed requirements eliminate the burdensome documentation requirement for fellows to justify clinical and educational work hour variations.

Clinical and educational work hours represent only one part of the larger issue of conditions of the learning and working environment, and Section VI has now been expanded to include greater attention to patient safety and fellow and faculty member well-being. The requirements are intended to support programs and fellows as they strive for excellence, while also ensuring ethical, humanistic training. Ensuring that flexibility is used in an appropriate manner is a shared responsibility of the program and fellows. With this flexibility comes a responsibility for fellows and faculty members to recognize the need to hand off care of a patient to another provider when a fellow is too fatigued to provide safe, high quality care and for programs to ensure that fellows remain within the 80-hour maximum weekly limit.

**VI.A. Patient Safety, Quality Improvement, Supervision, and Accountability**

**VI.A.1. Patient Safety and Quality Improvement**

*All physicians share responsibility for promoting patient safety and enhancing quality of patient care. Graduate medical education must prepare fellows to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by fellows who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.*

*Fellows must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating fellows will apply these skills to critique their future unsupervised practice and effect quality improvement measures.*

*It is necessary for fellows and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.*

**VI.A.1.a) Patient Safety**

**VI.A.1.a).(1) Culture of Safety**

*A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety in order to identify areas for improvement.*

**VI.A.1.a).(1).(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.**  
(Core)

1271 VI.A.1.a).(1).(b) The program must have a structure that  
1272 promotes safe, interprofessional, team-based  
1273 care. <sup>(Core)</sup>  
1274

1275 VI.A.1.a).(2) Education on Patient Safety  
1276  
1277 Programs must provide formal educational activities  
1278 that promote patient safety-related goals, tools, and  
1279 techniques. <sup>(Core)</sup>  
1280

**Background and Intent: Optimal patient safety occurs in the setting of a coordinated interprofessional learning and working environment.**

1281  
1282 VI.A.1.a).(2).(a) Fellows must have the opportunity to participate  
1283 with the chief medical officer or equivalent in the  
1284 management of one or more serious safety events.  
1285 <sup>(Core)</sup>  
1286

1287 VI.A.1.a).(2).(b) Fellows must have experience in patient safety  
1288 executive-level daily team meetings, as applicable.  
1289 <sup>(Core)</sup>  
1290

1291 VI.A.1.a).(3) Patient Safety Events  
1292  
1293 *Reporting, investigation, and follow-up of adverse*  
1294 *events, near misses, and unsafe conditions are pivotal*  
1295 *mechanisms for improving patient safety, and are*  
1296 *essential for the success of any patient safety*  
1297 *program. Feedback and experiential learning are*  
1298 *essential to developing true competence in the ability*  
1299 *to identify causes and institute sustainable systems-*  
1300 *based changes to ameliorate patient safety*  
1301 *vulnerabilities.*  
1302

1303 VI.A.1.a).(3).(a) Residents, fellows, faculty members, and other  
1304 clinical staff members must:

1305  
1306 VI.A.1.a).(3).(a).(i) know their responsibilities in reporting  
1307 patient safety events at the clinical site;  
1308 <sup>(Core)</sup>  
1309

1310 VI.A.1.a).(3).(a).(ii) know how to report patient safety  
1311 events, including near misses, at the  
1312 clinical site; and, <sup>(Core)</sup>  
1313

1314 VI.A.1.a).(3).(a).(iii) be provided with summary information  
1315 of their institution's patient safety  
1316 reports. <sup>(Core)</sup>  
1317

1318 VI.A.1.a).(3).(b) Fellows must participate as team members in  
1319 real and/or simulated interprofessional clinical

1320 patient safety activities, such as root cause  
1321 analyses or other activities that include  
1322 analysis, as well as formulation and  
1323 implementation of actions. <sup>(Core)</sup>  
1324

1325 **VI.A.1.a).(4)** Fellow Education and Experience in Disclosure of  
1326 Adverse Events  
1327

1328 *Patient-centered care requires patients, and when*  
1329 *appropriate families, to be apprised of clinical*  
1330 *situations that affect them, including adverse events.*  
1331 *This is an important skill for faculty physicians to*  
1332 *model, and for fellows to develop and apply.*  
1333

1334 **VI.A.1.a).(4).(a)** All fellows must receive training in how to  
1335 disclose adverse events to patients and  
1336 families. <sup>(Core)</sup>  
1337

1338 **VI.A.1.a).(4).(b)** Fellows should have the opportunity to  
1339 participate in the disclosure of patient safety  
1340 events, real or simulated. <sup>(Detail)†</sup>  
1341

1342 **VI.A.1.b)** Quality Improvement  
1343

1344 **VI.A.1.b).(1)** Education in Quality Improvement  
1345

1346 *A cohesive model of health care includes quality-*  
1347 *related goals, tools, and techniques that are necessary*  
1348 *in order for health care professionals to achieve*  
1349 *quality improvement goals.*  
1350

1351 **VI.A.1.b).(1).(a)** Fellows must receive training and experience in  
1352 quality improvement processes, including an  
1353 understanding of health care disparities. <sup>(Core)</sup>  
1354

1355 **VI.A.1.b).(2)** Quality Metrics  
1356

1357 *Access to data is essential to prioritizing activities for*  
1358 *care improvement and evaluating success of*  
1359 *improvement efforts.*  
1360

1361 **VI.A.1.b).(2).(a)** Fellows and faculty members must receive data  
1362 on quality metrics and benchmarks related to  
1363 their patient populations. <sup>(Core)</sup>  
1364

1365 **VI.A.1.b).(3)** Engagement in Quality Improvement Activities  
1366

1367 *Experiential learning is essential to developing the*  
1368 *ability to identify and institute sustainable systems-*  
1369 *based changes to improve patient care.*  
1370

1371 VI.A.1.b).(3).(a) Fellows must have the opportunity to  
 1372 participate in interprofessional quality  
 1373 improvement activities. <sup>(Core)</sup>  
 1374  
 1375 VI.A.1.b).(3).(a).(i) This should include activities aimed at  
 1376 reducing health care disparities. <sup>(Detail)</sup>  
 1377

1378 VI.A.2. Supervision and Accountability  
 1379

1380 VI.A.2.a) *Although the attending physician is ultimately responsible for*  
 1381 *the care of the patient, every physician shares in the*  
 1382 *responsibility and accountability for their efforts in the*  
 1383 *provision of care. Effective programs, in partnership with*  
 1384 *their Sponsoring Institutions, define, widely communicate,*  
 1385 *and monitor a structured chain of responsibility and*  
 1386 *accountability as it relates to the supervision of all patient*  
 1387 *care.*

*Supervision in the setting of graduate medical education*  
*provides safe and effective care to patients; ensures each*  
*fellow’s development of the skills, knowledge, and attitudes*  
*required to enter the unsupervised practice of medicine; and*  
*establishes a foundation for continued professional growth.*

1395 VI.A.2.a).(1) Each patient must have an identifiable and  
 1396 appropriately-credentialed and privileged attending  
 1397 physician (or licensed independent practitioner as  
 1398 specified by the applicable Review Committee) who is  
 1399 responsible and accountable for the patient’s care.  
 1400 <sup>(Core)</sup>  
 1401

Sponsoring Institution-Based Fellowship-Specific Background and Intent: For Sponsoring Institution-based fellowships, this requirement refers to patients in a hospital or health system setting.

1402  
 1403 VI.A.2.a).(1).(a) This information must be available to fellows,  
 1404 faculty members, other members of the health  
 1405 care team, and patients. <sup>(Core)</sup>  
 1406

1407 VI.A.2.a).(1).(b) Fellows and faculty members must inform each  
 1408 patient of their respective roles in that patient’s  
 1409 care when providing direct patient care. <sup>(Core)</sup>  
 1410

1411 VI.A.2.b) *Supervision may be exercised through a variety of methods.*  
 1412 *For many aspects of patient care, the supervising physician*  
 1413 *may be a more advanced fellow. Other portions of care*  
 1414 *provided by the fellow can be adequately supervised by the*  
 1415 *appropriate availability of the supervising faculty member or*  
 1416 *fellow, either on site or by means of telecommunication*  
 1417 *technology. Some activities require the physical presence of*  
 1418 *the supervising faculty member. In some circumstances,*

1419  
1420  
1421

*supervision may include post-hoc review of fellow-delivered care with feedback.*

**Background and Intent:** Appropriate supervision is essential for patient safety and high-quality teaching. Supervision is also contextual. There is tremendous diversity of fellow patient interactions, education and training locations, and fellow skills and abilities even at the same level of the educational program. The degree of supervision is expected to evolve progressively as a fellow gains more experience, even with the same patient condition or procedure. All fellows have a level of supervision commensurate with their level of autonomy in practice; this level of supervision may be enhanced based on factors such as patient safety, complexity, acuity, urgency, risk of serious adverse events, or other pertinent variables.

1422

1450  
1451  
1452  
1453  
1454  
1455  
1456  
1457  
1458  
1459  
1460

- VI.A.2.b).(1)** The program must demonstrate that the appropriate level of supervision in place for all fellows is based on each fellow’s level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. <sup>(Core)</sup>
- VI.A.2.b).(2)** The program must define when physical presence of a supervising physician is required. <sup>(Core)</sup>
- VI.A.2.c)** **Levels of Supervision**
- To promote appropriate fellow supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: <sup>(Core)</sup>
- VI.A.2.c).(1)** **Direct Supervision:**
- VI.A.2.c).(1).(a)** the supervising physician is physically present with the fellow during the key portions of the patient interaction; or, <sup>(Core)</sup>
- VI.A.2.c).(1).(b)** the supervising physician and/or patient is not physically present with the fellow and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. <sup>(Core)</sup>
- VI.A.2.c).(2)** **Indirect Supervision:** the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the fellow for guidance and is available to provide appropriate direct supervision. <sup>(Core)</sup>
- VI.A.2.c).(3)** **Oversight –** the supervising physician is available to provide review of procedures/encounters with feedback provided after care is delivered. <sup>(Core)</sup>

- 1461 VI.A.2.d) The privilege of progressive authority and responsibility,  
 1462 conditional independence, and a supervisory role in patient  
 1463 care delegated to each fellow must be assigned by the  
 1464 program director and faculty members. <sup>(Core)</sup>  
 1465  
 1466 VI.A.2.d).(1) The program director must evaluate each fellow's  
 1467 abilities based on specific criteria, guided by the  
 1468 Milestones. <sup>(Core)</sup>  
 1469  
 1470 VI.A.2.d).(2) Faculty members functioning as supervising  
 1471 physicians must delegate portions of care to fellows  
 1472 based on the needs of the patient and the skills of  
 1473 each fellow. <sup>(Core)</sup>  
 1474  
 1475 VI.A.2.d).(3) Fellows should serve in a supervisory role to junior  
 1476 fellows and residents in recognition of their progress  
 1477 toward independence, based on the needs of each  
 1478 patient and the skills of the individual resident or  
 1479 fellow. <sup>(Detail)</sup>  
 1480  
 1481 VI.A.2.e) Programs must set guidelines for circumstances and events  
 1482 in which fellows must communicate with the supervising  
 1483 faculty member(s). <sup>(Core)</sup>  
 1484  
 1485 VI.A.2.e).(1) Each fellow must know the limits of their scope of  
 1486 authority, and the circumstances under which the  
 1487 fellow is permitted to act with conditional  
 1488 independence. <sup>(Outcome)</sup>  
 1489

**Background and Intent: The ACGME Glossary of Terms defines conditional independence as: Graded, progressive responsibility for patient care with defined oversight.**

- 1490  
 1491 VI.A.2.f) Faculty supervision assignments must be of sufficient  
 1492 duration to assess the knowledge and skills of each fellow  
 1493 and to delegate to the fellow the appropriate level of patient  
 1494 care authority and responsibility. <sup>(Core)</sup>  
 1495  
 1496 VI.B. Professionalism  
 1497  
 1498 VI.B.1. Programs, in partnership with their Sponsoring Institutions, must  
 1499 educate fellows and faculty members concerning the professional  
 1500 responsibilities of physicians, including their obligation to be  
 1501 appropriately rested and fit to provide the care required by their  
 1502 patients. <sup>(Core)</sup>  
 1503  
 1504 VI.B.2. The learning objectives of the program must:  
 1505  
 1506 VI.B.2.a) be accomplished through an appropriate blend of supervised  
 1507 patient care responsibilities, clinical teaching, and didactic  
 1508 educational events; <sup>(Core)</sup>

1509  
1510 **VI.B.2.b) be accomplished without excessive reliance on fellows to**  
1511 **fulfill non-physician obligations; and, <sup>(Core)</sup>**  
1512

**Background and Intent: Routine reliance on fellows to fulfill non-physician obligations increases work compression for fellows and does not provide an optimal educational experience. Non-physician obligations are those duties which in most institutions are performed by nursing and allied health professionals, transport services, or clerical staff. Examples of such obligations include transport of patients from the wards or units for procedures elsewhere in the hospital; routine blood drawing for laboratory tests; routine monitoring of patients when off the ward; and clerical duties, such as scheduling. While it is understood that fellows may be expected to do any of these things on occasion when the need arises, these activities should not be performed by fellows routinely and must be kept to a minimum to optimize fellow education.**

1513  
1514 **VI.B.2.c) ensure manageable patient care responsibilities. <sup>(Core)</sup>**  
1515

**Background and Intent: The Common Program Requirements do not define “manageable patient care responsibilities” as this is variable by specialty and PGY level. Review Committees will provide further detail regarding patient care responsibilities in the applicable specialty-specific Program Requirements and accompanying FAQs. However, all programs, regardless of specialty, should carefully assess how the assignment of patient care responsibilities can affect work compression.**

1516  
1517 **VI.B.3. The program director, in partnership with the Sponsoring Institution,**  
1518 **must provide a culture of professionalism that supports patient**  
1519 **safety and personal responsibility. <sup>(Core)</sup>**  
1520

1521 **VI.B.4. Fellows and faculty members must demonstrate an understanding**  
1522 **of their personal role in the:**

1523  
1524 **VI.B.4.a) provision of patient- and family-centered care; <sup>(Outcome)</sup>**

1525  
1526 **VI.B.4.b) safety and welfare of patients entrusted to their care,**  
1527 **including the ability to report unsafe conditions and adverse**  
1528 **events; <sup>(Outcome)</sup>**  
1529

**Background and Intent: This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the fellow.**

1530  
1531 **VI.B.4.c) assurance of their fitness for work, including: <sup>(Outcome)</sup>**  
1532

**Background and Intent: This requirement emphasizes the professional responsibility of faculty members and fellows to arrive for work adequately rested and ready to care for patients. It is also the responsibility of faculty members, fellows, and other members of the care team to be observant, to intervene, and/or to escalate their concern about fellow and faculty member fitness for work, depending on the situation, and in accordance with institutional policies.**

*clinical learning environment models constructive behaviors, and prepares fellows with the skills and attitudes needed to thrive throughout their careers.*

**Background and Intent:** The ACGME is committed to addressing physician well-being for individuals and as it relates to the learning and working environment. The creation of a learning and working environment with a culture of respect and accountability for physician well-being is crucial to physicians' ability to deliver the safest, best possible care to patients. The ACGME is leveraging its resources in four key areas to support the ongoing focus on physician well-being: education, influence, research, and collaboration. Information regarding the ACGME's ongoing efforts in this area is available on the ACGME website.

As these efforts evolve, information will be shared with programs seeking to develop and/or strengthen their own well-being initiatives. In addition, there are many activities that programs can utilize now to assess and support physician well-being. These include culture of safety surveys, ensuring the availability of counseling services, and attention to the safety of the entire health care team.

1588  
1589

1601  
1602  
1603  
1604

- VI.C.1.** The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:
- VI.C.1.a)** efforts to enhance the meaning that each fellow finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; <sup>(Core)</sup>
- VI.C.1.b)** attention to scheduling, work intensity, and work compression that impacts fellow well-being; <sup>(Core)</sup>
- VI.C.1.c)** evaluating workplace safety data and addressing the safety of fellows and faculty members; <sup>(Core)</sup>

**Background and Intent:** This requirement emphasizes the responsibility shared by the Sponsoring Institution and its programs to gather information and utilize systems that monitor and enhance fellow and faculty member safety, including physical safety. Issues to be addressed include, but are not limited to, monitoring of workplace injuries, physical or emotional violence, vehicle collisions, and emotional well-being after adverse events.

1605  
1606  
1607  
1608

- VI.C.1.d)** policies and programs that encourage optimal fellow and faculty member well-being; and, <sup>(Core)</sup>

**Background and Intent:** Well-being includes having time away from work to engage with family and friends, as well as to attend to personal needs and to one's own health, including adequate rest, healthy diet, and regular exercise.

1609

1610 VI.C.1.d).(1) Fellows must be given the opportunity to attend  
1611 medical, mental health, and dental care appointments,  
1612 including those scheduled during their working hours.  
1613 (Core)  
1614

**Background and Intent:** The intent of this requirement is to ensure that fellows have the opportunity to access medical and dental care, including mental health care, at times that are appropriate to their individual circumstances. Fellows must be provided with time away from the program as needed to access care, including appointments scheduled during their working hours.

1615 VI.C.1.e) attention to fellow and faculty member burnout, depression,  
1616 and substance use disorder. The program, in partnership with  
1617 its Sponsoring Institution, must educate faculty members and  
1618 fellows in identification of the symptoms of burnout,  
1619 depression, and substance use disorder, including means to  
1620 assist those who experience these conditions. Fellows and  
1621 faculty members must also be educated to recognize those  
1622 symptoms in themselves and how to seek appropriate care.  
1623 The program, in partnership with its Sponsoring Institution,  
1624 must: (Core)  
1625  
1626

**Background and Intent:** Programs and Sponsoring Institutions are encouraged to review materials in order to create systems for identification of burnout, depression, and substance use disorder. Materials and more information are available on the Physician Well-being section of the ACGME website (<http://www.acgme.org/What-We-Do/Initiatives/Physician-Well-Being>).

1627 VI.C.1.e).(1) encourage fellows and faculty members to alert the  
1628 program director or other designated personnel or  
1629 programs when they are concerned that another  
1630 fellow, resident, or faculty member may be displaying  
1631 signs of burnout, depression, a substance use  
1632 disorder, suicidal ideation, or potential for violence;  
1633 (Core)  
1634  
1635

**Background and Intent:** Individuals experiencing burnout, depression, substance use disorder, and/or suicidal ideation are often reluctant to reach out for help due to the stigma associated with these conditions, and are concerned that seeking help may have a negative impact on their career. Recognizing that physicians are at increased risk in these areas, it is essential that fellows and faculty members are able to report their concerns when another fellow or faculty member displays signs of any of these conditions, so that the program director or other designated personnel, such as the department chair, may assess the situation and intervene as necessary to facilitate access to appropriate care. Fellows and faculty members must know which personnel, in addition to the program director, have been designated with this responsibility; those personnel and the program director should be familiar with the institution's impaired physician policy and any employee health, employee assistance, and/or wellness programs within the institution. In cases of physician impairment, the program director or designated personnel should follow the policies of their institution for reporting.

- 1636  
1637 **VI.C.1.e).(2)** provide access to appropriate tools for self-screening;  
1638 and, <sup>(Core)</sup>  
1639  
1640 **VI.C.1.e).(3)** provide access to confidential, affordable mental  
1641 health assessment, counseling, and treatment,  
1642 including access to urgent and emergent care 24  
1643 hours a day, seven days a week. <sup>(Core)</sup>  
1644

**Background and Intent: The intent of this requirement is to ensure that fellows have immediate access at all times to a mental health professional (psychiatrist, psychologist, Licensed Clinical Social Worker, Primary Mental Health Nurse Practitioner, or Licensed Professional Counselor) for urgent or emergent mental health issues. In-person, telemedicine, or telephonic means may be utilized to satisfy this requirement. Care in the Emergency Department may be necessary in some cases, but not as the primary or sole means to meet the requirement.**

**The reference to affordable counseling is intended to require that financial cost not be a barrier to obtaining care.**

- 1645  
1646 **VI.C.2.** There are circumstances in which fellows may be unable to attend  
1647 work, including but not limited to fatigue, illness, family  
1648 emergencies, and parental leave. Each program must allow an  
1649 appropriate length of absence for fellows unable to perform their  
1650 patient care responsibilities. <sup>(Core)</sup>  
1651  
1652 **VI.C.2.a)** The program must have policies and procedures in place to  
1653 ensure coverage of patient care. <sup>(Core)</sup>  
1654  
1655 **VI.C.2.b)** These policies must be implemented without fear of negative  
1656 consequences for the fellow who is or was unable to provide  
1657 the clinical work. <sup>(Core)</sup>  
1658

**Background and Intent: Fellows may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.**

- 1659  
1660 **VI.D. Fatigue Mitigation**  
1661  
1662 **VI.D.1. Programs must:**  
1663  
1664 **VI.D.1.a)** educate all faculty members and fellows to recognize the  
1665 signs of fatigue and sleep deprivation; <sup>(Core)</sup>  
1666  
1667 **VI.D.1.b)** educate all faculty members and fellows in alertness  
1668 management and fatigue mitigation processes; and, <sup>(Core)</sup>  
1669  
1670 **VI.D.1.c)** encourage fellows to use fatigue mitigation processes to  
1671 manage the potential negative effects of fatigue on patient  
1672 care and learning. <sup>(Detail)</sup>

**Background and Intent: Providing medical care to patients is physically and mentally demanding. Night shifts, even for those who have had enough rest, cause fatigue. Experiencing fatigue in a supervised environment during training prepares fellows for managing fatigue in practice. It is expected that programs adopt fatigue mitigation processes and ensure that there are no negative consequences and/or stigma for using fatigue mitigation strategies.**

**This requirement emphasizes the importance of adequate rest before and after clinical responsibilities. Strategies that may be used include, but are not limited to, strategic napping; the judicious use of caffeine; availability of other caregivers; time management to maximize sleep off-duty; learning to recognize the signs of fatigue, and self-monitoring performance and/or asking others to monitor performance; remaining active to promote alertness; maintaining a healthy diet; using relaxation techniques to fall asleep; maintaining a consistent sleep routine; exercising regularly; increasing sleep time before and after call; and ensuring sufficient sleep recovery periods.**

1690  
1691

- VI.D.2. Each program must ensure continuity of patient care, consistent with the program’s policies and procedures referenced in VI.C.2–VI.C.2.b), in the event that a fellow may be unable to perform their patient care responsibilities due to excessive fatigue. (Core)**
- VI.D.3. The program, in partnership with its Sponsoring Institution, must ensure adequate sleep facilities and safe transportation options for fellows who may be too fatigued to safely return home. (Core)**
- VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care**
- VI.E.1. Clinical Responsibilities**
- The clinical responsibilities for each fellow must be based on PGY level, patient safety, fellow ability, severity and complexity of patient illness/condition, and available support services. (Core)**

**Background and Intent: The changing clinical care environment of medicine has meant that work compression due to high complexity has increased stress on fellows. Faculty members and program directors need to make sure fellows function in an environment that has safe patient care and a sense of fellow well-being. Some Review Committees have addressed this by setting limits on patient admissions, and it is an essential responsibility of the program director to monitor fellow workload. Workload should be distributed among the fellow team and interdisciplinary teams to minimize work compression.**

1692  
1693  
1694  
1695  
1696  
1697  
1698  
1699

- VI.E.2. Teamwork**
- Fellows must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the subspecialty\* and larger health system. (Core)**

- 1700  
1701 VI.E.2.a) Fellows must have experience in the leadership of clinical and  
1702 non-clinical administrative and management teams. <sup>(Core)</sup>  
1703
- 1704 **VI.E.3. Transitions of Care**  
1705
- 1706 **VI.E.3.a) Programs must design clinical assignments to optimize**  
1707 **transitions in patient care, including their safety, frequency,**  
1708 **and structure.** <sup>(Core)</sup>  
1709
- 1710 **VI.E.3.b) Programs, in partnership with their Sponsoring Institutions,**  
1711 **must ensure and monitor effective, structured hand-over**  
1712 **processes to facilitate both continuity of care and patient**  
1713 **safety.** <sup>(Core)</sup>  
1714
- 1715 **VI.E.3.c) Programs must ensure that fellows are competent in**  
1716 **communicating with team members in the hand-over process.**  
1717 <sup>(Outcome)</sup>  
1718
- 1719 **VI.E.3.d) Programs and clinical sites must maintain and communicate**  
1720 **schedules of attending physicians and fellows currently**  
1721 **responsible for care.** <sup>(Core)</sup>  
1722
- 1723 **VI.E.3.e) Each program must ensure continuity of patient care,**  
1724 **consistent with the program’s policies and procedures**  
1725 **referenced in VI.C.2-VI.C.2.b), in the event that a fellow may**  
1726 **be unable to perform their patient care responsibilities due to**  
1727 **excessive fatigue or illness, or family emergency.** <sup>(Core)</sup>  
1728
- 1729 **VI.F. Clinical Experience and Education**  
1730
- 1731 *Programs, in partnership with their Sponsoring Institutions, must design*  
1732 *an effective program structure that is configured to provide fellows with*  
1733 *educational and clinical experience opportunities, as well as reasonable*  
1734 *opportunities for rest and personal activities.*  
1735

**Background and Intent:** In the new requirements, the terms “clinical experience and education,” “clinical and educational work,” and “clinical and educational work hours” replace the terms “duty hours,” “duty periods,” and “duty.” These changes have been made in response to concerns that the previous use of the term “duty” in reference to number of hours worked may have led some to conclude that fellows’ duty to “clock out” on time superseded their duty to their patients.

- 1736  
1737 **VI.F.1. Maximum Hours of Clinical and Educational Work per Week**  
1738
- 1739 **Clinical and educational work hours must be limited to no more than**  
1740 **80 hours per week, averaged over a four-week period, inclusive of all**  
1741 **in-house clinical and educational activities, clinical work done from**  
1742 **home, and all moonlighting.** <sup>(Core)</sup>  
1743

**Background and Intent:** Programs and fellows have a shared responsibility to ensure that the 80-hour maximum weekly limit is not exceeded. While the requirement has been written with the intent of allowing fellows to remain beyond their scheduled work periods to care for a patient or participate in an educational activity, these additional hours must be accounted for in the allocated 80 hours when averaged over four weeks.

### ***Scheduling***

While the ACGME acknowledges that, on rare occasions, a fellow may work in excess of 80 hours in a given week, all programs and fellows utilizing this flexibility will be required to adhere to the 80-hour maximum weekly limit when averaged over a four-week period. Programs that regularly schedule fellows to work 80 hours per week and still permit fellows to remain beyond their scheduled work period are likely to exceed the 80-hour maximum, which would not be in substantial compliance with the requirement. These programs should adjust schedules so that fellows are scheduled to work fewer than 80 hours per week, which would allow fellows to remain beyond their scheduled work period when needed without violating the 80-hour requirement. Programs may wish to consider using night float and/or making adjustments to the frequency of in-house call to ensure compliance with the 80-hour maximum weekly limit.

### ***Oversight***

With increased flexibility introduced into the Requirements, programs permitting this flexibility will need to account for the potential for fellows to remain beyond their assigned work periods when developing schedules, to avoid exceeding the 80-hour maximum weekly limit, averaged over four weeks. The ACGME Review Committees will strictly monitor and enforce compliance with the 80-hour requirement. Where violations of the 80-hour requirement are identified, programs will be subject to citation and at risk for an adverse accreditation action.

### ***Work from Home***

While the requirement specifies that clinical work done from home must be counted toward the 80-hour maximum weekly limit, the expectation remains that scheduling be structured so that fellows are able to complete most work on site during scheduled clinical work hours without requiring them to take work home. The new requirements acknowledge the changing landscape of medicine, including electronic health records, and the resulting increase in the amount of work fellows choose to do from home. The requirement provides flexibility for fellows to do this while ensuring that the time spent by fellows completing clinical work from home is accomplished within the 80-hour weekly maximum. Types of work from home that must be counted include using an electronic health record and taking calls from home. Reading done in preparation for the following day's cases, studying, and research done from home do not count toward the 80 hours. Fellow decisions to leave the hospital before their clinical work has been completed and to finish that work later from home should be made in consultation with the fellow's supervisor. In such circumstances, fellows should be mindful of their professional responsibility to complete work in a timely manner and to maintain patient confidentiality.

During the public comment period many individuals raised questions and concerns related to this change. Some questioned whether minute by minute tracking would be required; in other words, if a fellow spends three minutes on a phone call and then a few hours later spends two minutes on another call, will the fellow need to report that time. Others raised concerns related to the ability of programs and institutions to verify the

accuracy of the information reported by fellows. The new requirements are not an attempt to micromanage this process. Fellows are to track the time they spend on clinical work from home and to report that time to the program. Decisions regarding whether to report infrequent phone calls of very short duration will be left to the individual fellow. Programs will need to factor in time fellows are spending on clinical work at home when schedules are developed to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks. There is no requirement that programs assume responsibility for documenting this time. Rather, the program's responsibility is ensuring that fellows report their time from home and that schedules are structured to ensure that fellows are not working in excess of 80 hours per week, averaged over four weeks.

1758  
1759  
1760  
1761

**VI.F.2. Mandatory Time Free of Clinical Work and Education**

**VI.F.2.a) The program must design an effective program structure that is configured to provide fellows with educational opportunities, as well as reasonable opportunities for rest and personal well-being. <sup>(Core)</sup>**

**VI.F.2.b) Fellows should have eight hours off between scheduled clinical work and education periods. <sup>(Detail)</sup>**

**VI.F.2.b).(1) There may be circumstances when fellows choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. <sup>(Detail)</sup>**

**Background and Intent: While it is expected that fellow schedules will be structured to ensure that fellows are provided with a minimum of eight hours off between scheduled work periods, it is recognized that fellows may choose to remain beyond their scheduled time, or return to the clinical site during this time-off period, to care for a patient. The requirement preserves the flexibility for fellows to make those choices. It is also noted that the 80-hour weekly limit (averaged over four weeks) is a deterrent for scheduling fewer than eight hours off between clinical and education work periods, as it would be difficult for a program to design a schedule that provides fewer than eight hours off without violating the 80-hour rule.**

1762  
1763  
1764  
1765

**VI.F.2.c) Fellows must have at least 14 hours free of clinical work and education after 24 hours of in-house call. <sup>(Core)</sup>**

**Background and Intent: Fellows have a responsibility to return to work rested, and thus are expected to use this time away from work to get adequate rest. In support of this goal, fellows are encouraged to prioritize sleep over other discretionary activities.**

1766  
1767  
1768  
1769  
1770

**VI.F.2.d) Fellows must be scheduled for a minimum of one day in seven free of clinical work and required education (when averaged over four weeks). At-home call cannot be assigned on these free days. <sup>(Core)</sup>**

1771

**Background and Intent:** The requirement provides flexibility for programs to distribute days off in a manner that meets program and fellow needs. It is strongly recommended that fellows’ preference regarding how their days off are distributed be considered as schedules are developed. It is desirable that days off be distributed throughout the month, but some fellows may prefer to group their days off to have a “golden weekend,” meaning a consecutive Saturday and Sunday free from work. The requirement for one free day in seven should not be interpreted as precluding a golden weekend. Where feasible, schedules may be designed to provide fellows with a weekend, or two consecutive days, free of work. The applicable Review Committee will evaluate the number of consecutive days of work and determine whether they meet educational objectives. Programs are encouraged to distribute days off in a fashion that optimizes fellow well-being, and educational and personal goals. It is noted that a day off is defined in the ACGME Glossary of Terms as “one (1) continuous 24-hour period free from all administrative, clinical, and educational activities.”

- VI.F.3. Maximum Clinical Work and Education Period Length**
- VI.F.3.a) Clinical and educational work periods for fellows must not exceed 24 hours of continuous scheduled clinical assignments. (Core)**
- VI.F.3.a).(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or fellow education. (Core)**
- VI.F.3.a).(1).(a) Additional patient care responsibilities must not be assigned to a fellow during this time. (Core)**

**Background and Intent:** The additional time referenced in VI.F.3.a).(1) should not be used for the care of new patients. It is essential that the fellow continue to function as a member of the team in an environment where other members of the team can assess fellow fatigue, and that supervision for post-call fellows is provided. This 24 hours and up to an additional four hours must occur within the context of 80-hour weekly limit, averaged over four weeks.

- VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a fellow, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:**
- VI.F.4.a).(1) to continue to provide care to a single severely ill or unstable patient; (Detail)**
- VI.F.4.a).(2) humanistic attention to the needs of a patient or family; or, (Detail)**

- 1801 VI.F.4.a).(3) to attend unique educational events. <sup>(Detail)</sup>  
 1802  
 1803 VI.F.4.b) These additional hours of care or education will be counted  
 1804 toward the 80-hour weekly limit. <sup>(Detail)</sup>  
 1805

**Background and Intent:** This requirement is intended to provide fellows with some control over their schedules by providing the flexibility to voluntarily remain beyond the scheduled responsibilities under the circumstances described above. It is important to note that a fellow may remain to attend a conference, or return for a conference later in the day, only if the decision is made voluntarily. Fellows must not be required to stay. Programs allowing fellows to remain or return beyond the scheduled work and clinical education period must ensure that the decision to remain is initiated by the fellow and that fellows are not coerced. This additional time must be counted toward the 80-hour maximum weekly limit.

- 1806  
 1807 VI.F.4.c) A Review Committee may grant rotation-specific exceptions  
 1808 for up to 10 percent or a maximum of 88 clinical and  
 1809 educational work hours to individual programs based on a  
 1810 sound educational rationale.

- 1811  
 1812 VI.F.4.c).(1) The Institutional Review Committee will not consider  
 1813 requests for exceptions to the 80-hour limit to the fellows'  
 1814 work week.

1815  
 1816 VI.F.5. Moonlighting

- 1817  
 1818 VI.F.5.a) Moonlighting must not interfere with the ability of the fellow  
 1819 to achieve the goals and objectives of the educational  
 1820 program, and must not interfere with the fellow's fitness for  
 1821 work nor compromise patient safety. <sup>(Core)</sup>  
 1822

- 1823 VI.F.5.b) Time spent by fellows in internal and external moonlighting  
 1824 (as defined in the ACGME Glossary of Terms) must be  
 1825 counted toward the 80-hour maximum weekly limit. <sup>(Core)</sup>  
 1826

**Background and Intent:** For additional clarification of the expectations related to moonlighting, please refer to the Common Program Requirement FAQs (available at <http://www.acgme.org/What-We-Do/Accreditation/Common-Program-Requirements>).

- 1827  
 1828 VI.F.6. In-House Night Float  
 1829  
 1830 Night float must occur within the context of the 80-hour and one-  
 1831 day-off-in-seven requirements. <sup>(Core)</sup>  
 1832

**Background and Intent:** The requirement for no more than six consecutive nights of night float was removed to provide programs with increased flexibility in scheduling.

- 1833  
 1834 VI.F.7. Maximum In-House On-Call Frequency  
 1835

1836		<b>Fellows must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period).</b> <small>(Core)</small>
1837		
1838		
1839	<b>VI.F.8.</b>	<b>At-Home Call</b>
1840		
1841	<b>VI.F.8.a)</b>	<b>Time spent on patient care activities by fellows on at-home call must count toward the 80-hour maximum weekly limit. The frequency of at-home call is not subject to the every-third-night limitation, but must satisfy the requirement for one day in seven free of clinical work and education, when averaged over four weeks.</b> <small>(Core)</small>

1844		
1845		
1846		
1847		
1848	<b>VI.F.8.a).(1)</b>	<b>At-home call must not be so frequent or taxing as to preclude rest or reasonable personal time for each fellow.</b> <small>(Core)</small>
1849		
1850		
1851		
1852	<b>VI.F.8.b)</b>	<b>Fellows are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit.</b> <small>(Detail)</small>
1853		
1854		
1855		
1856		

**Background and Intent:** This requirement has been modified to specify that clinical work done from home when a fellow is taking at-home call must count toward the 80-hour maximum weekly limit. This change acknowledges the often significant amount of time fellows devote to clinical activities when taking at-home call, and ensures that taking at-home call does not result in fellows routinely working more than 80 hours per week. At-home call activities that must be counted include responding to phone calls and other forms of communication, as well as documentation, such as entering notes in an electronic health record. Activities such as reading about the next day’s case, studying, or research activities do not count toward the 80-hour weekly limit.

**In their evaluation of fellowship programs, Review Committees will look at the overall impact of at-home call on fellow rest and personal time.**
